## Business Analytics BMABUA

Analytical thinking is a part of decision making in business. Spreadsheets and business software have supported business decision making, but due to the complexity of the business and the availability of large data sets, business analytics has emerged as a field to identify patterns and metrics to assist business decisions and draw better conclusions.

You will learn complex concepts, skills and application of conceptual and technical knowledge for a career in:

- data project management
- data management
- data analysis and visualisation
- data insight analysis

The major in Business Analytics will cover key areas such as:

- data structures and modelling
- automated transactions and decision making using machine learning
- predictions using data
- data visualisation
- data project management

You'll also learn to develop and deliver a business data analysis project.

You will graduate with contemporary knowledge and skills of data analytics and an understanding of how to apply these skills in the context of data analytics.

UNIT CODE	UNIT TITLE	UNIT TYPE	SEM	CREDIT POINTS	CAMPUS	PRE-REQUISITES
BCO2006	Data Management Principles and Visualisation	Major	1B3, 2B4	12	CC	BCO1102
				?	FP	

This information is current at the publication date November 11, 2023. It is provided as information only and does not form part of a contract between any person and Victoria University
