

# Bachelor of Health Science

Course code: HBHL

## Course Requirements

To attain the Bachelor of Health Science, students will be required to complete 288 credit points consisting of:

- 96 credit points of First Year Core studies;
- 96 credit points of Public Health Major studies

Plus One of the following:

Option A:

- 96 credit points of Indigenous Health Major studies;

Or

Option B:

- 96 credit points of Minor studies (Two Minor sets in total).

Students that complete the first year of College Core studies can elect to graduate with the following (Option A) double Major:

- Majors in Public Health and Indigenous Health.

Students that complete the first year of College Core studies and a single Major in Public Health, can elect to graduate with (Option B) two minors to complement their Major, as follows:

- Indigenous Health (HMIIND);
- Health (Sport Science Minor) (SMIHEA);
- Health and Nutrition (HMIHNU), and;
- Bioscience (HMIBIO).

Students are required to enrol in all units for semester 1 and 2, and are not permitted to enrol in more than 48 credit points per semester as a full-time load.

## Credit Points

A credit point is used to measure the study load for a unit. A standard unit consists of 12 credit points, with each completed unit's credit points adding up to meet your required total of credit points to complete your course.

## Prerequisites

A number of units within the degree have 'prerequisites'. These prerequisites must be met before enrolment in the unit is permitted. Generally these prerequisites require the successful completion of a unit or units taken at an earlier stage in the course. Students should pay particular attention to these prerequisite requirements as failure to meet these can seriously hinder progression through the course.

### Core

A unit that must be completed

### Major

The subject area that you will specialise in during your degree, comprising a set of units within a particular discipline. For example, a business degree has majors such as marketing and banking & finance. At Victoria University a major is made up of 96 credit points (equivalent to 8 units)

### Minor

A subject area that is the second focus of a degree, comprising a smaller set of units than a major within a particular discipline. At Victoria University a minor is made up of 48 credit points (equivalent to 4 units).

## Majors

### Public Health - HMAPBH

The Public Health Major provides students with knowledge and skills in Public Health and Health Promotion. The major develops the student's knowledge base in Public Health and Health Promotion and focuses on the application of knowledge, policy, and research in improving the health of populations. Students completing this major will have an understanding and perspective on how to address contemporary health problems related to critical social and behavioural factors that influence health outcomes.

Students choosing the minor, HMAPBH Public Health, may be required to obtain a 'Working With Children Check' prior to undertaking the unit, HHB2402 Health Program Planning and Evaluation.

## Majors

### Indigenous Health - HMAIND

The Indigenous Health Major builds on the Indigenous Health Minor to provide students with a complete context and understanding of the cultural and historical factors that need to be considered when developing and implementing health programs for Australian Aboriginal populations.

Students explore, analyse and deconstruct disciplinary and lived perspectives, impacts and outcomes for Australian Aboriginal individuals and communities in the 21st Century. Topics that are explored include history, human rights, traditional owners, sovereignty, governance and societal structures, and colonial systems of power through an inter-disciplinary unit set, and how these influence and impact the health outcomes of Australian Aboriginal populations and communities. In addition to this students may explore contemporary health and community interventions used by Aboriginal organisations and communities and their relationship to the conventional western medicine construct and mainstream service provision.

A group research project will be presented in relation to Australian Aboriginal health, representing discipline and multi-disciplinary approaches through detailed action plans.

### Health (Sport Science Minor) - SMIHEA

Being healthy is important to all of us. Our health is influenced by a range of individual and behavioural factors as well as physical and social environments. Studying health will help you to develop skills and knowledge to make decisions about your own health, inform others, and also to recognise the importance of health in society. You will also become aware of how to support and promote healthy behaviours of others. The minor in Health provides you with an understanding of the individual and societal influences on health and human development. You will study areas covering adolescent health, sexuality and relationships, social bases of health and health promotion and policy.
