

VU POLYTECHNIC HANDBOOK 2021

DISCLAIMER

The information contained in Victoria University's 2021 VU Polytechnic was current at 04 December 2020

In today's university environment, changes to courses occur far more frequently than in the past. For current information on Victoria University's courses, readers are advised to access the University's online courses database at www.vu.edu.au/courses

If you have difficulty in accessing this material electronically, please phone (03)9919 6100 for assistance.

IMPORTANT INFORMATION

The course details in this handbook (Plus details of all other Victoria University courses) can also be searched on the University's online courses database at www.vu.edu.au/courses

This handbook can be downloaded as a pdf file from the Victoria University website at www.vu.edu.au/courses/course-handbooks-and-guides

HOW TO USE THIS HANDBOOK

Victoria University's 2021 VU Polytechnic Handbook is designed to provide students with detailed information on course structures and unit details for undergraduate and postgraduate courses offered by the college in 2021.

The definition of fields used in course tables throughout this handbook include:

Credit Point – the number of credit points a unit contributes towards the total points needed to complete a course.

PLEASE NOTE

This handbook provides a guide to courses available within Victoria University's VU Polytechnic in 2021.

Although all attempts have been made to make the information as accurate as possible, students should check with the college that the information is accurate when planning their courses.

NOTE: Prospective students are strongly advised to search the University's online courses database at www.vu.edu.au/courses for the most up-to-date list of courses.

This handbook includes descriptions of courses that may later be altered or include courses that may not be offered due to unforeseen circumstances, such as insufficient enrolments or changes in teaching personnel. The fact that details of a course are included in this handbook can in no way be taken as creating an obligation on the part of the University to teach it in any given year or in the manner described. The University reserves the right to discontinue or vary courses at any time without notice.

OTHER INFORMATION

Information about course fees, articulation and credit transfer, recognition of prior learning, admission and enrolment procedures, examinations, and services available to students can be accessed on the University's website or by contacting the University directly.

UNITS

Below are details of courses offered by the VU Polytechnic in 2021.

This information is also available online on the University's searchable courses database at www.vu.edu.au/courses

NOTE: Courses available to international students are marked with the (I) symbol

Diploma of Health Coaching

Course Code: 10237NAT

Campus: Online.

About this course: Develop the skills and knowledge to work confidently in the health and wellbeing sector as a Health Coach, providing healthy eating, exercise and lifestyle management to individuals, groups or in the workplace. Victoria University Polytechnic's Diploma of Health Coaching is designed to provide you with the capabilities to deliver life coaching advice and practice, nutrition and fitness plans as well as develop your business management skills. This qualification is ideal for those currently working in the sports or health industry who are looking to expand their skillset or for those looking to enter the sector. You will gain confidence and knowledge in:

- evaluating client health information;
- safe exercise and movement;
- nutrition and diet;
- behaviour change assessment;
- coaching health and wellbeing goals;
- legal and ethical compliance, and;
- work priorities and professional development.

You will have access to Victoria University's \$68 million sport precinct that includes an aquatic centre, commercial gym with the latest equipment and group exercise spaces. You will also gain hands-on work experience in a supported learning environment at our custom designed teaching gym on campus.

Course Objectives: The role of a Health Coach requires the application of advanced and specific skills and knowledge in the areas of health assessment, life coaching methodology and practice, nutrition, fitness, self and business management and to have a broad range of cognitive, technical and communication skills to select and apply methods and technologies to:

- analyse information to complete a range of activities, including health assessment of individuals, identification of most appropriate support services or facilities available and referral of individuals to the relevant services
- provide and transmit solutions to sometimes complex problems, applying life coaching skills to work with individuals to plan a better approach to their overall health and to address specific challenges in a realistic manner, and running their own business
- transmit information and skills to others, communicating effectively with a range of individuals, groups, clients, service providers or other practitioners in order to achieve the best possible outcome for clients when providing health coaching services

Graduates at this level will apply knowledge and skills to demonstrate autonomy, judgement and defined responsibility in known or changing contexts and within broad but established parameters. They will be able to demonstrate a broad skill set, enabling them to work as Health Coaches, who may run community or care institutions based programs, deliver workplace health programs, counsel individuals to achieve their health goals, or may be active on social media platforms (for example bloggers), or a combination of these. They are promoting healthy eating, exercise and lifestyle on a broader level.

Careers: Possible career opportunities emerging from the completion of 10237NAT Diploma of Health Coaching include:

- Health Coach.

Course Duration: 1 year

Admission Requirements: Applicants must: - be over 18 years of age, and; - have a level of language, literacy and numeracy skills likely to facilitate successful completion of the course - sufficient to interpret complex documents and guidelines, liaise effectively with a range of health care professionals. Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

Selection Processes: Other

COURSE STRUCTURE

To be awarded the 10237NAT Diploma of Health Coaching, a student must successfully complete a total of nine (9) units of competency, comprising of:

- nine (9) core units.

CORE UNITS

BSBWOR501	Manage personal work priorities and professional development	60
CHCLEG003	Manage legal and ethical compliance	80
CHCPOL003	Research and apply evidence to practice	65
CHCPRP005	Engage with health professionals and the health system	40
DHCCCG503	Coach clients to achieve health and wellbeing goals	100
DHCCHI501	Collect and evaluate client health information	50
DHCSEM502	Promote safe exercise and movement	60
HLTHPS010	Interpret and use information about nutrition and diet	50
HLTPOP014	Assess readiness for and effect behaviour change	50

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited

towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate IV in Clinical Classification

Course Code:2227 4VIC

Campus:Online.

About this course:Get set to launch your career as a clinical coder in the health industry with this interactive online course. This certificate equips you with the knowledge required to apply data coding to medical information. You will develop skills to translate descriptions of medical diagnoses and procedures into codes, which are recorded as health data. This requires a good understanding of medical terminology, but doesn't require hands-on contact with patients. Clinical coders work with hospitals, government organisations and other medical institutes to code medical records. They ensure coded data meets national and legal reporting requirements. The data you create will contribute to:

- medical research;
- health service planning;
- monitoring patient safety, and;
- hospital funding models.

This course is offered fully online through our award-winning blended learning model. You will be guided through a series of eLearning activities and attend weekly webinars to consolidate your learning. Assessments are conducted through a combination of webinar and discussion board attendance and online tests.

Course Objectives:The Certificate IV in Clinical Classification develops the skills and knowledge to translate descriptions of medical diagnoses and procedures into codes, which are recorded as health data. Clinical coders are responsible for the coding of moderately complex medical records.

Careers:The career outcome from this course is a clinical coder.

Course Duration: 1 year

Admission Requirements:Applicants are best placed to successfully undertake this qualification if they have language, literacy and numeracy skills that align to Level 3 of the Australian Core Skills Framework (ACSF). Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

Selection Processes: OtherN/A

COURSE STRUCTURE

To be awarded 2227 4VIC Certificate IV in Clinical Classification, a student must successfully complete a total of twelve (12) units of competency.

CORE UNITS

BSBMED301B	Interpret and apply medical terminology appropriately	60
BSBMED305B	Apply the principles of confidentiality, privacy and security within the medical environment	20
BSBWHS201A	Contribute to health and safety of self and others	20

BSBWOR401A	Establish effective workplace relationships	50
BSBWOR501B	Manage personal work priorities and professional development	60
HLTHIR402D	Contribute to organisational effectiveness in the health industry	30
VU21 652	Apply knowledge of the health system for clinical coding purposes	30
VU21 653	Prepare for clinical coding	40
VU21 654	Analyse clinical documentation	40
VU21 655	Abstract clinical information to support clinical coding	60
VU21 656	Assign codes to an episode of care	50
VU21 657	Participate in clinical coding audits	50

Advanced Diploma of Legal Practice

Course Code:2227 6VIC

Campus:Footscray Nicholson.

About this course:Take the next step in your career as a paraprofessional in the legal practice industry with an Advanced Diploma of Legal Practice at Victoria University Polytechnic. This course will provide you with extensive training in the workings of today's professional legal office. You will gain essential skills for work as a legal paraprofessional, including how to:

- provide advice on legal services to potential clients;
- practise in a legal area of your interest;
- manage legal practice operation resources;
- interpret legislation, and;
- produce complex legal documents.

You will also develop a basic understanding in the following areas:

- family law;
- property law;
- contract law;
- commercial law;
- criminal law, and;
- conveyancing.

Our experienced teachers will ensure you are job-ready by the time you graduate. You could also go on to further study, as this course can be the first step towards becoming a lawyer.

Course Objectives: 22276VIC Advanced Diploma of Legal Practice qualification learning outcomes are as follows: Knowledge Graduates of an Advanced Diploma will have specialised and integrated technical and theoretical knowledge with depth within one or more fields of work and learning, through a demonstrated in-depth understanding of specialised legal knowledge within a range of areas of legislation: including law of torts, contracts, property, civil and criminal procedures, evidence, privacy, and/or administration, cyber law, consumer protection, family, and

employment, in order to work within the operational and/or assistant level of organisations in the legal practice environment. Skills Graduates at this level will have a broad range of cognitive, technical and communication skills to select and apply methods and technologies to:

- demonstrate a command of wide-ranging, highly specialised technical, creative or conceptual skills in the application of legal research techniques to identify legal information from a range of sources;
- demonstrate accountability for personal outputs within broad parameters in developing own action/work plan according to own responsibilities and the legal project brief, and;
- demonstrate accountability for personal and group outcomes within broad parameters in coordinating and facilitating team work.

Application of knowledge and skills Graduates at this level will apply knowledge and skills to demonstrate autonomy, judgment and defined responsibility to:

- analyse, diagnose, design and execute judgments across a broad range of technical or management functions in the application of relevant legislation in a legal practice environment, and;
- generate ideas through the analysis and review of information and concepts at an abstract level of a range of information sources to draft complex legal documents.

Careers: Possible career opportunities emerging from the completion of 22276VIC Advanced Diploma of Legal Practice include:

- Law Clerk (litigation debt recovery, property, mortgage recovery);
- Legal Probate Clerk;
- Conveyance Clerk;
- Corporate Law Clerk;
- Mortgage Clerk;
- Legal Clerk;
- Family Law Assistant;
- Probate/Deceased Estate Law Clerk;
- Compliance Officer;
- Assistant to Parliamentary Counsel;
- working in Victoria Police;
- Land Title Officer;
- Legal Assistant/Secretary;
- Legal Research Assistant;
- Trainee Court Registrar, and;
- Paralegal.

Course Duration: 1.5 years

Admission Requirements: Applicants are best placed to successfully undertake this qualification if they have language, literacy and numeracy skills that align to Level 4 of the Australian Core Skills Framework (ACSF). Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

Selection Processes: OtherN/A

COURSE STRUCTURE

To be awarded 22276VIC Advanced Diploma of Legal Practice, a student must successfully complete twenty-four (24) units of competency, comprising of:

- thirteen (13) core units, and;
- eleven (11) elective units, of which:

four (4) units must be selected from Group A; seven (7) may be selected from Group A or Group B of which: two (2) elective units may be selected and substituted for Group B units, from any currently endorsed training package or accredited course first packaged at AQF Level 4, 5 or 6.

CORE UNITS

BSBWHS301A	Maintain workplace safety	40
VU21631	Investigate and apply legal process	50
VU21632	Research and evaluate legal research method	50
VU21633	Analyse and apply law of contract	50
VU21634	Analyse and apply law of torts	50
VU21635	Define and evaluate law of evidence	50
VU21636	Determine appropriate aspects of commercial law	50
VU21637	Employ property law principles and concepts	50
VU21638	Apply conveyancing process	50
VU21639	Explore and apply wills, probate and administration procedures	50
VU21640	Analyse and apply civil procedure	50
VU21641	Analyse and evaluate concepts and principles of criminal law	50
VU21642	Practise in a legal environment	70

ELECTIVE UNITS

Group A

VU21644	Examine and apply land contract law	50

VU21649	Define and research the application of corporations law	50
VU21651	Evaluate the concepts and principles of family law	50

Group B

BSBCUS301B	Deliver and monitor a service to customers	35
------------	--	----

BSBITU303A	Design and produce text documents	90
BSBITU304A	Produce spreadsheets	35
BSBITU307A	Develop keyboarding speed and accuracy	50
BSBLEG418A	Produce complex legal documents	80
BSBWRT401A	Write complex documents	50
Imported		
BSBLEG403	Maintain trust accounts	50

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate I in Transition Education

Course Code:22301VIC

Campus:Footscray Nicholson, St Albans.

About this course:This course is designed for young people with special learning needs. You will gain independence, community awareness, and an understanding of other courses you can go on to study. You will also be more prepared to enter the workforce. This course will support your special needs, with a range of learning activities to develop valuable learning and social skills. You will explore:

- independent living;
- personal development;
- vocational and employability skills;
- community involvement;
- volunteering effectively;
- basic literacy and numeracy, and;
- use of everyday technology.

We will help you find the best option for you after leaving school, whether that is employment, volunteer work or further study. When you finish this course, you will have improved skills and confidence for your next step.

Course Objectives:The outcomes of the 22301VIC Certificate I in Transition Education are consistent with Australian Qualifications Framework (AQF) Level 1 and are listed below. Developing knowledge of strategies to:

- identify personal goals for community participation or further learning;
- develop independent living skills to participate in activities in the community;
- identify information and resources about everyday activities such as travel, health and participation in recreational activities, and;
- rights and responsibilities to participate in the community.

Developing skills to:

- develop a personal learning plan to explore different options;

- access information and resources to support independent living skills and activities;
- apply strategies for self-development including participation in interpersonal relationships, and;
- use technology to access information and resources to support independent living skills and activities.

Application of skills and knowledge in highly structured, familiar and personally relevant contexts.

Careers:There are no specific career outcomes from completing 22301VIC Certificate I in Transition Education. The focus of the curriculum is to enable:

- entry level employment, and;
- further study to gain employment.

Course Duration: 1 year

Admission Requirements:Applicants must be recognised as having an intellectual disability or learning difficulty. Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

Selection Processes: OtherN/A

COURSE STRUCTURE

To be awarded 22301VIC Certificate I in Transition Education, a student must successfully complete a total of ten (10) units of competency, comprising of: six (6) core units, and; four (4) elective units, of which: elective units may be selected from the 22301VIC Certificate I in Transition Education qualification; up to two (2) elective units may be selected from units first packaged in Certificate I qualifications in endorsed training packages or accredited courses. Electives must be industry relevant as well as be approved by the Polytechnic.

CORE UNITS:

VU21776	Develop and document a learning plan with support	150
VU21777	Enhance self development	150
VU21778	Participate in travel activities	150
VU21779	Investigate future options for further training, work or community activities	150
VU21780	Participate in the community	150
VU21781	Use technology for a range of purposes	150

ELECTIVE UNITS:

CHCVOL201B	Be an effective volunteer	25
VU21434	Read and write short basic messages and forms	70
VU21451	Participate in short simple exchanges	80

VU21785	Participate in recreational activities	50
VU21786	Participate in creative activities	50
VU21787	Apply communication for a range of purposes	50
VU21788	Apply numeracy for a range of purposes	50

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate I in Work Education

Course Code:22302VIC

Campus:Footscray Park, Footscray Nicholson, St Albans.

About this course:This course is designed for young people with additional learning needs. You will gain independence, community awareness and an understanding of other courses you can go on to study. You will also improve your employment prospects and be more prepared to enter the workforce. This course will provide you with an understanding of basic workplace expectations. The staff at the Polytechnic will support you to gain skills in:

- job seeking and employability;
- personal management;
- teamwork and communication;
- basic literacy and numeracy, and;
- use of everyday technology.

You will learn through a combination of classroom learning, supported practical placement and vocational electives.

Course Objectives:The outcomes of the 22302VIC Certificate I in Work Education are consistent with the Australian Qualifications Framework (AQF) Level 1 and are listed below. Developing knowledge of:

- work related WHS procedures and requirements;
- sources of information on a range of industries;
- sources of information to identify the job seeking process and employment opportunities;
- strategies for setting work related goals, and;
- education/training requirements for specific jobs.

Developing skills to:

- develop a personal vocational plan to explore different options;
- access information and resources to support achievement of vocational goals;
- apply strategies for self-development to support workplace participation, and;
- use technology to access information and resources to support vocational goals.

Application of skills and knowledge in highly structured, personally relevant and supported contexts.

Careers:- entry level employment, and;- further study to gain employment.

Course Duration: 1 year

Admission Requirements:Applicants must be recognised as having an intellectual disability or learning difficulty. Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

Selection Processes: Interview, OtherN/A

COURSE STRUCTURE

To be awarded the 22302VIC Certificate I in Work Education, a student must successfully complete a total of ten (10) units of competency, comprising of:

- seven (7) core units, and;
- three (3) electives which may be selected from:
- units listed in the 22302VIC Certificate I in Work Education qualification;
- units first packaged in Certificate I qualifications in endorsed training packages or accredited curriculum, and/or;
- units first packaged in a 'Course in..' in accredited curriculum.

CORE UNITS

BSBWHS201	Contribute to health and safety of self and others	20
VU21664	Prepare for employment	30
VU21771	Develop an individual vocational plan with support	100
VU21772	Develop personal management skills for work	80
VU21773	Participate in vocational activities	400
VU21774	Participate in practical placement with support	300
VU21775	Develop interpersonal communication skills for the workplace	30

ELECTIVE UNITS

ICTICT103	Use, communicate and search securely on the internet	50
SISXCA1001	Provide equipment for activities	10
SISXCA1002	Assist with activity sessions	15
TLIG1001A	Work effectively with others	40
VU21307	Work with numbers and money in simple familiar situations	30
VU21785	Participate in recreational activities	50

Certificate II in Plumbing (Pre-Apprenticeship)

Course Code:22304VIC

Campus:Werribee, Sunshine.

About this course: Lay the groundwork for an apprenticeship in the plumbing industry with a Certificate II in Plumbing (Pre-apprenticeship) at the Polytechnic. This practical course will ensure you are prepared to enter the trades industry by introducing you to a range of foundational plumbing skills and knowledge including:

- working safely as part of a team;
- measuring and calculating;
- using industry terminology to communicate effectively;
- reading plans and specifications;
- using plumbing tools, equipment and materials;
- producing simple technical drawings;
- using basic welding equipment, and;
- using plumbing pipes, fittings and fixtures to simulate plumbing installations.

When you graduate from this course, you'll be on your way towards a plumbing apprenticeship.

Course Objectives: The Certificate II in Plumbing (Pre-apprenticeship) will prepare graduates with the skills and knowledge for entry into an apprenticeship (Certificate III in Plumbing) in one of the various sectors of the plumbing industry. This qualification has a range of units that introduce the learner to basic plumbing skills and knowledge including:

- working safely as part of a team;
- measuring and calculating;
- using basic industry terminology to communicate effectively;
- reading plans and specifications;
- selecting and using plumbing tools, equipment and materials;
- producing simple technical drawings;
- using basic welding equipment, and;
- using plumbing pipes, fittings and fixtures to simulate plumbing installations.

This qualification is not linked to any occupational regulatory outcome. Vocational Education Training in Schools (VETiS) This qualification forms part of the credit suite specified by the Victorian Curriculum and Assessment Authority (VCAA) and may contribute towards the satisfactory completion of the Victoria Certificate of Education (VCE) or the Victoria Certificate of Applied Learning (VCAL).

Careers: The 22304VIC Certificate II in Plumbing (Pre-apprenticeship) will prepare graduates with the skills and knowledge for entry into an apprenticeship (CPC32413 Certificate III in Plumbing) in one (1) of the various sectors of the plumbing industry.

Course Duration: 3 months

Admission Requirements: It is recommended that applicants have basic communication, literacy and numeracy skills that are sufficiently well developed for them to participate in the training. Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs. VETiS: The literacy and numeracy levels of applicants will be assessed through consultation with the relevant secondary school.

Selection Processes: Other/Not Applicable.

COURSE STRUCTURE

To be awarded the 22304VIC Certificate II in Plumbing (Pre-Apprenticeship), a student must successfully complete all nineteen (19) core units.

CORE UNITS

BSBWRT301	Write simple documents	30
CPCCCM1015A	Carry out measurements and calculations	20
CPCCCM2001A	Read and interpret plans and specifications	36
CPCCOHS1001A	Work safely in the construction industry	6
CPCCOHS2001A	Apply OHS requirements, policies and procedures in the construction industry	20
CPCPCM2039A	Carry out interactive workplace communication	10
CUVACD303A	Produce technical drawings	50
HLTAID002	Provide basic emergency life support	12
VU21789	Apply basic sheet metal practices	50
VU21790	Cut and penetrate building materials and structures	30
VU21791	Fabricate simple plumbing pipe systems	30
VU21792	Identify career pathways in the plumbing industry	30
VU21793	Perform basic oxy-acetylene welding and cutting	20
VU21794	Prepare to work in the plumbing industry	20
VU21795	Use and apply basic levelling equipment for plumbing	8
VU21796	Use basic electric welding equipment and techniques	20
VU21797	Use basic plumbing hand tools	50
VU21798	Use basic power tools	20
VU21799	Use plumbing pipes, fittings and fixtures to simulate plumbing installations	30

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate IV in Tertiary Preparation

Course Code: 22313VIC

Campus: Footscray Park.

About this course: 22313VIC Certificate IV in Tertiary Preparation provides the skills and knowledge required for a successful transition into higher vocational education and training pathways and/or higher education. Designed to cater to the needs of two specific cohorts, this course will:

- develop academic writing, problem solving, planning and organising skills, technology and research skills, collaborative learning and team work skills of the general student population,

All skills are developed with an emphasis on their application in a higher education or vocational education context.

Course Objectives: The purpose of the Certificate IV in Tertiary Preparation is to assist entry to VET and Higher Education courses across a range of disciplines. The term 'Tertiary Studies' as used within the context of this course refers to both higher education undergraduate study and higher level vocational (VET) courses of study. Such courses of study have their own entry requirements and this course is not intended to either replace those requirements or to guarantee access to individual courses of study. However, in undertaking this course students will be better prepared for future training and education options.

Careers: Completion of the 22313VIC Certificate IV in Tertiary Preparation, enables a number of pathway outcomes including:

- vocational study at the same or higher AQF level, and;
- higher education undergraduate programs.

Course Duration: 0.5 years

Admission Requirements: Applicants are best placed to successfully undertake this qualification if they have language, literacy and numeracy skills that align to Level 3 of the Australian Core Skills Framework (ACSF). Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

Selection Processes: OtherN/A

COURSE STRUCTURE

To be awarded 22313VIC Certificate IV in Tertiary Preparation, a student must successfully complete a total of ten (10) units of competency, comprising of:

- five (5) core units, and;
- five (5) elective units of which:

units may be selected from the 22313VIC Certificate IV in Tertiary Preparation qualification and/or; units first packaged in any other endorsed training package or other accredited curricula. Note: units imported from endorsed training packages or other curricula must:

- reflect the needs of the learner;
- reflect the integrity of the AQF level of this qualification, and;
- support the intent of this qualification.

CORE UNITS

VU21864	Set study goals and plan education pathway	50
VU21865	Prepare for tertiary reading and writing	80
VU21866	Communicate verbally in a further study context	40
VU21867	Participate in collaborative learning	30
VU21868	Conduct online research for further study	40

ELECTIVE UNITS

General

BSBCMM401	Make a presentation	30
BSBITU304	Produce spreadsheets	35
BSBITU404	Produce complex desktop published documents	50
VU20746	Apply essential further study skills	90
VU21058	Use a range of techniques to solve mathematical problems	110

Certificate IV in Liberal Arts

Course Code: 22317VIC

Campus: Footscray Nicholson.

About this course: This course introduces you to university study in arts and social sciences, and provides a pathway to further study. You will develop skills in the following areas:

- complex writing;
- problem solving;
- cultural analysis;
- planning and organising activities;
- research;
- communication and presentation;
- social inquiry, and;
- information technology.

Successful completion will give you credits towards a Bachelor of Arts or a Bachelor of Education Studies, where you can specialise in your area of interest and benefit from our work-placement opportunities.

Course Objectives: 22317VIC Certificate IV in Liberal Arts provides an alternative pathway to access further study by developing study skills and knowledge for effective participation in tertiary learning environments. The aim of the course is to provide academic support to students interested in the arts, humanities, education and social sciences by enabling development of critical skills and knowledge to progress into higher education and/or to extend vocational skills and training.

Careers: Completion of the 22317VIC Certificate IV in Liberal Arts, enables a number of pathway outcomes including:

- vocational study at the same or higher AQF level, and;
- higher education undergraduate programs.

Course Duration: 1 year

Admission Requirements: Applicants are best placed to successfully undertake this qualification if they have language, literacy and numeracy skills that align to Level 3 of the Australian Core Skills Framework (ACSF). Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

Selection Processes: OtherN/A

COURSE STRUCTURE

To be awarded the 22317VIC Certificate IV in Liberal Arts, a student must successfully complete a total of seven (7) units comprising of:

- two (2) core units, and;
- five (5) electives, which may be selected from:

units listed in the 22317VIC Certificate IV in Liberal Art qualification, and/or; units first packaged in Certificate IV qualifications in the source training package or accredited curriculum. Imported units must support the outcomes of this qualification as well as be approved by the Polytechnic.

CORE UNITS

VU21881 Apply essential further study skills 90

VU21882 Research fields of study and enquiry 40

ELECTIVE UNITS

VU21883 Examine approaches to citizenship and public life 90

VU21884 Analyse stories/narratives within cultures 90

VU21885 Analyse human transformations of nature 90

VU21886 Examine approaches to economy and society 90

VU21887 Analyse texts in their cultural context 90

Certificate IV in Cyber Security

Course Code:22334VIC

Campus:Footscray Nicholson, St Albans, Sunshine.

About this course:Develop the knowledge and skills to work in one of the fastest growing sectors, the cyber security and IT industry. You will develop skills that involve a blend of problem solving, critical thinking, collaboration, data analytics, penetration testing, cloud-based networking, scripting, privacy and ethics. With exposure to leading industry platforms such as Amazon Web Services, Splunk and Cisco, your training will ensure you gain the skills for the technologies industry demand. Upon completion of this course you will have gained knowledge and skills in:

- monitoring the risk of cyber security attacks;
- implementing appropriate software;
- using a range of tools and procedures to mitigate cyber security threats, and;

- protecting an organisation from insider security breaches and developing systems to minimise network vulnerabilities and risks.

Unique to the Certificate IV in Cyber Security are connections to industry that are embedded early on in your training. You will have access to expert panel discussions, inspirational story-telling and industry events. With access to our Cybersecurity Training Centre, you will have the opportunity during your course to train in a simulated working environment for collaboration and practical experience, forming teams to produce solutions to industry standard problems.

Course Objectives: This course is aligned with Level 4 of the Australian Qualifications Framework (AQF) in that graduates will have:

- cognitive skills to identify and analyse risk of security attacks and recommend appropriate strategies to mitigate the attacks;
- cognitive, technical and communication skills to implement and use a range of tools and procedures to mitigate cyber security threats in a wide variety of contexts;
- specialist technical skills to apply solutions to a defined range of unpredictable problems by methodically verifying compliance of all aspects associated with network security;
- broad knowledge base of relevant Australian standards, codes of practice and industry guidelines on network security;
- ability to evaluate information from a variety of sources and analyse the data gathered on the network security to assess compliance, and;
- ability to take responsibility for own outputs and contributions as part of a team to maintaining an organisation's cyber security system and incident response plan.

The Volume of Learning for the Certificate IV in Cyber Security is typically 0.5 - 2 years. This incorporates structured training delivery and opportunities for practice and reinforcement of skills including, self-directed study, research, project work and written assignments.

Careers:Possible career opportunities emerging from the completion of 22334VIC Certificate IV in Cyber Security, include: IT Administrator; Cyber Security Practitioner; IT Security Analyst, and;

- Junior Security IT Analyst.

Course Duration: 1 year

Admission Requirements:Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

COURSE STRUCTURE

To be awarded the 22334VIC Certificate IV in Cyber Security, a student must successfully complete a total of sixteen (16) units of competency, comprising of:

- ten (10) core units, and;
- six (6) elective units.

Electives must be industry relevant as well as be approved by the Polytechnic.

CORE UNITS		
BSBRES401	Analyse and present research information	40
BSBWHS401	Implement and monitor WHS policies, procedures and programs to meet legislative requirements	50
ICTICT418	Contribute to copyright, ethics and privacy in an ICT environment	40
ICTPRG407	Write script for software applications	40
RIICOM301D	Communicate information	30
VU21988	Utilise basic network concepts and protocols required in cyber security	80
VU21989	Test concepts and procedures for cyber security	60
VU21990	Recognise the need for cyber security in an organisation	60
VU21991	Implement network security infrastructure for an organisation	80
VU21992	Develop a cyber security industry project	120
ELECTIVE UNITS		
ICTPRG405	Automate processes	40
VU21993	Secure a networked personal computer	60
VU21994	Perform basic cyber security data analysis	20
VU21995	Manage the security infrastructure for the organisation	80
VU21996	Evaluate and test an incident response plan for an enterprise	40
VU21997	Expose website security vulnerabilities	40

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate II in Building and Construction Pre-apprenticeship

Course Code:22338VIC

Campus:Industry, Werribee, Sunshine.

About this course:Lay the foundation for a career in the building industry with a Certificate II in Building and Construction Pre-apprenticeship at the Polytechnic. Increase your chances of getting an apprenticeship by developing basic skills and knowledge in bricklaying and carpentry. This course will ensure you are prepared to work in labouring roles in the construction industry with studies in:

- erect and safely use working platforms;

- apply basic bricklaying techniques;
- construct basic sub-floor;
- construct basic wall frames;
- install basic external cladding, and;
- interior fixings.

You will also gain valuable knowledge about construction industry policies and procedures. When you graduate from this course, you'll be on your way towards a bricklaying or carpentry apprenticeship. Students undertaking this course as part of Vocational Education and Training in Schools (VETiS), the duration of the course will be delivered over two years.

Course Objectives:This qualification has been developed to enable participants to achieve the underpinning skills, knowledge and ability to meet AQF Level 2 requirements and to provide them with a solid foundation from which to undertake future apprenticeship training at the Certificate III level. The course outcomes of the 22338VIC Certificate II in Building and Construction Pre-apprenticeship are consistent with the distinguishing features of the learning outcomes specified in the Australian Qualifications Framework. This qualification forms part of the credit suite specified by the Victorian Curriculum and Assessment Authority (VCAA) and may contribute towards the satisfactory completion of the Victoria Certificate of Education (VCE) or the Victoria Certificate of Applied Learning (VCAL).

Careers:Possible career opportunities emerging from the completion of 22338VIC Certificate II in Building and Construction Pre-apprenticeship include:

- carpentry apprentice, and;
- bricklaying apprentice.

Course Duration:3 months

Admission Requirements:Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs. VETiS: The literacy and numeracy levels of applicants will be assessed through consultation with the relevant secondary school.

COURSE STRUCTURE

To be awarded the 22338VIC Certificate II in Building and Construction Pre-apprenticeship, a student must successfully complete the following:

- ten (10) core units, and;
- all the elective units from one trade stream.

CORE UNITS

CPCCCM1012A	Work effectively and sustainably in the construction industry	20
CPCCCM1014A	Conduct workplace communication	20
CPCCCM1015A	Carry out measurements and calculations	20
CPCCCM2006	Apply basic levelling procedures	8
CPCCOHS2001A	Apply OHS requirements, policies and procedures in the	20

	construction industry	
CPCCWHS1001	Prepare to work safely in the construction industry	6
HLTAID002	Provide basic emergency life support	12
VU22014	Prepare for work in the building and construction industry	16
VU22015	Interpret and apply basic plans and drawings	25
VU22016	Erect and safely use working platforms	24
ELECTIVE UNITS		
Stream: Bricklaying		
VU22017	Identify and handle bricklaying tools and equipment	76
VU22018	Apply basic bricklaying techniques	126
VU22019	Apply brick veneer construction techniques	80
VU22020	Apply cavity brick construction techniques	80
VU22021	Apply masonry blockwork techniques	50
Stream: Carpentry		
VU22022	Identify and handle carpentry tools and equipment	100
VU22023	Perform basic setting out	24
VU22024	Construct basic sub-floor	48
VU22025	Construct basic wall frames	48
VU22026	Construct a basic roof frame	40
VU22027	Install basic external cladding	24
VU22028	Install basic window and door frames	24
VU22029	Install interior fixings	40
VU22030	Carry out basic demolition of timber structures	20
VU22031	Construct basic formwork for concreting	40

Graduate Certificate in Management

Course Code:22443VIC

Campus:Industry, Online.

About this course:Extend your skills and prepare for roles in complex senior and middle management. You will develop high-level skills to initiate and develop plans and lead teams towards operational success. On completion, you will be equipped with the confidence and tools to provide strategic direction in your field. Areas of study include:

- development, resourcing and integration of organisational strategic business planning;

- development and implementation of innovation;
- management of people, change, and organisational culture;
- management of risk and compliance;
- human resource practices;
- project management, and;
- leadership of strategic transformation.

Course Objectives: Graduates of the qualification will be able to meet the current and future industry requirements to effectively work within complex senior and middle management roles across a wide range of industry sectors with the skills and knowledge to oversee the: development, resourcing and integration of organisational strategic business planning; development and implementation of innovation and its corollary, management of people, change, and organisational culture; management of risk and compliance, and, depending on individual or combined management focus, a range of specific functions of marketing; human resource practices; global business opportunities; financial resources and/or sustainability.

Careers:Possible career opportunities emerging from the completion of 22443VIC Graduate Certificate in Management include:

- senior management positions;
- generalist managers;
- complex project managers, and;
- specialist managers in: human resources; finance; marketing; sustainability; compliance; risk management; global business.

Course Duration: 1 year

Admission Requirements:Applicants must have either a Diploma or Advanced Diploma qualification in a related field and three (3) years equivalent full-time work experience at a management level OR a Bachelor degree in a related field and one (1) year equivalent full-time work experience at a management level OR five (5) years equivalent full-time work experience at a management level. Applicants must have a demonstrated capacity in learning, reading, writing, oracy and numeracy skills that align to Level 4 of the Australian Core Skills Framework (ACSF). Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

COURSE STRUCTURE

To be awarded the 22443VIC Graduate Certificate in Management, a student must successfully complete a total of five (5) units of competency, comprising of:

- two (2) core units, and;
- three (3) elective units which may be selected from the units listed in the 22443VIC Graduate Certificate in Management qualification or any relevant units first packaged at AQF level 7 or 8 in the source training product from any currently endorsed training package or accredited course.

Electives must be industry relevant as well as be approved by the Polytechnic.

CORE UNITS

VU22225	Manage the development, implementation and review of strategic business plans	70
VU22226	Lead creative thinking and innovation practices in an organisational environment	70
ELECTIVE UNITS		
BSBLDR805	Lead and influence change	80
VU22227	Manage multiple projects	80
VU22228	Manage legal, regulatory and ethical compliance requirements in an organisational environment	60
VU22229	Develop and implement a risk management strategy	60
VU22230	Manage people in an organisational environment	60
VU22234	Oversee the management of financial resources in an organisation	60
VU22235	Develop and manage an integrated marketing strategy	60

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate II in Mumgu-dhal tyama-tyt

Course Code:22448VIC

Campus:Werribee.

About this course: Develop your personal strengths and explore Aboriginal and/or Torres Strait Islander culture, history and community with the Certificate II in Mumgu-dhal tyama-tyt at VU Polytechnic. You will develop language literacy and numeracy skills whilst strengthening your knowledge of Aboriginal culture and its influence on current events and attitudes. You will gain knowledge and skills in:

- health and safety of others;
- study skills and learning pathway development;
- investigating language acquisition;
- mentoring of Aboriginal and/or Torres Strait Islander community members;
- community project development;
- aboriginal and/or Torres Strait Islander history;
- aboriginal and/or Torres Strait Islander culture, and;
- effective communication tools.

Electives can be chosen from a variety of other courses on offer at VU Polytechnic to compliment your training and education.

Course Objectives: The outcomes of the 22448VIC Certificate II in Mumgu-dhal tyama-tyt meet AQF level 2 criteria through the:

- development of knowledge of Aboriginal and/or Torres Strait Islander history and culture and its influence on current events and attitudes, education and training options to support identified learning goals and occupational health and safety procedures
- development of skills to work with Aboriginal and/or Torres Strait Islander communities to develop as a mentor, contribute to community activities and plan for own further education and training to support personal goals
- application of knowledge and skills in supported contexts within the known environment of the local Aboriginal and/or Torres Strait Islander community.

Careers:This course is a foundation course with pathways into higher-level vocational education.

Course Duration: 0.5 years

Admission Requirements:Learners enrolling in the Certificate II in Mumgu-dhal tyama-tyt are best equipped to successfully undertake the qualification if they have minimum language, literacy and numeracy skills that align to Level 2 of the ACSF. Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

COURSE STRUCTURE

To be awarded the 22448VIC Certificate II in Mumgu-dhal tyama-tyt a student must successfully complete a total of thirteen (13) units of competency, comprising of:

- eight (8) core units, and;
- five (5) elective units, of which:

units may be selected from the 22448VIC Certificate II in Mumgu-dhal tyama-tyt qualification, Mumgu-dhal tyama-tyt Curriculum or any other accredited course or endorsed training package. The selection of elective units should be guided by the vocational, educational and/or personal development needs of learners and support the AQF level of the qualification as well as be approved by the Polytechnic.

CORE UNITS

BSBWHS201	Contribute to health and safety of self and others	20
VU22093	Develop study skills	10
VU22100	Investigate language acquisition	30
VU22110	Develop a learning pathway	15
VU22111	Work with Aboriginal and/or Torres Strait Islander community members to develop mentoring skills	25
VU22112	Support others to complete a small scale community project	70
VU22113	Investigate the influence of Aboriginal and/or Torres Strait Islander history	60

VU22114	Investigate and present on features of Aboriginal and/or Torres Strait Islander culture	20
ELECTIVE UNITS		
CUARES202	Source and use information relevant to own arts practice	30
ICTICT103	Use, communicate and search securely on the internet	50
ICTWEB201	Use social media tools for collaboration and engagement	20
VU22094	Explore your story	35
VU22096	Participate in Aboriginal and/or Torres Strait Islander events of significance	20

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Diploma of Teacher Education Preparation

Course Code: 22451VIC

Campus: Footscray Park, Learning Links Geelong..

About this course: Start your journey towards a rewarding career in education with the Diploma of Teacher Education Preparation. This course provides you with the essential teaching and learning skills required to pathway into an undergraduate teacher education program. You will develop fundamental knowledge of the education environment, inclusive education, the teaching profession and approaches to learning in the context of early childhood, primary and secondary schooling. You will graduate with knowledge of twenty-first century learning and teaching practices and have the confidence to pursue further study in the field. You will develop the skills to:

- critically examine approaches to learning and the ways in which contemporary issues in education impact on teaching and teachers;
- collaborate with and lead others;
- use language, literacy and numeracy at a level required to enter undergraduate level teaching qualifications, and;
- develop self-management strategies to support resilience in the context of the teaching profession.

Course Objectives: The purpose of the qualification is to support successful transitions into an undergraduate initial teacher education qualification for those from diverse backgrounds and life stages, without compromising the rigour of their preparation as teachers. Note: Completion of this qualification will not result in registration as a teacher.

Careers: Possible career opportunities emerging from the completion of 22451VIC Diploma of Teacher Education Preparation, include:

- education support worker.

This course also provides a pathway into undergraduate initial teacher education qualifications for those students who decide to continue into a teaching career.

Course Duration: 1 year

Admission Requirements: Applicants are best placed to successfully undertake this qualification if they have language, literacy and numeracy skills that align to Level 3 of the Australian Core Skills Framework (ACSF). Prior to enrolment, all applicants will be required to complete a Pre-Training review, including a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs. For employment and practical placement purposes, this vocational sector typically requires a current and satisfactory Working with Children Check. Failure to provide the required document in the timeframe specified by the Course Coordinator, means you will be unable to undertake practical placement in a workplace and therefore not eligible to progress in this course. The following is a suggested site you could visit to obtain this check: - Working with Children Check - <http://www.workingwithchildren.vic.gov.au/>

COURSE STRUCTURE

To be awarded the 22451VIC Diploma of Teacher Education Preparation, a student must successfully complete a total of twelve (12) units of competency, comprising of:

- nine (9) core units;
- one (1) unit from the education practice stream, and;
- two (2) elective units, selected from:

the electives listed within the 22451VIC Diploma of Teacher Education Preparation qualification; the units listed within the education practice stream of 22451VIC Diploma of Teacher Education Preparation that have not previously been selected, and/or; any other accredited course or endorsed training package where the unit is first packaged at AQF level 4 or above in the source training product. The selection of elective units should be guided by the vocational, educational and/or personal development needs of learners as well as be approved by the Polytechnic.

CORE UNITS

CHCDIV002	Promote Aboriginal and/or Torres Strait Islander cultural safety	25
VU21356	Engage with a range of complex texts for learning purposes	30
VU21360	Create a range of complex texts for learning purposes	30
VU22074	Use a range of techniques to solve mathematical problems	110
VU22271	Develop academic skills for the tertiary learning environment	95
VU22272	Investigate the education system	50
VU22273	Examine approaches to learning	70
VU22274	Investigate contemporary issues in teaching	80
VU22275	Investigate the digital education environment	50

EDUCATION PRACTICE STREAM

CHCEDS022	Work with students in need of additional support	50
-----------	--	----

ELECTIVE UNITS

CHCEDS019	Support students' mathematics learning	45
CHCEDS020	Support students' literacy learning	40

Certificate II in Engineering Studies

Course Code:22470VIC

Campus:Sunshine.

About this course:Start your training towards a rewarding career in the growing engineering industry at VU Polytechnic. This hands-on course is designed for people looking to enter an engineering apprenticeship or who are already doing some engineering work and would like to gain accreditation and a pathway to a full apprenticeship. During this course you will be introduced to a range of fundamental skills used in the engineering industry. This course can also provide credit into an engineering industry Australian Apprenticeship. Upon completion of this course you will have developed knowledge and confidence in:

- welding;
- reading and creating engineering drawings;
- basic machining;
- fabrication, and;
- use of basic hand and power tools.

During this course you will be able to undertake elective options that provide an introduction to an engineering occupation of your choice such as a fabricator, mechanical engineer (maintenance, diesel or workshop).

Course Objectives:The aim of this course is to provide pre-employment training and a pathway into the engineering, manufacturing or related industries. Specifically a graduate of this course will be eligible to: undertake a work-based traineeship or apprenticeship in a range of engineering, manufacturing or related areas; enrol in Certificate III qualifications in the engineering, manufacturing or related areas, and; seek entry level employment in the engineering, manufacturing or related industries. Vocational Education Training in Schools (VETiS) This qualification forms part of the credit suite specified by the Victorian Curriculum and Assessment Authority (VCAA) and may contribute towards the satisfactory completion of the Victoria Certificate of Education (VCE) or the Victoria Certificate of Applied Learning (VCAL).

Careers:Possible career opportunities emerging from the completion of 22470VIC Certificate II in Engineering Studies include:

- Apprenticeship.

Course Duration:3 months

Admission Requirements:Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs. VETiS: The literacy and numeracy levels of applicants will be assessed through consultation with the relevant secondary school.

COURSE STRUCTURE

To be awarded the 22470VIC Certificate II in Engineering Studies, a student must successfully complete a total of eleven (11) units of competency, comprising of:

- seven (7) core units, and;
- four (4) elective units, of which:
- two (2) elective units must be selected from the 22470VIC Certificate II in Engineering Studies qualification;
- two (2) elective units may be selected from any endorsed training package or accredited course provided they are consistent with the course outcomes and the AQF level of the qualification.

Electives must be industry relevant as well as be approved by the Polytechnic.

CORE UNITS

MEM13014A	Apply principles of occupational health and safety in the work environment	10
MEM18001C	Use hand tools	20
MEMPE006A	Undertake a basic engineering project	80
VU22329	Report on a range of sectors in the manufacturing, engineering and related industries	30
VU22330	Select and interpret drawings and prepare three dimensional (3D) sketches and drawings	20
VU22331	Perform basic machining processes	40
VU22332	Apply basic fabrication techniques	40

ELECTIVE UNITS

MEM18002B	Use power tools/hand held operations	20
MEM30011A	Set up basic pneumatic circuits	40
VU22333	Perform intermediate engineering computations	40
VU22334	Produce basic engineering components and products using fabrication and machining operations	60
VU22335	Perform metal machining operations	60
VU22336	Perform metal fabrication operations	60
VU22339	Create engineering drawings using computer aided systems	60
VU22340	Use 3D printing to create products	40

Recognition of Prior Learning and/or Credit Transfers:

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate I in General Education for Adults

Course Code:22472VIC

Campus:Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

About this course: You will develop important skills and gain confidence in:

- reading and writing;
- numeracy and mathematics;
- communication – listening and speaking, and;
- use of computers.

You will learn in a supportive and encouraging environment. This course will help you meet your personal needs as well as help you to participate in the community. You will also be prepared for further study and increase your employment opportunities. This certificate is designed for adults (both migrants and native English speakers) who have had limited formal education, wish to improve their skills to return to work or for formal study. When you complete this course, you will be able to:

- clarify project goals with a support person;
- understand familiar texts;
- create simple texts, and;
- use simple mathematics.

Course Objectives: 22472VIC Certificate I in General Education For Adults qualification learning outcomes are as follows: Knowledge Graduates at this level will have foundational knowledge for everyday life, further learning and preparation for initial work through knowledge:

- of the importance of documenting learning to support progress and factors which can support or hinder progress in learning;
- of different learning strategies and how they contribute to learning;
- that texts have different audiences and purposes;
- of reading strategies and features in a range of familiar and less familiar text types;
- of basic structural conventions of text types, and;
- that signs/prints/symbols represent meaning in familiar mathematical information.

Skills Graduates at this level will have foundational cognitive and communication skills to:

- clarify project goals with an appropriate support person, plan, carry out, document and evaluate a project;
- develop, implement and review learning goals;
- read, interpret and evaluate familiar and less familiar texts;
- create a range of familiar and some less familiar texts with some specialised vocabulary;
- interpret, use, estimate and calculate a range of simple numerical information for immediate personal purposes and some less familiar contexts, and;
- use paper based and web based mediums to engage with and create texts of limited complexity.

Application of knowledge and skills Graduates at this level will apply knowledge and skills to demonstrate autonomy in highly structured and stable contexts and within narrow parameters through:

- working to an agreed program to plan, implement and monitor progress towards achievement of learning goals;
- practical application of an agreed action plan in a project activity in a familiar and some less familiar contexts and/or around a specific content area of interest;
- interpreting and evaluating a range of familiar and less familiar text types of limited complexity in a range of familiar contexts;
- creating a range of familiar and less familiar paper based and web based texts of limited complexity related to different purposes, which may include some unfamiliar aspects, and;
- applies mathematical information and problem solving strategies in familiar contexts.

Careers: Completion of 22472VIC Certificate I in General Education for Adults will assist in further education and training.

Course Duration: 0.5 years

Admission Requirements: Applicants are best placed to successfully undertake this qualification if they have language, literacy and numeracy skills that align to Level 2 of the Australian Core Skills Framework (ACSF). Prior to enrolment, all applicants will be required to attend an interview and complete a literacy and numeracy assessment.

Selection Processes: Interview

COURSE STRUCTURE

To be awarded the 22472VIC Certificate I in General Education for Adults, a student must successfully complete a total of sixteen (16) units of competency, comprising of:

- two (2) core units, and;
- fourteen (14) elective units, comprising of:
- three (3) core skills reading and oracy units;
- three (3) core writing units;
- four (4) core skills numeracy and mathematics units, and;
- four (4) special interest electives units, which can be selected from:

units listed in the special interest electives list, which have not previously been completed, and/or; core skills reading and oracy, writing and numeracy and mathematics units from the 22476VIC Certificate I in General Education for Adults (Introductory), or the 22472VIC Certificate I in General Education for Adults or the 22473VIC Certificate II in General Education for Adults, which have not previously been completed, and/or; units/modules which are first packaged in AQF level 1 or 2 qualifications in nationally endorsed training packages or accredited curriculum. Electives must be industry relevant as well as be approved by the Polytechnic.

CORE UNITS

VU22384	Develop and document a learning plan and portfolio	20
VU22385	Plan and undertake a project	30

ELECTIVE UNITS

Core Skills: Reading and Oracy

VU22386	Engage with texts of limited complexity for personal purposes	25
VU22387	Engage with texts of limited complexity for learning purposes	25
VU22389	Engage with texts of limited complexity to participate in the community	25

Core Skills: Writing

VU22391	Create texts of limited complexity for personal purposes	25
VU22392	Create texts of limited complexity for learning purposes	25
VU22394	Create texts of limited complexity to participate in the community	25

Core Skills: Numeracy and Mathematics

VU22395	Work with a range of numbers and money in familiar and routine situations	30
VU22396	Work with and interpret directions in familiar and routine situations	30
VU22397	Work with measurement in familiar and routine situations	30
VU22400	Work with and interpret numerical information in familiar and routine texts	30

Special Interest Electives

BSBITU102	Develop keyboard skills	40
PUATEA001B	Work in a team	20
VU22401	Undertake a simple investigation of science in the community	40
VU22402	Undertake a simple investigation of health and well being	20

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate II in General Education for Adults

Course Code:22473VIC

Campus:Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine, Online.

About this course:22473VIC Certificate II in General Education for Adults provides students with an accredited general education qualification at AQF Level II. The

course focuses on the development of literacy skills to read, interpret, evaluate and produce a range of texts and to apply knowledge of everyday and formal numeracy in a range of contexts. Outcomes also focus on the skills and knowledge to conduct a project and to investigate pathways and develop, implement and review a learning plan. Preparation for entry into the Australian Defence Force For persons seeking to enlist in the Australian Defence Force (ADF) and who do not have formal documentation of their educational achievements, this course facilitates preparation for entry. Please contact the Polytechnic for more information.

Course Objectives: 22473VIC Certificate II in General Education for Adults qualification learning outcomes are as follows: Knowledge Graduates at this level will have basic factual, technical and procedural knowledge of a defined area of work and learning through knowledge of:

- processes for developing an individual learning plan;
- features and components of an individual learning plan;
- basic project methodology to complete a project in an activity in a selected context and/or around a specific content area;
- techniques used by writers to convey meaning and achieve purpose;
- structure and conventions of a range of familiar and unfamiliar text types, and;
- signs/prints/symbols and their representation in mathematical texts and materials.

Skills Graduates at this level will have cognitive skills to access, record and act on a defined range of information from a range of sources and cognitive and communication skills to apply and communicate known solutions to a limited range of predictable problems to:

- develop a learning plan in relation to identified goals, assemble a portfolio, and evaluate progress in relation to goals;
- discuss aspects of own learning plan such as purpose and preferred learning styles to support development of the plan;
- gather and analyse information from a variety of sources to complete a project;
- identify and address issues and barriers which affect project goals;
- select and apply reading strategies to interpret and analyse a range of familiar and unfamiliar texts;
- discuss features and content of texts to establish relevance and effectiveness;
- access and navigate web based digital text to locate information;
- gather and order information required to create a range of familiar and unfamiliar complex written and digital texts, and;
- investigate, interpret and apply knowledge of everyday and formal mathematics in a range of contexts.

Application of knowledge and skills Graduates at this level will apply knowledge and skills to demonstrate autonomy and limited judgement in structured and stable conditions and within narrow parameters through:

- accessing and noting relevant information about possible pathway options and discussing options;
- reviewing and revising progress of learning plan and project;

- undertaking project tasks efficiently and monitor activities against action plan;
- contributing to effective group interaction by recognising responsibilities of others;
- selecting texts relevant to own purposes and evaluating effectiveness;
- selecting appropriate format, structure and language to create texts, and;
- applying mathematical information and problem solving strategies in a range of contexts.

Careers: Completion of 22473VIC Certificate II in General Education for Adults will assist in further education and training.

Course Duration: 0.5 years

Admission Requirements: Applicants are best placed to successfully undertake this qualification if they have language, literacy and numeracy skills that align to Level 3 of the Australian Core Skills Framework (ACSF). Prior to enrolment, all applicants will be required to attend an interview and complete a literacy and numeracy assessment.

Selection Processes: Interview

COURSE STRUCTURE

To be awarded the 22473VIC Certificate II in General Education for Adults, a student must successfully complete a total of eleven (11) units of competency, comprising of:

- two (2) core units, and;
- nine (9) elective units comprising of:

two (2) core skills reading and oracy units; two (2) core skills writing units; two (2) core skills numeracy and mathematics units, and; three (3) special interest electives units, which can be selected from:

- units listed in the special interest electives, which have not previously been completed, and/or;
- core skills reading and oracy, writing and numeracy and mathematics units from the 22473VIC Certificate II in General Education for Adults, or the 22472VIC Certificate I in General Education for Adults or the 22474VIC Certificate III in General Education for Adults, which have not previously been completed, and/or;
- units/modules which are first packaged in AQF level 2 or 3 qualifications in nationally endorsed training packages or accredited curriculum.

Electives must be industry relevant as well as be approved by the Polytechnic.

CORE UNITS

VU22411	Research pathways and produce a learning plan and portfolio	20
VU22412	Implement and review a project	30

ELECTIVE UNITS

Core Skills: Reading and Oracy

VU22414	Engage with a range of complex texts for learning purposes	30
VU22415	Engage with a range of complex texts for employment purposes	30
VU22416	Engage with a range of complex texts to participate in the community	30

Core Skills: Writing

VU22419	Create a range of complex texts for learning purposes	30
VU22420	Create a range of complex texts to participate in the workplace	30
VU22421	Create a range of complex texts to participate in the community	30

Core Skills: Numeracy and Mathematics

VU22422	Investigate and interpret shapes and measurements and related formulae	50
VU22423	Investigate numerical and statistical information	50
VU22424	Investigate and use simple mathematical formulae and problem solving techniques	50

Special Interest Electives

BSBADM302	Produce texts from notes	60
BSBITU201	Produce simple word processed documents	60
ICTICT103	Use, communicate and search securely on the internet	50

Units specific to preparation for entry into the Australian Defence Force: Online only

VU22414	Engage with a range of complex texts for learning purposes	30
VU22415	Engage with a range of complex texts for employment purposes	30
VU22419	Create a range of complex texts for learning purposes	30
VU22420	Create a range of complex texts to participate in the workplace	30
VU22422	Investigate and interpret shapes and measurements and related formulae	50
VU22424	Investigate and use simple mathematical formulae and problem solving techniques	50

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate III in General Education for Adults

Course Code: 22474VIC

Campus: Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

About this course: 22474VIC Certificate III in General Education for Adults, provides students with an accredited general education course at Australian Qualification Framework Level 3. The course focuses on the development of literacy skills to read, interpret, critically analyse and create complex texts and to perform a range of complex mathematical tasks. 22474VIC Certificate III in General Education for Adults, also includes the ability to research a range of pathway options and identify and progress towards further study goals.

Course Objectives: 22474VIC Certificate III in General Education for Adults qualification learning outcomes are as follows: Knowledge Graduates of a Certificate III will have factual, technical, procedural and theoretical knowledge in an area of work and learning through knowledge of:

- processes for developing an individual learning plan;
- sources of information about broad pathway options;
- devices used by writers to convey meaning and achieve purpose;
- complex grammatical structures to accurately and effectively express content and meaning;
- a broad and/or specialised vocabulary to accurately express content, and;
- mathematical and problem solving techniques and strategies in a broad range of highly complex contexts.

Skills Graduates at this level will have cognitive and communication skills to interpret and act on available information, apply and communicate known solutions to a variety of predictable problems and to deal with unforeseen contingencies using known solutions and provide information to a variety of specialist and non-specialist audiences to:

- read and interpret a range of information about potential pathway options;
- apply research skills to locate and evaluate information relevant to own goals and options;
- develop, document and evaluate a learning plan according to identified processes;
- select and evaluate types of evidence to assemble a portfolio;
- read interpret and critically analyse a broad range of highly complex texts;
- plan and produce a folio of highly complex texts, and;
- perform a range of complex mathematical tasks and use a variety of formal and informal mathematical language in a broad range of contexts.

Application of knowledge and skills Graduates at this level will demonstrate the application of knowledge and skills:

- through identification of barriers to the achievement of learning goals and strategies to address these;
- to adapt and transfer skills and knowledge within known routines, methods, procedures and time constraints through the application of a range of strategies to engage with and create a broad range of highly complex text types and apply problem solving strategies and techniques to a range of mathematical contexts, and;
- to take responsibility for own outputs in learning including participation in teams and taking limited responsibility for the output of others within established parameters through the design, development, monitoring and evaluation of own learning plan and implementation of a project where responsibilities of other members are identified and own role is clarified.

Careers: Completion of 22474VIC Certificate III in General Education for Adults will assist in further education and training.

Course Duration: 0.5 years

Admission Requirements: Applicants are best placed to successfully undertake this qualification if they have language, literacy and numeracy skills that align to Level 4 of the Australian Core Skills Framework (ACSF). Prior to enrolment, all applicants will be required to attend an interview and complete a literacy and numeracy assessment.

Selection Processes: Interview

COURSE STRUCTURE

To be awarded the 22474VIC Certificate III in General Education for Adults, a student must successfully complete a total of eight (8) units of competency, comprising of:

- one (1) core unit, and;
- seven (7) elective units, comprising of:

four (4) core skills units from either reading, writing, numeracy and mathematics; three (3) special interest electives units, which can be selected from: units listed in the special interest electives list, which have not previously been completed, and/or; core skills reading, writing and numeracy and mathematics units from the 22474VIC Certificate III in General Education for Adults, or the 22473VIC Certificate II in General Education for Adults, which have not previously been completed, and/or; units/modules which are first packaged in AQF level 3 or 4 qualifications in nationally endorsed training packages or accredited curriculum. Electives must be industry relevant as well as be approved by the Polytechnic.

CORE UNIT

VU22434	Evaluate pathway options, design a learning plan and compile a portfolio	60
Core Skills: Reading		
VU22436	Engage with a range of highly complex texts for	30

	learning purposes	
VU22438	Engage with a range of highly complex texts to participate in the community	30
Core Skills: Writing		
BSBWRT401	Write complex documents	50
VU22440	Create a range of highly complex texts for learning purposes	30
VU22441	Create a range of highly complex texts to participate in the community	30
Core Skills: Numeracy and Mathematics		
VU22442	Analyse and evaluate numerical and statistical information	50
VU22443	Use algebraic techniques to analyse mathematical problems	50
VU22444	Use formal mathematical concepts and techniques to analyse and solve problems	50
Special Interest Electives		
BSBLIB304	Develop and use information literacy skills	40
HLTAAP001	Recognise healthy body systems	70

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate I in General Education for Adults (Introductory)

Course Code:22476VIC

Campus:Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

About this course:Develop foundational technical and communication skills with a Certificate I in General Education for Adults (Introductory) at the Polytechnic. You will develop skills and gain confidence in:

- reading and writing;
- numeracy, and;
- digital literacy/computing.

You will learn in a supportive and encouraging environment. This course will help you meet your personal needs as well as help you to participate in the community. On completion, you will be prepared for further study in the 22472VIC Certificate I in General Education for Adults or to move into the workforce. When you complete this course, you will be able to:

- plan and carry out a simple project with a support person;
- understand familiar print and digital texts;

- construct simple and familiar texts with a support person, and;
- use basic mathematics.

Course Objectives: 22476VIC Certificate I in General Education for Adults (Introductory) qualification learning outcomes are as follows: Knowledge Graduates at this level will have foundational knowledge for everyday life, further learning and preparation for initial work through knowledge of:

- own short term learning objectives;
- highly familiar and predictable text types relevant to own needs;
- basic reading strategies to engage with familiar paper based and web based text types, and;
- stages or processes of writing including planning, drafting and editing.

Skills Graduates at this level will have foundational cognitive, technical and communication skills to:

- identify and review achievement of own short term learning objectives;
- undertake defined routine activities such as planning and carrying out a simple project based on own identified interests;
- identify and report simple issues and problems such as identifying problems in achieving learning goals;
- use a limited range of reading strategies to create meaning from simple familiar and predictable text types;
- convey and discuss information about texts;
- construct simple and familiar text with appropriate support;
- apply simple mathematical knowledge in familiar and everyday situations, and;
- use paper based and web based mediums to engage with and create simple texts.

Application of knowledge and skills Graduates at this level will apply knowledge and skills to demonstrate autonomy in highly structured and stable contexts and within narrow parameters through:

- working with a support person to discuss, identify and implement own short term learning objectives;
- completing project tasks according to agreed steps;
- working with other learners to discuss roles and expected outcomes for a project;
- locating, reading and interpreting specific information in simple, familiar and predictable paper based and web based text types;
- creating texts for a limited purpose and audience, and;
- applying relevant mathematical information in familiar contexts.

Careers:Completion of 22476VIC Certificate I in General Education for Adults (Introductory) will assist in further education and training.

Course Duration:0.5 years

Admission Requirements:Applicants are best placed to successfully undertake this qualification if they have language, literacy and numeracy skills that align to Level 2 of the Australian Core Skills Framework (ACSF). Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment.

Selection Processes: Interview

COURSE STRUCTURE

To be awarded the 22476VIC Certificate I in General Education for Adults (Introductory), a student must successfully complete a total of sixteen (16) units of competency, comprising of:

- two (2) core units, and;
- fourteen (14) elective units, comprising of:
- three (3) core skills reading and oracy units;
- three (3) core skills writing units;
- four (4) core skills numeracy and mathematics units, and;
- four (4) special interest electives, which can be selected from:

units listed in the special interest electives list, which have not been previously completed, and/or; core skills reading and oracy, writing and numeracy and mathematics units from the 22476VIC Certificate I in General Education for Adults (Introductory), or the 22471VIC Course in Initial General Education for Adults or the 22472VIC Certificate I in General Education for Adults, which have not been previously completed, and/or; units/modules which are first packaged in AQF level 1 or 2 qualifications in nationally endorsed training packages or accredited curriculum. Electives must be industry relevant as well as be approved by the Polytechnic.

CORE UNITS

VU22358	Develop learning goals	20
VU22359	Conduct a project with guidance	20

ELECTIVE UNITS

Core Skills: Reading and Oracy

VU22360	Engage with simple texts for personal purposes	25
VU22361	Engage with simple texts for learning purposes	25
VU22363	Engage with simple texts to participate in the community	25

Core Skills: Writing

VU22365	Create simple texts for personal purposes	25
VU22366	Create simple texts for learning purposes	25
VU22368	Create simple texts to participate in the community	25

Core Skills: Numeracy and Mathematics

VU22369	Work with simple numbers and money in familiar situations	30
VU22370	Work with simple measurements in familiar situations	30

VU22371	Work with simple design and shape in familiar situations	30
VU22450	Work with and interpret simple directions in familiar situations	30
Special Interest Electives		
FDFO2061A	Use numerical applications in the workplace	30
VU22375	Apply basic computer skills to language learning	20
VU22376	Access the internet for language learning	20
VU22379	Identify community options	20

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Advanced Diploma of Building Design (Architectural)

Course Code: 22477VIC

Campus: Werribee, Sunshine, Learning Links Geelong.

About this course: Open the door for a creative and rewarding career designing buildings with an Advanced Diploma of Building Design (Architectural) at Victoria University Polytechnic. You will become proficient in the design, presentation and documentation process for residential, industrial and commercial buildings. With this qualification and the required industry experience, you will be eligible to register as a drafting practitioner through the Victorian Building Authority (VBA) (external link). This course combines hands-on learning, industry projects and theoretical training. You will develop specialist skills and knowledge in:

- construction technology;
- design solutions and producing working drawings;
- building codes and compliance;
- computer-aided drafting (CAD);
- designing safe and sustainable buildings;
- complex project management, and;
- small business planning.

Course Objectives: The 22477VIC Advanced Diploma of Building Design (Architectural) provides an accredited training program and vocational outcomes for a person to be employed as a building designer or draftsman. On completion of the 22477VIC Advanced Diploma of Building Design (Architectural) participants will have the skills and knowledge to design and develop architectural working drawings for the construction of residential, commercial and industrial buildings, thereby enabling them to:

- interpret client needs through sketch and design;
- interpret building legislation;
- utilise technology to develop plans and documentation for construction methods and specifications;

- liaise with building surveyors and builders;
- negotiate with local council;
- understand probable cost comparisons, and;
- process contract administration.

Careers: Graduates in 22477VIC Advanced Diploma of Building Design (Architectural) are likely to be employed as:

- building designers,
- architectural assistants,
- building design assistants, and/or;
- architectural draftspersons.

Graduates may apply for registration to become registered building practitioners with the Victorian Building Authority (VBA), subject to meeting specified criteria. This qualification is the only qualification recognised by the VBA that leads to a registered outcome for this occupation and is cited within the Building Interim Regulations 2017.

Course Duration: 2 years

Admission Requirements: Applicants are best placed to successfully undertake this qualification if they have a demonstrated capacity in learning, reading, writing, oral communication and numeracy that align to Level 3 of the Australian Core Skills Framework (ACSF). Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

COURSE STRUCTURE

To be awarded the 22477VIC Advanced Diploma of Building Design (Architectural), a student must successfully complete a total of twenty (20) core units of competency.

CORE UNITS

VU22454	Undertake site survey and analysis to inform design process	40
VU22455	Apply structural and construction technology to the design of residential buildings	180
VU22456	Apply structural and construction technology to the design of commercial buildings	120
VU22457	Comply with relevant legislation in the design of residential buildings	50
VU22458	Comply with relevant legislation in the design of commercial buildings	60
VU22459	Design safe buildings	40
VU22460	Design sustainable buildings	90
VU22461	Integrate services layout into design documentation	40

VU22462	Produce preliminary and working drawings for residential buildings	180
VU22463	Produce preliminary and working drawings for commercial buildings	180
VU22464	Select construction materials for building projects	60
VU22465	Provide design solutions for residential and commercial buildings	200
VU22466	Integrate digital applications into architectural workflows	240
VU22467	Present architectural designs	120
VU22468	Manage architectural project administration	60
VU22469	Undertake complex architectural projects	280
VU22470	Conduct, interpret and apply a Bushfire Attack Level (BAL) assessment	50
CPCCWHS1001	Prepare to work safely in the construction industry	6
BSBSMB404	Undertake small business planning	50
BSBPMG415	Apply project risk management techniques	40

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate II in Work Education

Course Code: 22481VIC

Campus: Footscray Park, Footscray Nicholson.

About this course: Gain valuable workplace skills and confidence with a Certificate II in Work Education at Victoria University Polytechnic. This course offers people with intellectual disabilities the opportunity to develop hands-on skills in simulated and authentic work place settings. You will have the opportunity to select either hospitality or sport electives. Once complete, you can pathway into other Certificate II or III courses or gain entry-level employment. This course will give you an understanding of workplace expectations, you will be supported to gain skills in:

- job seeking and employability;
- personal management;
- teamwork and communication;
- basic literacy and numeracy, and;
- use of everyday technology.

To provide you with an authentic employment experience, this course includes two (2) supported work-placement blocks. For your simulated workplace training, you will learn in state-of-the-art hospitality and sport facilities. This course will improve

your employment prospects and ensure you feel more prepared to enter the workforce.

Course Objectives: The Certificate II in Work Education is intended to support post compulsory school aged learners with permanent intellectual disabilities to develop employment ready skills, knowledge and behaviours. The outcomes of the 22481VIC Certificate II in Work Education are consistent with Australian Qualifications Framework (AQF) Level 2 through:

- development of basic factual, technical and procedural knowledge of a defined area of work and learning in:
- WHS/OHS rights, obligations, procedures and processes;
- workplace behavioural expectations;
- requirements and features of a range of jobs;
- development of basic cognitive, technical and communication skills;
- participate effectively in a workplace;
- manage own time;
- apply defined personal protective and contingency strategies, and;
- undertake a work placement.

Skills and knowledge at this level will be applied in structured and stable contexts within a defined range of parameters. The volume of learning for this qualification would typically be a minimum of 1 year due to the additional time required to reinforce learning for the intended cohort. The volume of learning incorporates structured training delivery and extensive opportunities for practice and reinforcement of skills.

Careers: This is a low-level qualification which will enable:

- entry level employment, and;
- further study to gain employment.

Course Duration: 1 year

Admission Requirements: Applicants must be recognised as having an intellectual disability or learning difficulty. Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

COURSE STRUCTURE

To be awarded the 22481VIC Certificate II in Work Education, a student must successfully complete a total of eight (8) units of competency, comprising of:

- three (3) core units, and;
- five (5) elective units, of which:
- one (1) unit must be selected from the WHS/OHS elective units listed in 22481VIC Certificate II in Work Education, and;
- four (4) units may be selected from the units listed in 22481VIC Certificate II in Work Education, or from other endorsed or accredited training products where the unit(s) are first packaged in AQF Level 1, 2 or 3 qualifications in the source training product.

Electives must be industry relevant as well as be approved by the Polytechnic.

CORE UNITS

VU22574	Investigate job opportunities	80
VU22575	Identify workplace expectations	150
VU22576	Undertake a work placement	250

ELECTIVE UNITS

WHS/OHS

SITXWHS001	Participate in safe work practices	12
------------	------------------------------------	----

Stream: Business Administration

BSCBUS201	Deliver a service to customers	40
BSBIND201	Work effectively in a business environment	30
BSBWOR204	Use business technology	20
VU22577	Develop independent travel skills	100

Stream: Sport

SISXCA1003	Conduct non-instructional sport, fitness or recreation sessions	20
SISXCCS001	Provide quality service	25
SISXFAC001	Maintain equipment for activities	5
VU22577	Develop independent travel skills	100

Stream: Hospitality

SITHCCC001	Use food preparation equipment	25
SITHCCC002	Prepare and present simple dishes	25
SITXFSA001	Use hygienic practices for food safety	15
VU22577	Develop independent travel skills	100

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate I in EAL (Access)

Course Code: 22484VIC

Campus: Footscray Nicholson, St Albans, Werribee, Sunshine, Geelong Learning Links..

About this course: Improve your English skills to gain employment or further study opportunities with a Certificate I in EAL (Access) at Victoria University Polytechnic. This course is designed for people learning English as an Additional Language who need to develop English language speaking, listening, reading, writing numeracy and

learning skills prior to further English language education, tertiary or vocational education and ultimately employment. You will also develop strategies for learning and academic skills to:

- plan language learning;
- participate in short simple conversations;
- listen to and give information and instructions;
- read and write short simple messages;
- read and complete short forms;
- read and write short simple information and instructions;
- locate health and medical information;
- understand settlement information, and;
- recognise simple numbers and money.

You will be confident communicating in a wide range of formal and informal situations in social and community life, as well as in some workplace situations.

Course Objectives: Certificate I in EAL (Access) outcomes focus on the development of English language speaking, listening, reading and writing skills directly related to immediate personal and social needs together with electives selected to develop relevant social, settlement and numeracy skills and knowledge. The purpose of this qualification is preparation for participation in further English language study or vocational training which may include English language support or employment.

Careers: Completion of 22484VIC Certificate I in EAL (Access) will assist in further education and training and/or employment opportunities.

Course Duration: 0.5 years

Admission Requirements: Entry in to 22484VIC Certificate I in EAL (Access) must be determined according to the following criteria: - a participant's current English language skills. (The Listening and Speaking and Reading and Writing units in the Framework will provide the basis for initial assessment processes and placement of participants at the appropriate proficiency level); - a participant's prior formal education experience, both overseas and in Australia; - any prior EAL learning, and; - a participant's learning and pathway needs including employability skills, literacies (digital and other literacies), and further educational and vocational training needs.

Selection Processes: Interview

COURSE STRUCTURE

To be awarded the 22484VIC Certificate I in EAL (Access), a student must successfully complete a total of eight (8) units of competency, comprising of:

- one (1) core unit, and;
- seven (7) elective units, of which:

one (1) unit to be selected from the Speaking and Listening electives; one (1) unit to be selected from the Reading and Writing electives; two (2) units to be selected from the Language Skills electives, which can be chosen from the Speaking and Listening and/or Reading and Writing units, which have not been previously completed from: 22484VIC Certificate I in EAL (Access); 22483VIC Course in EAL; Certificate II qualifications in this EAL framework; three (3) units to be selected from: general electives listed in the 22484VIC Certificate I in EAL (Access) qualification; general electives listed in the Certificate II qualifications in this EAL framework;

units/modules which are first packaged in AQF level 1 and 2 qualifications in other accredited curricula and/or endorsed training packages.

Recognition of Prior Learning and/or Credit Transfers:

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate II in EAL (Access)

Course Code: 22485VIC

Campus: Footscray Nicholson, St Albans, Werribee, Sunshine, Geelong Learning Links..

About this course: Improve your English skills to gain employment or further study opportunities with a Certificate II in EAL (Access) at Victoria University Polytechnic.

This course is designed for people learning English as an Additional Language who need to develop English language speaking, listening, reading, writing and learning skills prior to further English language education, tertiary or vocational education and ultimately employment. You will also develop strategies for learning and academic skills to:

- develop learning goals;
- participate in simple conversations and transactions;
- listen to and give information and directions;
- read and write simple messages and transactional texts;
- read and write simple descriptions and recounts;
- understand current issues;
- use the computer and create documents;
- explore community services, and;
- work with simple numbers and money.

You will be confident communicating in a wide range of formal and informal situations in social and community life, as well as in some workplace situations.

Course Objectives: Certificate II in EAL (Access) outcomes focus on the development of English language speaking, listening, reading and writing skills together with electives selected to develop relevant knowledge and skills for simple everyday communication and community participation and to enable participants to move into further English language education or vocational training or a combination of both, or employment.

Careers: Completion of 22485VIC Certificate II in EAL (Access) will assist in further education and training and/or employment opportunities.

Course Duration: 0.5 years

Admission Requirements: Entry in to 22485VIC Certificate II in EAL (Access) must be determined according to the following criteria: - a participant's current English language skills. (The Listening and Speaking and Reading and Writing units in the Framework will provide the basis for initial assessment processes and placement of participants at the appropriate proficiency level); - a participant's prior formal education experience, both overseas and in Australia; - any prior EAL learning, and; - a participant's learning and pathway needs including employability skills, literacies (digital and other literacies), and further educational and vocational training needs.

Selection Processes: Interview

COURSE STRUCTURE

To be awarded the 22485VIC Certificate II in EAL (Access), a student must successfully complete a total of eight (8) units of competency, comprising of: one (1) core unit, and; seven (7) elective units, of which: one (1) unit to be selected from the Speaking and Listening electives; one (1) unit to be selected from the Reading and Writing electives; two (2) units to be selected from the Language Skills electives which have not been previously completed from: 22485VIC Certificate II in EAL (Access); units in the Certificate I, II and/or III qualifications in this EAL Framework; three (3) units to be selected from: general electives listed in the 22485VIC Certificate II in EAL (Access) qualification; general electives listed in the Certificate I, II and/or III qualifications in this EAL framework; units/modules which are first packaged in AQF level 2 or 3 qualifications in other accredited curricula and/or endorsed training packages.

Admission Requirements: Entry in to 22492VIC Certificate IV in EAL (Further Study) must be determined according to the following criteria: - a participant's current English language skills. (The Listening and Speaking and Reading and Writing units in the Framework will provide the basis for initial assessment processes and placement of participants at the appropriate proficiency level); - a participant's prior formal education experience, both overseas and in Australia; - any prior EAL learning, and; - a participant's learning and pathway needs including employability skills, literacies (digital and other literacies), and further educational and vocational training needs.

Selection Processes: Interview

COURSE STRUCTURE

To be awarded the 22492VIC Certificate IV in EAL (Further Study), a student must successfully complete a total of nine (9) units of competency, comprising of:

- seven (7) core units, and;
- two (2) elective units, which have not been previously completed, from:

electives listed in the 22492VIC Certificate IV in EAL (Further Study) qualification; electives listed in the Certificate III and/or IV qualifications in this EAL Framework; units/modules which are first packaged in AQF level 3, 4 or 5 qualifications in other accredited curricula and/or endorsed training packages.

CORE UNITS

VU22411	Research pathways and produce a learning plan and portfolio	20
VU22645	Give complex presentations for study purposes	80
VU22646	Participate in complex spoken discourse for study purposes	60
VU22647	Take notes from complex spoken texts for study purposes	50
VU22648	Read and write complex texts for study purposes	120
VU22649	Use critical reading skills to analyse study tasks	40
VU22650	Use language analysis skills to review own texts	40

ELECTIVE UNITS

BSBLIB407	Search library and information databases	30
VU21881	Apply essential further study skills	90

Certificate II in Electrotechnology (Pre-vocational)

Course Code: 22499VIC

Campus: Werribee, Sunshine.

About this course: Lay the groundwork for an electrical apprenticeship or traineeship with a Certificate II in Electrotechnology (Pre-vocational) at Victoria University Polytechnic. Aimed at school leavers and those new to the workforce, this practical course will prepare you with foundational electrotechnology skills. You will also gain an insight into the electrical/electronics industry to help you choose your career path. You will develop technical skills and knowledge that will ensure you are ready for work in the electrical trade including:

- basic electrical theory and workshop practices;
- basic network cabling for extra low voltage (ELV) equipment and devices;
- use of test instruments in the electrotechnology industry;
- wiring and installation;
- provision of basic sustainable energy solutions in domestic premises;
- fabricate, assemble and dismantle utilities industry components;
- working with electrotechnology equipment and use of test instruments, and;
- workplace safety and first aid.

You will graduate with a nationally recognised qualification as well as credits for further training as an apprentice, or trainee in the electrotechnology industry in areas such as:

- electrical;
- renewable energy;
- air conditioning/refrigeration, and;
- instrumentation.

Course Objectives: The 22499VIC Certificate II in Electrotechnology (Pre-vocational) is consistent with the Australian Qualifications Framework (AQF) for a Certificate II level qualification in that graduates will have the following learning attributes: Knowledge Graduates will have:

- basic factual, technical and procedural knowledge within the area of electrotechnology. For example, in the application of basic electrical principles and workshop practices to enhance their entry-level employment prospects in the electrotechnology industry.

Skills Graduates will have:

- cognitive skills to access, record and act on a defined range of information from a range of sources. For example, compiling information on the range of occupations at electrotechnology trade level, in order to make a more informed choice in the selection of a vocational career path;
- cognitive and communication skills to apply and communicate known solutions to a limited range of predictable problems. For example, solving problems in extra-low voltage single path circuits, and;
- technical skills to use a limited range of equipment to complete tasks involving known routines and procedures with a limited range of options. For example, testing, repairing and securing electrical equipment.

Application of knowledge and skills Graduates of this qualification will be able to demonstrate the application of knowledge and skills:

- with some accountability for the quality of own outcomes and some responsibility for own outputs in work and learning. For example, identifying potential learning pathways;
- with limited autonomy and judgement in the completion of own defined and routine tasks in known and stable contexts. For example, completing assigned electrical tasks in a workplace environment, and;
- with limited autonomy and judgement to complete routine but variable tasks in collaboration with others in a team environment. For example, contributing to the outcomes of a basic electrotechnology project as a member of a team.

Vocational Education Training in Schools (VETiS) This qualification forms part of the credit suite specified by the Victorian Curriculum and Assessment Authority (VCAA) and may contribute towards the satisfactory completion of the Victoria Certificate of Education (VCE) or the Victoria Certificate of Applied Learning (VCAL).

Careers: This is a pre-vocational course and as such, provides the required prerequisite knowledge and skills to gain access to a wide range of apprenticeships and traineeships offered within the electrotechnology industry.

Course Duration: 3 months

Admission Requirements: Applicants are best equipped to achieve the outcomes of this course if they have as a minimum; language, literacy and numeracy skills that are equivalent to Level 2 of the Australian Core Skill Framework (ACSF). Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs. VETiS: The literacy and numeracy levels of applicants will be assessed through consultation with the relevant secondary school.

COURSE STRUCTURE

To be awarded the 22499VIC Certificate II in Electrotechnology (Pre-vocational), a student must successfully complete a total of fifteen (15) units of competency, comprising of:

- thirteen (13) core units, and;
- a minimum of two (2) elective units.

CORE UNITS

CPCWHS1001	Prepare to work safely in the construction industry	6
HLTAID003	Provide first aid	18
UEENEEE101A	Apply Occupational Health and Safety regulations, codes and practices in the workplace	20
UEENEEE102A	Fabricate, assemble and dismantle utilities industry components	40
UEENEEE103A	Solve problems in ELV single path circuits	40
UEENEEE105A	Fix and secure electrotechnology equipment	20
UEENEEJ104A	Establish the basic operating conditions of air conditioning systems	20
VU22333	Perform intermediate engineering computations	40
VU21544	Install a sustainable extra low voltage energy power system	30
VU22670	Provide an overview of the electrotechnology industry	30
VU22671	Use test instruments in the electrotechnology industry	20
VU22672	Carry out basic electrotechnology project	40
VU22673	Carry out basic network cabling for extra low voltage (ELV) equipment and devices	30

ELECTIVE UNITS

UEENEEJ102A	Prepare and connect refrigerant tubing and fittings	40
VU22669	Perform energy sector installations of extra low voltage (ELV) single path circuits	40

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate I in Employment Pathways

Course Code: 22523VIC

Campus: Industry, Footscray Nicholson, City King St, Sunshine, Geelong Learning Links.

About this course: The Certificate I in Employment Pathways will equip you with core employability skills, including essential skills in teamwork, communication, problem-solving and self-management. This training will give you an understanding of workplace expectations. You'll be supported to develop skills in:

- developing personal effectiveness;
- communicating in the workplace;
- preparing for employment;
- developing an action plan for career planning;
- contributing to the health and safety of others;
- participating in job seeking activities, and;
- participating in practical placement with support.

Course Objectives: The Certificate I in Employment Pathways is consistent with the criteria and specifications of the AQF Level I as outlined in the Australian Qualification Framework Second Edition January 2013, as follows: Knowledge: Graduates at this level will have foundational knowledge for everyday life, further learning and preparation for initial work through knowledge of:

- OHS / WHS procedures and signs;
- sources of information on a range of industries;
- sources of information for employment opportunities;
- strategies for setting work related goals, and;
- education/training requirements for specific jobs.

Skills: Graduates at this level will have foundational cognitive, technical and communication skills to:

- follow and apply OHS / WHS and emergency procedures in specific industries;
- identify own self development needs and strategies to improve personal effectiveness;
- identify own skills and match to job opportunities, and;
- identify processes and stages to develop basic career action plan.

Graduates at this level will apply knowledge and skills to demonstrate some autonomy in highly structured and stable contexts and within narrow parameters through:

- collecting and organising information to develop a portfolio to document skill;
- accessing and using employment and workplace information;
- compiling a skills portfolio and simple resumé, and;

- using digital technology to access information about selected industries and employment opportunities.

The volume of learning for this qualification is typically six (6) months and incorporates structured and unstructured learning activities such as:

- structured activities to develop work preparation skills such as developing and monitoring a basic career action plan, and;
- unstructured activities such as accessing and collecting information about different employment areas and work opportunities.

Careers: This is a foundation qualification with the intent to build foundation skills and knowledge that will support access to employment and/or further training.

Course Duration: 3 months

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

Selection Processes: Interview

COURSE STRUCTURE

To be eligible for the award of the 22523VIC Certificate I in Employment Pathways, learners must successfully complete a total of seven (7) units comprising:

- three (3) Core units, and;
- one (1) OHS / WHS Stream unit selected from:
- units from OHS / WHS Stream in this qualification, or;
- units first packaged in Certificate I or II qualifications in endorsed Training Packages or other accredited curricula. The units selected must relate to OHS / WHS requirements in the workplace.
- three (3) elective units selected from:
- units may be chosen from within or across any listed skill cluster, and;
- units from other endorsed or accredited training products where the unit/s are first packaged in Certificate I or II qualifications in the source training product and reflect the integrity and intent of the qualification.

CORE UNITS

VU22786	Develop personal effectiveness	30
VU22787	Prepare for employment	30
VU22788	Develop an action plan for career planning	30

ELECTIVE UNITS

BSBCMM201	Communicate in the workplace	40
BSBWHS201	Contribute to health and safety of self and others	20
VU22103	Participate in a practical placement with support	40
VU22789	Participate in job seeking activities	50

Recognition of Prior Learning and/or Credit Transfers:

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate IV in Business

Course Code:BSB40215

Campus:Footscray Park, Footscray Nicholson, City King St.

About this course:Gain practical skills for the business sector and beyond with a Certificate IV in Business at the Polytechnic. You will learn to effectively manage the office administration aspects of a business, and gain a focused understanding of today's business world. This well-rounded course will give you skills in:

- creating presentations;
- advanced word processing, spreadsheets and databases;
- producing business documents;
- organising travel and meetings;
- analysing and presenting research;
- people management, and;
- safe workplace practices.

You will also gain insight into the various possible career paths that you could take with these skills. When you graduate, you will have the ability and confidence to work in the industry, directing a range of administration tasks.

Course Objectives:This qualification is suited to those working as administrators and project officers. In this role, individuals use well-developed skills and a broad knowledge base to apply solutions to a defined range of unpredictable problems and analyse information from a variety of sources. They may provide leadership and guidance to others with some limited responsibility for the output of others.

Careers:Possible career opportunities emerging from completing the BSB40215 Certificate IV in Business include:

- Administrator;
- Project Officer;
- Accounts Clerk;
- Customer Service Advisor;
- Clerk;
- e-Business Practitioner;
- Legal Receptionist;
- Medical Receptionist;
- Office Administration Assistant;
- Student Services Officer, and;
- Word Processing Operator.

Course Duration:0.5 years

Admission Requirements:Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

Selection Processes: Other/Not Applicable.

COURSE STRUCTURE

To be awarded BSB40215 Certificate IV in Business, a student must complete a total of ten (10) units of competency, consisting of:

- one (1) core unit, and;
- nine (9) elective units of which:

five (5) elective units must be selected from the elective units listed in the BSB40215 Certificate IV in Business qualification; four (4) elective units may be selected from the elective units listed in the BSB40215 Certificate IV in Business qualification, or any currently endorsed training package or accredited course at the same qualification level; if not listed in BSB40215 Certificate IV in Business, one (1) unit may be selected from either a Certificate III or Diploma qualification. Elective units must be relevant to the work environment and the qualification, maintain the integrity of the AQF alignment, contribute to a valid, industry-supported vocational outcome as well as be approved by the Polytechnic.

STREAM: General

CORE UNITS

BSBWHS401	Implement and monitor WHS policies, procedures and programs to meet legislative requirements	50

Recognition of Prior Learning and/or Credit Transfers

For the above streams, previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the training package and be assessed as appropriate by the Polytechnic.

Certificate IV in Human Resources

Course Code:BSB41015

Campus:Footscray Nicholson.

About this course:This unique course will equip you with a wide range of cognitive, technical, functional and communication skills preparing you for entry into the human resources sector. It will provide you with the necessary foundation skills to process payroll, prepare for staff recruitment, support performance management functions, create job descriptions, organise meetings, conduct OHS audits and implement industrial relations procedures.

Course Objectives:This qualification is suitable for individuals working in a range of human resources management positions. Job roles could include human resources assistants, human resources coordinators, human resources administrators and payroll officers. Workplace responsibilities would be determined at a workplace level. Some smaller business may require employees to work across all aspects of human resources. In larger companies, individuals may just have responsibility for a singular aspect of human resources such as remuneration.

Careers:Possible career opportunities emerging from the completion of BSB41015 Certificate IV in Human Resources include:

- Human Resources Assistant;
- Human Resources Coordinator;
- Human Resources Administrator, and;
- Payroll Officer.

Course Duration:0.5 years

Admission Requirements:Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

Selection Processes: OtherN/A

COURSE STRUCTURE

To be awarded BSB41015 Certificate IV in Human Resources, a student must successfully complete a total of ten (10) units of competency, comprising of:

- six (6) core units, and;
- four (4) elective units, of which:

two (2) units must be selected from the electives listed in the BSB41015 Certificate IV in Human Resources qualification, and; two (2) units may be selected from any endorsed training package or accredited course at Certificate III Level or above. Elective units must be relevant to the work environment and the qualification, maintain the integrity of the AQF alignment and contribute to a valid, industry-supported vocational outcome, as well as be approved by the Polytechnic.

CORE UNITS

BSBHRM403	Support performance-management processes	40
BSBHRM404	Review human resources functions	50
BSBHRM405	Support the recruitment, selection and induction of staff	50
BSBLDR402	Lead effective workplace relationships	50
BSBWHS401	Implement and monitor WHS policies, procedures and programs to meet legislative requirements	50
BSBWRK411	Support employee and industrial relations procedures	50

ELECTIVE UNITS

BSBADM405	Organise meetings	20
BSBFIA302	Process payroll	30
BSBREL401	Establish networks	35
BSBWRT401	Write complex documents	50

Certificate IV in Work Health and Safety

Course Code:BSB41419

Campus:Industry, Footscray Nicholson.

About this course: Gain the practical skills and knowledge to deliver effective work health and safety (WHS) procedures in your workplace. You will gain fundamental knowledge in workplace health and safety, including compliance requirements, risk management, WHS consultation and participation process and implementation of WHS management systems. The qualification reflects the role of workers who apply a broad knowledge base and well developed skills in a wide variety of contexts and may include coordinators, advisors and facilitators. You will also gain competencies in:

- Writing complex documents;
- Contributing to implementing WHS monitoring processes;
- Assisting with managing WHS compliance of contractors;
- Contributing to workplace incident response;

- Showing leadership in the workplace, and;
- Implementing and monitoring environmentally sustainable work practices.

This course can lead to the following career opportunities across a range of industry settings:

- Occupational health and safety representative;
- Occupational health and safety leader, and;
- Occupational health and safety manager.

Course Objectives: This qualification is suitable for people working in a work health and safety (WHS) role who may or may not work under supervision. Potential participants in this course may provide leadership and guidance to others and have some limited responsibility for the output of others. The qualification reflects the role of workers who apply a broad knowledge base and well-developed skills in a wide variety of contexts and may include coordinators, advisors and facilitators.

Careers: Possible career opportunities emerging from the completion of BSB41419 Certificate IV in Work Health and Safety include:

- OHS representative;
- OHS leader;
- OHS advisory, or;
- OHS manager.

Course Duration: 0.5 years

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

COURSE STRUCTURE

To be awarded the BSB41419 Certificate IV in Work Health and Safety, a student must successfully complete a total of ten (10) units of competency, comprising of:

- five (5) core units, and;
- five (5) elective units, of which:

three (3) units must be selected from Group A, and; two (2) units may be selected as follows: both units may be selected from Group A, Group B or any currently endorsed Training Package qualification or accredited course at the same Australian Qualifications Framework (AQF) level, and; one (1) unit may be selected from a Certificate III or Diploma, from any currently endorsed Training Package qualification or accredited course. In addition, electives must be relevant to the work environment and the qualification, maintain the integrity of the AQF alignment, contribute to a valid, industry-supported vocational outcome as well as be approved by the Polytechnic.

CORE UNITS

BSBWHS412	Assist with workplace compliance with WHS laws	40
BSBWHS413	Contribute to implementation and maintenance of WHS consultation and participation processes	40

BSBWHS414	Contribute to WHS risk management	60	<ul style="list-style-type: none"> • coordinator;
BSBWHS415	Contribute to implementing WHS management systems	50	<ul style="list-style-type: none"> • leading hand; • supervisor, and;
BSBWHS416	Contribute to workplace incident response	40	<ul style="list-style-type: none"> • team leader.

ELECTIVE UNITS

Group A

BSBWRT401	Write complex documents	50
BSBWHS418	Assist with managing WHS compliance of contractors	30
BSBWHS419	Contribute to implementing WHS monitoring processes	60

Group B

BSBMGT401	Show leadership in the workplace	50
BSBSUS401	Implement and monitor environmentally sustainable work practices	40

Recognition of Prior Learning and/or Credit Transfers for Course Structure:

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate IV in Leadership and Management

Course Code:BSB42015

Campus:Industry, Footscray Nicholson.

About this course:Build your leadership skills for management and supervisory roles in a wide range of organisations and industries. This course will provide you with the skills and knowledge to operate as an individual in a business environment, as well as provide leadership and guidance to support others. You will learn how to:

- coordinate business resources;
- promote innovation in a team environment;
- implement and monitor WHS policies, procedures and programs to meet legislative requirements, as well as;
- undertake project work.

Note: Please note, this course is not available for general enrolments, it is available for industry partnerships only.

Course Objectives:This qualification reflects the role of individuals working as developing and emerging leaders and managers in a range of enterprise and industry contexts. As well as assuming responsibility for their own performance, individuals at this level provide leadership, guidance and support to others. They also have some responsibility for organising and monitoring the output of their team. They apply solutions to a defined range of predictable and unpredictable problems, and analyse and evaluate information from a variety of sources.

Careers:Possible career opportunities emerging from completing BSB42015 Certificate IV in Leadership and Management are:

Course Duration:0.5 years

Admission Requirements:Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

Selection Processes: Other/Not Applicable.

COURSE STRUCTURE

To be awarded BSB42015 Certificate IV in Leadership and Management, a student must successfully complete a total of twelve (12) units of competency, comprising of:

- four (4) core units, and;
- eight (8) elective units, of which:

four (4) units must be from Group A; four (4) units may be selected from Group A or Group B; one (1) unit may be selected from any currently endorsed training package at Certificate IV Level or above or any accredited course at Certificate IV level. Elective units must be relevant to the work environment and the qualification, maintain the integrity of the AQF alignment and contribute to a valid, industry-supported vocational outcome as well as be approved by the Polytechnic.

CORE UNITS

BSBLDR401	Communicate effectively as a workplace leader	40
BSBLDR402	Lead effective workplace relationships	50
BSBLDR403	Lead team effectiveness	50
BSBMGT402	Implement operational plan	40

ELECTIVE UNITS

Group A

BSBADM409	Coordinate business resources	30
BSBINN301	Promote innovation in a team environment	40
BSBLDR404	Lead a diverse workforce	50
BSBMGT403	Implement continuous improvement	40
BSBREL402	Build client relationships and business networks	50
BSBRISK401	Identify risk and apply risk management processes	50
BSBWHS401	Implement and monitor WHS policies, procedures and programs to meet legislative requirements	50
BSBWOR404	Develop work priorities	40

Group B		
BSBCMM401	Make a presentation	30
BSBCUS402	Address customer needs	50
BSBLE401	Develop teams and individuals	40
BSBPMG522	Undertake project work	60
Imported		
BSBREL401	Establish networks	35
BSBSMB404	Undertake small business planning	50

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate IV in Library and Information Services

Course Code:BSB42115

Campus:Footscray Nicholson.

About this course:Develop your research and customer services skills with a Certificate IV in Library and Information Services at Victoria University Polytechnic. This course will help you launch your career in the library, information and cultural services industry. You will develop industry-specific skills and gain a broad knowledge base for a wide variety of contexts. You will learn to:

- retrieve information;
- maintain catalogues;
- provide multimedia support;
- help customers access information;
- analyse and evaluate information, and;
- use social media tools for engagement.

You will also develop essential and transferable skills including evaluation, planning and problem solving. You will be prepared to provide leadership and guidance to others.

Course Objectives:This qualification reflects the role of individuals who use well developed skills and a broad knowledge base in a wide variety of contexts. They apply solutions to a defined range of unpredictable problems, and analyse and evaluate information from a variety of sources. They may provide leadership and guidance to others with some limited responsibility for the output of others.

Careers:Possible career opportunities emerging from the completion of BSB42115 Certificate IV in Library and Information Services.

- Client Services Officer;
- Digital Services Officer;
- Gallery Assistant or Officer;
- Information Services Assistant;

- Library Assistant or Officer, and;
- Museum Assistant or Officer.

Course Duration:1 year

Admission Requirements:Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

Selection Processes: Other/Not Applicable.

COURSE STRUCTURE

To be awarded BSB42115 Certificate IV in Library and Information Services, a student must successfully complete a total of fifteen (15) units of competency, comprising of:

- six (6) core units, and;
- nine (9) elective units, of which:

five (5) elective units must be selected from Group A; two (2) elective units must be selected from Group A and/or Group B; two (2) elective units may be selected from Group A, B and/or Group C or from any currently endorsed training package or accredited course at Certificate III, IV or Diploma level. Elective units must be relevant to the work environment and the qualification, maintain the integrity of the AQF alignment and contribute to a valid, industry-supported vocational outcome as well as be approved by the Polytechnic.

CORE UNITS

BSBCUS301	Deliver and monitor a service to customers	35
BSBIPR401	Use and respect copyright	50
BSBLDR403	Lead team effectiveness	50
BSBLIB303	Provide multimedia support	30
BSBLIB402	Consolidate and maintain industry knowledge	60
BSBWHS401	Implement and monitor WHS policies, procedures and programs to meet legislative requirements	50

ELECTIVE UNITS

Group A		
BSBLIB403	Complete a range of cataloguing activities	100
BSBLIB404	Use integrated library management systems	30
BSBLIB405	Assist customers to access information	40
BSBLIB406	Obtain information from external and networked sources	20
BSBLIB407	Search library and information databases	30

Group B

BSBEU401	Review and maintain a website	50
ICTWEB201	Use social media tools for collaboration and engagement	20
Group C		
ICTICT203	Operate application software packages	60
Imported		
BSBLIB503	Develop and promote activities, events and public programs	60

UNITS IN TRANSITION:

The following unit/s will not be offered to prospective students. These units are only available for current/continuing students.

Group A

BSBLIB201	Assist with circulation services	15
-----------	----------------------------------	----

Group C

BSBLIB305	Use established cataloguing tools	40
-----------	-----------------------------------	----

Imported

BSBLIB202	Process information resource orders	40
-----------	-------------------------------------	----

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Diploma of Business Administration

Course Code:BSB50415

Campus:Footscray Nicholson, Werribee.

About this course:Gain practical skills for the business sector and more, with a Diploma of Business Administration at the Polytechnic. You will learn to effectively manage the key administrative processes of a business, as well as gain knowledge in team and people management. This well-rounded course will give you skills in:

- planning and managing conferences;
- administrative systems;
- producing business documents;
- organising travel and meetings;
- project management;
- people management and support, and;
- team leadership.

You will also gain insight, into the various possible career paths that you could take, with these skills. When you graduate, you will be equipped with the confidence and skillset necessary to work in the business sector, managing a range of administration tasks.

Course Objectives:This qualification would apply to individuals with various job titles including administration managers, general office managers and office managers. Individuals in these roles may possess a sound theoretical knowledge base and use a range of specialised, technical or managerial competencies to plan, carry out and evaluate their own work and/or the work of a team.

Careers:Possible career opportunities emerging from the completion of BSB50415 Diploma of Business Administration includes:

- administration officer;
- personal assistant;
- receptionist;

administration manager;

- assistant manager, and;
- executive officer.

Course Duration:0.5 years

Admission Requirements:Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

COURSE STRUCTURE

To be awarded the BSB50415 Diploma of Business Administration, a student must successfully complete a total of eight (8) units of competency, comprising of:

- eight (8) elective units, of which:

five (5) units must be selected from Group A; three (3) units may be selected from Group B, or any currently endorsed training package or accredited course at the same qualification level; if not listed in the BSB50415 Diploma of Business Administration qualification, one (1) unit may be selected from either a Certificate IV or Advanced Diploma qualification. Elective units must be relevant to the work environment and the qualification, maintain the integrity of the AQF alignment and contribute to a valid, industry-supported vocational outcome as well as be approved by the Polytechnic.

ELECTIVE UNITS

- eight (8) core units, and;
- four (4) elective units, which may be selected from the elective units listed in the BSB51415 Diploma of Project Management qualification or any endorsed Training Package or accredited course at Diploma level or higher.

Electives must not include the choice of the unit BSBPMG522 Undertake project work. In addition, electives must be relevant to the work environment and the qualification, maintain the integrity of the AQF alignment, contribute to a valid, industry-supported vocational outcome as well as be approved by the Polytechnic.

CORE UNITS

BSBPMG511	Manage project scope	40
BSBPMG512	Manage project time	40
BSBPMG513	Manage project quality	40
BSBPMG514	Manage project cost	40
BSBPMG515	Manage project human resources	40
BSBPMG516	Manage project information and communication	40
BSBPMG517	Manage project risk	40
BSBPMG521	Manage project integration	60

ELECTIVE UNITS

BSBMGT516	Facilitate continuous improvement	60
BSBPMG519	Manage project stakeholder engagement	40
BSBWOR501	Manage personal work priorities and professional development	60
BSBWOR502	Lead and manage team effectiveness	60
Imported		
BSBLDR502	Lead and manage effective workplace relationships	50

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Diploma of Project Management

Course Code: BSB51415

Campus: Industry, Footscray Nicholson.

About this course: Develop the technical, organisational and personal skills needed to manage complex projects in dynamic environments. Project management involves planning, organising and assessing jobs, as well as managing the people and risks involved, in order to achieve specific outcomes. This course is designed for team leaders, frontline managers, individuals seeking to develop their skills or commence a career in project management and individuals from across a range of different industries who are or will be involved in project delivery. You will gain a sound theoretical knowledge base and use a range of specialised, technical and managerial competencies to initiate, plan, execute and evaluate your own work and/or the work of others. You will gain skills in how to manage project scope, time, quality, cost, human resources, information and communication, risk and integration. In addition, you will also gain knowledge on how to:

- Facilitate continuous improvement;
- Manage personal work priorities and professional development;
- Lead and manage team effectiveness, and;
- Lead and manage effective workplace relationships.

Careers in project management Project management skills are highly transferrable and sought after in every industry. Project management is growing in importance and demand across Australia. In Victoria, the extensive list of infrastructure projects currently underway and planned for the next 20 years supports the demand for these skills. Example career opportunities include:

- Project manager;
- Project team member, and;
- Project steering committee member.

Course Objectives: This qualification reflects the role of individuals who apply project management skills and knowledge. They may manage projects in a variety of contexts, across a number of industry sectors. They have project leadership and management roles and are responsible for achieving project objectives. They possess a sound theoretical knowledge base and use a range of specialised, technical and managerial competencies to initiate, plan, execute and evaluate their own work and/or the work of others.

Careers: Possible career opportunities emerging from the completion of BSB51415 Diploma of Project Management, include:

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Diploma of Leadership and Management

Course Code:BSB51918

Campus:Industry, Footscray Nicholson.

About this course:You will learn innovative approaches to managing people, projects, and teams in a wide range of industries and organisations. This course is designed for individuals who have considerable experience in an industry or vocational area. You may already be managing staff, or working towards a career as a manager. You will develop the skills and emotional intelligence to lead and manage:

- workplace relationships;
- effective teams and individuals;
- organisational change;
- people performance, and;
- professional development.

You will also gain a range of technical skills such as:

- operational plan management;
- finance and budgeting;
- organisational policy development;
- development of workplace learning, and;
- project management.

Course Objectives:This qualification reflects the role of individuals who apply knowledge, practical skills and experience in leadership and management across a range of enterprise and industry contexts. Individuals at this level display initiative and judgement in planning, organising, implementing and monitoring their own workload and the workload of others. They use communication skills to support individuals and teams to meet organisational or enterprise requirements. They plan, design, apply and evaluate solutions to unpredictable problems, and identify, analyse and synthesise information from a variety of sources.

Careers:Possible career opportunities emerging from the completion of BSB51918 Diploma of Leadership and Management include:

- Manager;
- Team Leader;
- Project Officer, and/or;
- Office Administrator.

Course Duration:0.5 years

Admission Requirements:Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

COURSE STRUCTURE

To be awarded the BSB51918 Diploma of Leadership and Management, a student must successfully complete a total of twelve (12) units of competency, comprising of:

- four (4) core units, and;
- eight (8) elective units, of which:

four (4) units must be selected from Group A; four (4) units may be selected from Group A or Group B; two (2) units may be selected from Diploma or above in the Business Services Training Package; one (1) unit may be selected from any currently endorsed training package or accredited course at Diploma level. Elective units must be relevant to the work environment and the qualification, maintain the integrity of the AQF alignment and contribute to a valid, industry-supported vocational outcome as well as be approved by the Polytechnic.

CORE UNITS

BSBLDR502	Lead and manage effective workplace relationships	50

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate III in Early Childhood Education and Care

Course Code:CHC30113

Campus:Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

About this course: Start your career in early childhood education and care today. Become a qualified Early Childhood Co-Educator (Level 3), and gain the knowledge and skills related to childhood development and caring for children for example, planning play activities, which contribute towards a child's cognitive development. You will consolidate your skills and knowledge during this course, by undertaking two practical placements, in long day-care settings.

Course Objectives: This qualification reflects the role of workers in a range of early childhood educational settings who work within the requirements of the Education and Care Services National Regulations and the National Quality Standard. They support the implementation of an approved learning framework, and support children's wellbeing, learning and development. Depending on the setting, educators may work under direct supervision or autonomously. Under the Education and Care Services National Law (2011) the Australian Children's Education and Care Quality Authority (ACECQA) publishes lists of approved early childhood education and care qualifications and information regarding regulatory requirements here: www.acecqa.gov.au

- early childhood co-educator;
- outside school hours care assistant;
- playgroup supervisor;
- recreation assistant;
- family day care worker;
- nanny, and;
- reliever.

Careers:

Course Duration: 0.5 years

Admission Requirements: Students will be required to demonstrate they have the capacity to work with children and families in the highly demanding field of early childhood as set out by the Australian Children's Education and Care Quality Authority (ACECQA) and the Education and Care Services National Regulations by attending an interview. This may be conducted individually or as a group, at the discretion of the Polytechnic. Further information can be found: <https://www.acecqa.gov.au/> Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs. For employment and practical placement purposes, this vocational sector typically requires a current and satisfactory Police Record Check and Working with Children Check. Failure to provide the required documents in the timeframe specified

by the Course Coordinator, means you will be unable to undertake practical placement in a workplace and therefore not eligible to progress in this course. The following are suggested sites you could visit to obtain these checks: - Police Record Check - http://www.police.vic.gov.au/content.asp?Document_ID=274 - Working with Children Check - <http://www.workingwithchildren.vic.gov.au/>

Admission Requirements International: Completion of an Australian Year 11 or equivalent. Students will be required to demonstrate they have the capacity to work with children and families in the highly demanding field of early childhood as set out by the Australian Children's Education and Care Quality Authority (ACECQA) and the Education and Care Services National Regulations by attending an interview. This may be conducted individually or as a group, at the discretion of the Polytechnic. Further information can be found: <https://www.acecqa.gov.au/> IELTS: Overall score of 5.5 (no band less than 5.0).

Selection Processes: Other/Not Applicable.

COURSE STRUCTURE

To be awarded CHC30113 Certificate III in Early Childhood Education and Care, a student must successfully complete a total of eighteen (18) units of competency, comprising of:

- fifteen (15) core units, and;
- three (3) elective units of which:

at least one (1) unit must be selected from the CHC30113 Certificate III in Early Childhood Education and Care qualification, and; up to two (2) units may be selected from any endorsed training package or accredited courses – these units must be relevant to the work outcome. All electives chosen must support the overall integrity of the AQF level of this qualification and contribute to a valid, industry-supported vocational outcome as well as be approved by the Polytechnic.

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate III in Individual Support

Course Code:CHC33015

Campus:Footscray Nicholson, St Albans, Werribee, Sunshine.

About this course:This course provides you with foundational skills and knowledge to work in the aged, disability, home and community care industry. You will learn to work with individuals to support their independence and wellbeing, in their homes or in community settings. You can choose to specialise in the following areas:

- ageing;
- home and community, and;
- disability.

Through classroom learning, e-learning and a practical work placement, you will learn to:

- provide individualised support, both physical and social;
- maintain personal care and other activities;
- recognise healthy body systems, and;
- work with diverse people.

You will also learn valuable skills in following safe work practices and working legally and ethically.

Course Objectives:This qualification reflects the role of workers in the community and/or residential setting who follow an individualised plan to provide person-centred support to people who may require support due to ageing, disability or some other reason. Work involves using discretion and judgement in relation to individual support as well as taking responsibility for individual outputs. Workers have a range

of factual, technical and procedural knowledge, as well as some theoretical knowledge of the concepts and practices required to provide person-centred support.

Careers:Possible career opportunities emerging from the completion of CHC33015 Certificate III in Individual Support include:

- Home care assistant;
- Care assistant;
- Care worker;
- Community care worker;
- Personal care assistant;
- Residential care worker;
- Support worker;
- Disability Support Worker, and;
- NDIS Disability Support worker.

Course Duration:0.5 years

Admission Requirements:Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs. For employment and practical placement purposes, this vocational sector typically requires a current and satisfactory Police Record Check. Failure to provide the required documents in the time frame specified by the Course Coordinator, means you will be unable to undertake practical placement in a workplace and therefore not eligible to progress in this course. The following is a suggested site you could visit to obtain this check: - Police Record Check- <http://www.crimcheck.org.au/check/vuhealthdisabilityagedcare>

Selection Processes: Other/Not Applicable.

COURSE STRUCTURE

To be awarded CHC33015 Certificate III in Individual Support, a student must successfully complete a total of thirteen (13) units of competency, consisting of:

- seven (7) core units, and;
- six (6) elective units, consisting of:
 - at least four (4) units from the electives listed within the CHC33015 Certificate III in Individual Support qualification, of which, at least two (2) units must be from those units listed under Groups A, B or C;
 - up to two (2) units from the electives listed within the CHC33015 Certificate III in Individual Support qualification, any endorsed training package or accredited course.

All electives chosen must contribute to a valid, industry-supported vocational outcome as well as be approved by the Polytechnic. Specialisations The Polytechnic currently offer the following specialisation(s): - Ageing; - Ageing, Home and Community, and; - Disability.

Specialisation: Ageing

To be awarded this specialisation, the following training package rules must be adhered to:

- all Group A units must be selected.

CORE UNITS		
CHCCCS015	Provide individualised support	30

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate IV in Education Support

Course Code:CHC40213

Campus:Industry, Footscray Nicholson, St Albans, Werribee, Sunshine.

About this course: Gain the skills and confidence to provide support in classrooms with a Certificate IV in Education Support at the Polytechnic. This course will provide you with essential skills to work collaboratively with teachers and students in a wide variety of educational environment settings, such as school and community settings. You will learn about:

- child development;
- supporting students' literacy and numeracy learning;
- assisting students with disabilities;
- autism spectrum disorder, and;
- supporting students who are at risk.

Through classroom and online learning as well as practical work placement, you will lay the groundwork for a rewarding career in education. Upon graduation, you will have the confidence, practical skills and knowledge to support teachers in public schools, independent schools and community education.

Course Objectives: This qualification reflects the role of workers in a range of education settings, including public and independent schools and community education settings, who provide assistance and support to teachers and students under broad-based supervision.

Careers: Possible career opportunities emerging from the completion of CHC40213 Certificate IV in Education Support, include:

- Education Assistant;
- Support Worker (working with children with disabilities);
- Teacher Assistant;

- Teacher Aide;
- Aboriginal and/or Torres Strait Islander education worker;
- Indigenous Language and Culture Teaching Assistant;
- Integration Aid;
- Multicultural Aid, and;
- Integration Coordinator.

Course Duration: 9 months

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs. For employment and practical placement purposes, this vocational sector typically requires a current and satisfactory Working with Children Check. Failure to provide the required documents in the time frame specified by the Course Coordinator, means you will be unable to undertake practical placement in a workplace and therefore not eligible to progress in this course. Visit the following site: - Working with Children Check - <http://www.workingwithchildren.vic.gov.au/>

Selection Processes: Other N/A

COURSE STRUCTURE

To be awarded CHC40213 Certificate IV in Education Support, a student must successfully complete a total of seventeen (17) units of competency, comprising of:

- twelve (12) core units, and;
- five (5) elective units, of which:

at least three (3) units must be selected from the electives listed in the CHC40213 Certificate IV in Education Support qualification, and; up to two (2) units may be selected from any endorsed training package or accredited course relevant to the work outcome. All electives chosen must contribute to a valid, industry-supported vocational outcome as well as be approved by the Polytechnic.

CHCEDSO19	Support students' mathematics learning	45
CHCEDSO20	Support students' literacy learning	40
CHCEDSO23	Supervise students outside the classroom	40
CHCEDSO31	Provide support to students with autism spectrum disorder	50
HLTAID003	Provide first aid	18

Certificate IV in Youth Work

Course Code:CHC40413

Campus:Footscray Nicholson, Werribee, Sunshine.

About this course:Begin your career making a difference to the lives of young people with a Certificate IV in Youth Work at the Polytechnic. This course will provide you with foundational skills to work with and support young people for positive outcomes. You will learn to develop and facilitate programs that address their social, behavioural, health, welfare, developmental and protection needs. You will have the opportunity to undertake a community or industry project, which will help consolidate your knowledge. You will graduate with practical skills and knowledge in:

- effective communication;
- child protection;
- assessing youth at risk;
- advocacy and empowerment;
- community education and group activities;
- legal and ethical frameworks, and;
- workplace safety and first aid.

Course Objectives:This qualification reflects the role of workers who develop and facilitate programs for young people through a range of community-based programs designed to address the social, behavioural, health, welfare, developmental and protection needs of young people.

Careers:Possible career opportunities emerging from the completion of CHC40413 Certificate IV in Youth Work include:

- Community Development Worker (Youth);
- Youth and Family Resource Officer;
- Indigenous Youth Worker;
- Youth and Family Service Worker;
- Recreational Youth Activities Worker;
- Youth Case Worker;
- Residential Care Worker;
- Youth Housing Support Worker;

- Support Worker Residential;
- Youth Worker, and;
- Youth Alcohol and Other Drugs Worker.

Course Duration: 1 year

Admission Requirements:Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs. For employment and practical placement purposes, this vocational sector typically requires a current and satisfactory Police Record Check and Working with Children Check. Failure to provide the required documents in the timeframe specified by the Course Coordinator, means you will be unable to undertake practical placement in a workplace and therefore not eligible to progress in this course. The following are suggested sites you could visit to obtain these checks: - Police Record Check - http://www.police.vic.gov.au/content.asp?Document_ID=274 - Working with Children Check - <http://www.workingwithchildren.vic.gov.au/>

Selection Processes: Other/Not Applicable.

COURSE STRUCTURE

To be awarded CHC40413 Certificate IV in Youth Work, a student must successfully complete a total of eighteen (18) units of competency, comprising of:

- fourteen (14) core units, and;
- four (4) elective units of which:

two (2) units must be selected from the electives listed in the CHC40413 Certificate IV in Youth Work qualification; two (2) units may be selected from any endorsed training package or accredited course relevant to the work outcome. All electives chosen must contribute to a valid, industry-supported vocational outcome as well as be approved by the Polytechnic.

CHCPRT009	Provide primary residential care	90
Imported		
CHCPRT010	Work with children and young people with complex trauma and attachment issues and needs	75
CHCYTH005	Develop and implement procedures to enable young people to address their needs	55

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate IV in Community Services

Course Code:CHC42015

Campus:Industry, Footscray Nicholson, Werribee, Sunshine.

About this course: Prepare yourself for a diverse and rewarding career in the community sector with a Certificate IV in Community Services at the Polytechnic. You will gain a strong practical and theoretical base in welfare and social justice to work in a range of community support services. You will be ready to provide support, education, advocacy or interventions for individual clients, groups or communities. This course will teach you to provide holistic support in residential and community settings. You will learn to respond to social, emotional, psychological and practical needs. You will gain industry-specific knowledge and skills including:

- community development;
- relationship building;
- working with diverse people;
- conflict resolution and problem solving;
- community education and engagement;
- facilitating the interests and rights of clients;
- organising group activities and projects, and;
- promoting awareness of domestic and family violence.

Course Objectives: This qualification reflects the role of community service workers who design and deliver person-centred services to individuals and/or groups.

Workers may provide support, advocacy or interventions to individual clients, groups or communities across a range of services.

Careers: Possible career opportunities emerging from the completion of CHC42015 Certificate IV in Community Services include:

- Case Worker;
- Community Services Worker;
- Community Support Worker;
- Domestic Violence Worker;
- Early Intervention Homelessness Worker;
- Family support worker;
- Health Education Officer;
- Outreach Officer;
- Support Worker;
- Welfare Support Worker, and;
- Welfare Worker.

Course Duration: 1 year

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs. For employment and practical placement purposes, this vocational sector typically requires a current and satisfactory Police Record Check and Working with Children Check. Failure to provide the required documents in the timeframe specified by the Course Coordinator, means you will be unable to undertake practical placement in a work place and therefore not eligible to progress in this course. The following are suggested sites you could visit to obtain these checks: - Police Record Check - http://www.police.vic.gov.au/content.asp?Document_ID=274 - Working with Children Check - <http://www.workingwithchildren.vic.gov.au/>

Selection Processes: Other/Not Applicable.

COURSE STRUCTURE

To be awarded CHC42015 Certificate IV in Community Services, a student must successfully complete a total of fifteen (15) units of competency, comprising of:

- seven (7) core units, and;
- eight (8) elective units, consisting of:
- at least six (6) units from the electives listed in the CHC42015 Certificate IV in Community Services qualification;
- up to two (2) units from the electives listed in the CHC42015 Certificate IV in Community Services qualification, any endorsed training package or accredited course.

Any combination of electives that meets the rules above can be selected for the award of the CHC42015 Certificate IV in Community Services. Where appropriate, electives may be packaged to provide a qualification with a specialisation. Electives must be industry relevant as well as be approved by the Polytechnic. Specialisations The Polytechnic, currently do not offer specialisations for this qualification.

CHCCDE004	Implement participation and engagement strategies	85
CHCCDE007	Develop and provide community projects	70
CHCCOM001	Provide first point of contact	35
HLTAID003	Provide first aid	18

Imported

CHCDFV003	Promote community awareness of domestic and family violence	50
CHCGRP001	Support group activities	30

Certificate IV in Ageing Support

Course Code:CHC43015

Campus:Industry, Footscray Nicholson, St Albans, Werribee, Sunshine.

About this course: Learn to support older people with skill and dignity with a Certificate IV in Ageing Support at Victoria University Polytechnic. This course, created in consultation with the industry, will offer increased career opportunities in aged and community care. You will learn to care for the interests, rights and empowerment of clients. You will gain knowledge and experience in providing support to older people with complex needs, and working with groups of older people. This course includes training in:

- palliative and dementia care;
- falls prevention and interventions for clients at risk;
- service planning and delivery, and;

- elderly care health and hygiene.

Participating in a twenty (20) day work placement will give you practical industry experience as well as on-the-job confidence. You will also further develop your communication skills and your ability to develop and maintain relationships and partnerships.

Course Objectives: This qualification reflects the role of support workers who complete specialised tasks and functions in aged services, either in residential, home or community-based environments. Workers will take responsibility for their own outputs within defined organisation guidelines and maintain quality service delivery through the development, facilitation and review of individualised service planning and delivery.

Careers: Possible career opportunities emerging from the completion of CHC43015 Certificate IV in Ageing Support include:

- home care assistant;
- care assistant;
- care worker;
- community care worker;
- personal care assistant, and;
- residential care worker.

Course Duration: 1 year

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs. For employment and practical placement purposes, this vocational sector typically requires a current and satisfactory Police Record Check. Failure to provide the required documents in the timeframe specified by the Course Coordinator, means you will be unable to undertake practical placement in a workplace and therefore not eligible to progress in this course. The following is a suggested site you could visit to obtain this check: - Police Record Check - http://www.police.vic.gov.au/content.asp?Document_ID=274

Selection Processes: Other/Not Applicable.

COURSE STRUCTURE

To be awarded CHC43015 Certificate IV in Ageing Support, a student must successfully complete a total of eighteen (18) units of competency, comprising of:

- fifteen (15) core units, and;
- three (3) elective units, consisting of:

at least two (2) units from the electives listed in the CHC43015 Certificate IV in Ageing Support qualification, and; up to one (1) unit from the electives listed in the CHC43015 Certificate IV in Ageing Support qualification or any endorsed training package or accredited course – these units must be relevant to the work outcome. All electives chosen must contribute to a valid, industry-supported vocational outcome as well as be approved by the Polytechnic.

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate IV in Disability

Course Code:CHC43115

Campus:Industry, Footscray Nicholson, St Albans, Werribee, Sunshine, Altona Meadows Library and Learning Centre..

About this course:This industry ready qualification will provide you with the essential theoretical and practical skills necessary to provide high quality, person-centred training and support for people with disabilities. You will gain practical experience in:

- caring for the interests, rights and empowerment of clients;

- facilitating community participation and social inclusion;
- enhancing the client's ability to achieve greater independence;
- supporting individuals with autism spectrum disorder;
- working with people with mental health issues;
- working with diverse groups, and;
- following safe work practices.

Course Objectives:This qualification reflects the role of workers in a range of community settings and clients' homes, who provide training and support in a manner that empowers people with disabilities to achieve greater levels of independence, self-reliance, community participation and wellbeing. Workers promote a person-centred approach, work without direct supervision and may be required to supervise and/or coordinate a small team.

Careers:Possible career opportunities emerging from the completion of CHC43115 Certificate IV in Disability include:

- Disability Support Worker;
- Local Area Coordinator;
- Positive Behaviour Support Worker;
- NDIS Support Coordinator;
- Residential Support Worker;
- Team Leader – Disability Services, and;
- Disability Employment Services Consultant.

Course Duration: 1 year

Certificate IV in Mental Health

Course Code:CHC43315

Campus:Footscray Nicholson, Werribee, City Flinders, City King St, Sunshine.

About this course:Develop the skills for a rewarding career in the fast-growing health industry, working with people experiencing mental health issues. Designed by industry professionals, the Certificate IV in Mental Health will give you the foundation knowledge and skills to provide a wide range of services, including establishing self-directed recovery relationships and providing recovery oriented mental health services. Upon completion of this course you will have gained confidence and knowledge in:

- dual diagnosis and co-existing needs;
- providing mental health services;
- mental health recovery approaches;
- AOD assessments;
- networking and working collaboratively;
- understanding and working with diversity, and;
- legal and ethical issues.

Participating in a 160 hours of work placement will give you practical industry experience as well as on-the-job confidence. You will also further develop your communication skills and your ability to develop and maintain relationships and partnerships.

Course Objectives:This qualification reflects the role of workers who provide self-directed recovery oriented support for people affected by mental illness and psychiatric disability. Work involves implementing community based programs and activities focusing on mental health, mental illness and psychiatric disability. Work is undertaken in a range of community contexts such as community based non-

government organisations; home based outreach; centre-based programs; respite care; residential services, rehabilitation programs; clinical settings; or supporting people in employment. Work is carried out autonomously under the broad guidance of other practitioners and professionals.

Careers:Possible career opportunities emerging from the completion of CHC43315 Certificate IV in Mental Health:

- Case Worker;
- Mental Health Worker;
- Community Support Worker, and;
- Family Support Worker.

Course Duration: 1 year

Admission Requirements:Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs. For employment and practical placement purposes, this vocational sector typically requires a current and satisfactory Police Record Check and Working with Children Check. Failure to provide the required documents in the timeframe specified by the Course Coordinator, means you will be unable to undertake practical placement in a work place and therefore not eligible to progress in this course. The following are suggested sites you could visit to obtain these checks: - Police Record Check - http://www.police.vic.gov.au/content.asp?Document_ID=274 - Working with Children Check - <http://www.workingwithchildren.vic.gov.au/>

COURSE STRUCTURE

To be awarded the CHC43315 Certificate IV in Mental Health, a student must successfully complete a total of fifteen (15) units of competency, comprising of:

- eleven (11) core units, and;
- four (4) elective units, of which:
- at least two (2) units must be selected from the electives listed in the CHC43315 Certificate IV in Mental Health qualification, including at least one (1) unit from the At Risk group, and;
- up to two (2) units may be selected from any endorsed training package or accredited course – these units must be relevant to the work outcome.

All electives chosen must contribute to a valid, industry-supported vocational outcome as well as be approved by Victoria University Polytechnic.

CORE UNITS

CHCDIV001	Work with diverse people	40

Diploma of Early Childhood Education and Care

Course Code:CHC50113

Campus:Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

About this course: Gain the skills and qualification to work at a high level in children's services with a Diploma of Early Childhood Education and Care at Victoria University Polytechnic. You will develop skills in providing care and education to children, with an emphasis on play-based learning. You will learn to facilitate learning and play in order to enable children to achieve developmental outcomes. This practical course will prepare you to enter a rewarding industry where you will provide education and care to children during their most influential years. It includes five work placements and a first aid course. Upon completion, you will be a qualified early childhood educator with skills and knowledge in:

- childhood development (aesthetic, creative, physical);
- planning for children with additional needs;
- networking and family partnerships, and;
- first aid, health and safety.

Course Objectives: This qualification reflects the role of early childhood educators who are responsible for designing and implementing curriculum in early childhood education and care services. In doing so, they work to implement an approved

learning framework within the requirements of the Education and Care Services National Regulations and the National Quality Standard. They may have responsibility for supervision of volunteers or other staff. Under the Education and Care Services National Law (2011) the Australian Children's Education and Care Quality Authority (ACECQA) publishes lists of approved early childhood education and care qualifications and information regarding regulatory requirements here: www.acecqa.gov.au.

Careers: At the completion of CHC50113 Diploma of Early Childhood Education and Care, you will be able to explore the following careers:

- Children's Services Co-ordinator;
- Family Day Care Co-ordinator;
- Educational Leader or Room Leader in a service;
- Early Childhood Educator;
- Playgroup Co-ordinator;
- Assistant Director of Early Childhood Services;
- Early Childhood Educator - Team Leader;
- Early Childhood Educator - Recreation;
- Reliever in Early Childhood Programs;
- Nanny, and;
- deliver three (3) year old kinder program.

Course Duration: 1.5 years

Admission Requirements: Students will be required to demonstrate they have the capacity to work with children and families in the highly demanding field of early childhood as set out by the Australian Children's Education and Care Quality Authority (ACECQA) and the Education and Care Services National Regulations by participating in an interview. This may be conducted individually or as a group, at the discretion of the Polytechnic. Further information can be found: <https://www.acecqa.gov.au/>. Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs. For employment and practical placement purposes, this vocational sector typically requires a current and satisfactory Police Record Check and Working with Children Check. Failure to provide the required documents in the timeframe specified by the Course Coordinator, means you will be unable to undertake practical placement in a workplace and therefore not eligible to progress in this course. The following are suggested sites you could visit to obtain these checks: - Police Record Check - http://www.police.vic.gov.au/content.asp?Document_ID=274 - Working with Children Check - <http://www.workingwithchildren.vic.gov.au/>

Admission Requirements International: Completion of an Australian Year 12 or equivalent. Students will be required to demonstrate they have the capacity to work with children and families in the highly demanding field of early childhood as set out by the Australian Children's Education and Care Quality Authority (ACECQA) and the Education and Care Services National Regulations by participating in an interview. This may be conducted individually or as a group, at the discretion of the Polytechnic. Further information can be found: <https://www.acecqa.gov.au/> IELTS 5.5 or equivalent. For employment and practical placement purposes, this vocational sector typically requires a current and satisfactory Police Record Check and Working with Children Check prior to commencing practical placements. Failure to provide the required documents in the timeframe specified by the Course Coordinator, means you will be unable to undertake practical placement in a workplace and therefore not

eligible to progress in this course. The following are suggested sites you could visit to obtain these checks: - Police Record Check -

http://www.police.vic.gov.au/content.asp?Document_ID=274 - Working with Children Check - <http://www.workingwithchildren.vic.gov.au/>

Selection Processes: Interview, Other/Not Applicable.

COURSE STRUCTURE

To be awarded CHC50113 Diploma of Early Childhood Education and Care, a student must successfully complete a total of twenty-eight (28) units of competency, consisting of:

- twenty-three (23) core units, and;
- five (5) elective units, of which:

at least two (2) must be selected from the elective units listed below, and; up to three (3) units may be selected from any endorsed training package or accredited course relevant to the work outcome. All electives chosen must support the overall integrity of the AQF level of this qualification and contribute to a valid, industry-supported vocational outcome and must be in accordance with the packaging rules specified in CHC Community Services Training Package as well as be approved by the Polytechnic.

CORE UNITS

CHCECE001	Develop cultural competence	70

Diploma of Community Services

Course Code:CHC52015

Campus:Footscray Nicholson, Werrbee.

About this course:Gain the skills, knowledge and understanding to work in the community welfare sector with a Diploma of Community Services at Victoria University Polytechnic. This course will enhance your existing knowledge in direct service work and client support so that you can make a genuine difference in people's lives. Students will gain the skills, knowledge and understanding to work in the community services sector with a Diploma of Community Services at Victoria University Polytechnic. This course will enhance your existing knowledge in direct service work and client support so that you can make a genuine difference in people's lives. You will learn to develop and deliver programs and services that meet various needs of individuals and families. We will train you to take a holistic approach by providing you with the knowledge to work with a diverse range of people, using a case management approach. You will also learn other skills such as advocacy, counselling and group work. As part of your studies, you will gain valuable practical experience through undertaking a fieldwork placement.

Course Objectives:This qualification reflects the roles of community services, case management and social housing workers involved in the managing, co-ordinating and/or delivering of person-centred services to individuals, groups and communities. At this level, workers have specialised skills in community services and work autonomously under broad directions from senior management. Workers are usually providing direct support to individuals or groups of individuals. Workers may also

have responsibility for the supervision of other workers and volunteers and/or case management; program coordination or the development of new business opportunities. Note: The Statutory & Forensic Child, Youth & Family Welfare specialisation, must be achieved in order to meet the minimum education requirements for child protection and youth justice practice in Victoria. In addition, to meet the minimum education requirements for entry into child protection practice in Victoria, diploma qualifications must be approved by the Australian Community Workers Association (ACWA), who mandate students must complete 400 hours of work placement.

Careers:The community services sector is one of Australia's fastest growing sectors, and is expected to continue growing. The Diploma of Community Services from Victoria University Polytechnic can help you get your foot in the door, with an emphasis on the skills required to be an effective Community Services worker. Working in community services is demanding but rewarding, and offers diverse opportunities. You could work in welfare organisations, government departments or not-for-profit organisations across a range of areas including:

- Homelessness;
- Family and domestic violence;
- Child protection;
- Employment support;
- Advocacy;
- Group facilitator;
- Community corrections;
- Case worker;
- Client service assessor, and;
- Community services worker.

Course Duration: 2 years

Admission Requirements:Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs. Students are required to attend a face to face group interview and pre-training review on campus. For employment and practical placement purposes, this vocational sector typically requires a current and satisfactory Police Record Check and Working with Children Check. Failure to provide the required documents in the timeframe specified by the Course Coordinator, means you will be unable to undertake practical placement in a workplace and therefore not eligible to progress in this course. The following are suggested sites you could visit to obtain these checks: - Police Record Check - http://www.police.vic.gov.au/content.asp?Document_ID=274 - Working with Children Check - <http://www.workingwithchildren.vic.gov.au/>

Selection Processes: OtherNot Applicable.

COURSE STRUCTURE

To be awarded CHC52015 Diploma of Community Services, a student must successfully complete a total of sixteen (16) units of competency, consisting of:

- eight (8) core units, and;
- eight (8) elective units, of which:

six (6) units must be selected from the electives listed in the CHC52015 Diploma of Community Services qualification, and; two (2) units may be selected from the electives listed in the CHC52015 Diploma of Community Services qualification or any endorsed training package or accredited course – these units must be relevant to the work outcome. All electives chosen must contribute to a valid, industry-supported vocational outcome as well as be approved by the Polytechnic.

CORE UNITS

CHCCCS007	Develop and implement service programs	100
CHCCOM003	Develop workplace communication strategies	100
CHCDEVO02	Analyse impacts of sociological factors on clients in community work and services	100
CHCDIV003	Manage and promote diversity	80
CHCLEG003	Manage legal and ethical compliance	80
CHCMGT005	Facilitate workplace debriefing and support processes	120
CHCPRP003	Reflect on and improve own professional practice	120
HLTWHS004	Manage work health and safety	40

ELECTIVE UNITS

CHCADV005	Provide systems advocacy services	90
CHCCCS004	Assess co-existing needs	80
CHCCDE011	Implement community development strategies	70
CHCCSL003	Facilitate the counselling relationship and process	120
CHCCSM005	Develop, facilitate and review all aspects of case management	75
CHCDEVO01	Confirm client developmental status	60
CHCGRP002	Plan and conduct group activities	70

Imported Electives

CHCDFV003	Promote community awareness of domestic and family violence	50
-----------	---	----

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the training package and be assessed as appropriate by the Polytechnic.

Diploma of Community Development

Course Code:CHC52115

Campus:Footscray Nicholson, Werribee, Sunshine.

About this course: Help create better outcomes for communities with a Diploma of Community Development at Victoria University Polytechnic. This course will provide you with the theoretical knowledge and skills required for leadership in the community sector. You will learn to work in partnership with communities to build their capacity, resilience and self-determination. You will gain the tools to educate the public through programs on health advocacy and community consultation. You will develop specific community development skills as well as broad skills for community services work, such as:

- advocacy;
- facilitation;
- needs assessment, and;
- empowerment.

As part of your studies, you will undertake a fieldwork placement and an industry project. You will even have the opportunity to undertake your placement in an international location; in 2016, students went to Malaysia. These opportunities will give you valuable practical experience and on-the-job confidence.

Course Objectives: This qualification reflects the role of community services workers who manage the development and delivery of programs that build capacity of communities to influence and guide their own future through public social change processes. At this level, workers have specialised skills with complexity in the range and choices of actions required. Workers will generally have responsibility for the supervision of other workers and volunteers. This work may be undertaken through organisations working across a range of social, environment, health, economic, arts and culture, recreation sectors.

Careers: Possible career opportunities emerging from the completion of CHC52115 Diploma of Community Development include:

- community development officer;
- community housing resources worker;
- neighbourhood centre manager, and;
- project manager.

Course Duration: 1.5 years

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs. For employment and practical placement purposes, this vocational sector typically requires a current and satisfactory Police Record Check and Working with Children Check. Failure to provide the required documents in the timeframe specified by the Course Coordinator, means you will be unable to undertake practical placement in a workplace and therefore not eligible to progress in this course. The following are suggested sites you could visit to obtain these checks: - Police Record Check -

http://www.police.vic.gov.au/content.asp?Document_ID=274 - Working with Children Check - <http://www.workingwithchildren.vic.gov.au/>

Selection Processes: Other/Not Applicable.

COURSE STRUCTURE

To be awarded CHC52115 Diploma of Community Development, a student must successfully complete a total of fourteen (14) units of competency, consisting of:

- eight (8) core units, and;
- six (6) elective units, of which:

at least three (3) units must be selected from the electives listed in the CHC52115 Diploma of Community Development qualification, and; up to three (3) units can be selected from the electives listed in the CHC52115 Diploma of Community Development qualification or any endorsed training package or accredited course - these units must be relevant to the work outcome. All electives chosen must contribute to a valid, industry-supported vocational outcome as well as be approved by the Polytechnic.

CORE UNITS

CHCCDE002	Develop and implement community programs	125
CHCCDE008	Support community action	90
CHCCDE009	Develop and support community leadership	90
CHCCDE010	Develop and lead community engagement strategies to enhance participation	70
CHCCDE011	Implement community development strategies	70
CHCCDE012	Work within organisation and government structures to enable community development outcomes	95
CHCDIV003	Manage and promote diversity	80
HLTWHS003	Maintain work health and safety	40

ELECTIVE UNITS

CHCADV005	Provide systems advocacy services	90
CHCCSL003	Facilitate the counselling relationship and process	120
CHCGRP002	Plan and conduct group activities	70
CHCPRP003	Reflect on and improve own professional practice	120
Imported		
CHCDEV002	Analyse impacts of sociological factors on clients in community work and services	100
CHCDFV003	Promote community awareness of domestic and family violence	50

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the training package and be assessed as appropriate by the Polytechnic.

Advanced Diploma of Community Sector Management

Course Code:CHC62015

Campus:Industry, Footscray Nicholson.

About this course: Develop the specialist skills to put you at the forefront of community sector management. In this course you will develop the skills required to manage services, departments and projects in a range of community organisations and government services which may include:

- housing;
- children's services;
- alcohol and other drugs;
- mental health;
- disability, and;
- aged and community care.

Areas of study include:

- risk management;
- finances;
- human resources;
- occupational health and safety processes, and;
- change & innovation.

Course Objectives: This qualification reflects the role of workers who are middle managers or managers across a range of community sector organisations. These people work independently and report to executive management, directors or boards of management. They undertake a range of functions requiring the application of knowledge and skills to achieve results in line with the organisation's goals and strategic directions. At this level, workers have responsibility for planning and monitoring service delivery, recruitment and performance management of other paid or unpaid workers, managing risk and contributing to continuous improvement within the scope of their specific role. This may include management of a specific programs or project, or broader management of a community-based organisation, early childhood education service, not-for-profit organisation or community centre. No licensing, legislative, regulatory or certification requirements apply to this qualification at the time of publication.

Careers: Possible career opportunities emerging from the completion of CHC62015 Advanced Diploma of Community Sector Management includes:

- coordinator;
- centre manager;
- program area manager;
- community development manager;
- community services manager;
- volunteer program manager;
- community care manager, and;
- community education manager.

Course Duration: 1 year

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs. For employment and practical placement purposes, this vocational sector typically requires a current and satisfactory Police Record Check and Working with Children Check. Failure to provide the required documents in the timeframe specified by the Course Coordinator, means you will be

unable to undertake practical placement in a workplace and therefore not eligible to progress in this course. The following are suggested sites you could visit to obtain these checks: - Police Record Check - http://www.police.vic.gov.au/content.asp?Document_ID=274 - Working with Children Check - <http://www.workingwithchildren.vic.gov.au/>

Selection Processes: OtherN/A

COURSE STRUCTURE

To be awarded CHC62015 Advanced Diploma of Community Sector Management, a student must successfully complete a total of thirteen (13) units of competency, comprising of:

- eight (8) core units, and;
- five (5) elective units, of which:

at least two (2) units must be selected from the electives listed in the CHC62015 Advanced Diploma of Community Sector Management qualification; up to three (3) units may be selected from any endorsed training package or accredited course. These units must be relevant to the work outcome. All electives chosen must contribute to a valid, industry-supported vocational outcome as well as be approved by the Polytechnic.

CORE UNITS

BSBFIM601	Manage finances	80
BSBINN601	Lead and manage organisational change	60
BSBMGT608	Manage innovation and continuous improvement	70
BSBRISK501	Manage risk	60
CHCDIV003	Manage and promote diversity	80
CHCLEG003	Manage legal and ethical compliance	80
CHCMGT001	Develop, implement and review quality framework	110
CHCMGT003	Lead the work team	100
ELECTIVE UNITS		
BSBHRM602	Manage human resources strategic planning	60
CHCCOM003	Develop workplace communication strategies	100
CHCMGT005	Facilitate workplace debriefing and support processes	120
CHCPOL002	Develop and implement policy	90
CHCPRP003	Reflect on and improve own professional practice	120

Certificate II in Construction Pathways

Course Code: CPC20211

Campus: Werribee, Sunshine.

About this course: Looking to enter a trades apprenticeship or get a taste of the construction industry? The Certificate II in Construction Pathways at VU Polytechnic

is the ideal starting point. This course is designed to introduce you to the range of recognised trades in the construction industry and provides credit into a construction industry Australian Apprenticeship. While undertaking this course you will gain strong foundation skills to help you increase your employment opportunities in the sector. You will have knowledge of:

- occupational health and safety standards and procedures;
- communication;
- problem solving;
- working in a team, and;
- basic hand and technical skills.

During this course you will be able to undertake elective options that provide an introduction to a trade occupation of your choice such as carpentry, joinery, shopfitting, bricklaying, concreting and plastering.

Course Objectives: This qualification provides a pathway to the primary trades in the construction industry with the exception of plumbing. Trade outcomes are predominantly achieved through an Australian Apprenticeship and this Certificate II allows for inclusion of skills suited for entry to off-site occupations, such as joinery and shopfitting as well as carpentry, bricklaying and other occupations in general construction. This Certificate II is designed to introduce learners to the recognised trade callings in the construction industry and provide meaningful credit in a construction industry Australian Apprenticeship. The qualification has core unit of competency requirements that are required in most Certificate III qualifications. The elective options are structured to allow choice from areas of trade skills as an introduction to a range of occupations. The construction industry strongly affirms that training and assessment leading to recognition of skills must be undertaken in a real or very closely simulated workplace environment and this qualification requires all units of competency to be delivered in this context. Completion of the general induction training program specified by the National Code of Practice for Induction Training for Construction Work (ASCC 2007) is required before entering a construction work site. Achievement of unit CPCCOHS1001A covers this requirement.

Careers: Possible career opportunities emerging from the completion of CPC2021 1 Certificate II in Construction Pathways, includes:

- Builder's Labourer;
- Construction Assistant;
- Trades Assistant;
- Trades Assistant (Brick and Blocklaying);
- Trades Assistant (Plastering);
- Trades Assistant (Carpentry);
- Trades Assistant (Joinery and Shopfitting);
- Trades Assistant (Joinery and Shopfitting);
- Trades Assistant (Carpentry), and;
- Trades Assistant (Waterproofing).

Course Duration: 0.5 years

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

COURSE STRUCTURE

To be awarded the CPC20211 Certificate II in Construction Pathways, a student must successfully complete a total of twelve (12) units of competency, comprising of:

- six (6) core units, and;
- six (6) elective units, of which:
- no less than four (4) units and up to six (6) units from Groups A to G, with no less than two (2) units from any individual group;
- up to two (2) units from Group H, and;
- one (1) unit may be chosen from Certificate I or II qualifications in CPC08 Construction, Plumbing and Services Training Package or another current training package or accredited course.

The elective units must ensure the integrity of the AQF alignment and contribute to a valid, industry-supported vocational outcome as well as be approved by Victoria University Polytechnic.

CORE UNITS

CPCCCM1012A	Work effectively and sustainably in the construction industry	20
CPCCCM1013A	Plan and organise work	20
CPCCCM1014A	Conduct workplace communication	20
CPCCCM1015A	Carry out measurements and calculations	20
CPCCCM2001A	Read and interpret plans and specifications	36
CPCCOHS2001A	Apply OHS requirements, policies and procedures in the construction industry	20

ELECTIVE UNITS

Group A

CPCCBL2001A	Handle and prepare bricklaying and blocklaying materials	16
CPCCBL2002A	Use bricklaying and blocklaying tools and equipment	30

Group B

CPCCCA2002B	Use carpentry tools and equipment	96
CPCCCA2003A	Erect and dismantle formwork for footings and slabs on ground	24
CPCCCA2011A	Handle carpentry materials	16

Group C

Electives from this group, are not currently offered by the Polytechnic.

Group D

Electives from this group, are not currently offered by the Polytechnic.

Group E		
CPCCW2003A	Prepare for construction waterproofing process	100
CPCCW2004A	Prepare surfaces for waterproofing application	100
Group F		
CPCCN2001A	Assemble components	32
CPCCN2002B	Prepare for off-site manufacturing process	32
Group G		
Electives from this group, are not currently offered by the Polytechnic.		
Group H		
CPCCO2013A	Carry out concreting to simple forms	20
Imported		
AHCLSC202	Construct low-profile timber or modular retaining walls	50
VU21799	Use plumbing pipes, fittings and fixtures to simulate plumbing installations	30

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate II in Drainage

Course Code: CPC20712

Campus: Industry, Sunshine.

About this course: Gain specialist skills in planning, installing, maintaining and repairing stormwater, drainage and sewerage systems. You will gain practical skills and knowledge in:

- Planning the layout of a residential sanitary drainage system;
- Installing below-ground sanitary drainage systems;
- Installing on-site disposal systems;
- Providing basic emergency life support;
- Welding polyethylene and polypropylene pipes using fusion method, and;
- Reading plans and calculate plumbing quantities.

The course will be delivered via our award-winning blended learning model which will enable you to access to learn on and off campus for the theory component of the course. You will further develop your skills on-campus with practical workshops which simulate the working environment. On successful completion of this course, you will be able to register with the Victorian Building Authority as a drainer.

Course Objectives: This qualification provides an occupational outcome in draining.

The qualification has core and elective units of competency that include units

common to other qualifications in the plumbing industry, as well as specialist drainage units of competency. The plumbing industry strongly affirms that training and assessment leading to recognition of skills must be undertaken in a real or very closely simulated workplace environment and this qualification requires all units of competency to be delivered in this context. Completion of the general induction training program specified by the National Code of Practice for Induction Training for Construction Work (ASCC 2007) is required before entering a construction work site. Achievement of unit CPCOHS1001A or CPCWHS1001 covers this requirement.

Careers: Possible career opportunities emerging from the completion of CPC20712 Certificate II in Drainage include:

- Drainer.

Course Duration: 2 years

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

COURSE STRUCTURE

To be awarded the CPC20712 Certificate II in Drainage, a student must successfully complete a total of twenty-two (22) units of competency, comprising of:

- eighteen (18) core units, and;
- four (4) elective units.

Electives must be industry relevant as well as be approved by the Polytechnic.

CORE UNITS

CPCPCM2039A	Carry out interactive workplace communication	10
CPCPCM2040A	Read plans and calculate plumbing quantities	8
CPCPCM2041A	Work effectively in the plumbing and services sector	15
CPCPCM2043A	Carry out WHS requirements	50
CPCPCM2045A	Handle and store plumbing materials	6
CPCPCM2046A	Use plumbing hand and power tools	40
CPCPCM2047A	Carry out levelling	6
CPCPCM2054A	Carry out simple concreting and rendering	16
CPCPDR2021A	Locate and clear blockages	8
CPCPDR2022A	Install domestic treatment plants	20
CPCPDR2024A	Install stormwater and sub-soil drainage systems	15
CPCPDR2025A	Drain work site	5
CPCPDR2026A	Install prefabricated inspection openings and enclosures	4

CPCPDR3021A	Plan layout of a residential sanitary drainage system	8
CPCPDR3022A	Install below ground sanitary drainage systems	30
CPCPDR3023A	Install on-site disposal systems	8
HLTFA21 1A	Provide basic emergency life support	8
RIICCM210A	Install trench support	16
ELECTIVE UNITS		
CPCPCM2050A	Mark out materials	20
CPCPCM3022A	Weld polyethylene and polypropylene pipes using fusion method	8
CPCPDR2023A	Maintain effluent disinfection systems	4
CPCPSN3025A	Install pre-treatment facilities	8

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate III in Bricklaying/Blocklaying

Course Code:CPC30111

Campus:Industry, Werribee, Sunshine.

About this course: Lay the foundation for your career in building and construction with a Certificate III in Bricklaying/Blocklaying at the Polytechnic. This trade certificate is a practical course which will equip you to work as a bricklayer or blocklayer in both housing and commercial construction. It is suited for those who enjoy working outdoors, have good hand-eye coordination and can work neatly and accurately. You will gain essential skills and knowledge in:

- levelling;
- laying bricks and blocks;
- general demolition;
- veneer construction;
- structural masonry;
- arch design and construction, and;
- fireplace construction.

You will learn how to safely use and maintain a wide range of tools and equipment used for bricklaying and construction, including:

- power tools;
- automatic and laser levels;
- cement mixers;
- generators;
- scaffolding, and;
- conveyor belts.

This is an apprenticeship course offered over 3 years but is also available to non-apprentices over 1.5 years.

Course Objectives: This qualification provides a trade outcome in bricklaying and blocklaying. The qualification has core unit of competency requirements that cover common skills for the construction industry, as well as two specialist fields of work. Completion of the general induction training program specified by the National Code of Practice for Induction Training for Construction Work (ASCC 2007) is required before entering a construction work site. Achievement of unit CPCCOHS1001A or CPCCWHST001 covers this requirement.

Careers: Possible career opportunities emerging from the completion of CPC30111 Certificate III in Bricklaying/Blocklaying include:

- bricklayer and;
- blocklayer.

Course Duration: 1.5 years

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

Selection Processes: Other/Not Applicable.

COURSE STRUCTURE

To be awarded CPC30111 Certificate III in Bricklaying/Blocklaying, a student must successfully complete twenty-seven (27) units of competency, consisting of:

- twenty-one (21) core units, and;
- six (6) elective units, of which:

at least four (4) units must be selected from Groups A and B, and; up to two (2) units can be selected from Certificate III or IV qualifications in the CPC08 Construction, Plumbing and Services Training Package or another current training package, provided the integrity of the AQF alignment is ensured, and they contribute to a valid, industry-supported vocational outcome as well as be approved by the Polytechnic. Some units in this qualification may have prerequisite requirements, which must be met when packaging the qualification. Electives must be industry relevant as well as be approved by the Polytechnic.

CORE UNITS

CPCCA3002A	Carry out setting out	24
CPCCCM1012A	Work effectively and sustainably in the construction industry	20
CPCCCM1013A	Plan and organise work	20
CPCCCM1014A	Conduct workplace communication	20
CPCCCM1015A	Carry out measurements and calculations	20
CPCCCM2001A	Read and interpret plans and specifications	36
CPCCCM2006B	Apply basic levelling procedures	8

CPCCCM2008B	Erect and dismantle restricted height scaffolding	40
CPCCCM2009A	Carry out basic demolition	32
CPCCOHS2001A	Apply OHS requirements, policies and procedures in the construction industry	20
CPCCB12001A	Handle and prepare bricklaying and blocklaying materials	16
CPCCB12002A	Use bricklaying and blocklaying tools and equipment	30
CPCCB13002A	Carry out masonry veneer construction	60
CPCCB13003A	Carry out cavity brick construction	60
CPCCB13004A	Construct masonry steps and stairs	32
CPCCB13005A	Lay masonry walls and corners	76
CPCCB13006A	Lay multi-thickness walls and piers	60
CPCCB13009A	Install flashings and damp proof course	8
CPCCB13010A	Construct masonry arches	100
CPCCB13011A	Construct curved walls	32
CPCCB13014A	Install fire-rated masonry construction	32
ELECTIVE UNITS		
Group A		
CPCCB13001A	Lay paving	24
CPCCB13007A	Install glass blockwork	8
CPCCB13012A	Construct fireplaces and chimneys	48
CPCCB13013A	Construct masonry structural systems	40
CPCCB13015A	Construct decorative brickwork	70
CPCCB13016A	Construct battered masonry walls and piers	32
Group B		
BSBSMB406	Manage small business finances	60
Imported		
CPCSC2002A	Erect and dismantle basic scaffolding	56

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

CPCCCM2007B	Use explosive power tools	16
CPCCCM2010B	Work safely at heights	8
CPCCCO2013A	Carry out concreting to simple forms	20

Certificate III in Carpentry

Course Code: CPC30211

Campus: Industry, Werribee, Sunshine, Learning Links Geelong.

About this course: Build the framework for a career in construction with a Certificate III in Carpentry at the Polytechnic. This trade certificate is a practical course which will equip you to work as a carpenter in housing, commercial and industrial construction. You will learn how to construct and install wall frames, eaves, pitched roofs, ceiling frames and flooring systems. You will gain essential skills and knowledge in:

- measurements and calculations;
- excavation and demolition;
- working safely at heights;
- setting out;
- levelling;
- concreting formwork, and;
- reading plans and specifications.

You will learn how to safely use and maintain of a wide range of tools and equipment used for carpentry and construction, including:

- power tools;
- automatic and laser levels;
- nail guns;
- generators, and;
- scaffolding.

This is an apprenticeship course but is also available to non-apprentices.

Course Objectives: This qualification provides a trade outcome in carpentry, covering work in residential and commercial applications.

Careers: Possible career opportunities emerging from the completion of CPC30211 Certificate III in Carpentry.

- Carpenter, and;
- Carpenter and Joiner.

Course Duration: 3 years

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

Selection Processes: Other/Not Applicable.

COURSE STRUCTURE

To be awarded CPC30211 Certificate III in Carpentry, a student must successfully complete thirty (30) units of competency, comprising of:

- twenty-two (22) core units, and;
- eight (8) elective units, of which:

a maximum of two (2) of the eight (8) required elective units may be substituted by selecting relevant units of competency from any Certificate III or IV construction qualification or qualification in another endorsed training package. Electives must be industry relevant as well as be approved by the Polytechnic.

CORE UNITS

CPCCCA2002B	Use carpentry tools and equipment	96
CPCCCA2011A	Handle carpentry materials	16
CPCCCA3001A	Carry out general demolition of minor building structures	32
CPCCCA3002A	Carry out setting out	24
CPCCCA3003A	Install flooring systems	40
CPCCCA3004A	Construct wall frames	60
CPCCCA3005B	Construct ceiling frames	32
CPCCCA3006B	Erect roof trusses	40
CPCCCA3007C	Construct pitched roofs	60
CPCCCA3008B	Construct eaves	20
CPCCCA3023A	Carry out levelling operations	24
CPCCCM1012A	Work effectively and sustainably in the construction industry	20
CPCCCM1013A	Plan and organise work	20
CPCCCM1014A	Conduct workplace communication	20
CPCCCM1015A	Carry out measurements and calculations	20
CPCCCM2001A	Read and interpret plans and specifications	36
CPCCCM2002A	Carry out excavation	16
CPCCCM2007B	Use explosive power tools	16
CPCCCM2008B	Erect and dismantle restricted height scaffolding	40
CPCCCM2010B	Work safely at heights	8
CPCCCO2013A	Carry out concreting to simple forms	20
CPCCOHS2001A	Apply OHS requirements, policies and procedures in the construction industry	20

ELECTIVE UNITS

BSBSMB301	Investigate micro business opportunities	30
-----------	--	----

BSBSMB406	Manage small business finances	60
CPCCCA2003A	Erect and dismantle formwork for footings and slabs on ground	24

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited

towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate III in Signs and Graphics

Course Code:CPC30216

Campus:Sunshine.

About this course:Become a fully qualified sign-writer by learning this creative trade with a Certificate III in Signs and Graphics at Victoria University Polytechnic. This course will teach you the practical skills to design, manufacture and install a wide range of indoor and outdoor signage such as:

- vinyl;
- fabric;
- screen-print;
- digital, and;
- LED.

You will gain the knowledge and skills to work effectively in the sign industry, including:

- vinyl cutting;
- sign fabrication;
- sign installation;
- sign design;
- graphic design;
- how to operate advanced computer design software;
- how to produce signs on uneven surfaces;
- sign writing;
- how to produce engraved signs;
- advanced vinyl application, such as vehicle wrapping, and;
- heritage signage.

This is an apprenticeship course. You must be employed as signage apprentice.

Course Objectives:This qualification reflects the role of sign manufacturers who design and produce signs and graphics for a range of purposes. Signs and graphics can be produced using a range of traditional and contemporary techniques, often involving the use of advanced printing software and technology, and a range of methods for illumination and fabrication.

Careers:Possible career opportunities emerging from the completion of CPC30216 Certificate III in Signs and Graphics include:

- Signwriter and;
- Sign Manufacturer.

Course Duration:3 years

Admission Requirements:As part of the Victoria University Polytechnic Pre-Training Review admission process, applicants are required to complete a literacy and number assessment to identify learning support needs.

Selection Processes: OtherNot Applicable.

COURSE STRUCTURE

68

To be awarded the CPC30216 Certificate III in Signs and Graphics, a student must successfully complete a total of sixteen (16) units of competency, comprising of:

- seven (7) core units, and;
- nine (9) elective units, of which:

nine (9) units may be chosen from the elective units listed in the CPC30216 Certificate III in Signs and Graphics qualification, and; three (3) units may be chosen from other CPC Certificate III or Certificate IV qualifications, or another current training package or accredited course, provided they do not duplicate the outcome of another unit chosen for the qualification. The elective units must ensure the integrity of the AQF alignment and contribute to a valid, industry-supported vocational outcome as well as be approved by the Polytechnic.

CORE UNITS

CPCCSG3001	Design and lay out digital signs for production	60
CPCCSG3002	Produce and apply vinyl signs	50
CPCCSG3003	Colour manage signs	20
CPCCSG3004	Print digital signs	60
CPCCSG3011	Install LED technology into signs	50
CPCCSG3012	Fabricate signs	65
CPCCWHS3001	Identify construction work hazards and select risk control strategies	30

ELECTIVE UNITS

AURVTP009	Apply vehicle body film wrapping	20
CPCCCM3001	Operate elevated work platforms up to 11 metres	32
CPCCSG3005	Engrave signs	40
CPCCSG3006	Apply gilding to signs	40
CPCCSG3009	Screen-print signs	36
CPCCSG3013	Paint letters and decorative effects for signs	92
CPCCSG3017	Erect and install signs	30
ICPPRP2250	Produce graphics using graphics applications	60
MSFFM3022	Set up, operate and maintain computer numerically controlled (CNC) machining and processing centres	80

Units in Transition

The following unit/s will not be offered to prospective students. These units are only available for current/continuing students.

CPCCCM2006	Apply basic levelling procedures	8
CPCCCM3003	Work safely around electrical sources, services and	40

assets

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate III in Construction Waterproofing

Course Code:CPC31411

Campus:Werribee, Sunshine.

About this course:Gain the skills and confidence to either start your career in the construction waterproofing industry or build your current skillset with the Certificate III in Construction Waterproofing at VU Polytechnic. This hands-on course will teach you to prepare and apply waterproofing to internal, external and below-ground wet areas. You will learn how to assess and fix common waterproofing defects in both the residential and commercial construction industry. Our experienced teachers will help you gain essential knowledge and skills in:

- occupational health and safety;
- communication;
- problem solving;
- working as a team;
- waterproofing preparation, and;
- waterproofing operations.

The construction industry is one of the fastest growing sectors in Australia. This hands-on course caters for both students new to the sector or for experienced trades people carrying out waterproofing works.

Course Objectives:This qualification provides a trade outcome in waterproofing for the residential and commercial construction industry.

Careers:Possible career opportunities emerging from the completion of CPC31411 Certificate III in Construction Waterproofing include:

- Waterproofer.

Course Duration:0.5 years

Admission Requirements:Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

COURSE STRUCTURE

To be awarded the CPC31411 Certificate III in Construction Waterproofing, a student must successfully complete a total of nineteen (19) units of competency, comprising of:

- fourteen (14) core units, and;
- five (5) elective units of which:

three (3) elective units must be selected from the CPC31411 Certificate III in Construction Waterproofing qualification, and; two (2) elective units may be selected

from any Certificate III or IV construction qualification or qualification in another endorsed training package.

CORE UNITS

CPCCCM1012A	Work effectively and sustainably in the construction industry	20
CPCCCM1013A	Plan and organise work	20
CPCCCM1014A	Conduct workplace communication	20
CPCCCM1015A	Carry out measurements and calculations	20
CPCCCM2001A	Read and interpret plans and specifications	36
CPCCOHS2001A	Apply OHS requirements, policies and procedures in the construction industry	20
CPCCWP2001A	Handle waterproofing materials	24
CPCCWP2002A	Use waterproofing tools and equipment	60
CPCCWP2003A	Prepare for construction waterproofing process	100
CPCCWP2004A	Prepare surfaces for waterproofing application	100
CPCCWP3001A	Apply waterproofing process to below ground level wet areas	50
CPCCWP3002A	Apply waterproofing process to internal wet areas	50
CPCCWP3003A	Apply waterproofing process to external wet areas	50
CPCCWP3004A	Apply waterproofing remedial processes	50

ELECTIVE UNITS

BSBSMB406	Manage small business finances	60
CPCCCM2006B	Apply basic levelling procedures	8
CPCCCM2008B	Erect and dismantle restricted height scaffolding	40
CPCCCM2010B	Work safely at heights	8

Imported

Certificate III in Joinery

Course Code:CPC31912

Campus:Industry, Sunshine.

About this course: Gain specialist building skills for a career in the construction industry with a Certificate III in Joinery at the Polytechnic. As an apprentice joiner, this trade certificate will provide you with a theoretical and practical understanding of the construction and installation of wooden structures, manufacturing and machining skills of a variety of joinery products and materials. You'll develop essential skills and knowledge in:

- manufacturing and assembling stairs;
- manufacturing and assembling of windows and doorframes;
- manufacturing and assembling of joinery components;
- cutting and installing glass;
- applying finishes;
- setouts, levelling technical skills, and;
- reading and interpreting plans and specifications.

You'll also learn how to safely use and maintain tools and equipment including:

- static machines;
- power tools;
- automatic, line and laser levels;
- compressors and generators;
- air and battery operated tools, and;
- gas and powder activated tools.

This is an apprenticeship course; you must be employed as a joinery apprentice. This qualification is also available for applicants of the Skilled Migration Assessment Services (SMAS) program.

Course Objectives: This qualification provides a trade outcome in joinery covering work for residential and commercial applications. The qualification has core unit of competency requirements which cover common skills for the construction industry, as well as a specialist field of work. Completion of the general induction training program specified by the National Code of Practice for Induction Training for Construction Work (ASCC 2007) is required before entering a construction work site. Achievement of unit CPCCOHS1001A or CPCCWHS1001 covers this requirement.

Careers: Possible career opportunities emerging from the completion of CPC31912 Certificate III in Joinery include:

- Joiner.

Course Duration: 4 years

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

Selection Processes: Other/Not Applicable.

COURSE STRUCTURE

To be awarded CPC31912 Certificate III in Joinery, a student must complete a total of thirty (30) units of competency, consisting of:

- sixteen (16) core units, and;
- fourteen (14) elective units, of which:

a maximum of two (2) of the required fourteen (14) elective units may be substituted by selecting relevant units of competency from any Certificate III or IV construction qualification or qualification in another endorsed training package. Electives must be industry relevant as well as be approved by the Polytechnic.

CORE UNITS

CPCCCA2002B	Use carpentry tools and equipment	96
CPCCCA2011A	Handle carpentry materials	16
CPCCCM1012A	Work effectively and sustainably in the construction industry	20
CPCCCM1013A	Plan and organise work	20
CPCCCM1014A	Conduct workplace communication	20
CPCCCM1015A	Carry out measurements and calculations	20
CPCCCM2001A	Read and interpret plans and specifications	36
CPCCCM2006B	Apply basic levelling procedures	8
CPCCCM2007B	Use explosive power tools	16
CPCCCM2010B	Work safely at heights	8
CPCCJN3001A	Use static machines	56
CPCCJN3002A	Use computer-controlled machinery	60
CPCCJN3003A	Manufacture components for door and window frames and doors	80
CPCCJN3004A	Manufacture joinery components	40
CPCCOHS2001A	Apply OHS requirements, policies and procedures in the construction industry	20
CPCCSH3001A	Set out and assemble cabinets, showcases, wall units, counters and workstations	80

ELECTIVE UNITS

CPCCCA3001A	Carry out general demolition of minor building structures	32
CPCCCA3010A	Install and replace windows and doors	70
CPCCCA3012A	Frame and fit wet area fixtures	24
CPCCCA3013A	Install lining, panelling and moulding	40
CPCCCA3014A	Construct bulkheads	16
CPCCCA3015A	Assemble partitions	32
CPCCJN2001A	Assemble components	32

CPCCJN2002B	Prepare for off-site manufacturing process	32
CPCCJN2003A	Package manufactured products for transport	10
CPCCJN3005A	Cut and install glass	16
CPCCJS3002A	Manufacture stair components for straight flighted stairs	32
CPCCJS3011A	Design and set out stairs	24
CPCCSH2003A	Apply and install sealant and sealant devices	16
CPCCSH3005A	Apply and trim decorative finishes	40

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation, may be credited towards this course. Units must satisfy the completion rules of the training package and be assessed as appropriate by the Polytechnic.

Certificate III in Carpentry and Joinery

Course Code: CPC32011

Campus: Industry, Sunshine.

About this course: Gain specialist building skills for residential and commercial construction with a Certificate III in Carpentry and Joinery from Victoria Polytechnic. This trade certificate gives you practical carpentry skills in the installation and construction of wooden structures. You will learn to build wall frames, eaves, pitched roofs, ceiling frames, flooring systems and stairs. You will also learn key joinery skills such as the use of static machines. This course covers essential skills and knowledge in:

- manufacturing joinery components;
- measurements and calculations;
- excavation and demolition;
- working safely at heights;
- setting out;
- levelling, and;
- reading plans and specifications.

You will learn how to safely use and maintain a wide range of tools and equipment used for carpentry, joinery and construction, including:

- static machines;
- power tools;
- automatic and laser levels;
- nail guns;
- generators, and;
- scaffolding.

This is an apprenticeship course. You must be employed as a carpentry and joinery apprentice.

Course Objectives: This qualification provides a trade outcome in carpentry and joinery, covering work in residential and commercial applications.

Careers: Possible career opportunities emerging from completing CPC32011 Certificate III in Carpentry and Joinery are:

- Carpenter and Joiner.

Course Duration: 3 years

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

Selection Processes: Other/Not Applicable.

COURSE STRUCTURE

To be awarded CPC32011 Certificate III in Carpentry and Joinery, a student must successfully complete a total of thirty-two (32) units of competency, comprising of:

- twenty-eight (28) core units, and;
- four (4) elective units, of which:

a maximum of two (2) of the four (4) required elective units may be substituted by selecting relevant units of competency from any Certificate III or IV construction qualification or qualification in another endorsed training package. Electives must be industry relevant as well as be approved by Victoria University Polytechnic.

CORE UNITS

Units must satisfy the completion rules of the qualification and be assessed as appropriate by Victoria University Polytechnic.

Certificate III in Plumbing

Course Code:CPC32413

Campus:Industry, Sunshine.

About this course:Get the training and support needed to gain your plumbing qualification with a Certificate III in Plumbing at the Polytechnic. This is an apprenticeship course, designed for those currently employed as plumbing apprentices. It will provide you with the formal trade certificate you need in order to become a registered plumber. Through classroom learning and work-based tasks, you will gain skills and knowledge to complement your on-the-job training. You will learn about:

- water and sanitary services;
- drainage and blockage clearance;
- mechanical services;
- roofing;
- gasfitting;
- welding and pipe fabrication;
- reading plans and specifications, and;
- workplace safety.

You will graduate with the skills, confidence and experience to be job-ready.

Course Objectives:This qualification provides a trade outcome in plumbing.

Careers:Possible career opportunities emerging from the completion of CPC32413 Certificate III in Plumbing include:

- Plumber;
- Plumber and Drainer;
- Plumber and Gasfitter;
- Gasfitter, and;
- Roof Plumber.

Course Duration: 2 years

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

Selection Processes: Other/Not Applicable.

COURSE STRUCTURE

To be awarded the CPC32413 Certificate III in Plumbing, a student must successfully complete:

- all core units from:
- Stream 1 Water (24) and Stream 2 Sanitary (6) as well as;
- Stream 1 Water elective units (5) and Stream 2 Sanitary elective units (4).

Plus two of the following four stream requirements:

- Stream 3 Drainage: 9 core units and 3 elective units from the drainage stream;
- Stream 4 Mechanical services: 4 core units and 11 elective units from the mechanical services stream;
- Stream 5 Roofing: 8 core units and 4 elective units from the roofing stream, and;
- Stream 6 Gas services: 12 core units and 5 elective units from the gas services stream.

NB: Units of competency achieved in one stream count as credit for the same unit in the core or elective requirements for any other stream.

CORE UNITS

Water Stream

CPCPCM2039A	Carry out interactive workplace communication	10
CPCPCM2040A	Read plans and calculate plumbing quantities	8
CPCPCM2041A	Work effectively in the plumbing and services sector	15
CPCPCM2043A	Carry out WHS requirements	50
CPCPCM2045A	Handle and store plumbing materials	6
CPCPCM2046A	Use plumbing hand and power tools	40
CPCPCM2047A	Carry out levelling	6
CPCPCM2050A	Mark out materials	20
CPCPCM2052A	Weld using oxy-acetylene equipment	16
CPCPCM2053A	Weld using manual metal arc welding equipment	16
CPCPCM2054A	Carry out simple concreting and rendering	16
CPCPCM2055A	Work safely on roofs	20

CPCPCM3021A	Flash penetrations through roofs and walls	18
CPCPCM3022A	Weld polyethylene and polypropylene pipes using fusion method	8
CPCPCM3023A	Fabricate and install non-ferrous pressure piping	12
CPCPFS3031A	Fabricate and install fire hydrant and hose reel systems	40
CPCPWT3020A	Connect and install storage tanks to a domestic water supply	12
CPCPWT3021A	Set out and install water services	36
CPCPWT3022A	Install and adjust water service controls and devices	12
CPCPWT3023A	Install and commission water heating systems	25
CPCPWT3025A	Install water pumpsets	8
CPCPWT3026A	Fit off and commission heated and cold water services	16
CPCPWT3027A	Connect irrigation systems from drinking water supply	6
HLFA211A	Provide basic emergency life support	8
Sanitary Stream		
CPCPCM2048A	Cut and join sheet metal	8
CPCPDR2021A	Locate and clear blockages	8
CPCPSN3011B	Plan layout of a residential sanitary plumbing system	8
CPCPSN3022A	Install discharge pipes	28
CPCPSN3023A	Fabricate and install sanitary stacks	28

RIICCM210D	Install trench support	16			

Certificate IV in Building and Construction (Building)

Course Code: CPC40110

Campus: Sunshine, Leaming Links Geelong.

About this course: Add to your hands-on industry experience with a Certificate IV in Building and Construction (Building) at the Polytechnic and take the first steps to becoming a registered builder. This course is designed for those wishing to obtain formal registration under Victorian building legislation. You will learn to take responsibility for the complete construction of a building. You will develop specialist skills and knowledge to run a small-to-medium construction business. Focused primarily on residential buildings, you will gain knowledge about the principles, techniques and regulations of the building industry. Learning from industry professionals, you will cover topics such as:

- quantity surveying;
- tendering;
- planning and scheduling of labour and materials;
- selecting contractors;
- supervising work sites;
- construction technology;
- managing workplace safety, and;
- small business finance.

This course has flexible delivery for those working full time. Classes are held in the evenings, Saturdays and some weekdays.

Course Objectives: This qualification is designed to assist in meeting the licensing/registration requirements of those wishing to become a registered builder.

Careers: Possible career opportunities emerging from the completion of CPC40110 Certificate IV in Building and Construction (Building) include:

- builder, and/or;
- construction manager.

Course Duration: 1 year

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

Selection Processes: Other N/A

COURSE STRUCTURE

To be awarded CPC40110 Certificate IV in Building and Construction (Building), a student must successfully complete a total of sixteen (16) units of competency, comprising of:

- thirteen (13) core units, and;
- three (3) elective units, of which:

all three (3) elective units may be selected from the elective units listed in the CPC40110 Certificate IV in Building and Construction (Building) qualification, or; two (2) of the three (3) elective units may be selected from Certificate III, Certificate IV or Diploma qualifications from another endorsed training package or from the CPC08

Construction, Plumbing and Services Training Package, provided that at least one unit is from Certificate IV and the industry context is maintained. Electives must be industry relevant as well as be approved by the Polytechnic.

CORE UNITS

BSBSMB406A	Manage small business finances	60
CPCCBC4001A	Apply building codes and standards to the construction process for low rise building projects	40
CPCCBC4002A	Manage occupational health and safety in the building and construction workplace	40
CPCCBC4003A	Select and prepare a construction contract	40
CPCCBC4004A	Identify and produce estimated costs for building and construction projects	60
CPCCBC4005A	Produce labour and material schedules for ordering	40
CPCCBC4006B	Select, procure and store construction materials for low rise projects	40
CPCCBC4007A	Plan building or construction work	40
CPCCBC4008B	Conduct on-site supervision of building and construction projects	40
CPCCBC4009B	Apply legal requirements to building and construction projects	50
CPCCBC4010B	Apply structural principles to residential low rise constructions	160
CPCCBC4011B	Apply structural principles to commercial low rise constructions	80
CPCCBC4012B	Read and interpret plans and specifications	30

ELECTIVE UNITS

BSBITU202	Create and use spreadsheets	30
BSBPMG415	Apply project risk management techniques	40
CPCCBC4013A	Prepare and evaluate tender documentation	20
CPCCBC4020A	Build thermally efficient and sustainable structures	40
CPCCWHS1001	Prepare to work safely in the construction industry	6

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate IV in Plumbing and Services

Course Code:CPC40912

Campus:Industry, Sunshine.

About this course:Gain the knowledge and skills to become a licensed plumber with a Certificate IV in Plumbing and Services at the Polytechnic. This course is designed for registered plumbers and final-year apprentices looking to extend their technical skills and knowledge. You will be prepared to gain your plumbing licence with the Victoria Building Authority (external link) (VBA), subject to passing the VBA exam. Through classroom teaching and work-based tasks, you will be equipped to manage and design plumbing projects. This course includes studies in:

- drainage systems — roof, sanitary and stormwater;
- water supply;
- gas installations;
- mechanical services;
- reading plans and specifications, and;
- estimating work costs.

You will graduate with a nationally recognised qualification, ready to operate as a contractor plumber or to start your own plumbing business.

Course Objectives:This qualification provides an outcome for specialist plumbing services tradespersons and operators seeking to deepen their technical skills.

Careers:Possible career opportunities emerging from the completion of CPC40912 Certificate IV in Plumbing and Services include:

- plumbing contractor;
- air conditioning technician, and;
- self-employed plumber.

Course Duration: 2 years

Admission Requirements:Applicants must have successfully completed the Certificate III in Plumbing or equivalent. Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

COURSE STRUCTURE

To be awarded CPC40912 Certificate IV in Plumbing and Services, a student must successfully complete a total of fifteen (15) units of competency. The Polytechnic offers the following stream: Plumbing and services - Operations stream. Plumbing and services - Operations stream:

- twelve (12) core units, comprising of:

four (4) common core units, and; eight (8) Plumbing and services - Operations stream core units;

- three (3) electives, of which:

up to three (3) units may be selected from the list of elective units in the Plumbing and services — Operations stream; two (2) of the three (3) units may be selected from a Certificate IV qualification in another endorsed training package or from the core or elective units of another stream within the Certificate IV in Plumbing and

Services, ensuring both the integrity of the AQF alignment and the industry context of the qualification are maintained; one (1) of the three (3) units may be drawn from Certificate III or Diploma Plumbing and Services qualifications, and; no more than three (3) units may be selected from the list of elective units common to all streams. Electives must be industry relevant as well as be approved by the Polytechnic.

CORE UNITS

Common

BSBOHS403B	Identify hazards and assess OHS risks	60
CPCBC4012B	Read and interpret plans and specifications	30
CPCPCM4011A	Carry out work-based risk control processes	24
CPCPCM4012A	Estimate and cost work	40

Plumbing and services - Operations stream

BSBSMB401	Establish legal and risk management requirements of small business	60
CPCPDR4011B	Design and size sanitary drainage systems	40
CPCPDR4012B	Design and size stormwater drainage systems	45
CPCPDR4013B	Design and size domestic treatment plant disposal systems	35
CPCPGS4011C	Design and size consumer gas installations	60
CPCPRF4011B	Design and size roof drainage systems	60
CPCPSN4011B	Design and size sanitary plumbing systems	50
CPCPWT4011B	Design and size heated and cold water services and systems	80

ELECTIVE UNITS

Plumbing and services - Operations stream

CPCBC4021A	Minimise waste on the building and construction site	20
CPCPMS4011B	Design, size and lay out heating and cooling systems	160
CPCPWT4022A	Commission and maintain backflow prevention devices	20
Other streams		
CPCPCM4013A	Produce 2D architectural drawings using CAD software	40

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training

Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Diploma of Building and Construction (Building)

Course Code: CPC50210

Campus: Industry, Sunshine.

About this course: Develop the skills to manage a wide range of building projects with a Diploma of Building and Construction (Building) at the Polytechnic. This course will teach you the principles, techniques and regulations of the building industry for all types of medium-rise and wide-span buildings, up to 25 metres high. You will learn to take responsibility for coordinating the complete construction of a residential, industrial or commercial building. Learning from industry professionals, you will develop specialist skills and knowledge to run a small-to-medium construction business. You will learn about:

- quantity surveying;
- planning and scheduling of labour and materials;
- selecting contractors;
- managing project risk and quality;
- supervising work sites;
- construction technology;
- managing workplace safety, and;
- small business finance.

This qualification will also help you to meet the licensing/registration requirements to become a registered builder.

Course Objectives: This qualification is designed to meet the needs of builders, including selecting contractors, overseeing the work and its quality, and liaising with clients. This qualification is designed to assist in meeting the licensing/registration requirements of those wishing to become a registered builder.

Careers: Possible career opportunities emerging from completing CPC50210 Diploma of Building and Construction (Building) include:

- Builder;
- Estimator, and;
- Building Supervisor.

Course Duration: 2 years

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

Selection Processes: Other/Not Applicable.

COURSE STRUCTURE

To be awarded CPC50210 Diploma of Building and Construction (Building), a student must successfully complete a total of eighteen (18) units of competency, comprising of:

- thirteen (13) core units, and;

- five (5) elective units, of which:

a minimum of three (3) elective units must be from Group A units listed in the CPC50210 Diploma of Building and Construction (Building) qualification; a maximum of two (2) further elective units may be from Group B units listed in the CPC50210 Diploma of Building and Construction (Building) qualification; one (1) elective unit may be from Diploma level from the CPC08 Construction, Plumbing and Services Training Package or another endorsed training package, provided that the industry context of the qualification is maintained; two (2) elective units may be from any Certificate IV in the CPC08 Construction, Plumbing and Services Training Package, and; one (1) elective unit may be from any Advanced Diploma in the CPC08 Construction, Plumbing and Services Training Package. Some units in this qualification may have prerequisite requirements, which must be met when packaging the qualification. Electives must be industry relevant as well as be approved by the Polytechnic.

CORE UNITS

BSBOHS504B	Apply principles of OHS risk management	40
BSBPMG505A	Manage project quality	40
BSBPMG508A	Manage project risk	40
CPCCBC4001A	Apply building codes and standards to the construction process for low rise building projects	40
CPCCBC4003A	Select and prepare a construction contract	40
CPCCBC4004A	Identify and produce estimated costs for building and construction projects	60
CPCCBC4010B	Apply structural principles to residential low rise constructions	160
CPCCBC4013A	Prepare and evaluate tender documentation	20
CPCCBC5001B	Apply building codes and standards to the construction process for medium rise building projects	200
CPCCBC5002A	Monitor costing systems on medium rise building and construction projects	60
CPCCBC5003A	Supervise the planning of on-site medium rise building or construction work	200
CPCCBC5010B	Manage construction work	150
CPCCBC5018A	Apply structural principles to the construction of medium rise buildings	300

ELECTIVE UNITS

Group A

CPCCBC5004A	Supervise and apply quality standards to the selection of building and construction materials	60
-------------	---	----

CPCCB5006B	Apply site surveys and set-out procedures to medium rise building projects	110
CPCCB5007B	Administer the legal obligations of a building or construction contractor	100
CPCCB5011A	Manage environmental management practices and processes in building and construction	150
Group B		
BSBWOR501	Manage personal work priorities and professional development	60
CPCCB4005A	Produce labour and material schedules for ordering	40
CPCCB4006B	Select, procure and store construction materials for low rise projects	40
CPCCB4009B	Apply legal requirements to building and construction projects	50
CPCCB4011B	Apply structural principles to commercial low rise constructions	80
CPCCB4012B	Read and interpret plans and specifications	30
CPCCB4018A	Apply site surveys and set-out procedures to building and construction projects	40
CPCWHS1001	Prepare to work safely in the construction industry	6

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the training package and be assessed as appropriate by the Polytechnic.

Advanced Diploma of Building Surveying

Course Code: CPC60115

Campus: Sunshine, Geelong Learning Links.

About this course: Undertake practical training for building inspection and surveying work with an Advanced Diploma of Building Surveying at Victoria University Polytechnic. Building surveyors are responsible for interpreting and enforcing laws and regulations controlling building and construction. This course provides training in building theory and surveying related to residential, industrial and commercial buildings of up to three storeys. You will learn about building surveying procedures and practices, and develop specialist skills and knowledge in:

- plan assessment;
- construction methods, technology and materials;
- inspection;
- regulatory laws & compliance requirements, and;
- business management.

With a current shortage of registered building surveyors, you will be well placed for a career in Australia's growing construction industry.

Course Objectives: This qualification reflects the role of building surveyors who apply knowledge of compliance requirements and construction methods and materials to the implementation of statutory building surveying requirements or to the provision of advisory building surveying services. The scope of work/learning undertaken in this course will allow graduates an opportunity to apply their skills and knowledge to varying roles across jurisdictions and can include: - providing code-consulting advice to clients on the compliance requirements for proposed building developments; - processing building applications and issuing building permits; - conducting mandatory inspections; - auditing buildings and following up on areas of non-compliance, and; - issuing occupancy and final permits (temporary and permanent). Building Surveyors work in a highly regulated environment and must carry out their role ethically and according to legislative requirements.

Careers: Possible career opportunities emerging from the completion of CPC60115 Advanced Diploma of Building Surveying:

- unlimited building inspector;
- limited building surveyor, and;
- assistant building surveyor or cadet (depending on experience).

Course Duration: 2 years

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

Selection Processes: Other/Not Applicable.

COURSE STRUCTURE

To be awarded CPC60115 Advanced Diploma of Building Surveying, a student must successfully complete a total of seventeen (17) units of competency, comprising of:

- fourteen (14) core units, and;
- three (3) elective units of which:

all three (3) units may be selected from the elective units listed in the CPC60115 Advanced Diploma of Building Surveying qualification; up to two (2) units may be chosen from other Advanced Diploma or Graduate Diploma qualifications in the CPC Construction, Plumbing and Services Training Package or another current training package or accredited course, provided they do not duplicate the outcome of another unit chosen for the qualification. The elective units must ensure the integrity of the AQF alignment and contribute to a valid, industry-supported vocational outcome as well as be approved by the Polytechnic.

CORE UNITS

CPCBS6001	Research and evaluate construction methods and materials for residential buildings to three storeys	250
CPCBS6002	Research and evaluate construction methods and materials for commercial buildings to three storeys	250
CPCBS6003	Apply legal and ethical requirements to building	80

	surveying functions	
CPCCBS6004	Assess and advise on compliance of design documentation for residential buildings to three storeys	120
CPCCBS6005	Assess and advise on compliance of design documentation for commercial buildings to three storeys	90
CPCCBS6006	Process planning applications for residential buildings up to three storeys	200
CPCCBS6008	Process building applications for residential buildings up to three storeys	100
CPCCBS6009	Process building applications for commercial buildings up to three storeys	120
CPCCBS6010	Conduct and report on building surveying audits of residential buildings up to three storeys	100
CPCCBS6012	Conduct and report on initial construction inspections of residential buildings up to three storeys	120
CPCCBS6013	Conduct and report on initial construction inspections of commercial buildings up to three storeys	120
CPCCBS6014	Conduct and report on advanced and final inspections of residential buildings up to three storeys	80
CPCCBS6015	Conduct and report on advanced and final inspections of commercial buildings up to three storeys	80
CPCCBS6016	Assess and advise on performance-based solutions for buildings up to three storeys	90
ELECTIVE UNITS		
CPCCBS6011	Conduct and report on building surveying audits of commercial buildings up to three storeys	300
Imported		
CPCCBS8004	Advise on compliance of building design documentation	180
CPCCBS8009	Lead a building surveying team	60

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate IV in Professional Writing and Editing

Course Code:CUA40118

Campus:Footscray Nicholson, Online.

About this course:Unlock your potential as a writer with a Certificate IV in Professional Writing and Editing at Victoria University Polytechnic. This course will

80

provide you with theoretical and practical skills in a range of writing, editing and content production tasks. You'll have the opportunity to participate in literary events and in writing for a range of publications. You'll build a solid foundation of knowledge and skills to succeed in the writing, editing and publishing industries. Writing skills are also highly valued in almost all industries. You will gain experience and understanding to work effectively in the creative arts industry, including:

- writing and editing skills for fiction and non-fiction across a range of genres and forms;
- understanding and implementing copyright requirements;
- technological skills and use of the internet;
- concept development, and;
- history and theory of writing and literature.

Course Objectives:This qualification reflects the role of individuals who undertake a range of writing and editing tasks required across a range of industries. Individuals will be required to write in a range of contexts and text types. They will also be required to edit and proofread their own written works preparing them for roles across a range of industries, including the writing or editing industries. They may provide guidance to others but have limited responsibility for the output of others.

Careers:Possible career opportunities emerging from the completion of CUA40118 Certificate IV in Professional Writing and Editing include:

- writer, and;
- editor.

Course Duration: 1 year

Admission Requirements:Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

COURSE STRUCTURE

To be awarded the CUA40118 Certificate IV in Professional Writing and Editing, a student must successfully complete a total of twelve (12) units of competency, comprising of:

- six (6) core units, and;
- six (6) elective units, of which:
- four (4) units must be selected from the electives listed in the CUA40118 Certificate IV in Professional Writing and Editing qualification, and;
- two (2) units may be selected from the remaining listed electives or any currently endorsed training package qualification or accredited course.

Elective units must be relevant to the work environment and the qualification, maintain the overall integrity of the AQF alignment and contribute to a valid vocational outcome as well as be approved by the Polytechnic.

CORE UNITS

BSBITU303	Design and produce text documents	90
CUACMP311	Implement copyright arrangements	20

CUAIND311	Work effectively in the creative industries	50
CUAWRT404	Perform writing and editing tasks	120
CUAWRT405	Write fiction material	70
CUAWRT406	Write nonfiction material	70
ELECTIVE UNITS		
CUAPPR401	Realise a creative project	60
CUARES402	Conduct research	30
CUAWRT301	Write content for a range of media	40
CUAWRT407	Develop content for publication	70
CUAWRT411	Write for young children	70
CUAWRT413	Write poetry	70
CUAWRT414	Write narratives	70
ICTWEB420	Write content for web pages	30

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate IV in Design

Course Code:CUA40715

Campus:Footscray Nicholson.

About this course:Begin your career as a media designer or creative artist and gain fundamental skills that can be applied to a number of design disciplines, with a Certificate IV in Design at the Polytechnic. You will learn about design concepts, and how to select suitable techniques and media to communicate your ideas. Through the development of your own creative project, you will learn how to:

- develop your critical and creative thinking;
- devise design solutions;
- interpret and respond to a design brief;
- integrate colour theory and design process;
- produce drawings to communicate ideas;
- refine 3-D design ideas and processes;
- research and apply techniques for the design of wearable objects, and;
- author interactive media.

On completion, you will have a solid understanding of technical and conceptual design as well as have the knowledge to take design concepts through to finished art stage.

Course Objectives:This qualification reflects the role of individuals who have a broad range of technical and conceptual design skills. Practice at this level is underpinned

by the application of integrated technical and theoretical knowledge and the ability to develop concepts and solutions in response to a brief.

Careers:Possible career opportunities emerging from the completion of CUA40715 Certificate IV in Design include:

- design assistant and/or;
- digital artist.

Course Duration: 1 year

Admission Requirements:Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

COURSE STRUCTURE

To be awarded the CUA40715 Certificate IV in Design, a student must successfully complete a total of fifteen (15) units of competency, comprising of:

- seven (7) core units, and;
- eight (8) elective units, of which:

five (5) units must be selected from the electives listed in the CUA40715 Certificate IV in Design qualification, and; three (3) units may be selected from the electives listed in the CUA40715 Certificate IV in Design qualification or any currently endorsed training package qualification or accredited course at Certificate III, IV or Diploma level. Elective units must be relevant to the work environment and the qualification, maintain the integrity of the AQF alignment and contribute to a valid vocational outcome as well as be approved by the Polytechnic.

CORE UNITS

BSBCRT301	Develop and extend critical and creative thinking skills	40
BSBDES305	Source and apply information on the history and theory of design	65
BSBDES401	Generate design solutions	60
BSBDES402	Interpret and respond to a design brief	20
BSBWHS201	Contribute to health and safety of self and others	20
CUAACD401	Integrate colour theory and design processes	30
CUAPPR401	Realise a creative project	60
ELECTIVE UNITS		
BSBCRT402	Collaborate in a creative process	40
CUAACD301	Produce drawings to communicate ideas	80
CUADES401	Research and apply techniques for the design of wearable objects	50
CUADIG401	Author interactive media	50

CUADIG404	Apply scripting language in authoring	60
CUAGRD302	Use typography techniques	50
CUAWRT301	Write content for a range of media	40
Imported		
CUAACD507	Refine 3-D design ideas and processes	70

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate IV in Music Industry

Course Code:CUA40915

Campus:Footscray Nicholson.

About this course:In this course you will gain a basic grounding in music performance or in live sound, studio recording, Pro Tools, Logic, Ableton Live and Reason. You will learn in state of the art facilities at Kindred Studios with teachers who have first-hand music industry experience. This qualification is offered with the specialisations of:

- Sound Production, or;
- Performance.

This makes it the ideal preparation for entry into the music industry.

Course Objectives:This qualification reflects the role of individuals who use well-developed skills and a broad knowledge base in music performance, sound production or music business contexts. They apply solutions to a defined range of unpredictable problems, and analyse and evaluate information from a variety of sources. They may provide leadership and guidance to others and have limited responsibility for the output of others.

Careers:Possible career opportunities emerging from the completion of CUA40915 Certificate IV in Music Industry, with a specialisation includes: Performance Specialisation

- music performer (solo artist/group)

Sound Production

- sound engineer;
- music producer;
- studio engineer, and/or;
- live sound engineer.

Course Duration: 1 year

Admission Requirements:Applicants seeking to apply for the Performance Specialisation will be required to undertake an audition to determine course suitability. Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

Selection Processes:Practical Test, OtherN/A

COURSE STRUCTURE

To be awarded CUA40915 Certificate IV in Music Industry, a student must successfully complete a total of fourteen (14) units of competency, consisting of:

- four (4) core units, and;
- ten (10) elective units, of which:

eight (8) units must be selected from the elective units listed in the CUA40915 Certificate IV in Music Industry qualification, with no more than three (3) units from Group D, and; two (2) units may be selected from the remaining elective units listed in the CUA40915 Certificate IV in Music Industry qualification or any currently endorsed training package qualification or accredited course at Certificate III, IV or Diploma. Elective units must be relevant to the work environment and the qualification, maintain the integrity of the AQF alignment and contribute to a valid vocational outcome as well as be approved by the Polytechnic. This qualification can provide for specialisations. Specialisations The Polytechnic currently offer the following specialisation(s): - Performance, and; - Sound Production.

Specialisation: Sound Production

To be awarded this specialisation, the following additional packaging rules must be adhered to:

- six (6) elective units must be selected from Group B.

CORE UNITS

BSBCRT401	Articulate, present and debate ideas	40
BSBIPR401	Use and respect copyright	50
BSBSMB301	Investigate micro business opportunities	30
CUAWHS302	Apply work health and safety practices	10

ELECTIVE UNITS

Group A: Performance

Group A electives are not currently offered by the Polytechnic under this specialisation.

Group B: Sound Production

CUAMCP303	Develop simple musical pieces using electronic media	35
CUASOU301	Undertake live audio operations	100
CUASOU308	Install and disassemble audio equipment	40
CUASOU401	Mix live audio	140
CUASOU405	Record sound	60
CUASOU407	Edit sound	65

CUASOU409 Mix recorded music 50

Group C: Business

Group C electives are not currently offered by the Polytechnic under this specialisation.

Group D: General

CUASOU202 Perform basic sound editing 30

CUASOU307 Record and mix a basic music demo 40

CUASOU402 Manage audio input sources 30

Specialisation: Performance

To be awarded this specialisation, the following additional packaging rules must be adhered to:

- six (6) elective units must be selected from Group A.

CORE UNITS

BSBCRT401 Articulate, present and debate ideas 40

BSBIPR401 Use and respect copyright 50

BSBSMB301 Investigate micro business opportunities 30

CUAWHS302 Apply work health and safety practices 10

ELECTIVE UNITS

Group A: Performance

CUAMLT403 Develop skills in analysis of functional harmony 55

CUAMPF302 Prepare for performances 35

CUAMPF401 Rehearse music for group performances 85

CUAMPF402 Develop and maintain stagecraft skills 70

CUAMPF403 Develop repertoire as part of a backup group 60

CUAMPF404 Perform music as part of a group 70

CUAMPF405 Develop instrumental techniques 50

CUAMPF406 Perform music as a soloist 70

CUAMPF408 Develop performance techniques on a second instrument 40

Group B: Sound Production

Group B electives are not currently offered by the Polytechnic under this specialisation.

Group C electives are not currently offered by the Polytechnic under this specialisation.

Group D: General

CUASOU307 Record and mix a basic music demo 40

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Diploma of Professional Writing and Editing

Course Code:CUA50118

Campus:Footscray Nicholson.

About this course:Develop your writing skills for work in the creative and publishing industries with the Diploma of Professional Writing and Editing at VU Polytechnic. Written communication skills are highly desired in today's workforce. During this course you will develop broad and transferable writing skills that will allow you to work across many areas of the media, including:

- print publications;
- digital forums and websites;
- television and film;
- advertising and marketing materials;
- social media;
- press releases, and;
- technical documents.

During this course you will gain knowledge and skills in:

- performing advanced writing and editing tasks;
- writing advanced fiction and nonfiction materials;
- undertaking project work and developing works for publication, and;
- knowledge of the creative arts industry and working as a freelance editor or writer.

You will also learn to market your work, as well as discover what roles and opportunities are available to a professional writer or editor.

Course Objectives:This qualification reflects the role of individuals who undertake a range of advanced writing and editing tasks required across diverse industries, including the writing or editing industries. Individuals will be required to write in a range of contexts and text types. They have autonomy in performing writing and editing tasks and can be responsible for planning, coordinating and evaluating writing and editing their own work and the work of others.

Careers:Possible career opportunities emerging from the completion of CUA50118 Diploma of Professional Writing and Editing include:

- writer, and;
- editor.

Course Duration: 1 year

Admission Requirements:All applicants must provide evidence of their technical skills in writing and editing and ability to: - Write short works (approximately 1,000 words) suitable for publication in any media; - Edit other people's written work for grammar, punctuation and appropriate use of language, and; - Provide an objective critique of other people's written work in a positive manner to assist re-writing. Skills may have been acquired through personal or work experience, or through formal study, such as the completion of the Certificate IV in Professional Writing and Editing. Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

Selection Processes:Portfolio

COURSE STRUCTURE

To be awarded the CUA50118 Diploma of Professional Writing and Editing, a student must successfully complete a total of thirteen (13) units of competency, comprising of:

- six (6) core units, and;
- seven (7) elective units, of which:
- five (5) units must be selected from the electives listed in the CUA50118 Diploma of Professional Writing and Editing qualification, and;
- two (2) units may be selected from the remaining listed electives or any currently endorsed training package qualification or accredited course.

Elective units must be relevant to the work environment and the qualification, maintain the overall integrity of the AQF alignment and contribute to a valid vocational outcome as well as be approved by the Polytechnic.

CORE UNITS

BSBPMG522	Undertake project work	60
CUAIND402	Provide freelance services	30
CUAIND502	Maintain and apply creative arts industry knowledge	50
CUAWRT504	Perform advanced editing tasks	120
CUAWRT505	Perform advanced writing tasks	120
CUAWRT506	Develop nonfiction works for publication	70

ELECTIVE UNITS

BSBCRT403	Explore the history and social impact of creativity	50
BSBWRT401	Write complex documents	50
CUARES403	Research history and theory to inform own arts practice	70
CUAWRT404	Perform writing and editing tasks	120
CUAWRT405	Write fiction material	70

CUAWRT406	Write nonfiction material	70
CUAWRT508	Develop children's and young adults' written works for publication	70
CUAWRT509	Develop fiction works for publication	70

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Diploma of Graphic Design

Course Code:CUA50715

Campus:Footscray Nicholson.

About this course:Build the foundation for a career in the graphic design industry with a Diploma of Graphic Design at the Polytechnic. This vocational course will give you the technical skills and knowledge to produce artwork for commercial purposes using both traditional and electronic methods. You will develop a sound understanding of the design process and be ready to solve a range of visual communication problems. During your studies, you will learn to create design concept from a brief both efficiently and economically. You will build your personal portfolio while developing specialist skills for advertising and multimedia in:

- digital design;
- illustration;
- calligraphy;
- layout;
- typography, and;
- context.

You will also become proficient in the use of industry-standard software including Adobe Illustrator, InDesign, and Photoshop.

Course Objectives:This qualification reflects the role of individuals who combine technical, creative and conceptual skills to create designs that meet client requirements and solve a range of visual communication challenges. Practice at this level is underpinned by application of design theory and practice and the ability to analyse and synthesise information from a range of sources to generate design solutions.

Careers:Possible career opportunities emerging from the completion of CUA50715 Diploma of Graphic Design, include:

- Graphic Designer, and/or
- Illustrator

Course Duration: 1 year

Admission Requirements:Applicants must provide evidence of their ability to: - produce multiple examples of graphic design work that respond effectively to different design challenges; - produce typography that supports the overall design solution, and; - use graphic design industry software. Skills may have been acquired through personal or work experience, or through formal study such as the completion

of VCE Visual Communication Design, the Certificate IV in Screen and Media or the Certificate IV in Design. Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

Selection Processes: Portfolio, OtherN/A

COURSE STRUCTURE

To be awarded CUA50715 Diploma of Graphic Design, a student must successfully complete a total of nineteen (19) units of competency, comprising of:

- nine (9) core units, and;
- ten (10) elective units, of which:

six (6) units must be selected from the electives listed within the CUA50715 Diploma of Graphic Design qualification; four (4) units may be selected from the remaining listed electives or any currently endorsed training package qualification or accredited course at Certificate IV, Diploma or Advanced Diploma level. Elective units must be relevant to the work environment and the qualification, maintain the integrity of the AQF alignment and contribute to a valid vocational outcome.

CORE UNITS

Imported

CUAPHI507 Produce media photo images 50

Diploma of Screen and Media

Course Code:CUA51015

Campus:City King St.

About this course:The CUA51015 Diploma of Screen and Media (Specialist Make-up Services) course enables the participant to gain the practical and technical skills they need to work with confidence as a Photographic, Film and Television Make-up Artist/Technician. The CUA51015 Diploma of Screen and Media (Specialist Make-up Services) course is a comprehensive program that extends the knowledge and skills of a makeup artist into all forms of media from sketching, presenting of photographic portfolios in print and digital format, sculpting, body art, and airbrushing. It incorporates a series of photo shoots including a body art shoot. This course also covers business plans, marketing and client interaction to provide effective communication and awareness in a rapidly changing and diverse environment.

Course Objectives:This qualification reflects the role of individuals who possess a sound theoretical knowledge base and use a range of specialised, technical or managerial competencies to plan, carry out and evaluate the work of self and/or team in the film, television, radio and interactive media industries.

Careers:Our graduates enter the industry as freelance professionals in a variety of behind-the-scene production roles. Many have also found career-building positions in Australian network television. Australian and International graduates are also actively working in media industries in Europe, USA and Asia. The growth in digital television and online content delivery has seen the rise of new job roles and opportunities within the Industry. Industry professionals regularly turn to the Polytechnic students and graduates to fill roles in all aspects of:

- media special effects;
- body art and face painting events;
- feature film and television productions;
- theatre;
- fashion and wedding photography;
- runway, and;
- music clips.

This program aims to provide students with the skills and knowledge necessary to work as:

- Make-up Artist/Designer;
- Hair Stylist/Designer, and;
- Special Make-up Artist/Designer.

Course Duration: 1 year

Admission Requirements:Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

Selection Processes: OtherN/A

COURSE STRUCTURE

To be awarded CUA51015 Diploma of Screen and Media, a student must successfully complete a total of fifteen (15) units of competency, consisting of:

- three (3) core units, and;
- twelve (12) elective units, of which:

ten (10) units must be selected from the electives listed within the qualification, and; two (2) units may be selected from the remaining listed electives or any currently endorsed training package qualification or accredited course at Certificate IV, Diploma or Advanced Diploma level. Elective units must be relevant to the work environment and the qualification, maintain the integrity of the AQF alignment and contribute to a valid vocational outcome as well as be approved by the Polytechnic. Specialisations The Polytechnic currently offers the following specialisation(s): Specialist Make-up Services.

Specialisation: Specialist Make-up Services

To be awarded this specialisation, the following additional packaging rules must be adhered to:

- Six (6) specialist units must be selected from Group B, and must include CUAMUP401 Design, apply and remove make-up and CUAMUP403 Style hair for performance or productions.

CORE UNITS

BSBCRT501	Originate and develop concepts	30
CUAIND502	Maintain and apply creative arts industry knowledge	50
CUAPPR505	Establish and maintain safe creative practice	30

Group A Elective Units - Interactive Media

BSBDES402	Interpret and respond to a design brief	20
BSBDES403	Develop and extend design skills and practice	30

Group B Elective Units - Specialist Make-up Services

CUAMUP401	Design, apply and remove make-up	160
CUAMUP402	Maintain make-up and hair continuity	160
CUAMUP403	Style hair for performances or productions	60
CUAMUP404	Style wigs and hairpieces for performances or productions	120
CUAMUP502	Design and apply specialised make-up	65
CUAMUP503	Design and apply special make-up effects	60

Group C Elective Units - Screen and Media

Group C electives are not currently offered by the Polytechnic.

Group D Elective Units - General

BSBCMM401	Make a presentation	30
BSBCRT402	Collaborate in a creative process	40
BSBPMG522	Undertake project work	60

Imported Elective Units

CUAIND402	Provide freelance services	30

Diploma of Visual Arts

Course Code:CUA51115

Campus:Footscray Nicholson.

About this course:Begin your career as a visual artist with the skills and knowledge to produce artwork by studying a wide range of contemporary, digital and classical techniques in painting and drawing. Practising artists teach this course and visiting speakers give talks on their work. Your studies will also include gallery visits. You may also be able to take your study further by progressing into the Advanced Diploma of Visual Arts.

Course Objectives:This qualification reflects the role of individuals who combine specialised technical, creative and conceptual skills to plan and realise a body of work in one or more art forms. Mediums may include ceramics, drawing and illustration, painting, photomedia, printmaking, public art, sculpture, textile design, wood design, digital art and glasswork. Practice at this level is underpinned by application of arts theory and history and the ability to critically analyse and synthesise information from a range of sources. Discourse around complex ideas is also required. Visual artists may work in their own practice or in a wide range of contexts across the arts government, community or commercial organisation.

Careers:Possible career opportunities emerging from the completion of CUA51115 Diploma of Visual Arts include:

- digital art;
- drawing and illustration;
- painting;
- photomedia, and;
- printmaking.

Course Duration: 1 year

Admission Requirements:Applicants must have the technical and organisational skills to conceptualise and create works in selected medium. Skills and knowledge may have been acquired through experience in creative practice or through formal study such as the completion of VCE Studio Arts, the Certificate IV in Screen and Media or the Certificate IV in Design. Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

Selection Processes:Portfolio, Other/Not Applicable.

COURSE STRUCTURE

To be awarded CUA51115 Diploma of Visual Arts, a student must successfully complete a total of fifteen (15) units of competency, comprising of:

- six (6) core units, and;
- nine (9) elective units, of which:

three (3) units must be selected from Group A; two (2) units must be selected from Group B; four (4) units may be selected from the remaining electives listed in the CUA51115 Diploma of Visual Arts qualification or any other training package qualification or accredited course at Certificate IV, Diploma or Advanced Diploma Level. Elective units must be relevant to the work environment and the qualification, maintain the integrity of the AQF alignment and contribute to a valid vocational outcome as well as be approved by the Polytechnic.

CORE UNITS

CUAACD501	Refine drawing and other visual representation tools	70

CUADRA401	Experiment with techniques to produce drawings	50

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Advanced Diploma of Music Industry

Course Code:CUA60515

Campus:Footscray Nicholson.

About this course:Build the technical, compositional and performance skills you'll need as a professional musician. You will study music analysis, music craft, performance technique and technology. This qualification is offered with the specialist streams of performance and composition. It is the ideal way to prepare for entry into the music industry or into further study, for example the Bachelor of Music. You will have access to:

- well-equipped rehearsal and performance facilities at Kindred Studios;
- 21-machine computer music lab;
- multimedia software for production, arranging and composition;
- Kindred Studios, and;
- Study alongside industry professionals working in the music and media industries, in our unique industry-based location at Kindred Studios (external link) in Yarraville, just a 5 minute walk from Footscray Nicholson campus.

Course Objectives:This qualification reflects the role of individuals who use wide-ranging analytical, technical, creative, conceptual and managerial skills in their chosen field in the music industry. Their knowledge base may be specialised or broad. These individuals are sometimes accountable for group outcomes.

Careers:Possible career opportunities emerging from the completion of CUA60515 Advanced Diploma of Music Industry include:

- Composer and Performer, and;
- Performer.

Course Duration:1 year

Admission Requirements:All applicants will be required to undertake an audition to determine course suitability. Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

Selection Processes: Other/Not Applicable.

COURSE STRUCTURE

To be awarded CUA60515 Advanced Diploma of Music Industry, a student must successfully complete a total of fifteen (15) units of competency, consisting of:

- four (4) core units, and;
- eleven (11) elective units, of which:

eight (8) units must be selected from the electives listed in the qualification, with no more than two (2) units from Group D, and; three (3) units may be selected from the remaining listed electives or any currently endorsed training package qualification or accredited course at Diploma level or above. Elective units must be relevant to the work environment and the qualification, maintain the integrity of the AQF alignment, contribute to a valid vocational outcome and be approved by the University. This qualification can provide for specialisations. Specialisations The Polytechnic currently offers the following specialisation(s):

- Performance, and;
- Performance/Composition.

Specialisation: Performance

To achieve this specialisation, the following additional packaging rules must be adhered to:

- Six (6) elective units must be selected from Group A.

CORE UNITS

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate IV in Accounting and Bookkeeping

Course Code: FNS40217

Campus: Footscray Nicholson, Werribee.

About this course: Gain the specialised skills to enter the financial services industry with a Certificate IV in Accounting and Bookkeeping at VU Polytechnic. This course will provide you with a solid foundation to begin your financial career. You will learn accounting principles as well as develop skills to perform a range of duties in the financial sector. Our qualified trainers will provide you with the necessary knowledge and skills in:

- preparing financial reports;
- processing of financial transactions and interim reporting;
- administering subsidiary accounts and ledgers;
- computerised accounting systems and cloud-based systems;
- business activity and instalment activity statements, and;
- payroll systems.

Course Objectives: This qualification reflects the job roles of workers in the accounting industry, including BAS Agents and contract bookkeepers; and of those employees performing bookkeeping tasks for organisations in a range of industries. It includes preparing and lodging business and instalment activity statements, and providing advice or dealing with the Commissioner on behalf of a taxpayer in relation to activity statements. Individuals in these roles apply theoretical and specialist knowledge and skills to work autonomously, and exercise judgement in completing routine and non-routine activities. Licensing/Regulatory Information Work functions in the occupational areas where this qualification may be used are subject to regulatory requirements. Refer to the FNS Financial Services Training Package Companion Volume Implementation Guide or the relevant regulator for specific guidance on requirements. Persons providing a business activity statement (BAS) service for a fee or other reward must be registered by the Tax Practitioners Board (TPB) and this qualification is currently cited as meeting the TPB education requirements for registration. Other conditions apply, including a designated period of experience. Persons seeking BAS agent registration should check current registration requirements with the TPB, as registration requirements are reviewed regularly.

Careers: Graduates of this qualification will be able to enter roles such as:

- Bookkeeper;
- Accounts Support Officer;
- Accounts Payable/Receivable;
- Payroll Officer, and;
- BAS Agent.

Course Duration: 0.5 years

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

COURSE STRUCTURE

To be awarded the FNS40217 Certificate IV in Accounting and Bookkeeping, a student must successfully complete a total of thirteen (13) units of competency, comprising of:

- eight (8) core units, and;
- five (5) elective units, of which:

all five (5) may be selected from the units listed in the FNS40217 Certificate IV in Accounting and Bookkeeping qualification; up to two (2) units may be selected from a Certificate III, Certificate IV or Diploma in any currently endorsed training package or accredited course, provided they do not duplicate the outcome of another unit chosen for the qualification. Electives must be industry relevant as well as be approved by Victoria University Polytechnic.

CORE UNITS

BSBFIA401	Prepare financial reports	50
BSBSMB412	Introduce cloud computing into business operations	50
FNSACC311	Process financial transactions and extract interim reports	60
FNSACC312	Administer subsidiary accounts and ledgers	40
FNSACC408	Work effectively in the accounting and bookkeeping industry	40
FNSACC416	Set up and operate a computerised accounting system	80
FNSTPB401	Complete business activity and instalment activity statements	50
FNSTPB402	Establish and maintain payroll systems	45

ELECTIVE UNITS

BSBITU402	Develop and use complex spreadsheets	50
FNSACC411	Process business tax requirements	50
FNSACC313	Perform financial calculations	30
FNSACC414	Prepare financial statements for non-reporting entities	60
Imported		
BSBWRT401	Write complex documents	50

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Diploma of Accounting

Course Code: FNS50217

Campus: Footscray Nicholson, Werribee.

About this course: Boost your job prospects by gaining skills to provide professional financial services with a Diploma of Accounting at Victoria University Polytechnic. This course will provide you with the training and knowledge necessary for a range of accounting career pathways. You will become proficient in the use of accounting software. Learning from our expert staff, you will gain the skills and confidence to perform a range of accounting duties including:

- providing financial and business performance information;
- managing budgets and forecasts;
- preparing financial reports;
- providing management accounting information, and;
- preparing income tax.

Course Objectives: This qualification reflects professional accounting job roles in financial services and other industries, including tax agents, accounts payable and accounts receivable officers, payroll service providers, and employees performing a range of accounting tasks for organisations in a range of industries. Individuals in these roles apply solutions to a range of often complex problems, and analyse and evaluate information from a variety of sources. They apply initiative to plan, coordinate and evaluate their own work and provide guidance to others within defined guidelines. Licensing/Regulatory Information Work functions in the occupational areas where this qualification may be used are subject to regulatory requirements. Refer to the FNS Financial Services Training Package Companion Volume Implementation Guide or the relevant regulator for specific guidance on requirements. This qualification includes units that comprise an approved Tax Practitioner Board (TPB) course in Australian taxation law and commercial law, which are relevant for registration as a tax agent. Persons seeking registration with the TPB should check current registration requirements with the TPB, as registration requirements are reviewed regularly.

Careers: Possible career opportunities emerging from the completion of FNS50217 Diploma of Accounting include:

Recognition of Prior Learning and/or Credit Transfers:

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Diploma of Payroll Services

Course Code: FNS50417

Campus: Footscray Nicholson.

About this course: Are you interested in getting your foot in the door of the financial services industry? Develop a broad range of Payroll skills with the Diploma of Payroll Services at VU Polytechnic. Taught by teachers with real-world experience in the finance industry, you will learn a diverse range of skills including superannuation, taxation and communication skills. You will gain confidence and knowledge in:

- establishing and maintaining a Payroll system;
- salary packaging;
- budgeting and forecasting;
- implement internal controls;
- taxation systems for Payroll;

- managing Payroll, and;
- business performance information.

Upon completion of this course, you will be equipped to enter the industry with a wide range of cognitive, technical and functional communication skills, allowing you to either begin work or continue onto further study.

Course Objectives: This qualification reflects the job roles of workers who perform payroll administration and payroll management tasks in a variety of industries. It includes establishing payroll systems and using them to perform sometimes complex tasks, including preparing salary packaging arrangements and additional allowances, processing superannuation payments, and processing employee terminations.

Careers: Graduates in the FNS50417 Diploma of Payroll Services may seek employment as a:

- payroll officer;
- payroll manager, and/or;
- other specialised payroll functions.

Course Duration: 0.5 years

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

COURSE STRUCTURE

To be awarded the FNS50417 Diploma of Payroll Services, a student must successfully complete a total of eleven (11) units of competency, comprising of:

- eight (8) core units, and;
- three (3) elective units, of which:
- all three (3) units may be chosen from the elective units listed in the FNS50417 Diploma of Payroll Services qualification;

up to two (2) units may be from a Certificate IV, Diploma or Advanced Diploma in any currently endorsed training package or accredited course, provided they do not duplicate the outcome of another unit chosen for the qualification. FNSACC312	Administer subsidiary accounts and ledgers	40
FNSTPB401	Complete business activity and instalment activity statements	50

Recognition of Prior Learning and/or Credit Transfers:

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Advanced Diploma of Accounting

Course Code: FNS60217

Campus: Footscray Nicholson.

About this course: Enhance your career prospects by developing a broad range of accounting and professional finance skills with the Advanced Diploma of Accounting at Victoria University Polytechnic. This course will provide you with the training and knowledge necessary for a range of career paths in the finance industry. Learning from our expert teachers with current industry experience, you will gain skills in:

- tax for corporate entities;
- taxation planning;
- evaluating financial performance;
- auditing and corporate governance;
- preparing complex financial and management reports;
- the principles of consumer and contract law;
- the principles of corporations and trust law, and;
- the principles of commercial and property law.

Upon completion of this course you will be equipped with a wide range of technical and communication skills to prepare you for entry into the accounting sector workforce.

Course Objectives: This qualification reflects the role of individuals working in accounting and seeking professional recognition, including tax agents, accounts managers and business analysts; and to employees performing a range of accounts management tasks for organisations in a range of industries. At this level individuals are expected to apply theoretical and technical skills in a range of situations and to display initiative and judgement in planning activities. They have autonomy in performing complex operations and can be responsible for planning, coordinating and evaluating the work of others within broad but generally well-defined parameters. Licensing/Regulatory Information Work functions in the occupational areas where this qualification may be used are subject to regulatory requirements. Refer to the FNS Financial Services Training Package Companion Volume Implementation Guide or the relevant regulator for specific guidance on requirements. This qualification includes units that comprise an approved Tax Practitioner Board (TPB) course in

Australian taxation law and commercial law, which are relevant for registration as a tax agent. Persons seeking registration with the TPB should check current registration requirements with the TPB, as registration requirements are reviewed regularly.

Careers: Possible career opportunities emerging from the completion of FNS60217 Advanced Diploma of Accounting include:

- Registered Tax Agent;
- Financial Controller.

Course Duration: 9 months

Admission Requirements: Applicants must have completed either: FNSSS00014 Accounting Principles Skill Set and FNSSS00015 Advanced Accounting Principles Skill Set, or; FNS50215 Diploma of Accounting, or; FNS50217 Diploma of Accounting. Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

COURSE STRUCTURE

To be awarded the FNS60217 Advanced Diploma of Accounting, a student must successfully complete a total of fourteen (14) units of competency, comprising of:

- three (3) core units, and;
- eleven (11) elective units, of which:
- five (5) units must be selected from the elective units listed in the FNS60217 Advanced Diploma of Accounting qualification;
- six (6) units, may be selected from the elective units listed in the FNS60217 Advanced Diploma of Accounting or from a Certificate IV, Diploma or Advanced Diploma, in any currently endorsed training package or accredited course, provided they do not duplicate the outcome of another unit chosen for the qualification.

Electives must be industry relevant as well as be approved by Victoria University Polytechnic.

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate III in Non-Emergency Patient Transport

Course Code: HLT31115

Campus: Werribee, Sunshine.

About this course: Start your career as a non-emergency patient transport officer working with low-risk patients in a growing industry. During this course you will learn how to provide non-emergency transport and care for patients who have non-acute or chronic illness or disability. You will gain the skills to provide appropriate patient assessment as well as follow procedures for safe removal of a patient for pre-arranged or booked transport service. Learning from our expert staff through our award-winning blended learning model, you will gain knowledge and skills in:

- communicating in a health or community services environment;
- recognising healthy body systems;
- procedures for routine safe removal of a patient;
- transporting non-emergency patients;
- infection prevention and control procedures, and;
- working with diverse people and safe work practices for client care.

Course Objectives: This qualification reflects the role of workers such as non-emergency patient transport officers who provide non-emergency transport and care for patients who have non-acute or chronic illness or disability and require transport. Workers in this role provide appropriate patient assessment, follow procedures for safe removal of a patient for transport for pre-arranged or booked transport service and the time of response is not given high priority in comparison to emergency transport.

Careers: Possible career opportunities emerging from the completion of HLT31115 Certificate III in Non-Emergency Patient Transport include:

- Ambulance Assistant (First Aid Provider);
- Ambulance Call Taker, and;
- Non-Emergency Patient Transport Assistant.

Course Duration: 0.5 years

Admission Requirements: All applicants must be at least 18 years of age or over by the time of commencement date of the program. All applicants must complete a Language, Literacy and Numeracy Assessment (LLN). VU Polytechnic use the Basic Key Skills Builder (BKSB) tool for this assessment and applicants must achieve level four (4) in both literacy and numeracy. Applicants who complete the ACSF assessment tool the minimum exit level three (3) for both literacy and numeracy. Applicants can be accepted one (1) level lower with the provision of enrolling into additional learning support appropriate to their needs and course requirements where other elements of their application suggest the opportunity for successful completion. At time of application applicants must be able to provide: Current Drivers Licence (Probationary Accepted) Placement requirements: All applicants must provide prior to placement: A current Working with Children Check (WWCC) A satisfactory Police Record check

COURSE STRUCTURE

To be awarded the HLT31115 Certificate III in Non-Emergency Patient Transport, a student must successfully complete a total of thirteen (13) units of competency, comprising of:

- eight (8) core units, and;
- five (5) elective units, of which:

three (3) units must be selected from the electives listed in the HLT31115 Certificate III in Non-Emergency Patient Transport qualification, and; two (2) units may be selected from the electives listed in the HLT31115 Certificate III in Non-Emergency Patient Transport qualification, any endorsed training package or accredited course. All electives chosen must contribute to a valid, industry-supported vocational outcome as well as be approved by the Polytechnic.

CORE UNITS

HLTAAP001	Recognise healthy body systems	70
HLTAID003	Provide first aid	18
HLTAMB001	Follow procedures for routine safe removal of patient	50
HLTAMB014	Transport non-emergency patients under operational conditions	40
HLTINFO01	Comply with infection prevention and control policies and procedures	25
HLTWH002	Follow safe work practices for direct client care	25

ELECTIVE UNITS

HLTAID006	Provide advanced first aid	30
HLTAID007	Provide advanced resuscitation	14
HLTAMB007	Assess and deliver basic clinical care	100

Imported

CHCCCS010	Maintain high standard of service	30
CHCCCS026	Transport individuals	20

Units in Transition:

The following unit/s will not be offered to prospective students in 2020. These units will only be available for current/continuing students from this time.

BSBMED301	Interpret and apply medical terminology appropriately	60
HLTAMB011	Manage a routine non-emergency scene	50

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate III in Health Services Assistance

Course Code: HLT31115

Campus: Footscray Nicholson, St Albans, Werribee, Sunshine.

About this course: Develop a career caring for patients in hospitals as a Patient Service Assistant (PSA) to professional health staff. You will undertake a range of routine tasks and gain knowledge of:

- transporting patients;
- preparing and maintaining beds;
- following basic food safety practice;
- infection control, and;
- basic medical terminology.

Course Objectives: This qualification reflects the role of a variety of workers who use a range of factual, technical and procedural knowledge to provide assistance to health professional staff for the care of clients. Health services assistance involves the worker in direct client contact under supervision. This qualification forms part of the credit suite specified by the Victorian Curriculum and Assessment Authority (VCAA) and may contribute towards the satisfactory completion of the Victoria Certificate of Education (VCE) or the Victoria Certificate of Applied Learning (VCAL).

Careers: At the completion of HLT31115 Certificate III in Health Services Assistance, you will be able to explore the following careers:

- Orderly;
- Nursing Assistant;
- Nursing Support Worker;
- Patient Service Attendant;
- Ward Assistant;
- Patient Support Assistant;
- Wards Person;
- Patient Care Assistant, and;

- Ward Support.

Course Duration: 0.5 years

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs. For employment and practical placement purposes, this vocational sector typically requires a current and satisfactory Police Record Check and Working with Children Check. Failure to provide the required documents in the timeframe specified by the Course Coordinator, means you will be unable to undertake practical placement in a workplace and therefore not eligible to progress in this course. The following are suggested sites you could visit to obtain these checks: - Police Record Check - http://www.police.vic.gov.au/content.asp?Document_ID=274 - Working with Children Check - <http://www.workingwithchildren.vic.gov.au/VETIS>: The literacy and numeracy levels of applicants will be assessed through consultation with the relevant secondary school.

Selection Processes: OtherN/A

COURSE STRUCTURE

To be awarded HLT33115 Certificate III in Health Services Assistance, a student must successfully complete a total of fifteen (15) units of competency, comprising of:

- seven (7) core units, and;
- eight (8) elective units, consisting of:

at least six (6) units from the electives listed in the HLT33115 Certificate III in Health Services Assistance qualification; up to two (2) units from any endorsed training package or accredited course – these units must be relevant to the work outcome. All electives chosen must contribute to a valid, industry-supported vocational outcome as well as be approved by the Polytechnic.

Certificate III in Health Administration

Course Code: HLT37315

Campus: Industry, Werribee.

About this course: Develop the skills necessary for supporting the daily operations of a health practice, with a Certificate III in Health Administration at Victoria University Polytechnic. This course will provide you with training to work in administrative roles in hospitals, community health centres and private practices. Through classroom learning and a practical work placement, you will learn to perform a variety of duties including:

- maintaining patient and financial records
- managing information and resources
- implementing infection control policies.

You will also become proficient in the use of basic medical terminology. You will develop a combination of communications skills and organisational skills, as well as an understanding of work health and safety processes. Our expert staff will ensure you graduate job-ready.

Course Objectives: This qualification reflects the role of administrative workers in the health industry. These workers follow known routines and procedures, taking responsibility for their own work under general supervision. They combine communication, customer service and technical skills, and use discretion and judgment to adapt and transfer their skills to different situations.

Careers: Possible career opportunities emerging from the completion of HLT37315 Certificate III in Health Administration include:

- Admissions Clerk;
- Medical Receptionist;
- Clinical Coding Clerk;
- Administrative Worker;
- Ward Clerk, or;
- Patient Coordinator.

Course Duration: 0.5 years

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs. For employment and practical placement purposes, this vocational sector typically requires a current and satisfactory Police Record Check and Working with Children Check. Failure to provide the required documents in the timeframe specified by the Course Coordinator, means you will be unable to undertake practical placement in a workplace and therefore not eligible to progress in this course. The following are suggested sites you could visit to obtain these checks: - Police Record Check - http://www.police.vic.gov.au/content.asp?Document_ID=274 - Working with Children Check - <http://www.workingwithchildren.vic.gov.au/>

COURSE STRUCTURE

To be awarded HLT37315 Certificate III in Health Administration, a student must successfully complete a total of thirteen (13) units of competency, comprising of:

- five (5) core units, and;
- eight (8) elective units, consisting of:

at least three (3) units from the Administration group identified in the HLT37315 Certificate III in Health Administration qualification, and; up to five (5) units from the electives listed in the HLT37315 Certificate III in Health Administration qualification, any endorsed training package or accredited course. Electives must be industry relevant as well as be approved by the Polytechnic.

CORE UNITS

CHCCOM005	Communicate and work in health or community services	30
CHCDIV001	Work with diverse people	40
HLTINFO01	Comply with infection prevention and control policies and procedures	25

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate IV in Allied Health Assistance

Course Code: HLT43015

Campus: St Albans, Werribee, Sunshine.

About this course: Gain the knowledge and skills to provide therapeutic and program related support to allied health professionals and to assist patients with their rehabilitation. Delivered by expert staff through our award-winning blended learning, the Certificate IV in Allied Health Assistance at VU Polytechnic will provide you with the essential training to work alongside health professionals such as physiotherapists or occupational therapists in the health industry. Upon completion of this course you will be equipped with the knowledge and confidence to:

- Provide therapeutic and program related support to allied health professionals;
- Conduct therapeutic and program related activities under the guidance of an allied health professional;
- Identify client circumstances that need additional input from the allied health professional;
- Engaged to work in a speciality area or work generically across the organisation in delivery of allied health assistance; services, and;
- Work in conjunction with the allied health professional, may have responsibility for supervising other allied health assistance workers.

During this course, you will undertake work placement to help you gain necessary skills to work in the industry.

Course Objectives: This qualification reflects the role of workers who provide therapeutic and program related support to allied health professionals. The worker is required to conduct therapeutic and program related activities under the guidance of an allied health professional. Supervision may be direct, indirect or remote and must occur within organisation requirements. The worker is required to identify client circumstances that need additional input from the allied health professional. The worker may be engaged to work in a speciality area or work generically across the organisation in delivery of allied health assistance services. The worker, in

conjunction with the allied health professional, may have responsibility for supervising other allied health assistance workers.

Careers: Possible career opportunities emerging from the completion of HLT43015 Certificate IV in Allied Health Assistance include:

- Allied Health Worker;
- Community Rehabilitation Assistant.

Course Duration: 1 year

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

COURSE STRUCTURE

To be awarded the HLT43015 Certificate IV in Allied Health Assistance, a student must successfully complete a total of sixteen (16) units of competency, comprising of:

- seven (7) core units, and;
- nine (9) elective units, of which:
- at least six (6) units must be selected from the electives listed in the HLT43015 Certificate IV in Allied Health Assistance qualification; at least 2 of these units must be coded HLTAHA;
- three (3) units may be selected from any endorsed training package or accredited course. These units must be relevant to the work outcome.

Any combination of electives that meets the rules above can be selected for the award of the Certificate IV in Allied Health Assistance. Where appropriate, electives may be packaged to provide a qualification with a specialisation. Packaging for each specialisation:

- All Group A electives must be selected for award of the Certificate IV in Allied Health Assistance (Physiotherapy)
- All Group B electives must be selected for award of the Certificate IV in Allied Health Assistance (Podiatry)
- All Group C electives must be selected for award of the Certificate IV in Allied Health Assistance (Occupational therapy)
- All Group D electives must be selected for award of the Certificate IV in Allied Health Assistance (Speech pathology)
- All Group E electives must be selected for award of the Certificate IV in Allied Health Assistance (Community rehabilitation)
- All Group F electives must be selected for award of the Certificate IV in Allied Health Assistance (Nutrition and dietetics)

All electives chosen must contribute to a valid, industry-supported vocational outcome as well as be approved by Victoria University Polytechnic. The Polytechnic currently offer the following specialisation:

- Community rehabilitation.

Specialisation: Community rehabilitation

To be awarded this specialisation, the following additional rule must be adhered to:

- all Group E (2) electives must be selected.

Diploma of Remedial Massage

Course Code: HLT52015

Campus: Footscray Park, Werribee, City King St, Whitten Oval.

About this course: Develop essential skills to work across a range of industries from sport to rehabilitation with a Diploma of Remedial Massage at the Polytechnic. This course teaches you practical skills in remedial massage, which uses massage, stretching and associated techniques to improve wellness, health and relaxation. You will gain the theoretical knowledge required to assess your clients' soft tissue dysfunction as well as provide treatment to clients with a specific need. You will gain experience with real clients in the Polytechnic massage clinic. You will study at our City King campus during the first semester then at Whitten Oval for second semester. Enrolling in this course provides the opportunity to apply for a paid cadetship with the Western Bulldogs AFL club. This course gives you a qualification as well as the small business skills needed to thrive in the industry. This qualification is recognised nationally by Service Skills Australia.

Course Objectives: This qualification reflects the role of remedial massage therapists who work with clients presenting with soft tissue dysfunction, musculoskeletal imbalance or restrictions in range of motion (ROM). Practitioners may be self-employed or work within a larger health service.

Careers: Possible career opportunities emerging from the completion of HLT52015 Diploma of Remedial Massage include:

- Ayurvedic Lifestyle Consultant;

- Clinical Aromatherapist;
- Kinesiologist;
- Reflexologist;
- Remedial Massage Therapist;
- Shiatsu Therapist, and/or;
- TCM Remedial Massage Practitioner.

Course Duration: 1 year

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs. For employment and practical placement purposes, this vocational sector typically requires a current and satisfactory Police Record Check. Failure to provide the required documents in the timeframe specified by the Course Coordinator, means you will be unable to undertake practical placement in a workplace and therefore not eligible to progress in this course. The following is a suggested site you could visit to obtain this check: - Police Record Check - http://www.police.vic.gov.au/content.asp?Document_ID=274

COURSE STRUCTURE

To be awarded HLT52015 Diploma of Remedial Massage, a student must successfully complete a total of twenty-one (21) units of competency, comprising of:

- sixteen (16) core units, and;
- five (5) elective units, of which:

at least one (1) unit must be selected from the Business Management group listed in the HLT52015 Diploma of Remedial Massage qualification; up to four (4) units must be selected from the electives listed in the HLT52015 Diploma of Remedial Massage qualification, any endorsed training package or accredited course – these units must be relevant to the work outcome. All electives chosen must contribute to a valid, industry-supported vocational outcome as well as be approved by the Polytechnic.

CORE UNITS

CHCCM006	Establish and manage client relationships	35
CHCDIV001	Work with diverse people	40
CHCLEG003	Manage legal and ethical compliance	80
CHCPRP003	Reflect on and improve own professional practice	120
CHCPRP005	Engage with health professionals and the health system	40
HLTAAP003	Analyse and respond to client health information	60
HLTAID003	Provide first aid	18
HLTINF004	Manage the prevention and control of infection	50
HLTMSG001	Develop massage practice	40
HLTMSG002	Assess client massage needs	150

HLTMSG003	Perform remedial massage musculoskeletal assessments	240
HLTMSG004	Provide massage treatments	150
HLTMSG005	Provide remedial massage treatments	240
HLTMSG006	Adapt remedial massage practice to meet specific needs	120
HLTMSG008	Monitor and evaluate remedial massage treatments	30
HLTWHS004	Manage work health and safety	40
ELECTIVE UNITS		
Business Management		
BSBSMB404	Undertake small business planning	50
CHCCCS001	Address the needs of people with chronic disease	75
Other Electives		
BSBMED401	Manage patient recordkeeping system	50
SISSPT307A	Conduct advanced taping	10
HLTMSG007	Adapt remedial massage practice for athletes	60

Recognition of Prior Learning and/or Credit Transfers:

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Diploma of Nursing

Course Code: HLT54115

Campus: St Albans, Werribee, Sunshine.

About this course: Study one of the great caring professions and embark on a rewarding career as a Division 2 Nurse. You could find work in a variety of fields from public or private hospitals to private nursing or community health care facilities. You will gain hands-on learning experience in our ward simulation labs as well as clinical experience through course placements. Students, who successfully complete this course, may apply to the Nursing and Midwifery Board of Australia (www.nursingmidwiferyboard.gov.au) for registration as an Enrolled Nurse.

Course Objectives: This qualification reflects the role of an enrolled nurse working under supervision of a registered nurse. This qualification covers the application of skills and knowledge required to provide nursing care for people across the health sector. A lifespan approach should underpin this qualification with relevant competencies that relate to the different stages of life identified within the units. A graduate from a Diploma of Nursing program approved by the Nursing and Midwifery Board of Australia (NMBA) is able to apply for registration with the NMBA as an enrolled nurse. Further information on registration is available at www.nursingmidwiferyboard.gov.au.

Careers: Possible career opportunities emerging from the completion of HLT54115 Diploma of Nursing include:

- Enrolled Nurse.

Course Duration: 2 years

Admission Requirements: All applicants must be at least 18 years of age or over by the time of commencement date of the program. All applicants must complete a Literacy and Numeracy Assessment (LLN). VU Polytechnic use the Basic Key Skills Builder (BKSB) tool for this assessment and applicants must achieve level four (4) in both literacy and numeracy. Applicants who complete the ACSF assessment tool must achieve a minimum exit level three (3) for both Literacy and Numeracy. All applicants will be required to undertake an interview and complete a language and calculations test. Applicants must also be able to demonstrate that they meet the requirements of the Nursing and Midwifery Board of Australia's (NMBA) English language skills registration standard. Proof of this English language competency must be provided and can be achieved via one (1) of the following pathways: 1. Primary Language Pathway The applicant's primary language is English, and they have undertaken and satisfactorily completed at least six (6) years of primary and secondary education, including at least two (2) years between Years 7 and 12. Countries include Australia, New Zealand, United Kingdom, Republic of Ireland, Canada, South Africa and the United States of America. Applicants will be required to complete a declaration. 2. English Language Test Pathway Applicants must be able to demonstrate that they have achieved the required minimum scores in one of the approved English language tests as specified in the NMBA's English language skills registration standard prior to acceptance of offer. IELTS the IELTS (academic module) with a minimum overall score of 7 and a minimum score of 7 in each of the four components (listening, reading, writing and speaking). OET with a minimum score of B in each of the four components (listening, reading, writing and speaking). PTE Academic with a minimum overall score of 65 and a minimum score of 65 in each of the four communicative skills (listening, reading, writing and speaking). TOEFL iBT with a minimum total score of 94 and the following minimum score in each section of the test 24 for listening, 24 for reading, 27 for writing, and 23 for speaking. More information can be found by visiting:

<https://www.nursingmidwiferyboard.gov.au/Registration-Standards/English-language-skills.aspx> Placement requirements: In addition to the above requirements, all students must provide the following documentation prior to placement. A current Working with Children Check (WWCC) A satisfactory Police Record check A Health Status check (immunisations status) are required for clinical placement purposes.

Admission Requirements International: All applicants must be at least 18 years of age or over by the time of commencement date of the program. All applicants must demonstrate Year 12 or equivalent and meet the requirements of the Nursing and Midwifery Board of Australia's (NMBA) English language skills registration standard. All applicants will be required to undertake an interview and complete a language and calculations test. Applicants must also be able to demonstrate that they meet the requirements of the Nursing and Midwifery Board of Australia's (NMBA) English language skills registration standard. Proof of this English language competency must be provided and can be achieved via one (1) of the following pathways: Primary Language Pathway Primary Language Pathway The applicant's primary language is English, and they have undertaken and satisfactorily completed at least six (6) years of primary and secondary education, including at least two (2) years between Years 7 and 12. Countries include Australia, New Zealand, United Kingdom, Republic of Ireland, Canada, South Africa and the United States of America. English Language

Test Pathway Applicants must be able to demonstrate that they have achieved the required minimum scores in one of the approved English language tests as specified in the NMBA's English language skills registration standard prior to acceptance of offer. IELTS the IELTS (academic module) with a minimum overall score of 7 and a minimum score of 7 in each of the four components (listening, reading, writing and speaking). OET with a minimum score of B in each of the four components (listening, reading, writing and speaking). PTE Academic with a minimum overall score of 65 and a minimum score of 65 in each of the four communicative skills (listening, reading, writing and speaking). TOEFL iBT with a minimum total score of 94 and the following minimum score in each section of the test 24 for listening, 24 for reading, 27 for writing, and 23 for speaking. More information can be found by visiting: <https://www.nursingmidwiferyboard.gov.au/Registration-Standards/English-language-skills.aspx> Placement requirements: In addition to the above requirements all students must provide prior to placement: A current Working with Children Check (WWCC) A satisfactory Police Record check A Health Status check (immunisations status) are required for clinical placement purposes.

Selection Processes: Interview, Other Not Applicable.

COURSE STRUCTURE

To be awarded HLT54115 Diploma of Nursing, a student must successfully complete a total of twenty-five (25) units of competency, consisting of:

- twenty (20) core units, and;
- five (5) elective units, of which:

at least three (3) units from the electives listed within the HLT54115 Diploma of Nursing qualification; up to two (2) units from any endorsed training package or accredited course – these units must be relevant to the work outcome. All electives chosen must contribute to a valid, industry-supported vocational outcome as well as be approved by the Polytechnic.

CORE UNITS

CHCDIV001	Work with diverse people	40
CHCDIV002	Promote Aboriginal and/or Torres Strait Islander cultural safety	25
CHCPRP003	Reflect on and improve own professional practice	120
HLTAAP002	Confirm physical health status	90
HLTAAP003	Analyse and respond to client health information	60
HLTENN001	Practise nursing within the Australian health care system	100
HLTENN002	Apply communication skills in nursing practice	50
HLTENN003	Perform clinical assessment and contribute to planning nursing care	50
HLTENN004	Implement, monitor and evaluate nursing care plans	110
HLTENN005	Contribute to nursing care of a person with complex	90

needs

HLTENN006	Apply principles of wound management in the clinical environment	45
HLTENN007	Administer and monitor medicines and intravenous therapy	250
HLTENN008	Apply legal and ethical parameters to nursing practice	30
HLTENN009	Implement and monitor care for a person with mental health conditions	60
HLTENN011	Implement and monitor care for a person with acute health problems	70
HLTENN012	Implement and monitor care for a person with chronic health problems	50
HLTENN013	Implement and monitor care of the older person	75
HLTENN015	Apply nursing practice in the primary health care setting	80
HLTINF001	Comply with infection prevention and control policies and procedures	25
HLTWHS002	Follow safe work practices for direct client care	25

ELECTIVE UNITS

CHCPOL003	Research and apply evidence to practice	65
HLTENN010	Apply a palliative approach in nursing practice	50
HLTENN025	Implement and monitor care for a person with diabetes	80
HLTWHS006	Manage personal stressors in the work environment	25
Imported		
BSBMED301	Interpret and apply medical terminology appropriately	60

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate II in Information, Digital Media and Technology

Course Code: ICT20115

Campus: Industry, Footscray Nicholson, St Albans, Werribee.

About this course: This certificate covers digital literacy, employability skills as well as social and welfare support for youth experiencing education or employment barriers, as part of the Polytechnic's 'Skills First' program. Students develop general information and communication technology skills and gain an understanding of

software and digital media packages, as well as social media tools. The program also covers the essential skills needed to prepare for work and traineeship roles including:

- attendance;
- punctuality;
- teamwork;
- communication, and;
- problem solving skills.

VEtIS: This delivery is partial completion of ICT201 15. On successful completion of the program, students will be eligible for: a Statement of Attainment towards completion of ICT20115 Certificate II in Information, Digital Media and Technology.

Course Objectives: This qualification provides the skills and knowledge for individuals to be competent in the foundation skills and knowledge for use within the wide range of general information and communications technology (ICT) technologies. Persons working at this level apply a range of knowledge and skills in basic information and communications technology, with an understanding of software packages, digital media packages, social media tools and working safely and ethically in a sustainable work environment. Vocational Education Training in Schools (VEtIS) This qualification forms part of the credit suite specified by the Victorian Curriculum and Assessment Authority (VCAA) and may contribute towards the satisfactory completion of the Victoria Certificate of Education (VCE) or the Victoria Certificate of Applied Learning (VCAL).

Careers: This entry level qualification provides the foundation skills and knowledge to use information and communications technology (ICT) in any industry.

Course Duration: 0.5 years

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs. VEtIS: The literacy and numeracy levels of applicants will be assessed through consultation with the relevant secondary school.

Selection Processes: Other/Not Applicable.

COURSE STRUCTURE

To be awarded ICT201 15 Certificate II in Information, Digital Media and Technology, a student must complete a total of fourteen (14) units of competency, consisting of:

- seven (7) core units, and;
- seven (7) elective units, consisting of:
- up to seven (7) from the elective units listed in the ICT201 15 Certificate II in Information, Digital Media and Technology qualification, and;
- up to three (3) units from elsewhere in the ICT Information and Communications Technology Training Package or any other training package or accredited course at Certificate II or III level.

The elective units chosen must be relevant to the work outcome and meet local industry needs as well as be approved by the Polytechnic. VEtIS: This delivery is partial completion of ICT201 15. On successful completion of the program, students will be eligible for: a Statement of Attainment towards completion of ICT201 15 Certificate II in Information, Digital Media and Technology.

CORE UNITS

BSBWHS201	Contribute to health and safety of self and others	20
BSBSUS201	Participate in environmentally sustainable work practices	20
ICTICT201	Use computer operating systems and hardware	60
ICTICT202	Work and communicate effectively in an ICT environment	40
ICTICT203	Operate application software packages	60
ICTICT204	Operate a digital media technology package	40
ICTWEB201	Use social media tools for collaboration and engagement	20

ELECTIVE UNITS

CUAPOS201	Perform basic vision and sound editing	40
ICTICT205	Design basic organisational documents using computing packages	40
ICTICT206	Install software applications	20
ICTICT207	Integrate commercial computing packages	60
ICTICT211	Identify and use basic current industry specific technologies	40
ICTSAS205	Maintain ICT system integrity	20
ICTSAS206	Detect and protect from spam and destructive software	10

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate III in Information, Digital Media and Technology

Course Code: ICT30118

Campus: Footscray Nicholson, Sunshine.

About this course: Gain the specialised knowledge and skills to work in the growing general communications and technology (ICT) industry. This course provides you with practical, industry relevant training in a variety of information and communication technology (ICT) disciplines. Training in our state-of-the-art computer labs, you will develop the skills and knowledge to:

- work and communicate in an ICT environment;
- create user documentation;
- install and optimise operating system software;
- run diagnostic tests;

- consult on WHS communication processes, and;
- work sustainably.

Successful completion of the course will equip you with the confidence to work across a range of ICT roles, or to continue onto further study.

Course Objectives: This qualification provides the skills and knowledge for an individual to be competent in a wide range of general information and communications technology (ICT) technical functions and to achieve a degree of self-sufficiency as an advanced ICT user. Persons working at this level will support information technology activities in the workplace across a wide range of ICT areas, including technical support, network administration, web technologies, software applications and digital media technologies. Vocational Education and Training in Schools (VETiS) This qualification forms part of the credit suite specified by the Victorian Curriculum and Assessment Authority (VCAA) and may contribute towards the satisfactory completion of the Victoria Certificate of Education (VCE) or the Victoria Certificate of Applied Learning (VCAL).

Careers: Possible career opportunities emerging from the completion of ICT30118 Certificate III in Information, Digital Media and Technology include:

- Technical Support Officer;
- Network Administrator;
- Web Technician;
- Software Administration Officer, and;
- Digital Media Technician.

Course Duration: 0.5 years

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs. Vocational Education and Training in Schools (VETiS): The literacy and numeracy levels of applicants will be assessed through consultation with the relevant secondary school.

COURSE STRUCTURE

To be awarded the ICT30118 Certificate III in Information, Digital Media and Technology, a student must successfully complete a total of seventeen (17) units of competency, comprising of:

- six (6) core units, and;
- eleven (11) elective units, of which:

five (5) units must be selected from one of the following specialist elective groups: Group A: Applications; Group B: Network administration; Group C: Support; Group D: Web technologies, or; Group E: Multimedia; up to six (6) units may be selected from any of the specialist elective groups above or from Group F, and; up to three (3) units may be selected from elsewhere in the ICT Information and Communication Technology Training Package or any other Training Package or accredited course at Certificate III or IV level. The electives chosen must be relevant to the work outcomes and meet local industry needs as well as be approved by the Polytechnic.

CORE UNITS

BSBSUS401 Implement and monitor environmentally sustainable 40

work practices

BSBWHS304	Participate effectively in WHS communication and consultation processes	30
ICTICT202	Work and communicate effectively in an ICT environment	40
ICTICT301	Create user documentation	20
ICTICT302	Install and optimise operating system software	20
ICTSAS308	Run standard diagnostic tests	40
ELECTIVE UNITS		
Specialist elective units		
Group A: Applications		
ICTICT203	Operate application software packages	60
ICTICT304	Implement system software changes	40
ICTICT307	Customise packaged software applications for clients	80
ICTICT308	Use advanced features of computer applications	40
ICTICT409	Develop macros and templates for clients using standard products	60
Group B: Network administration		
ICTNWK305	Install and manage network protocols	40
ICTSAS307	Install, configure and secure a small office or home office network	50
Group C: Support		
ICTSAS304	Provide basic system administration	20
ICTSAS305	Provide ICT advice to clients	40
ICTSAS306	Maintain equipment and software	20
Group D: Web technologies		
BSBEBU401	Review and maintain a website	50
ICTWEB303	Produce digital images for the web	30
Group E: Multimedia		
Group E electives are not currently offered by the Polytechnic.		
General electives units		
Group F		
ICTICT305	Identify and use current industry specific technologies	60

ICTICT306	Migrate to new technology	20
ICTPRG301	Apply introductory programming techniques	40
Imported Units		
VU21993	Secure a networked personal computer	60
VU21994	Perform basic cyber security data analysis	20

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate IV in Computer Systems Technology

Course Code: ICT41015

Campus: Footscray Nicholson, Sunshine.

About this course: Gain the skills and knowledge to work in the IT sector as a specialist or as part of a team with a Certificate IV in Computer Systems Technology at Victoria University Polytechnic. This course will provide you with practical training in multiple information and communication technology (ICT) disciplines. You will train in our state-of-the-art computer labs to gain technical skills in:

- connecting, maintaining and configuring hardware;
- building, installing and operating networks;
- network security;
- introductory programming skills;
- operating system software;
- troubleshooting system and software faults;
- router set-up and testing;
- client-side script for a dynamic webpage;
- WHS communication and consultation processes, and;
- client business requirements.

You will also gain skills in working ethically, safely and sustainably in a workplace environment. Upon completion of this qualification, you will have the confidence and ability to work across a range of ICT roles, or continue with further study.

Course Objectives: This qualification provides the skills and knowledge for an individual to install and administer simple networks, servers, and client desktop deployments either as an independent information and communications technology (ICT) specialist or as part of a team.

Careers: Possible career opportunities emerging from the completion of ICT41015 Certificate IV in Computer Systems Technology include:

- Network Administrator;
- Network Operations Technician;
- Network Technician;
- Tester (Networking), and;
- Tester (Websites).

Course Duration: 1 year

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

COURSE STRUCTURE

To be awarded the ICT41015 Certificate IV in Computer Systems Technology, a student must successfully complete a total of twenty (20) units of competency, comprising of:

- twelve (12) core units, and;
- eight (8) elective units, of which:

all eight (8) units may be selected from the electives listed in the ICT41015 Certificate IV in Computer Systems Technology qualification; up to four (4) electives may be selected from elsewhere in ICT Information and Communications Technology Training Package, or any other endorsed training package or accredited course at Certificate IV or Diploma level. Electives chosen must be relevant to the work outcome and meet local industry needs as well as be approved by the Polytechnic.

CORE UNITS

BSBSUS401	Implement and monitor environmentally sustainable work practices	40
BSBWHS304	Participate effectively in WHS communication and consultation processes	30
ICTICT401	Determine and confirm client business requirements	40
ICTICT418	Contribute to copyright, ethics and privacy in an ICT environment	40
ICTICT421	Connect, maintain and configure hardware components	40
ICTNWK404	Install, operate and troubleshoot a small enterprise branch network	60
ICTNWK405	Build a small wireless local area network	20
ICTPRG414	Apply introductory programming skills in another language	60
ICTSAS425	Configure and troubleshoot operating system software	40
ICTSAS426	Locate and troubleshoot ICT equipment, system and software faults	40
ICTTEN417	Install, configure and test a router	60
ICTWEB411	Produce basic client-side script for dynamic web pages	40
ELECTIVE UNITS		
ICTNWK408	Configure a desktop environment	40

ICTNWK420	Install and configure virtual machines	50
ICTPRG430	Apply introductory object-oriented language skills	60
ICTWEB425	Apply structured query language to extract and manipulate data	60
ICTWEB430	Produce server-side script for dynamic web pages	60
Imported		
ICTDBS413	Determine database requirements	80
ICTNWK421	Install, configure and test network security	50
ICTWEB416	Customise content management system	80

UNITS IN TRANSITION

The following unit/s will not be offered to prospective students. These units are only available for current/continuing students.

ICTNWK402	Install and configure virtual machines for sustainable ICT	50
ICTDBS401	Identify physical database requirements	80
ICTNWK406	Install, configure and test network security	50
ICTPMG401	Support small scale ICT projects	60
ICTWEB415	Produce server-side script for dynamic web pages	60

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate II in Engineering

Course Code: MEM20105

Campus: Sunshine.

About this course: Lay the foundation for a career in the engineering industry with a Certificate II in Engineering at Victoria University Polytechnic. This course will give you practical engineering skills as well as a broad understanding of engineering principles. You will develop skills in the safe use and maintenance of equipment including:

- drill machines;
- lathes;
- grinders;
- milling machines, and;
- other engineering tools and materials.

You will learn how to produce components and products using hand tools and machines. You will also learn how to read and create basic technical/computer-aided design (CAD) drawings. This course also teaches you occupational health and safety

principles and how to follow workplace safety regulations. This qualification will help you to get an engineering apprenticeship or traineeship, or an entry-level job in the field.

Course Objectives: This qualification covers the skills and knowledge required of workers employed as Engineering/manufacturing Employees - Level III as defined in the Manufacturing and Associated Industries and Occupations Award or in related industries where Engineering/ Manufacturing Employees work. The qualification has been specifically developed to reflect the minimum training requirement specified in the Award for employment in the above occupation. The qualification packaging has been developed on an assumption that competency will be developed through a combination of on and off-the-job learning strategies such as those delivered through a formal traineeship. The qualification may also be achieved through formal skills recognition assessment processes.

Careers: This is a preparatory course, which will prepare students to enter into an apprenticeship.

Course Duration: 3 months

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

COURSE STRUCTURE

To be awarded the MEM20105 Certificate II in Engineering, a student must successfully complete:

- five (5) core units and;
- elective units listed in the MEM20105 Certificate II in Engineering qualification, to the value of at least 30 points.

elective units up to the value of six (6) points, may be selected from other endorsed training packages and accredited courses, where those units are available for inclusion at Certificate II. Note: This is not to include other MEM units, which may be listed in other training packages and/or accredited courses.

CORE UNITS

MEM13014A	Apply principles of occupational health and safety in the work environment	10
MEM14004A	Plan to undertake a routine task	10
MEM15002A	Apply quality systems	20
MEM15024A	Apply quality procedures	10
MEM16007A	Work with others in a manufacturing, engineering or related environment	10

ELECTIVE UNITS

MEM05005B	Carry out mechanical cutting	20
MEM05007C	Perform manual heating and thermal cutting	20

MEM05013C	Perform manual production welding	20
MEM07032B	Use workshop machines for basic operation	20
MEM09002B	Interpret technical drawing	40
MEM11011B	Undertake manual handling	20
MEM12023A	Perform engineering measurements	30
MEM12024A	Perform computations	30
MEM14005A	Plan a complete activity	20
MEM16008A	Interact with computing technology	20
MEM18001C	Use hand tools	20
MEM18002B	Use power tools/hand held operations	20

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate III in Engineering - Mechanical Trade

Course Code: MEM30219

Campus: Sunshine.

About this course: Start a career as a mechanical tradesperson with the Certificate III in Engineering – Mechanical Trade apprenticeship course. The skills associated with this qualification are intended to apply to a wide range of mechanical trade work, including undertaking fitting, assembly, manufacture, installation, modification, testing, fault finding, maintenance and service of mechanical equipment, machinery and the use of machine tools. You'll learn about mechanical and thermal cutting, marking out, tool making, general machining, maintenance, mechatronics, fluid power, shaping and joining metal using computer numerical control (CNC) machinery, computer-aided drafting (CAD) and workplace safety. This qualification is offered with the specialist streams of:

- Fitting, and;
- Fitting/machining.

Course Objectives: This qualification defines the skills and knowledge required of an Engineering Tradesperson - Mechanical within metal, engineering, manufacturing and associated industries. The qualification has been specifically developed for apprentices in the above trade. The qualification packaging has been developed on an assumption that competency will be developed through a combination of on and off-the-job learning strategies such as those delivered through a formal apprenticeship. The qualification may also be achieved through formal skills recognition assessment processes. The skills associated with this qualification are intended to apply to a wide range of mechanical trade work, including undertaking fitting, assembly, manufacture, installation, modification, testing, fault finding, maintenance and service of mechanical equipment, machinery and the use of machine tools. This qualification is designed to provide an industry recognised skills profile related to trade work as an Engineering Tradesperson - Mechanical. Skills

development should be undertaken through an Australian Apprenticeship arrangement where the mix of on and off-the-job training would be specified in the Training Plan associated with the Contract of Training between the employer and apprentice. Assessment of some units of competency must, where indicated, include evidence of the candidate's performance in a functioning workplace where there is a sufficient range of appropriate tasks and materials to cover the scope of application of those units. All outcomes must reflect the standard of performance inherent in the job. No licensing, legislative or certification requirements apply to this qualification at the time of publication. However, in some jurisdictions units in this qualification may relate to licensing or regulatory requirements. Local regulations should be checked.

Careers: Possible career opportunities emerging from the completion of MEM30219 Certificate III in Engineering - Mechanical Trade include:

- Fitter and Turner;
- Fitter and Machinist;
- Mechanical Fitter;
- Metal Fabricator;
- Plant Mechanic;
- Tool and Die Maker, and;
- Toolmaker.

Course Duration: 3 years

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

COURSE STRUCTURE

To be awarded the MEM30219 Certificate III in Engineering - Mechanical Trade, units of competency to the value of 96 points must be achieved, chosen as outlined below:

- core units of competency listed below (totalling 33 points);
- elective units of competency to a minimum value of 40 points from Groups A, B and C electives as described below, and;
- elective units of competency to a maximum value of 23 points from Group D to bring the total value to 96 points.

To be awarded the MEM30219 Certificate III in Engineering - Mechanical Trade (Fitting), units of competency to the value of 96 points must be achieved, chosen as outlined below:

- core units of competency listed below (totalling 33 points);
- elective units of competency to a minimum value of 40 points from Group B electives as described below, and;
- elective units of competency to a maximum value of 23 points from Group D to bring the total value to 96 points.

To be awarded the MEM30219 Certificate III in Engineering - Mechanical Trade (Fitting/machining), units of competency to the value of 96 points must be achieved, chosen as outlined below:

- core units of competency listed below (totalling 33 points);

- elective units of competency to a minimum value of 40 points from Group C electives as described below, and;
- elective units of competency to a maximum value of 23 points from Group D to bring the total value to 96 points.

Appropriate Group D elective units to the value of 8 points may be chosen from this Training Package, other endorsed Training Packages and accredited courses where those units are available for inclusion at Certificate III. Only select units that would be suitable for occupational outcomes in a mechanical trade environment. Electives must be industry relevant as well as be approved by the Polytechnic. Prerequisites Points associated with prerequisites count towards the total. All prerequisites are included in the units listed. Specialisations The Polytechnic offer the following specialisations:

- Fitting, and;
- Fitting/machining.

Specialisation: Fitting

CORE UNITS

MEM09002	Interpret technical drawing	40
MEM11011	Undertake manual handling	20
MEM12023	Perform engineering measurements	30
MEM12024	Perform computations	30
MEM13015	Work safely and effectively in manufacturing and engineering	40
MEM14006	Plan work activities	40
MEM16006	Organise and communicate information	20
MEM16008	Interact with computing technology	20
MEM17003	Assist in the provision of on-the-job training	20
MEM18001	Use hand tools	20
MEM18002	Use power tools/hand held operations	20
MSMENV272	Participate in environmentally sustainable work practices	30

ELECTIVE UNITS

Group B

MEM12006	Mark off/out (general engineering)	40
MEM07005	Perform general machining	80
MEM18003	Use tools for precision work	40
MEM18004	Maintain and overhaul mechanical equipment	40

MEM18005	Perform fault diagnosis, installation and removal of bearings	40
MEM18006	Perform precision fitting of engineering components	60
MEM18055	Dismantle, replace and assemble engineering components	30
MEM18009	Perform precision levelling and alignment of machines and engineering components	40
MEM18007	Maintain and repair mechanical drives and mechanical transmission assemblies	40
MEM18018	Maintain pneumatic system components	40
MEM18020	Maintain hydraulic system components	40

Group D

MEM05007	Perform manual heating and thermal cutting	20
MEM05012	Perform routine manual metal arc welding	20
MEM05050	Perform routine gas metal arc welding	20
MEM12003	Perform precision mechanical measurement	20
MEM18010	Perform equipment condition monitoring and recording	40
MEM18011	Shut down and isolate machines/equipment	20

Specialisation: Fitting/machining

CORE UNITS

MEM09002	Interpret technical drawing	40
MEM11011	Undertake manual handling	20
MEM12023	Perform engineering measurements	30
MEM12024	Perform computations	30
MEM13015	Work safely and effectively in manufacturing and engineering	40
MEM14006	Plan work activities	40
MEM16006	Organise and communicate information	20
MEM16008	Interact with computing technology	20
MEM17003	Assist in the provision of on-the-job training	20
MEM18001	Use hand tools	20
MEM18002	Use power tools/hand held operations	20
MSMENV272	Participate in environmentally sustainable work practices	30

ELECTIVE UNITS

Group C

MEM07005	Perform general machining	80
MEM07006	Perform lathe operations	40
MEM07007	Perform milling operations	40
MEM07008	Perform grinding operations	40
MEM12003	Perform precision mechanical measurement	20
MEM12006	Mark off/out (general engineering)	40
MEM18003	Use tools for precision work	40
MEM18005	Perform fault diagnosis, installation and removal of bearings	40
MEM18006	Perform precision fitting of engineering components	60
MEM18018	Maintain pneumatic system components	40
MEM18020	Maintain hydraulic system components	40
MEM18055	Dismantle, replace and assemble engineering components	30

Group D

MEM05007	Perform manual heating and thermal cutting	20
MEM05012	Perform routine manual metal arc welding	20
MEM05049	Perform routine gas tungsten arc welding	20
MEM05050	Perform routine gas metal arc welding	20
MEM07021	Perform complex lathe operations	40

Recognition of Prior Learning and/or Credit Transfers:

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate III in Engineering - Fabrication Trade

Course Code: MEM30319

Campus: Sunshine.

About this course: Lay the foundation for a career in metal fabrication and engineering with a Certificate III in Engineering - Fabrication Trade apprenticeship course. This course will give you the knowledge and skills required to work in the metals and engineering industry. You'll learn to make and repair steel and other metal products and structures such as boilers and storage tanks, and will learn broad engineering skills in fabrication including undertaking metal fabrication, structural steel erection, sheet metal work, welding, blacksmithing and surface finishing.

Course Objectives: This qualification defines the skills and knowledge required of an engineering tradesperson - fabrication within metal, engineering, manufacturing and associated industries. The qualification has been specifically developed to meet the needs of apprentices in the above trade. The qualification packaging has been developed on an assumption that competency will be developed through an integrated combination of on and off-the-job learning strategies such as those delivered through a formal apprenticeship. The qualification may also be achieved through formal skills recognition assessment processes. The skills associated with this qualification are intended to apply to a wide range of fabrication work, including undertaking metal fabrication, structural steel erection, sheetmetal work, welding, blacksmithing and surface finishing. This qualification is designed to provide an industry recognised skills profile related to trade work as an Engineering Tradesperson- Fabrication. Skills development should be undertaken through an Australian Apprenticeship arrangement where the mix of on and off-the-job training would be specified in the Training Plan associated with the Contract of Training between the employer and apprentice. Assessment of some units of competency must, where indicated, include evidence of the candidate's performance in a functioning workplace where there is a sufficient range of appropriate tasks and materials to cover the scope of application of those units. All outcomes must reflect the standard of performance inherent in the job. No licensing, legislative or certification requirements apply to this qualification at the time of publication. However, in some jurisdictions units in this qualification may relate to licensing or regulatory requirements. Local regulations should be checked.

Careers: Possible career opportunities emerging from the completion of MEM30319 Certificate III in Engineering- Fabrication Trade include:

- Fitter (Metal);
- Fitter and Turner;
- Maintenance Mechanic/Motor Mechanic;
- Mechanical Fitter;
- Metal Fabricator;
- Plant Mechanic;
- Tool and Die Maker, and;
- Toolmaker.

Course Duration: 3 years

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

COURSE STRUCTURE

To be awarded the MEM30319 Certificate III in Engineering - Fabrication Trade, units of competency to the value of 96 points must be achieved, chosen as outlined below:

- all core units of competency listed below (totalling 33 points);
- elective units of competency to a minimum value of 40 points from Groups A, B, C, D, E, F and G as described below, and;
- elective units of competency to a maximum value of 23 points from Group H to bring the total value to 96 points.

To be awarded the MEM30319 Certificate III in Engineering - Fabrication Trade (Welding), units of competency to the value of 96 points must be achieved, chosen as outlined below:

- all core units of competency listed below (totalling 33 points);
- elective units of competency to a minimum value of 40 points from Group C as described below, and;
- elective units of competency to a maximum value of 23 points from Group H to bring the total value to 96 points.

To be awarded the MEM30319 Certificate III in Engineering - Fabrication Trade (Boilermaking/welding), units of competency to the value of 96 points must be achieved, chosen as outlined below:

- all core units of competency listed below (totalling 33 points);
- elective units of competency to a minimum value of 40 points from Group D as described below, and;
- elective units of competency to a maximum value of 23 points from Group H to bring the total value to 96 points.

Appropriate Group H elective units to the value of 8 points may be chosen from this Training Package, other endorsed Training Packages and accredited courses where those units are available for inclusion at Certificate III. Only select units that would be suitable for occupational outcomes in a fabrication trade environment. Electives must be industry relevant as well as be approved by the Polytechnic. Prerequisites Points associated with prerequisites count towards the total. All prerequisites are included in the units listed. Specialisations The Polytechnic offer the following specialisations:

- Boilermaking/welding, and;
- Welding.

Specialisation: Boilermaking/welding

CORE UNITS

MEM09002	Interpret technical drawing	40
MEM11011	Undertake manual handling	20
MEM12023	Perform engineering measurements	30
MEM12024	Perform computations	30
MEM13015	Work safely and effectively in manufacturing and engineering	40
MEM14006	Plan work activities	40
MEM16006	Organise and communicate information	20
MEM16008	Interact with computing technology	20
MEM17003	Assist in the provision of on-the-job training	20
MEM18001	Use hand tools	20
MEM18002	Use power tools/hand held operations	20

MSMENV272	Participate in environmentally sustainable work practices	30
-----------	---	----

ELECTIVE UNITS

Group D

MEM05005	Carry out mechanical cutting	20
MEM05007	Perform manual heating and thermal cutting	20
MEM05012	Perform routine manual metal arc welding	20
MEM05015	Weld using manual metal arc welding process	40
MEM05016	Perform advanced welding using manual metal arc welding process	40
MEM05017	Weld using gas metal arc welding process	40
MEM05019	Weld using gas tungsten arc welding process	40
MEM05036	Repair, replace and/or modify fabrications	40
MEM05037	Perform geometric development	60
MEM05049	Perform routine gas tungsten arc welding	20
MEM05050	Perform routine gas metal arc welding	20
MEM05051	Select welding processes	20
MEM05052	Apply safe welding practices	40
MEM12007	Mark off/out structural fabrications and shapes	40

Group H

MEM05010	Apply fabrication, forming and shaping techniques	80
MEM05011	Assemble fabricated components	80
MEM13001	Perform emergency first aid	10

Specialisation: Welding

MEM18002	Use power tools/hand held operations	20
MSMENV272	Participate in environmentally sustainable work practices	30
ELECTIVE UNITS		
Group C		
MEM05004	Perform routine oxy fuel gas welding	20
MEM05005	Carry out mechanical cutting	20
MEM05007	Perform manual heating and thermal cutting	20
MEM05012	Perform routine manual metal arc welding	20
MEM05015	Weld using manual metal arc welding process	40
MEM05016	Perform advanced welding using manual metal arc welding process	40
MEM05017	Weld using gas metal arc welding process	40
MEM05018	Perform advanced welding using gas metal arc welding process	40
MEM05019	Weld using gas tungsten arc welding process	40
MEM05020	Perform advanced welding using gas tungsten arc welding process	40
MEM05047	Weld using flux core arc welding process	40
MEM05048	Perform advanced welding using flux core arc welding process	40
MEM05049	Perform routine gas tungsten arc welding	20
MEM05050	Perform routine gas metal arc welding	20
MEM05051	Select welding processes	20
MEM05052	Apply safe welding practices	40
Group H		
MEM05008	Perform advanced manual thermal cutting, gouging and shaping	20
MEM05037	Perform geometric development	60
MEM12007	Mark off/out structural fabrications and shapes	40

MEM13001 Perform emergency first aid 10

Recognition of Prior Learning and/or Credit Transfers:

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate IV in Engineering

Course Code:MEM40119

Campus:Sunshine.

About this course:This course gives you the opportunity to upgrade your skills and knowledge so you can advance your career in the manufacturing and engineering industries. You will learn more about:

- welding/fabrication (certificates 1-10) - including metallurgy, inspection and design;
- machining – using milling machines, lathes, brake pressing, rolling and plasma cutting;
- installation and maintenance of mechanical equipment, machinery and fluid power equipment, and;
- workplace safety.

This is a leading-edge course focused on current technology. You will be prepared to gain entry into technician and supervisor positions in the industry.

Course Objectives: This qualification provides the skills and knowledge to demonstrate, broad theoretical concepts, application of skills and knowledge, problem solving, information interpretation and output responsibility.

Careers:Possible career opportunities emerging from the completion of MEM40119 Certificate IV in Engineering includes:

- engineering/manufacturing tradesperson – Special Class Level II;
- fitter and turner;
- fitter and machinist;
- maintenance fitter;
- boilermaker;
- sheet metal worker;
- welder, and;
- patternmaker.

Course Duration: 4 years

Admission Requirements: Students must have completed Cert III in Engineering or provide evidence of equivalent experience in order to gain credits and/or Recognition of Prior Learning (RPL). In accordance with qualification requirements students must have access to structured on-the-job training or is an existing apprentice under an Australian Apprenticeship arrangement.

The training involves face to face theory and requires a specified number of hours of practice on relevant skills in a workplace. It should not be used as a pre-employment or pre-apprenticeship program. Applicants are required to complete a Pre-Training Review

and a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

COURSE STRUCTURE

To be awarded MEM40119 Certificate IV in Engineering, a student must successfully complete the following:

- twelve (12) core units (totalling 33 points), and:
- elective units comprising of:
- units selected from Group A, to the value of at least twelve (12) points, and;
- units selected from Group B to a maximum value of eighty seven (87) points to bring the total value to one hundred and thirty two (132) points of which:
- appropriate Group B units to the value of fourteen (14) points may be chosen from this Training Package, other endorsed Training Packages and accredited courses where those units are available for inclusion in Certificate III and Certificate IV qualifications. Only select units that would be suitable for occupational outcomes in a higher engineering trade environment.

Electives must be industry relevant as well as be approved by the Polytechnic.

CORE UNITS

MEM09002	Interpret technical drawing	40
MEM11011	Undertake manual handling	20
MEM12023	Perform engineering measurements	30
MEM12024	Perform computations	30
MEM13015	Work safely and effectively in manufacturing and engineering	40
MEM14006	Plan work activities	40
MEM16006	Organise and communicate information	20
MEM16008	Interact with computing technology	20
MEM17003	Assist in the provision of on-the-job training	20
MEM18001	Use hand tools	20
MEM18002	Use power tools/hand held operations	20
MSMENV272	Participate in environmentally sustainable work practices	30

ELECTIVE UNITS

Group A

MEM18010	Perform equipment condition monitoring and recording	40
----------	--	----

MEM18019	Maintain pneumatic systems	40
MEM18022	Maintain fluid power controls	80
Group A - Alternative Electives		
MEM05026	Apply welding principles	40
MEM05043	Perform welds to code standards using gas metal arc welding process	60
MEM05044	Perform welds to code standards using gas tungsten arc welding process	60
MEM05045	Perform pipe welds to code standards using manual metal arc welding process	60
MEM05046	Perform welds to code standards using manual metal arc welding process	60
MEM12003	Perform precision mechanical measurement	20
MEM18011	Shut down and isolate machines/equipment	20
MEM18021	Maintain hydraulic systems	40
Group B		
MEM05007	Perform manual heating and thermal cutting	20
MEM05012	Perform routine manual metal arc welding	20
MEM05015	Weld using manual metal arc welding process	40
MEM05050	Perform routine gas metal arc welding	20
MEM05051	Select welding processes	20
MEM05052	Apply safe welding practices	40
MEM07005	Perform general machining	80
MEM07006	Perform lathe operations	40
MEM07007	Perform milling operations	40
MEM07008	Perform grinding operations	40
MEM07021	Perform complex lathe operations	40
MEM12006	Mark off/out (general engineering)	40
MEM18003	Use tools for precision work	40
MEM18004	Maintain and overhaul mechanical equipment	40
MEM18005	Perform fault diagnosis, installation and removal of bearings	40
MEM18006	Perform precision fitting of engineering components	60

MEM18007	Maintain and repair mechanical drives and mechanical transmission assemblies	40
MEM18009	Perform precision levelling and alignment of machines and engineering components	40
MEM18018	Maintain pneumatic system components	40
MEM18020	Maintain hydraulic system components	40
MEM18055	Dismantle, replace and assemble engineering components	30
MEM05055	Weld using oxy fuel gas welding process	40
Group B - Alternative Electives		
MEM03003	Perform sheet and plate assembly	40
MEM05004	Perform routine oxy fuel gas welding	20
MEM05005	Carry out mechanical cutting	20
MEM05010	Apply fabrication, forming and shaping techniques	80
MEM05011	Assemble fabricated components	80
MEM05012	Perform routine manual metal arc welding	20
MEM05016	Perform advanced welding using manual metal arc welding process	40
MEM05017	Weld using gas metal arc welding process	40
MEM05018	Perform advanced welding using gas metal arc welding process	40
MEM05019	Weld using gas tungsten arc welding process	40
MEM05020	Perform advanced welding using gas tungsten arc welding process	40
MEM05023	Weld using submerged arc welding process	40
MEM05036	Repair, replace and/or modify fabrications	40
MEM05037	Perform geometric development	60
MEM05047	Weld using flux core arc welding process	40
MEM05048	Perform advanced welding using flux core arc welding process	40
MEM05049	Perform routine gas tungsten arc welding	20
MEM05050	Perform routine gas metal arc welding	20
MEM12007	Mark off/out structural fabrications and shapes	40

Please note: Group A and Group B Electives must not be interchanged with Group A -

Alternative Electives and Group B - Alternative Electives.

Group A and Group B Electives are packaged for the Mechanical stream, whereas Group A and Group B Alternative are packaged for Fabrication stream.

Recognition of Prior Learning and/or Credit Transfers:

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate II in Furniture Making

Course Code:MSF20313

Campus:Industry, Sunshine.

About this course:If you are interested in a career in furniture making and want to prepare yourself for an apprenticeship in the industry, then this is the course for you. MSF20313 Certificate II in Furniture Making is a preparatory course for an aspiring young apprentice, to gain the skills and knowledge in basic furniture making which includes but is not limited to:

- manufacture free-standing furniture;
- manufacture built-in cabinets;
- provide on-site assistance with the installation of furniture, and;
- understanding quality manufacturing of furniture products.

Our qualified trainers and assessors, in conjunction with experienced industry partners, will prepare you for an exciting career in the furniture industry!

Course Objectives:This qualification describes the skills and knowledge required to perform the manufacture of free-standing furniture or built-in cabinets, and provide on-site assistance in the installation of furniture or cabinets involving known routines and procedures and some accountability for the quality of outcomes. It reflects vocational outcomes for those performing assistant cabinet maker, assistant installer of built-in cabinets, and production operator within a cabinet making enterprise. Cabinets include free-standing and built-in furniture or fitted cabinets, such as those used in kitchens and bathrooms. Skills are also included that cover assisting in the installation or renovation of kitchens and bathrooms and other fitted cabinets, which involves collaboration with others through members of a group or team. This qualification does not cover shopfitting. Meaningful involvement of industry is essential to achieving this qualification outcome. This qualification is suitable for persons employed in furniture making as described above. It also applies to persons who are formally engaged in a traineeship in accordance with the Australian Apprenticeships policy. The MSF20516 Certificate II in Furniture Making Pathways is the appropriate qualification for VET delivered to secondary students.

Careers:Job roles covered by this qualification include assistant cabinet maker, assistant installer of built-in cabinets for kitchens, bathrooms and other fitted cabinets, and production operator within a cabinet making enterprise. Cabinets include free-standing and built-in furniture.

Course Duration: 2 months

Admission Requirements:Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

Selection Processes: Other/Not Applicable.

COURSE STRUCTURE

To be awarded the MSF20313 Certificate II in Furniture Making, a student must successfully complete a total of thirteen (13) units, comprising of:

- five (5) core units, and;
- eight (8) elective units, of which:

one (1) unit must be selected from Group A; four (4) units must be selected from Group B, with a maximum of two (2) units coded MSS, and; three (3) units may be selected from the MSF Furnishing Training Package, other endorsed training packages and/or accredited courses. Units must be aligned at Certificate II level (maximum 3 units) or Certificate III level (maximum 1 unit) as well as be approved by the Polytechnic.

CORE UNITS:

MSFFM2001	Use furniture making sector hand and power tools	40
MSFGN2001	Make measurements and calculations	30
MSMENV272	Participate in environmentally sustainable work practices	30
MSMSUP102	Communicate in the workplace	20
MSMSUP106	Work in a team	30

ELECTIVE UNITS:

Group A

MSMWHS200	Work safely	30
-----------	-------------	----

Group B

MEM16008A	Interact with computing technology	20
MSAPMSUP201A	Receive or despatch goods	20
MSFFF2004	Prepare surfaces for finishing	24
MSFFF2006	Apply surface coatings by spray gun	60
MSFFM2002	Assemble furnishing components	20
MSFFM2003	Select and apply hardware	16
MSFFM2004	Apply sheet laminates by hand	8
MSFFM2005	Join solid timber	8
MSFFM2006	Hand make timber joints	40
MSFFM2007	Follow plans to assemble production furniture	16
MSFFM2010	Set up and operate basic static machines	56

MSFFM2011	Apply manufactured board conversion techniques	16
MSFFM2012	Set up, operate and maintain pressure and clamping machines	20
MSFKB2001	Prepare for cabinet installation	12
MSFKB2002	Provide assistance in cabinet installation	12
MSMSUP240	Undertake minor maintenance	30
MSMSUP273	Handle goods	20
MSS402001	Apply competitive manufacturing practices	40

Group C: Certificate II Level

CPCCOHS2001A	Apply OHS requirements, policies and procedures in the construction industry	20
--------------	--	----

Group C: Certificate III Level

CPCCWP3002A	Apply waterproofing process to internal wet areas	50
MSFFM3005	Fabricate custom furniture	64
MSFKB3001	Identify processes in kitchen and bathroom projects	80
MSFKB3005	Fabricate cabinets for the built-in environment	80

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

CPCCWHS1001	Prepare to work safely in the construction industry	6

Certificate III in Cabinet Making

Course Code:MSF31113

Campus:Industry, Sunshine, Learning Links Geelong.

About this course: Develop valuable cabinet making skills for residential and commercial buildings with a Certificate III in Cabinet Making at Victoria University Polytechnic. This is an apprenticeship course, designed for those currently employed as cabinet-making apprentices. It will provide you with the formal trade certificate you need, to become a fully qualified cabinet maker. You'll be prepared to work in furniture making and the installation and manufacture of fitted furniture in kitchens and bathrooms. Through classroom learning and work-based tasks, you'll gain skills and knowledge to complement your on-the-job training. We provide a strong partnership between you, your employer and our teaching staff that will ensure you know how to:

- use hand and power tools;
- apply surface coatings using a spray gun;
- produce manual and computer-aided drawings, and;
- estimate and cost a job.

You'll graduate with the skills, confidence and experience to be job-ready.

Course Objectives: This qualification covers the skills and knowledge required to perform a range of skills at trade-level for those working in furniture making and those involved in the manufacture and installation of fitted furniture typically in a kitchen, bathroom and related context. Installation skills may be applied to new or renovation work. Training programs for this qualification are suitable to be undertaken as part of a formal training contract with an employer under an Australian Apprenticeship arrangement.

Careers: Possible career opportunities emerging from the completion of MSF31113 Certificate III in Cabinet Making include:

- Cabinet Maker.

Course Duration: 3 years

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

Selection Processes: Other/Not Applicable.

COURSE STRUCTURE

To be awarded MSF31113 Certificate III in Cabinet Making, a student must successfully complete twenty-eight (28) units of competency, comprising of:

- six (6) core units, and;
- twenty-two (22) elective units from Groups A to F as specified below.

Electives must be industry relevant as well as be approved by the Polytechnic. Specialisation The Polytechnic currently offer the following specialisation(s):

- Furniture, and;
- Kitchens and Bathrooms.

Specialisation: Furniture

To be awarded this specialisation, the following training package rules apply:

- one (1) unit from Group A;
- a minimum of eight (8) units from Groups B or D, and;
- a minimum of eight (8) units from Group E;
- the balance of units (up to 5) can be chosen from Group F, or from Groups B, C or D.

Additional Group F rules:

Up to five (5) relevant units may be chosen from units not already selected from Groups B to E, or units available in this Training Package or other endorsed Training Packages and accredited courses. Those units must be aligned at Certificate II level (maximum 1 unit), Certificate III level (maximum 5 units) or Certificate IV level (maximum 1 unit). Units selected from other Training Packages and accredited courses via Group F must be relevant to the qualification outcome and not duplicate

units available within this qualification.

CORE UNITS

MSFFM2001	Use furniture making sector hand and power tools	40
MSFGN2001	Make measurements and calculations	30
MSFGN3001	Read and interpret work documents	24
MSMENV272	Participate in environmentally sustainable work practices	30
MSMSUP102	Communicate in the workplace	20
MSMSUP106	Work in a team	30

ELECTIVE UNITS

Group A

CPCWHS1001	Prepare to work safely in the construction industry	6
MSMWHS200	Work safely	30

Group B

MSFFF2004	Prepare surfaces for finishing	24
MSFFM2002	Assemble furnishing components	20
MSFFM2005	Join solid timber	8
MSFFM2006	Hand make timber joints	40
MSFFM3002	Construct furniture using leg and rail method	64
MSFFM3005	Fabricate custom furniture	64
MSFFM3006	Install furnishing products	24

Group C

Group C electives are not currently offered by the Polytechnic

Group D

BSBCUS301	Deliver and monitor a service to customers	35
MSFFM2003	Select and apply hardware	16
MSFFM2010	Set up and operate basic static machines	56
MSFFM2011	Apply manufactured board conversion techniques	16
MSFFM3010	Prepare cutting list from plans and job specifications	16
MSFFM3021	Set up, operate and maintain computer numerically controlled (CNC) sizing machines	60
MSFFM3022	Set up, operate and maintain computer numerically	80

	controlled (CNC) machining and processing centres			Group F electives are not currently offered by the Polytechnic
MSFGN3002	Estimate and cost job	16		Specialisation: Kitchens and Bathrooms
Group E				To be awarded this specialisation, the following training package rules apply:
CUAACD302	Produce computer-aided drawings	50		- one (1) unit from Group A;
MSFFF2006	Apply surface coatings by spray gun	60		- a minimum of eight (8) units from Groups C or D, and;
MSFFM3003	Produce angled and curved furniture using manufactured board	64		- and a minimum of eight (8) units from Group E;
MSFFM3004	Produce angled and curved furniture using solid timber	64		- the balance of units (up to 5) can be chosen from Group F, or from Groups B, C or D.
MSFFM3007	Prepare and apply decorative surfaces for furniture	24		Additional Group F rules:
MSFFM3008	Select timbers for furniture production	8		Up to five (5) relevant units may be chosen from units not already selected from Groups B to E, or units available in this Training Package or other endorsed Training Packages and accredited courses. Those units must be aligned at Certificate II level (maximum 1 unit), Certificate III level (maximum 5 units) or Certificate IV level (maximum 1 unit). Units selected from other Training Packages and accredited courses via Group F must be relevant to the qualification outcome and not duplicate units available within this qualification.
MSFFM3009	Produce manual and computer-aided production drawings	60		
MSFFM3011	Measure and draw site layout for manufactured furniture products	16		
MSFFM3012	Set up, operate and maintain sawing machines	24		CORE UNITS
MSFFM3013	Set up, operate and maintain drilling machines	24	MSFFM2001	Use furniture making sector hand and power tools 40
MSFFM3014	Set up, operate and maintain joining machines	52	MSFGN2001	Make measurements and calculations 30
MSFFM3015	Set up, operate and maintain planing and finishing machines	40	MSFGN3001	Read and interpret work documents 24

MSFFM3021	Set up, operate and maintain computer numerically controlled (CNC) sizing machines	60	Recognition of Prior Learning and/or Credit Transfers		
MSFFM3022	Set up, operate and maintain computer numerically controlled (CNC) machining and processing centres	80	Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.		
Group E					
CUAACD302	Produce computer-aided drawings	50	Certificate II in Civil Construction		
MSFFF2006	Apply surface coatings by spray gun	60	Course Code: RII20715		
MSFFM3003	Produce angled and curved furniture using manufactured board	64	Campus: Industry, Werribee, Sunshine.		
MSFFM3008	Select timbers for furniture production	8	About this course: Develop the foundational skills necessary to gain access to an apprenticeship in civil construction with this practical pre-apprenticeship course. You will be introduced to a range of foundation skills and knowledge including:		
MSFFM3009	Produce manual and computer-aided production drawings	60	<ul style="list-style-type: none"> • identifying, locating and protecting underground services; • measurements and calculations; • manual excavation; • levelling, and; • reading and interpreting plans and specifications. 		
MSFFM3011	Measure and draw site layout for manufactured furniture products	16	You will learn how to safely use and maintain tools and equipment used in civil construction, including:		
MSFFM3012	Set up, operate and maintain sawing machines	24	<ul style="list-style-type: none"> • hand and power tools; • small plant and equipment, and; • concreting materials and equipment 		
MSFFM3013	Set up, operate and maintain drilling machines	24	You will also develop an understanding of workplace safety and the safe disposal of infrastructure materials. Upon completion, you will have a broad understanding of the industry and be prepared to choose your career path. You will have the skills and knowledge to gain employment as an apprentice and undertake further study such as the Certificate III in Civil Construction.		
MSFFM3015	Set up, operate and maintain planing and finishing machines	40			
MSFFM3017	Set up, operate and maintain routing and shaping machines	60			

Course Objectives: This qualification reflects the role of individuals working in an operational role in civil construction, who undertake a prescribed range of tasks using limited practical skills and fundamental knowledge, in a defined context working under supervision. Licensing, legislative, regulatory and certification requirements that apply to this qualification can vary between states, territories, and industry sectors. Relevant information must be sourced prior to application of the qualification. Vocational Education and Training in Schools (VETiS) This qualification forms part of the credit suite specified by the Victorian Curriculum and Assessment Authority (VCAA) and may contribute towards the satisfactory completion of the Victoria Certificate of Education (VCE) or the Victoria Certificate of Applied Learning (VCAL).

Careers: Possible career opportunities emerging from the completion of RII20715 Certificate II in Civil Construction are:

- Civil Construction Apprentice, or;
- Civil Construction Operator.

Course Duration: 0.5 years

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs. VETiS: The literacy and numeracy levels of applicants will be assessed through consultation with the relevant secondary school.

COURSE STRUCTURE

To be awarded the RII20715 Certificate II in Civil Construction, a student must successfully complete a total of sixteen (16) units of competency, comprising of:

- ten (10) core units, and;
- six (6) elective units, of which:

at least five (5) units must be selected from elective units listed in the RII20715 Certificate II in Civil Construction qualification, and; one (1) unit may be selected from elsewhere within the RII Resources and Infrastructure Industry Training Package, or from another endorsed training package, or from an accredited course. All elective units selected from outside this qualification must reflect current occupational and learning outcomes of this AQF qualification level as well as be approved by the Polytechnic.

CORE UNITS

RIIBEF201D	Plan and organise work	20
RIICCM201D	Carry out measurements and calculations	20
RIICCM202D	Identify, locate and protect underground services	30
RIICCM203D	Read and interpret plans and specifications	40
RIICCM205E	Carry out manual excavation	8
RIICCM207D	Spread and compact materials manually	12
RIICOM201D	Communicate in the workplace	20
RIISAM203D	Use hand and power tools	80

RIISAM204D	Operate small plant and equipment	20
RIIWHS201D	Work safely and follow WHS policies and procedures	20
ELECTIVE UNITS		
RIICCM208D	Carry out basic levelling	16
RIICCM209D	Carry out concrete work	40
RIISAM201D	Handle resources and infrastructure materials and safely dispose of nontoxic materials	16
RIICCM206D	Support plant operations	8
RIIWHS205D	Control traffic with stop-slow bat	20
Imported units		

CPCWHS1001	Prepare to work safely in the construction industry	6
RIIWHS302D	Implement traffic management plan	20

Units in Transition

The following unit/s will not be offered to prospective students. These units are only available for current/continuing students.

BSBDIV301	Work effectively with diversity	30
RIICRC315D	Use concreting materials and equipment	60

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate III in Civil Construction Plant Operations

Course Code:RII30815

Campus:Industry, Werribee.

About this course: Gain the skills necessary to work on major infrastructure projects in the fast growing civil construction industry. Developed in partnership with industry, the Certificate III in Civil Construction Plant Operations at VU Polytechnic will provide you with the skills and knowledge to:

- plan and organise work;
- carry out measurements and calculations;
- identify, locate and protect underground services;
- read and interpret plans and specifications;
- carry out manual excavation;
- support plant operations;
- carry out basic levelling;
- communicate in the workplace;
- handle resources and infrastructure materials and safely dispose of nontoxic materials;

- use hand and power tools;
- operate small plant and equipment;
- work safely and follow WHS policies and procedures;
- drain and dewater civil construction site, and;
- usage of various civil construction machinery.

Course Objectives: This qualification reflects the role of a skilled operator working with civil construction plant, who applies a broad range of skills in a varied work context, using some discretion and judgement and relevant theoretical knowledge. The individual may provide theoretical advice and support a team. Licensing, legislative, regulatory and certification requirements that apply to this qualification can vary between states, territories, and industry sectors. Relevant information must be sourced prior to application of the qualification.

Careers: Possible career opportunities emerging from the completion of RII30815 Certificate III in Civil Construction Plant Operations include:

- Asphalter/Pavement Layer;
- Bridge Construction Worker;
- Civil Construction Plant Operator;
- Civil Foundations Worker;
- Construction Rescue Worker;
- Construction Worker (Civil Construction General);
- Construction Worker (Site Maintenance);
- Mine Rescue Worker;
- Mobile Plant Operator;
- Pipe Layer;
- Road Construction Worker;
- Road Marker;
- Timber Bridge Constructor;
- Traffic Controller;
- Trenchless Technology Civil Foundation Worker, and;
- tunnel Constructor or Builder.

Course Duration: 1.5 years

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

COURSE STRUCTURE

To be awarded the RII30815 Certificate III in Civil Construction Plant Operations, a student must successfully complete a total of nineteen (19) units of competency, comprising of: fourteen (14) core units, and; five (5) elective units, of which: one (1) unit must be selected from Group A; two (2) units must be selected from Group B; no more than two (2) units may be selected from Group C, and; no more than one (1) unit may be chosen from elsewhere within this training package, or from another endorsed training package, or from an accredited course. OR two (2) units must be selected from Group A; three (3) units may be selected from Group A, B or C; no more than one (1) unit may be selected from elsewhere within this training package, or from another endorsed training package, or from an accredited course. All elective units selected from outside this qualification must reflect current

occupational and learning outcomes of this AQF qualification level as well as be approved by the Polytechnic.

CORE UNITS

RIIBEF201D	Plan and organise work	20
RIICCM201D	Carry out measurements and calculations	20
RIICCM202D	Identify, locate and protect underground services	30
RIICCM203D	Read and interpret plans and specifications	40
RIICCM205E	Carry out manual excavation	8
RIICCM206D	Support plant operations	8
RIICCM207D	Spread and compact materials manually	12
RIICCM208D	Carry out basic levelling	16
RIICOM201D	Communicate in the workplace	20
RIISAM201D	Handle resources and infrastructure materials and safely dispose of nontoxic materials	16
RIISAM203D	Use hand and power tools	80
RIISAM204D	Operate small plant and equipment	20
RIIWH201D	Work safely and follow WHS policies and procedures	20
RIIWMG203D	Drain and dewater civil construction site	20

ELECTIVE UNITS

Group A

RIIMPO319E	Conduct backhoe/loader operations	200
RIIMPO321F	Conduct civil construction wheeled front end loader operations	160
RIIMPO323E	Conduct civil construction dozer operations	240
RIIMPO324F	Conduct civil construction grader operations	240

Group B

RIIMPO315E	Conduct tractor operations	60
------------	----------------------------	----

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate III in Civil Construction

Course Code: RII30915

Campus: Industry, Werribee, Sunshine.

About this course: Develop practical skills and knowledge in a fast-growing industry with a Certificate III in Civil Construction apprenticeship. This trade certificate is delivered with either a Civil Construction General specialisation, Road Construction and Maintenance specialisation or Tunnel Construction specialisation. You will gain knowledge and skills in:

- planning and organising work;
- workplace communication and safety;
- reading and interpreting plans and specifications;
- measurements and calculations;
- operation of a small plant and equipment;
- manual excavation and levelling;
- concreting;
- implementing a traffic management plan;
- installation of signs and roadside fixtures;
- repairing damaged surfaces, and;
- maintenance of bitumen surfaces.

You will also learn how to safely use and maintain tools and equipment used in civil construction, including:

- hand and power tools;
- concreting material and equipment;
- road surfacing equipment, and;
- elevating work platforms.

Course Objectives: This qualification reflects the role of a skilled operator working in Civil construction, who applies a broad range of skills in a varied work context, using some discretion and judgement and relevant theoretical knowledge. The qualification applies to specialist occupations in bituminous surfacing, bridge construction and maintenance, pipe laying, road construction and maintenance, road marking, tunnel construction, timber bridge construction and maintenance, civil construction general and traffic management occupations. The individual may provide theoretical advice and support a team. Licensing, legislative, regulatory and certification requirements that apply to this qualification can vary between states, territories, and industry sectors. Relevant information must be sourced prior to application of the qualification.

Careers: Possible career opportunities emerging from the completion of RII30915 Certificate III in Civil Construction:

- specialist in road construction, and;
- specialist in road maintenance.

Course Duration: 1.5 years

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

COURSE STRUCTURE

To be awarded the RII30915 Certificate III in Civil Construction, a student must successfully complete seven (7) core units as well as elective units required for one (1) specialisation. Specialisations The Polytechnic currently offer the following

specialisations: 1. Road Construction and Maintenance; 2. Civil Construction General, and; 3. Tunnel Construction.

CORE UNITS

RIIBEF201D	Plan and organise work	20
RIICCM201D	Carry out measurements and calculations	20
RIICCM203D	Read and interpret plans and specifications	40
RIICOM201D	Communicate in the workplace	20
RIISAM203D	Use hand and power tools	80
RIISAM204D	Operate small plant and equipment	20
RIIWHS201D	Work safely and follow WHS policies and procedures	20

Specialisation: Road Construction and Maintenance

To be awarded this specialisation, the additional training package rules must be adhered to:

- eighteen (18) elective units, of which:
- nine (9) units must be selected from Group J;
- at least two (2) units must be selected from Group K;
- at least two (2) units must be selected from Group L;
- no more than five (5) units may be selected from elsewhere within the RII Resources and Infrastructure Industry Training Package, or from another endorsed training package, or from an accredited course, and;
- at least five (5) units of the eighteen (18) elective units selected must be road construction and maintenance (RIICRC) units.

ELECTIVE UNITS

Group J Electives

RIICCM202D	Identify, locate and protect underground services	30
RIICCM205E	Carry out manual excavation	8
RIICCM206D	Support plant operations	8
RIICCM207D	Spread and compact materials manually	12
RIICCM208D	Carry out basic levelling	16
RIICRC201D	Repair potholes	36
RIISAM201D	Handle resources and infrastructure materials and safely dispose of nontoxic materials	16
RIIWHS302D	Implement traffic management plan	20

RIW MG203D	Drain and dewater civil construction site	20	BSBFLM312	Contribute to team effectiveness	40
Group K Electives			RIICBM301D	Maintain concrete bridges	80
RIICRC301D	Maintain drainage systems	16	RIICBS304D	Compact asphalt with rollers	44
RIICRC304D	Maintain sealed roads	32	RIICBS310D	Conduct patching operations	60
RIICRC315D	Use concreting materials and equipment	60	RIICCM301D	Construct and dismantle fences and gates	40
Group L Electives			RIICPL301D	Install water mains pipelines	40
BSBDIV301	Work effectively with diversity	30	RIICPL302D	Install stormwater systems	40
RIICCM209D	Carry out concrete work	40	RIICPL303D	Install sewer pipelines	40
RIICRC202D	Install signs	16	RIICPL304D	Install pre-cast gully pits	40
RIICRC204D	Install and maintain roadside fixtures	40	RIICPL305D	Install pre-cast access chambers	40
RIIHAN301E	Operate elevating work platform	40	RIICRC301D	Maintain drainage systems	16
RIIWH5205D	Control traffic with stop-slow bat	20	RIICRC302D	Place and form concrete kerb, channel and fixtures	36
Other Electives			RIICRC304D	Maintain sealed roads	32
RIICRM201E	Escort mobile works	24	RIICRC306D	Conduct earthworks	80
RIICRM204D	Prepare surface for road marking	16	RIICRC307D	Conduct road pavement construction	24
RIIMPO318F	Conduct civil construction skid steer loader operations	80	RIIHAN308F	Load and unload plant	20
Imported			RIIMG301D	Maintain site records	10
RIIMPO317F	Conduct roller operations	80	RIIMPO318F	Conduct civil construction skid steer loader operations	80
RIIMPO320F	Conduct civil construction excavator operations	200	RIIRT M203D	Work as a safety observer/spotter	20
RIIMPO321F	Conduct civil construction wheeled front end loader operations	160	Group Z		
Specialisation: Civil Construction General			FWPCOT2239	Trim and cut felled trees	40
To be awarded this specialisation, the additional training package rules must be adhered to:			RIICBS202D	Hand spread asphalt	18
- eighteen (18) elective units, of which:			RIICCM202D	Identify, locate and protect underground services	30
- at least ten (10) units must be selected from Group Y;			RIICCM205E	Carry out manual excavation	8
- at least three (3) units must be selected from Group Z, and;			RIICCM208D	Carry out basic levelling	16
- no more than five (5) units may be selected from elsewhere within the RII Resources and Infrastructure Industry Training Package, or from another endorsed training package, or from an accredited course.			RIICCM209D	Carry out concrete work	40
ELECTIVE UNITS			RIICCM210D	Install trench support	16
Group Y			RIICRC201D	Repair potholes	36
			RIICRC202D	Install signs	16
			RIICRC204D	Install and maintain roadside fixtures	40

RIICRC208D	Lay pipes	40
RIIRIS202D	Respond to site based spills	20
RIIWH302D	Implement traffic management plan	20
Imported		
RIIMPO317F	Conduct roller operations	80
RIIMPO320F	Conduct civil construction excavator operations	200
RIIMPO321F	Conduct civil construction wheeled front end loader operations	160

Specialisation: Tunnel Construction

To be awarded this specialisation, the additional training package rules must be adhered to:

- eighteen (18) elective units, of which:
- eight (8) units must be chosen from Group P;
- at least three (3) units must be chose from Group Q;
- at least two (2) units must be chose from Group R;
- no more than five (5) units may be selected from elsewhere within the RII Resources and Infrastructure Industry Training Package, or from another endorsed training package, or from an accredited course, and;
- at least two (2) of the eighteen (18) electives must be tunnel construction (RIICTC) units.

Group P

RIICCM202D	Identify, locate and protect underground services	30
RIICCM205E	Carry out manual excavation	8
RIICCM206D	Support plant operations	8
RIICCM207D	Spread and compact materials manually	12
RIICCM208D	Carry out basic levelling	16
RIICRC203D	Install sub-soil drainage	20
RIISAM201D	Handle resources and infrastructure materials and safely dispose of nontoxic materials	16
RIIWMG203D	Drain and dewater civil construction site	20
Group Q		
RIICCM301D	Construct and dismantle fences and gates	40
RIICFW303D	Install primary ground support	24
RIICRC301D	Maintain drainage systems	16

RIICTC301D	Install tunnelling constructions services	80
RIICTC302D	Line tunnel	80
RIICTC303D	Excavate tunnel by machine	32
RIICTC304D	Muck out tunnel earthworks	16
RIICTC305D	Construct portals	24
RIIHAN301E	Operate elevating work platform	40
RIIUND310D	Apply shot-crete underground	40
RIICFW302D	Install temporary and permanent rock anchors	24

Group R

CPCLDG3001A	License to perform dogging	80
CPCLRG3001A	License to perform rigging- Basic level	196
CPCLSF2001A	Licence to erect, alter and dismantle scaffolding basic level	40
RIICCM209D	Carry out concrete work	40
RIICCM210D	Install trench support	16
RIICCM211D	Erect and dismantle temporary fencing and gates	40
RIICRC208D	Lay pipes	40
RIIRIS201D	Conduct local risk control	20
RIIWH304D	Work safely at heights	20
TLILIC0003	Licence to operate a forklift truck	40
Imported		
RIIMPO317F	Conduct roller operations	80
RIIMPO321F	Conduct civil construction wheeled front end loader operations	160

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate IV in Civil Construction Operations

Course Code:RII40615

Campus:Industry, Werribee, Sunshine.

About this course:Gain the technical skills and knowledge to operate as a specialist in civil construction with the RII40615 Certificate IV in Civil Construction Operations at the Polytechnic. This course will provide you with the knowledge and skills required to manage civil construction workers and contractors as well as contribute to the

development of technical solutions for non-routine problems. You will gain skills and knowledge in:

- risk management and worksite safety;
- operational plan implementation;
- environmental management and supervision;
- tendering/contracting, and;
- supervising.

Existing workers with industry experience can also gain formal recognition for their current skills and competencies in this course through a combination of Recognition of Prior Learning (RPL) and gap training.

Course Objectives: This qualification reflects the role of specialist civil construction personnel who perform technical specialist tasks. They perform tasks involving a broad range of varied activities most of which are complex and non-routine. They are responsible for applying the site work instructions and practices to ensure the quantity and quality of their outputs and contribute to the development of technical solutions for non-routine problems.

Careers: Possible career opportunities emerging from the completion of RII40615 Certificate IV in Civil Construction Operations includes:

- supervisor;
- foreman;
- ganger, and;
- leading hand.

Course Duration: 1 year

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

COURSE STRUCTURE

To be awarded the RII40615 Certificate IV in Civil Construction Operations, a student must successfully complete a total of twelve (12) units of competency, comprising of:

- four (4) core units, and;
- eight (8) elective units, of which:

at least four (4) units must be selected from Group A; at least two (2) units must be selected from Group B, and; two (2) units may be selected from elsewhere within the RII Resources and Infrastructure Industry Training Package, or from another endorsed training package, or from an accredited course. All elective units selected from outside this qualification must reflect current occupational and learning outcomes of this AQF qualification level as well as be approved by the Polytechnic.

CORE UNITS

BSBWHS401	Implement and monitor WHS policies, procedures and programs to meet legislative requirements	50
RIIENV402D	Implement and monitor environmental policies	40

RIIQUA401D	Apply a quality management system on site	60
RIIRIS301D	Apply risk management processes	40
ELECTIVE UNITS		
Group A		
BSBPMG416	Apply project procurement procedures	40
LGACOM401A	Administer contracts	60
LGACOM402A	Arrange contracts	20
LGACOM409A	Prepare tender documentation	60
LGACOM410A	Prepare response to tenders	20
RIICWM402D	Supervise civil works contractors	100
Group B		
BSBMGT402	Implement operational plan	40
RIICCR401D	Develop and maintain positive community relations	30
RIIGOV401D	Apply, monitor and report on compliance systems	80
Imported		
BSBMGT401	Show leadership in the workplace	50
BSBWOR404	Develop work priorities	40

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate IV in Civil Construction Supervision

Course Code: RII40715

Campus: Industry, Werribee, Sunshine.

About this course: Expand your civil construction skills and management experience with the Certificate IV in Civil Construction Supervision at the Polytechnic. This course is designed to equip current employees in the civil construction industry with a range of leadership and management skills and competencies to provide effective leadership in the workplace. Learning from industry professionals, you'll develop specialist skills and knowledge in:

- leadership;
- risk management and worksite safety;
- supervising civil works;
- operational plan implementation;
- tendering, and;
- civil structure maintenance and inspection.

Existing workers with industry experience can also gain formal recognition for their current skills and competencies in this course through a combination of Recognition of Prior Learning (RPL) and gap training.

Course Objectives: This qualification reflects the role of employees working in supervisory positions in civil construction. They perform tasks involving a broad range of varied activities most of which are complex and non-routine. They are responsible for the quantity and quality of the output of others, contribute to the development of technical solutions to non-routine problems and apply management plans to the workplace.

Careers: Possible career opportunities emerging from the completion of RII40715 Certificate IV in Civil Construction Supervision are:

- civil construction supervisor
- foreman;
- ganger, and;
- leading hand.

Course Duration: 1 year

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

COURSE STRUCTURE

To be awarded the RII40715 Certificate IV in Civil Construction Supervision, a student must successfully complete a total of twelve (12) units of competency, comprising of:

- five (5) core units, and;
- seven (7) elective units, of which:

at least two (2) units must be selected from Group A; at least two (2) units must be selected from Group B, and; two (2) units may be selected from elsewhere within the RII Resources and Infrastructure Industry Training Package, or from another endorsed training package, or from an accredited course. All elective units selected from outside this qualification must reflect current occupational and learning outcomes of this AQF qualification level as well as be approved by the Polytechnic.

CORE UNITS

BSBMGT401	Show leadership in the workplace	50
BSBMGT402	Implement operational plan	40
BSBWHS401	Implement and monitor WHS policies, procedures and programs to meet legislative requirements	50
RIICWM401D	Supervise civil works	80
RIIRIS401D	Apply site risk management system	40

ELECTIVE UNITS

Group A

LGAWORK402A	Prepare for operational works	60
RIICPL401D	Apply the principles for the installation of underground service using open excavation	60
RIICSG405D	Carry out inspections of civil structures	100
RIICSG406D	Apply principles of maintenance of civil structures	100
RIICWM402D	Supervise civil works contractors	100
RIIMPO402D	Apply the principles of earthworks construction	100

Group B

BSBLED401	Develop teams and individuals	40
BSBWOR404	Develop work priorities	40
LGACOM409A	Prepare tender documentation	60
LGACOM410A	Prepare response to tenders	20
RIICOM301D	Communicate information	30
RIIRA1402D	Apply and monitor site plant and resource management plan	60
RIIWS302D	Implement traffic management plan	20

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate III in Beauty Services

Course Code: SHB30115

Campus: City King St.

About this course: Fulfil your dream of working in the beauty industry. In this course you will develop the skills and knowledge to start your beauty career. Our team of professionals will teach you how to provide treatments and ensure a safe work environment. You will learn a range of beauty services which may include:

- make-up including camouflage and makeup for photography;
- eyelash extensions;
- waxing;
- manicure and pedicure;
- lash and brow treatments;
- spray tanning;
- demonstrating and selling retail skin care and cosmetic products;
- safe hygiene and work practices, and;
- environmental sustainability.

The combination of classroom and practical exercises means you will graduate with skills needed to work as a competent and work ready beauty therapist.

Course Objectives: This qualification reflects the role of individuals employed as beauticians to provide a range of beauty services including nail, waxing, lash and brow and basic make-up services. These individuals possess a range of well-developed technical and customer service skills where discretion and judgement is required and are responsible for their own outputs. This includes client consultation on beauty products and services. Work is typically conducted in beauty, waxing, brow and nail salons.

Careers: Possible career opportunities emerging from completing SHB30115 Certificate III in Beauty Services include:

- Beautician.

Course Duration: 0.5 years

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

Selection Processes: OtherN/A

COURSE STRUCTURE

To be awarded SHB30115 Certificate III in Beauty Services, a student must successfully complete a total of fifteen (15) units, consisting of:

- eleven (11) core units, and;
- four (4) elective units, of which:

two (2) units must be selected from the SHB30115 Certificate III in Beauty Services qualification, and; two (2) units may be selected from SHB30115 Certificate III in Beauty Services qualification, elsewhere in the SHB training package or any other current training package or accredited course. The selection of electives must be guided by the job outcome sought, local industry requirements and the complexity of skills appropriate to the AQF level of this qualification as well as be approved by the Polytechnic.

CORE UNITS

SHBBOS001	Apply cosmetic tanning products	16
SHBBCCS001	Advise on beauty products and services	30
SHBBFAS001	Provide lash and brow services	15
SHBBHRS001	Provide waxing services	85
SHBBMUP002	Design and apply make-up	45
SHBBNLS001	Provide manicure and pedicure services	50
SHBBRES001	Research and apply beauty industry information	20
SHBXCCS001	Conduct salon financial transactions	25
SHBXCCS002	Provide salon services to clients	40
SHBXIND001	Comply with organisational requirements within a personal	45

services environment

SHBXWHS001 Apply safe hygiene, health and work practices 40

SHBBMUP001 Apply eyelash extensions 30

SHBBMUP003 Design and apply make-up for photography 30

Imported

SHBBMUP004 Design and apply remedial camouflage make-up 30

SHBBNLS004 Apply nail art 15

Certificate III in Make-Up

Course Code: SHB30215

Campus: City King St.

About this course: Begin training for a career in beauty while completing your secondary school studies with the SHB30215 Certificate III in Make-Up. This intermediate course equips students with the necessary skills and knowledge to move into the beauty industry. You will learn how to:

- design and apply make-up;
- design and apply make-up for photography;
- design and apply creative make-up;
- conduct financial transactions, and;
- apply safe hygiene, health and work practices.

This course can be used as a pathway for entry into the SHB40115 Certificate IV in Beauty Therapy.

Course Objectives: This qualification reflects the role of individuals employed as make-up artists to design and apply make-up for a range of purposes and occasions across the beauty, fashion, media and entertainment industries. These individuals possess a range of well-developed technical and consultation skills where discretion and judgement is required and are responsible for their own outputs. This includes working cooperatively with a range of individuals including photographers, fashion stylists and media production staff. Work is typically conducted as part of a team or on a freelance basis in settings such as make-up studios, retail cosmetic counters, fashion and media sets and photography studios.

Careers: Possible career opportunities emerging from the completion of SHB30215 Certificate III in Make-Up:

- Make-up Artist.

Course Duration: 0.5 years

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

COURSE STRUCTURE

To be awarded the SHB30215 Certificate III in Make-Up, a student must successfully complete a total of fifteen (15) units of competency, comprising of: nine (9) core units, and; six (6) elective units, consisting of: three (3) units selected from the SHB30215 Certificate III in Make-Up qualification, and; three (3) units selected from the SHB30215 Certificate III in Make-Up qualification, elsewhere in SHB Training Package, or any other current training package or accredited course. The selection of electives must be guided by the job outcome sought, local industry requirements and the complexity of skills appropriate to the AQF level of this qualification as well as be approved by the Polytechnic.

CORE UNITS

SHBBMUP002	Design and apply make-up	45
SHBBMUP003	Design and apply make-up for photography	30
SHBBMUP004	Design and apply remedial camouflage make-up	30
SHBBMUP005	Apply airbrushed make-up	30
SHBBMUP006	Design and apply creative make-up	45
SHBBRES001	Research and apply beauty industry information	20
SHBXCCS002	Provide salon services to clients	40
SHBXIND001	Comply with organisational requirements within a personal services environment	45
SHBXWHS001	Apply safe hygiene, health and work practices	40

ELECTIVE UNITS

BSBSMB304	Determine resource requirements for the micro business	30
BSBSMB403	Market the small business	50
SHBBBOS001	Apply cosmetic tanning products	16
SHBBFAS001	Provide lash and brow services	15
SHBBMUP001	Apply eyelash extensions	30
SHBXCCS001	Conduct salon financial transactions	25

Certificate III in Hairdressing

Course Code: SHB30416

Campus: Industry, City King St.

About this course: Fulfil your dream of working in the hairdressing industry with a Certificate III in Hairdressing at Victoria University Polytechnic. You will develop specialist hairdressing skills and learn salon business practice at the hairdressing training studio. This qualification equips you with practical skills in:

- design and style;
- foundation colour;
- hair and scalp treatments;
- long hair design;
- protein treatments and straightening;

- men's grooming, and;
- advanced cutting and colour techniques.

Our qualified, industry experts will also teach you how to consult clients and promote products and services. On completion, you will have the confidence and skills to provide a variety of hairdressing services and begin your career as a qualified hairdresser. This course is offered as an apprenticeship course over 3 years and is also available to non-apprentices over 1 year.

Course Objectives: This qualification reflects the role of hairdressers who use a range of well-developed sales, consultation and technical skills and knowledge to provide a broad range of hairdressing services to clients. They use discretion and judgement to provide client services and take responsibility for the outcomes of their own work.

Careers: Possible career opportunities emerging from the completion of SHB30416 Certificate III in Hairdressing include:

- Hair Stylist.

Course Duration: 1 year

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

Selection Processes: OtherN/A

COURSE STRUCTURE

To be awarded SHB30416 Certificate III in Hairdressing qualification, a student must successfully complete a total of twenty-eight (28) units of competency, comprising of:

- twenty-one (21) core units;
- seven (7) elective units, of which:

three (3) units must be selected from either Group A or Group B; four (4) units from Group C. All electives chosen must contribute to a valid, industry-supported vocational outcome as well as be approved by the Polytechnic.

CORE UNITS

BSBSUS201	Participate in environmentally sustainable work practices	20
SHBBAS001	Provide shampoo and basin services	40
SHBHCLS002	Colour and lighten hair	65
SHBHCLS003	Provide full and partial head highlighting treatments	45
SHBHCLS004	Neutralise unwanted colours and tones	55
SHBHCLS005	Provide on scalp full head and retouch bleach treatments	55
SHBHCUT001	Design haircut structures	20

SHBHCU002	Create one length or solid haircut structures	30
SHBHCU003	Create graduated haircut structures	35
SHBHCU004	Create layered haircut structures	35
SHBHCU005	Cut hair using over-comb techniques	30
SHBHDES003	Create finished hair designs	50
SHBHIND001	Maintain and organise tools, equipment and work areas	20
SHBHIND003	Develop and expand a client base	35

SHBHCU011	Design and maintain beards and moustaches	20
SHBHREF003	Straighten and relax hair with protein treatments	45
SHBXCCS004	Recommend products and services	20

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and

be assessed as appropriate by the Polytechnic.

Certificate III in Barbering

Course Code: SHB30516

Campus: Industry, City King St.

About this course: Become a qualified barber and learn the full range of barbering skills and hairdressing techniques when you study the Certificate III in Barbering. The re-emergence of the barber shop means there's an increased need for specialist barbering skills, particularly as fashions for men are dominated by retro cuts and meticulously groomed facial hair. You will develop the full range of barbering techniques and client service skills, learn how to ensure a safe working environment and apply your knowledge to sell products and services. Upon completion you'll be competent in:

- barbering skills such as cutting, clippers and grooming;
- hairdressing skills including designing, cutting and colouring;
- a high level of communication skills;
- consulting and advising clients, and;
- promoting products and services.

Course Objectives: This qualification reflects the role of barbers who use a range of well-developed sales, consultation and technical skills and knowledge to provide a broad range of barbering services to clients. They use discretion and judgement to provide client services and take responsibility for the outcomes of their own work. This qualification provides a pathway to work as a barber in any industry environment, usually a barber shop or salon.

Careers: Possible career opportunities emerging from the completion of SHB30516 Certificate III in Barbering, include:

- Barber;
- Hair Stylist, and;
- Hairdresser.

Course Duration: 1 year

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

Selection Processes: OtherN/A

COURSE STRUCTURE

To be awarded SHB30516 Certificate III in Barbering qualification, a student must successfully complete a total of twenty-six (26) units of competency, comprising of:

- twenty-one (21) core units;
- five (5) elective units, of which:

three (3) units must be selected from the electives listed in the SHB30516 Certificate III in Barbering qualification; two (2) units may be selected from the electives listed in the SHB30516 Certificate III in Barbering qualification, elsewhere in the SHB Training Package, or any other current training package or accredited course. The selection of electives must be guided by the job outcome sought, local industry requirements and the complexity of skills appropriate to the AQF level of this

qualification. All electives chosen must contribute to a valid, industry-supported vocational outcome and with the Polytechnic approval.

CORE UNITS

BSBSUS201	Participate in environmentally sustainable work practices	20
SHBBAS001	Provide shampoo and basin services	40
SHBHCUT001	Design haircut structures	20
SHBHCUT002	Create one length or solid haircut structures	30
SHBHCUT003	Create graduated haircut structures	35
SHBHCUT004	Create layered haircut structures	35
SHBHCUT005	Cut hair using over-comb techniques	30
SHBHCUT007	Create combined traditional and classic men's haircut structures	45
SHBHCUT009	Cut hair using freehand clipper techniques	25
SHBHCUT011	Design and maintain beards and moustaches	20

Diploma of Beauty Therapy

Course Code:SHB50115

Campus:City King St.

About this course: Take your beauty career further with a Diploma of Beauty Therapy at the Polytechnic. This course will advance your beauty therapy skills and prepare you for management positions in salons and spas. We will ensure you know the theory and science behind treatments and techniques, and that you gain extensive hands-on experience. You will complete a practical placement in a salon of your choice as well as learning in our beauty salon and the classroom. This course provides training in basic and advanced beauty therapy techniques and services including:

- facial treatments;
- lash and brow treatments;
- manicures and pedicures;
- make-up;
- waxing;
- body massage and treatments;
- spa treatments;
- electrolysis treatments, and;
- advice on and selling of retail skin care and cosmetic products.

You will also learn valuable and transferable business and management skills.

Course Objectives: Students who complete this course work relatively autonomously, and are accountable for personal outputs. Their work involves the self-directed application of knowledge and skills with substantial depth in some areas where judgement is required in planning and selecting appropriate equipment, services and techniques. Elective units allow specialisation in areas such as electrolysis/diathermy, relaxation massage or spa treatments.

Careers: Possible career opportunities emerging from the completion of SHB50115 Diploma of Beauty Therapy include:

- Salon Beauty Therapist;
- Salon Manager/Owner;
- Department Store/Pharmacy Cosmetic Consultant;
- Spa Therapist;
- Health Spa/Resort Manager;
- Spa Therapist on a cruise ship;
- Freelance Therapist;
- Cosmetic or Beauty Equipment Sales Representative;
- Beauty Editor/Journalist, and;
- Beauty Educator.

Course Duration: 1 year

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

Admission Requirements International: Completion of an Australian Year 12 or equivalent. IELTS: Overall score of 5.5 (no band less than 5.0).

Selection Processes: Other/Not Applicable.

COURSE STRUCTURE

To be awarded SHB50115 Diploma of Beauty Therapy, a student must successfully complete a total of twenty-five (25) units of competency, comprising of:

- thirteen (13) core units, and;
- twelve (12) elective units, of which:

all units listed within Group A or Group B or Group C must be selected, and; remaining units must be selected from Group D - General Electives, elsewhere in the SHB Hairdressing and Beauty Services Training Package, or any other current training package or accredited course.

CORE UNITS

SHBBBOS002	Provide body massages	120
SHBBBOS003	Provide body treatments	120
SHBBFAS001	Provide lash and brow services	15
SHBBFAS002	Provide facial treatments and skin care recommendations	120
SHBBFAS003	Provide specialised facial treatments	115
SHBBHRS001	Provide waxing services	85
SHBBMUP002	Design and apply make-up	45

SHBBMUP003	Design and apply make-up for photography	30
SHBBMUP004	Design and apply remedial camouflage make-up	30

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate III in Fitness

Course Code: SIS30315

Campus: Footscray Park, Werribee.

About this course: Kick start a rewarding career in the fitness industry with this practical, industry-focused course. The Polytechnic's Certificate III in Fitness is designed to provide you with the skills and knowledge to confidently work as a gym instructor or group exercise instructor. You will learn the latest styles of training from our industry leading teachers and gain essential skills in:

- fitness session design and instruction;
- anatomy and physiology principles;
- instructing group exercise sessions;
- conducting fitness appraisals;
- exercise instruction for older clients;
- providing health screening and healthy eating information;
- workplace health and safety, and;
- first aid and risk management.

You will have access to Victoria University's \$68 million sport precinct, which includes an aquatic centre, commercial gym with the latest equipment, and group exercise spaces. You will also gain hands-on work experience in a supported learning environment at our custom designed teaching gym on campus.

Course Objectives: This qualification reflects the role of instructors who perform a range of activities and functions within the fitness industry. Depending on the specialisation chosen, this qualification provides a pathway to work as an instructor providing exercise instruction for group, aqua or gym programs. They work independently with some level of autonomy in a controlled environment such as fitness, leisure, aquatic and community centres where risks are managed through pre-existing risk assessment and hazard control processes. Individuals who specialise in Group Exercise Instruction deliver exercise sessions designed for participation by a group of clients with a mix of ages/fitness levels. Sessions may be freestyle, pre-choreographed or circuit style. These individuals instruct and demonstrate complete exercise sessions to groups with limited individual interaction. Individuals who specialise in Gym Instruction provide individually tailored client assessments, provide technique correction as needed, and develop and demonstrate programs. They also provide supervision of a facility or service, keep equipment clean, tidy and well maintained, and handle various customer inquiries.

Careers: Possible career opportunities emerging from the completion of SIS30315 Certificate III in Fitness include:

- Group Exercise Instructor, and;
- a Gym Instructor.

Course Duration: 0.5 years

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs. For employment and practical placement purposes, this vocational sector typically requires a current Working with Children's Check. Failure to provide the required documents in the timeframe specified by the Course Coordinator, means you will be unable to undertake practical placement in a workplace and therefore not eligible to progress in this course. The following is a suggested site you could visit to obtain this check: - Working with Children Check - <http://www.workingwithchildren.vic.gov.au/>

Selection Processes: Other

COURSE STRUCTURE

To be awarded the SIS30315 Certificate III in Fitness, a student must successfully complete a total of sixteen (16) units of competency, consisting of:

- nine (9) core units, and;
- seven (7) elective units, consisting of:

all units in Groups A, B or C, and; all remaining units to make up the required seven (7) electives must be selected from Group D of which: a maximum of two (2) units may be selected elsewhere in the SIS Sport, Fitness and Recreation Training Package, or any other current training package or accredited course. Specialisations: The Polytechnic currently offer the following as a dual specialisation: 1. Group Exercise Instructor, and; 2. Gym Instructor.

Dual Specialisation: Group Exercise Instructor, Gym Instructor

To be awarded the dual specialisation, the following training package rules must be adhered to:

All Group B and Group C electives must be selected.

CORE UNITS

SISFFIT001	Provide health screening and fitness orientation	15

SISFFIT003	Instruct fitness programs	50
SISFFIT004	Incorporate anatomy and physiology principles into fitness programming	95
SISFFIT005	Provide healthy eating information	55
SISFFIT014	Instruct exercise to older clients	70
SISXCCS001	Provide quality service	25
SISXFAC001	Maintain equipment for activities	5
SISXIND001	Work effectively in sport, fitness and recreation environments	25

ELECTIVE UNITS

Group A: Aqua Exercise Instructor

Group A electives are not currently offered by the Polytechnic.

Group B: Group Exercise Instructor

BSBRK401	Identify risk and apply risk management processes	50
HLTAID003	Provide first aid	18
HLTWH001	Participate in workplace health and safety	20
SISFFIT007	Instruct group exercise sessions	80
SISFFIT011	Instruct approved community fitness programs	40

Group C: Gym Instructor

Please note the following units meet the requirements for Group C.

BSBRK401, HLTAID003 and HLTWH001 which are listed in Group B.

SISFFIT006 which is listed in Group D.

Group D

SISFFIT006	Conduct fitness appraisals	30
SISXDIS001	Facilitate inclusion for people with a disability	20

Certificate IV in Fitness

Course Code: SIS40215

Campus: Footscray Park, Werribee.

About this course: The Certificate IV in Fitness gives you the skills to kick start your career the health sector, one of the fastest growing industries globally. Learn to work with clients on a one-on-one or group basis. Consumers are wanting a more personalised training service and there is increasing demand for fitness professionals to work with medical and allied health professionals, to design and offer fitness programs suitable for older people as well having the skills to coach and train children. You will learn from our industry-leading facilitators and gain advanced skills to:

- work with people affected by chronic conditions;
- liaise with fitness service coordinators and personal training managers;
- lead a team of personal trainers;
- plan, conduct and evaluate exercise training;
- provide leadership and guidance to clients and other staff;
- deal with unpredictable situations;
- work independently or with limited guidance, and;
- use discretion to solve non-routine problems, including monitoring and managing business activities to operate efficiently and profitably.

Victoria University Polytechnic will get you job-ready through hands-on learning opportunities in our \$68 million sport precinct that includes an aquatic centre, commercial gym with the latest equipment and group exercise spaces. You will also gain hands-on work experience in a supported learning environment at our custom designed teaching gym on campus and through supported work placements.

Course Objectives: This qualification reflects the role of personal trainers who have specialist skills to train individual clients, or groups of clients, on a one-on-one or group basis, to improve health-related components of fitness in relatively low risk situations. This may include training of older clients and children. They have a substantial depth of knowledge to plan, conduct and evaluate exercise training; provide leadership and guidance to clients and other staff; and deal with unpredictable situations applying defined guidelines and procedures from the fitness industry and the organisation. They work independently or with limited guidance from others and use discretion to solve non-routine problems, including monitoring and managing business activities to operate efficiently and profitably.

Careers: Possible career opportunities emerging from the completion of SIS40215 Certificate IV in Fitness include a pathway to work in a diversity of fitness industry businesses including fitness centres, gyms, aquatic facilities, community facilities and in open spaces, where risk management (through risk assessment and hazard control processes) does not already exist.

Course Duration: 0.5 years

Admission Requirements: Entry to this qualification is open to individuals who hold a current first aid and CPR certificate and have been recognised as competent through a recognised training program or recognition process against the following units of competency: SISFFIT001 Provide health screening and fitness orientation; SISFFIT002 Recognise and apply exercise considerations for specific populations; SISFFIT003 Instruct fitness programs; SISFFIT004 Incorporate anatomy and physiology principles into fitness programming; SISFFIT005 Provide healthy eating information; SISFFIT006 Conduct fitness appraisals; SISFFIT014 Instruct exercise to older clients, and; SISXCCS001 Provide quality service. Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

COURSE STRUCTURE

To be awarded the SIS40215 Certificate IV in Fitness, a student must successfully complete a total of twenty (20) units of competency, comprising of: twelve (12) core units, and; eight (8) elective units, of which: four (4) units must be selected from Group A; at least two (2) units must be selected from Group A or Group B, and; two (2) units may be selected elsewhere in SIS Sport, Fitness and Recreation Training Package, or any other current training package or accredited course. The selection of electives must be guided by the job outcome sought, local industry requirements and the complexity of skills appropriate to the AQF level of this qualification as well as be approved by the Polytechnic.

CORE UNITS

Diploma of Sport

Course Code:SIS50319

Campus:Footscray Park.

About this course:Kick off your career in the sports industry with a Diploma of Sport at Victoria University Polytechnic. You'll learn how to plan and deliver sports coaching sessions and strength and conditioning programs. Learning from current industry professionals, you'll gain skills and knowledge in:

- sport coaching;
- sport integrity;
- sport marketing;
- project management;
- sport psychology, and;
- customer service.

You'll also develop valuable skills in project management, sport safety and risk management, facilitation and organisational risk management. As a student of a leading sports university, you will have access to world-class facilities, sports research and our extensive network of sports organisation partners. This course is delivered through our award winning blended learning model that combines face-to-face workshops with flexible user-friendly e-learning activities.

Course Objectives:This qualification reflects the role of individuals who apply the skills and knowledge to pursue a range of roles within the Australian sport industry. They work or volunteer at community-based sport clubs and organisations in the Australian sport industry. Individuals with this qualification are involved in the self-directed application of knowledge and skills, and the provision of leadership and support to colleagues. They work autonomously and coordinate and supervise others.

Careers:Possible career opportunities emerging from the completion of SIS50319 Diploma of Sport include:

- High performance coach;
- Sport development manager, and;
- Sports Talent manager.

(Titles may vary across sport industry i.e. recreation officer etc) at community based sports clubs or sport, recreation or fitness organisations. Students will be awarded a coaching specialisation within this course. They will obtain a sport specific coaching accreditation, which will enable them to take up positions as a sport-specific coach (e.g. AFL) in industry. They will also complete a series of general coaching certifications online and gain experience coaching participants at various levels/age groups helping build their graduate capability and industry networks.

Course Duration: 1 year

Admission Requirements:Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs. This vocational sector typically requires a current and satisfactory Working with Children Check. A Working with Children Check can be obtained from: - Working with Children Check - <http://www.workingwithchildren.vic.gov.au/>

Admission Requirements International:Completion of an Australian Year 12 or equivalent. IELTS 5.5 or equivalent This vocational sector typically requires a current and satisfactory Working with Children Check. A Working with Children Check can be obtained from: - Working with Children Check - <http://www.workingwithchildren.vic.gov.au/>

COURSE STRUCTURE

To be awarded SIS50319 Diploma of Sport, a student must successfully complete a total of fourteen (14) units comprising of:

- three (3) core units, and;
- eleven (11) elective units, consisting of:
- at least nine (9) units from the elective units in qualification structure, and;
- up to two (2) elective units which can be selected from elsewhere in the SIS Training Package, or from any other current Training Package or accredited course.

Packaging Rules for each specialisation:

- all Group A electives must be selected for award of the Diploma of Sport (Coaching);

Specialisations: The Victoria University Polytechnic currently offers the following specialisation(s):

- Coaching.

Recognition of Prior Learning and/or Credit Transfers:

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate II in Tourism

Course Code:SIT20116

Campus:Footscray Nicholson.

About this course:Learn the basic skills to work effectively in the growing tourism and travel industry at Victoria University Polytechnic. This course provides the foundation skills necessary to work across a diverse range of roles within the tourism sector, including providing excellent customer service, food handling and workplace safety. You will gain an understanding and knowledge in:

- sourcing and using information on the tourism and travel industry;
- interacting with customers and providing visitor information;
- social and cultural sensitivity;
- safe work practices;
- responsible service of alcohol and non-alcoholic beverages;
- preparation of espresso coffee and hygienic practices for food safety, and;
- providing advice on Australian and International destinations.

Upon completion, you will have the confidence to operate within a travel or tourism environment. Please note: this qualification is not open for general enrolments. Secondary schools looking to collaborate with the Polytechnic should contact the Coordinator, Business Development Support (VETDS).

Course Objectives:This qualification reflects the role of individuals who have a defined and limited range of tourism operational skills and basic industry knowledge. They are involved in mainly routine and repetitive tasks and work under direct supervision. This qualification provides a pathway to work in many tourism and travel industry sectors and for a diverse range of employers including travel agencies, tour wholesalers, tour operators, attractions, cultural and heritage sites, and any small tourism business. Work could be undertaken in an office environment where the planning of tourism and travel products and services takes place, in the field where products are delivered, or a combination of both.

Careers:Possible career opportunities emerging from the completion of SIT20116 Certificate II in Tourism:

- Documentation Clerk for a tour wholesaler or travel agency museum attendant;
- Office Assistant for a tour operator;

- Receptionist and Office Assistant for a professional conference organiser or event management business;
- Receptionist and Office Assistant in a travel agency;
- Retail Sales Assistant in an attraction, and;
- Ride Attendant in an attraction.

Course Duration: 9 months

Admission Requirements:Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs. Block Credit: The literacy and numeracy levels of applicants will be assessed through consultation with the relevant secondary school.

COURSE STRUCTURE

To be awarded the SIT20116 Certificate II in Tourism, a student must successfully complete a total of eleven (11) units of competency, comprising of:

- four (4) core units, and;
- seven (7) elective units, of which:

three (3) units must be selected from the SIT20116 Certificate II in Tourism qualification; four (4) units may be selected from the SIT20116 Certificate II in Tourism qualification, elsewhere in the SIT Tourism, Travel and Hospitality Training Package, or any other current training package or accredited course.

CORE UNITS

Certificate III in Commercial Cookery

Course Code: SIT30816

Campus: Industry, Footscray Nicholson, Online, SMAS - Assessment Only Geelong Learning Links.

About this course: Make your culinary dream a reality, with this hands-on commercial cookery apprenticeship. Using a blend of online and practical skills development, this course provides you with essential skills in the following areas:

- food preparation (poultry, meat, seafood, vegetables, dairy, fruits);
- desserts (cakes, pastries);
- menu planning and costing;
- basic knife skills;
- basic methods of cookery;
- teamwork;
- sustainable work practices, and;
- food hygiene, food safety and OHS.

You will learn a range of practical skills and the latest trends and techniques used in the industry under the guidance of experienced chefs. On successful completion, you can choose to pathway into the Certificate IV in Commercial Cookery or find employment as a:

- Commis Chef, and;
- Sous Chef.

It is important to note that students will be expected to follow standard recipes to prepare meat dishes using each of the following meat items: beef, game (kangaroo, venison, speciality meats), lamb, pork, veal and offal (kidney, liver). Students will be unable to successfully complete unit SITHCCCO14 Prepare meat dishes without meeting this requirement. The completion of this unit is required to complete SIT30816 Certificate III in Commercial Cookery.

Course Objectives: This qualification reflects the role of commercial cooks who use a wide range of well-developed cookery skills and sound knowledge of kitchen operations to prepare food and menu items. Using discretion and judgment, they work with some independence and under limited supervision using plans, policies and procedures to guide work activities.

Careers: Prospective careers in hospitality include a cook and/or trainee chef in the following establishments:

- restaurants/cafes;
- hotels;
- resorts;
- reception centres;
- airlines;
- hospitals;
- aged care residences;
- cruise ships;
- catering companies, and;
- clubs.

Course Duration: 1 year

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

Admission Requirements International: Completion of an Australian Year 11 or equivalent. The Polytechnic use the International English Language Testing System (IELTS) to measure the language proficiency of people who want to study with us. As part of this test, applicants must attain a minimum IELTS (academic module) of 5.5 or equivalent. For employment and practical placement purposes, this vocational sector typically requires a current and satisfactory Police Record Check. Failure to provide the required documents in the timeframe specified by the Course Coordinator, means you will be unable to undertake practical placement in a workplace and therefore not eligible to progress in this course. The following is a suggested site you could visit to obtain this check: Police Record Check - http://www.police.vic.gov.au/content.asp?Document_ID=274

Selection Processes: Other/Not Applicable.

- food preparation and presentation.

The Footscray Nicholson hospitality training centre includes:

- three state-of-the-art commercial kitchens with the latest cooking equipment;
- two demonstration kitchens;
- a training bar, and;
- VenU: a 150-seat training restaurant.

VenU restaurant was awarded best training restaurant in Victoria at the Restaurant and Catering Awards. It is important to note that students will be expected to follow standard recipes to prepare meat dishes using each of the following meat items: beef, game (kangaroo, venison, specialty meats), lamb, pork, veal and offal (kidney, liver). Students will be unable to successfully complete unit SITHCC014 Prepare meat dishes without meeting this requirement. The completion of this unit is required to complete SIT40516 Certificate IV in Commercial Cookery.

Course Objectives: This qualification reflects the role of commercial cooks who have a supervisory or team leading role in the kitchen. They operate independently or with limited guidance from others and use discretion to solve non-routine problems.

Careers: Possible career opportunities emerging from the completion of SIT40516 Certificate IV in Commercial Cookery includes:

- Head Chef;
- Sous Chef, and;
- Chef de Partie.

Course Duration: 1.5 years

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs. For employment and practical placement purposes, this vocational sector typically requires a current and satisfactory Police Record Check. Failure to provide the required documents in the timeframe specified by the Course Coordinator, means you will be unable to undertake practical placement in a workplace and therefore not eligible to progress in this course. The following is a suggested site you could visit to obtain this check: Police Record Check - http://www.police.vic.gov.au/content.asp?Document_ID=274

Admission Requirements International: Completion of an Australian Year 11 or equivalent. The Polytechnic use the International English Language Testing System (IELTS) to measure the language proficiency of people who want to study with us. As part of this test, applicants must attain a minimum IELTS (academic module) of 5.5 or equivalent. For employment and practical placement purposes, this vocational sector typically requires a current and satisfactory Police Record Check. Failure to provide the required documents in the timeframe specified by the Course Coordinator, means you will be unable to undertake practical placement in a workplace and therefore not eligible to progress in this course. The following is a suggested site you could visit to obtain this check: Police Record Check - http://www.police.vic.gov.au/content.asp?Document_ID=274

COURSE STRUCTURE

To be awarded SIT40516 Certificate IV in Commercial Cookery qualification, a student must successfully complete a total of thirty-three (33) units of competency, comprising of:

- twenty-six (26) core units;
- seven (7) elective units which may be selected from within the SIT40516 Certificate IV in Commercial Cookery qualification, elsewhere in the SIT Tourism, Travel and Hospitality Training Package, or another other current training package or accredited course.

The selection of electives must be guided by the job outcome sought, local industry requirements and the complexity of skills appropriate to the AQF level of this qualification as well as be approved by the Polytechnic.

CORE UNITS

Diploma of Hospitality Management

Course Code: SIT50416

Campus: Footscray Nicholson.

About this course: Gain the knowledge and training required to become a skilled manager in the hospitality industry with a Diploma of Hospitality Management at Victoria University Polytechnic. You will gain practical skills tailored to working in restaurants, cafes, hotels and other hospitality areas. You will learn and apply your

skills in our fully equipped hospitality training centre under the guidance of passionate industry experts. Areas of study include:

- staff management;
- strategic business operations;
- food and beverage service;
- safety, and;
- business marketing.

During your course you will have access to leading industry standard software, including Opera Property used in many leading hotels throughout Australia. You will learn the skills to use the system and manage hotel front office operations, including creating reservations, managing accounts and check out. You will also gain essential skills in restaurant operations systems such as Micros POS.

Course Objectives: This qualification reflects the role of highly skilled senior operators who use a broad range of hospitality skills combined with managerial skills and sound knowledge of industry to coordinate hospitality operations. They operate independently, have responsibility for others and make a range of operational business decisions.

Careers: Possible career opportunities emerging from the completion of SIT50416 Diploma of Hospitality Management:

- banquet or function manager;
- bar manager;
- café manager;
- club manager;
- front office manager;
- motel manager, and;
- restaurant manager.

Course Duration: 1 year

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs. For employment and practical placement purposes, this vocational sector typically requires a current and satisfactory Police Record Check. Failure to provide the required documents in the timeframe specified by the Course Coordinator, means you will be unable to undertake practical placement in a workplace and therefore not eligible to progress in this course. The following is a suggested site you could visit to obtain this check: - Police Record Check - http://www.police.vic.gov.au/content.asp?Document_ID=274

Admission Requirements International: Completion of an Australian Year 11 or equivalent. The Polytechnic use the International English Language Testing System (IELTS) to measure the language proficiency of people who want to study with us. As part of this test, applicants must attain a minimum IELTS (academic module) of 5.5 or equivalent. For employment and practical placement purposes, this vocational sector typically requires a current and satisfactory Police Record Check. Failure to provide the required documents in the timeframe specified by the Course Coordinator, means you will be unable to undertake practical placement in a workplace and therefore not eligible to progress in this course. Certificate IV in Training and Assessment

Course Code:TAE40116

Campus:Industry, Werribee, City King St.

About this course:The Certificate IV in Training and Assessment (TAE40116) meets the minimum trainer and assessor requirements of the Standards for RTOs 2015. It is suitable for people wishing to commence or progress their career in training and assessment, including those who:

- want to develop or strengthen their training and assessment skills in a competency environment;
- wish to explore career change or personal development opportunities in the training and assessment field;
- deliver training and conduct assessment within their work role;
- are seeking to extend, enhance or update their existing qualifications, which may include previous, older versions of training and assessment qualifications, and;
- are engaged in a training role and intend to deliver and/or assess Training Package qualifications.

The Polytechnic offers a range of flexible, supported delivery models to meet the different learning and practical needs of our students. You can enrol in one of our weekly day or evening courses; or you can participate in our intensive block mode program. Our courses are structured to provide you with the level of learning support

you need to maximise your opportunities for success. In addition to face to face training delivered by expert facilitators, we provide:

- webinars;
- face to face tutorials;
- mentoring and coaching from trainers, and;
- a simulated work environment where you can practise your skills, get feedback from your peers and undertake your assessments.

Training is conducted at our conveniently located city campus. At the Polytechnic, we have strong links with industry and deliver customised programs for a range of industry clients. We work with our industry partners to ensure that our programs reflect the needs and expectations of employers. Our students graduate job-ready for roles in the training and assessment sector.

Course Objectives:This qualification reflects the roles of individuals delivering training and assessment services in the vocational education and training (VET) sector. This qualification (or the skill sets derived from units of competency within it) is also suitable preparation for those engaged in the delivery of training and assessment of competence in a workplace context, as a component of a structured VET program. Licensing/Regulatory Information Achievement of the TAE40116 Certificate IV in Training and Assessment satisfies the qualification requirements for trainers and assessors, who deliver and assess nationally accredited training products as specified in the Standards for Registered Training Organisations (RTOs) 2015.

Careers:At the completion of TAE40116 Certificate IV in Training and Assessment, you will be able to explore the following careers:

- Enterprise Trainer;
- Enterprise Assessor;
- Registered Training Organisation (RTO) Trainer;
- RTO Assessor;
- Training Adviser or Training Needs Analyst, and;
- Vocational Education Teacher.

Course Duration: 1 year

Admission Requirements:Applicants must be able to demonstrate vocational competency in their proposed teaching and assessing area. Vocational competency is defined as broad industry knowledge and experience, and may include, but is not limited to, holding a relevant unit of competency or qualification. All applicants are required to: Complete Pre-Training review Complete Literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs Provide relevant vocational unit of competency or qualification if relevant Provide resume or curriculum vitae

Selection Processes: OtherN/A

COURSE STRUCTURE

To be awarded TAE40116 Certificate IV in Training and Assessment, a student must successfully complete a total of ten (10) units of competency, comprising of:

- nine (9) core units, and;
- one (1) elective unit, of which:

- the elective may be selected from the electives listed in the TAE40116 Certificate IV in Training and Assessment qualification, or;
- from any currently endorsed training package or accredited course at Certificate IV or above.

The elective unit chosen must be relevant to the work outcome and meet local industry needs as well as be approved by the Polytechnic.

CORE UNITS

TAEASS401	Plan assessment activities and processes	40
TAEASS402	Assess competence	25

TAEDEL401	Plan, organise and deliver group-based learning	30
TAEDEL402	Plan, organise and facilitate learning in the workplace	25
TAEDES401	Design and develop learning programs	50
TAEDES402	Use training packages and accredited courses to meet client needs	25
TAELN411	Address adult language, literacy and numeracy skills	30

ELECTIVE UNITS

BSBCMM401	Make a presentation	30
TAEDEL301	Provide work skill instruction	40

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate II in Logistics

Course Code: TLI21815

Campus: Industry.

About this course: Gain the practical skills to start out in the transport and logistics industry with a Certificate II in Logistics. This course is ideal for new entrants to the industry to develop key foundational skills and a broad understanding of logistics principles. You will develop skills in:

- stocktaking;
- receiving and dispatching goods;
- applying fatigue management strategies;
- basic administration, and;
- customer service.

This course also teaches you occupational health and safety principles, and how to follow workplace safety regulations. This qualification will help you transition into the TLI32416 Certificate III in Logistics, or gain an entry-level job in the field. Please note: this qualification is not open for general enrolments. Contact the Polytechnic to find out more about our customised training solutions for your workforce.

Course Objectives: This is a qualification for a person engaged in logistics operations support within the Transport and Logistics Industry who undertakes a range of tasks involving known routines and procedures, and who takes some responsibility for the quality of their work outcomes. Successful achievement of the licensing units within the qualification must align with applicable licensing and regulatory requirements.

Careers: Possible career opportunities emerging from the completion of TLI21815 Certificate II in Logistics include:

- Logistics Support Officer, and/or;
- Logistics Clerk.

Course Duration: 0.5 years

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

COURSE STRUCTURE

To be awarded the TLI21815 Certificate II in Logistics, a student must successfully complete a total of eleven (11) units of competency, comprising of: four (4) core units, and; seven (7) elective units, of which: three (3) units must be selected from the technical elective units listed in the TLI21815 Certificate II in Logistics qualification and; four (4) units may be selected from the general electives list or remaining technical elective units listed in the TLI21815 Certificate II in Logistics qualification, of which: up to three (3) units may be selected from any relevant nationally endorsed training package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification as well as be approved by the Polytechnic.

CORE UNITS

BSBCUS201	Deliver a service to customers	40
TLIF0001	Apply chain of responsibility legislation, regulations and workplace procedures	15
TLIF1001	Follow work health and safety procedures	20
TLIG2007	Work in a socially diverse environment	20

ELECTIVE UNITS

Technical Units

TLIA2013	Receive goods	20
TLIA2021	Despatch stock	20
TLIA2022	Participate in stocktakes	20

TLID1001	Shift materials safely using manual handling methods	20
TLIF2010	Apply fatigue management strategies	30
General Units		
TLIA2014	Use product knowledge to complete work operations	20
TLIL2008	Complete routine administrative tasks	10

Certificate III in Logistics

Course Code:TLI32416

Campus:Industry.

About this course:Get prepared to launch your career, or expand your employment opportunities in the warehousing, transport and logistics industry with a Certificate III in Logistics. This practical logistics course has been developed with industry to equip you with a range of essential skills required to work in a warehouse environment. You will develop industry-leading techniques for:

- stock management;
- quality control inventory systems;
- info-technology;
- document and records management;
- staff induction;
- workplace health and safety;
- team leadership, and;
- customer service.

Please note: this qualification is not open for general enrolments. Contact the Polytechnic to find out more about our customised training solutions for your workforce.

Course Objectives:This is a qualification for those engaged in logistics operations within the Transport and Logistics Industry. It involves a defined range of skilled operations, usually within a range of broader related activities involving known routines, methods and procedures, where some discretion and judgement is required in selecting equipment, services or contingency measures within known time constraints. It may also include responsibility for coordinating the work of others.

Careers:Possible career opportunities emerging from the completion of TLI32416 Certificate III in Logistics include:

- Logistics Administration Officer, and/or;
- Logistics Service Clerk.

Course Duration: 1 year

COURSE STRUCTURE

To be awarded the TLI32416 Certificate III in Logistics, a student must successfully complete a total of thirteen (13) units of competency, comprising of:

- two (2) core units, and;
- eleven (11) elective units, of which:
- six (6) units must be selected from the technical elective units listed in the TLI32416 Certificate III in Logistics qualification and;

- five (5) units may be selected from the general electives list or remaining technical elective units listed in the TLI32416 Certificate III in Logistics qualification, of which:

up to three (3) units may be selected from any relevant nationally endorsed training package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification as well as be approved by the Polytechnic.

CORE UNITS

TLIE3004	Prepare workplace documents	20
TLIF0001	Apply chain of responsibility legislation, regulations and workplace procedures	15

ELECTIVE UNITS

Technical

BSBCUS301	Deliver and monitor a service to customers	35
TLIA3002	Maintain container/cargo records	20
TLIA3015	Complete receiptal/despatch documentation	40
TLIA3038	Control and order stock	40
TLIA3039	Receive and store stock	40
TLIF1001	Follow work health and safety procedures	20

General

BSBWOR301	Organise personal work priorities and development	30
TLIE2007	Use communications systems	20
TLIG3002	Lead a work team or group	40
TLIK2010	Use infotechnology devices in the workplace	40
TLIL3003	Conduct induction process	20

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate IV in Logistics

Course Code:TLI42016

Campus:Industry.

About this course:Launch your future career in the transport, storage and logistics industry with a Certificate IV in Logistics from the Polytechnic. This logistics certificate is a practical course that has been developed with industry. You will gain the knowledge and skills to confidently work in technical, operational or administrative roles in the logistics industry. An efficient supply chain is a fundamental component

of every type of business and essential to the transport and logistics industry. You will learn a broad range of essential logistics skills including:

- supply chain and logistics operations;
- warehouse operations;
- transport operations;
- business administration;
- purchasing and inventory;
- dangerous goods;
- import and export documentation, and;
- workplace health and safety.

You will gain on-the-job experience through our industry partnerships. Upon graduating, you will be both confident and competent. Please note: this qualification is not open for general enrolments. Contact the Polytechnic to find out more about our customised training solutions for your workforce.

Course Objectives: This is a qualification for those engaged in logistics operations in the transport and logistics industry in a variety of operational roles. It involves a broad range of skilled applications including requirements to evaluate and analyse current practices, to develop new criteria and procedures for performing current practices, and to provide leadership and guidance to others in applying skills and planning skill development.

Careers: Possible career opportunities emerging from the completion of TLI42016 Certificate IV in Logistics include:

- Logistics Operations;
- Warehousing Team Leader;
- Load Supervisor;
- Freight Scheduler, and;
- Fleet Controller.

Course Duration: 9 months

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

Selection Processes: Other/N/A

COURSE STRUCTURE

To be awarded TLI42016 Certificate IV in Logistics, a student must successfully complete a total of fifteen (15) units of competency, comprising of:

- two (2) core units, and;
- seven (7) technical elective units from the technical elective units listed in the TLI42016 Certificate IV in Logistics qualification, and;
- six (6) general elective units from the general elective units or remaining technical elective units listed in the TLI42016 Certificate IV in Logistics qualification, of which:

up to three (3) of the general elective units may be selected from any relevant nationally endorsed training package or accredited course. The general elective units

must contribute to the vocational outcomes of the qualification as well as be approved by the Polytechnic.

CORE UNITS

TLIF0001	Apply chain of responsibility legislation, regulations and workplace procedures	15
----------	---	----

TLIX4028	Apply knowledge of logistics	20
----------	------------------------------	----

ELECTIVE UNITS

Technical

TLIE3002	Estimate/calculate mass, area and quantify dimensions	30
----------	---	----

TLIF4014	Develop and maintain a safe workplace	50
----------	---------------------------------------	----

TLII4001	Coordinate quality customer service	30
----------	-------------------------------------	----

TLIL4070	Work effectively in the transport and logistics industry	30
----------	--	----

TLIP4013	Implement and monitor logistics planning and processes	80
----------	--	----

TLIP4039	Monitor transport operations	60
----------	------------------------------	----

TLIP4040	Monitor warehouse operations	60
----------	------------------------------	----

TLIR4001	Monitor supplier performance	30
----------	------------------------------	----

General

BSBMGT403	Implement continuous improvement	40
-----------	----------------------------------	----

TLIG4006	Facilitate work teams	50
----------	-----------------------	----

TLIL4009	Manage personal work priorities and professional development	50
----------	--	----

TLIP4002	Facilitate and capitalise on change in the workplace	50
----------	--	----

TLIU2012	Participate in environmentally sustainable work practices	20
----------	---	----

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the training package and be assessed as appropriate by the Polytechnic.

Diploma of Logistics

Course Code: TLI50415

Campus: Industry.

About this course: Prepare yourself for entry level management positions within the logistics industry with a Diploma of Logistics at the Polytechnic. In this course, you will gain a broad range of skills and knowledge for managing the distribution of goods and materials. You will learn to work with others to perform complex technical operations. An efficient supply chain is a fundamental component of every type of

business and essential to the transport and logistics industry. You will learn a broad range of essential logistics skills including:

- supply chain operations;
- contract negotiations;
- purchasing and inventory;
- distribution;
- supplier management;
- customer service;
- leadership and employee relations;
- budgets;
- planning;
- workplace health and safety, and;
- environmental sustainability.

This course will give you strong theoretical knowledge and practical experience developing logistics strategies. You will need to have considerable analytical and communication skills. Upon successful completion of this course, you will be qualified and ready for leadership roles in the logistics industry. Please note: this qualification is not open for general enrolments. Contact the Polytechnic to find out more about our customised training solutions for your workforce.

Course Objectives: A general qualification for the integrated management of logistics. Successful completion will require the self-directed application of knowledge and skills, with substantial depth in some areas where judgement is required in planning and selecting appropriate equipment, services and techniques for self and others. Applications involve participation in the development of strategic initiatives as well as personal responsibility and autonomy in performing complex technical operations and organising others. It may include participation in teams, including those concerned with planning and evaluation functions. Group or team coordination may be involved.

Careers: Job roles and titles vary across different logistic sectors. Possible job titles relevant to this qualification include:

- Logistics Manager;
- Transport Manager;
- Warehouse Manager;
- Administration Supervisor;
- Inventory Supervisor, and;
- Distribution Manager.

Course Duration: 1 year

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

Selection Processes: OtherN/A

COURSE STRUCTURE

To be awarded TL150415 Diploma of Logistics, a student must successfully complete a total of fifteen (15) units of competency, comprising of:

- two (2) core units, and;

- thirteen (13) elective units, of which:
- seven (7) units must be selected from the technical elective unit list in the TL150415 Diploma of Logistics qualification;
- a minimum of three (3) units must be selected from the general elective unit list or remaining technical elective unit list in the TL150415 Diploma of Logistics qualification;
- three (3) units may be selected from any relevant nationally endorsed training package or accredited course.

The units must contribute to the vocational outcomes of the qualification as well as be approved by the Polytechnic.

CORE UNITS

TLIF0002	Administer chain of responsibility policies and procedures	30
TLIL5020	Develop and maintain operational procedures for transport and logistics enterprises	30

ELECTIVE UNITS

Technical

BSBWHS501	Ensure a safe workplace	60
TLIA5058	Manage facility and inventory requirements	140
TLIF4064	Manage fatigue management policy and procedures	70
TLII5018	Manage customer service	40
TLIL5019	Implement and monitor transport logistics	40
TLIL5055	Manage a supply chain	60
TLIL5057	Maintain, monitor and improve transport operations systems	60
TLIP5008	Manage a transport and logistics business unit	60
TLIR5006	Develop, implement and review purchasing strategies	60
TLIR5014	Manage suppliers	60
TLIX4028	Apply knowledge of logistics	20

General

BSBCOM501	Identify and interpret compliance requirements	20
BSBMGT516	Facilitate continuous improvement	60
BSBRK501	Manage risk	60
BSBWOR502	Lead and manage team effectiveness	60
BSBWRK510	Manage employee relations	80

TLIR5005	Manage a contract	40
Imported		
BSBINM501	Manage an information or knowledge management system	50
PSPGEN046	Undertake research and analysis	60

Recognition of Prior Learning and/or Credit Transfer

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the training package and be assessed as appropriate by the Polytechnic.

Certificate III in Electrotechnology Electrician

Course Code:UEE30811

Campus:Sunshine, Victoria University is authorised by Trades Recognition Australian (TRA) to conduct skills assessment services for persons seeking temporary or permanent migration. For more information on these programs and countries that VU conducts these assessments please refer to: <http://vu.edu.au/skilled-migration..>

About this course:Gain the skills and knowledge to become a licensed electrician with a Certificate III in Electrotechnology Electrician at Victoria Polytechnic. Combine on-the-job training with your employer with this practical and theoretical course. You will learn to complete all phases of electrical systems and equipment including:

- installation;
- testing;
- fault finding;
- repair, and;
- maintenance.

Completing this course satisfies the Electrical Regulatory Authority Council's requirements to sit the licensing exam to become a licensed electrician. This course is offered as an apprenticeship over 4 years. To study this course as an apprentice, you must be employed as an apprentice electrician.

Course Objectives:This qualification provides competencies to select, install, set up, test, fault find, repair and maintain electrical systems and equipment in building and premises. It includes ERAC requirements for an 'Electrician's licence'.

Careers:Possible career opportunities emerging from the completion of UEE30811 Certificate III in Electrotechnology Electrician include:

- licensed A-grade electrician.

Course Duration: 4 years

Admission Requirements:Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

Selection Processes:, OtherNot Applicable.

COURSE STRUCTURE

To be awarded UEE30811 Certificate III in Electrotechnology Electrician course, a student must successfully complete the following units of competency, comprising of:

- all core units, and;
- a combination of electives achieving a total weighing of 140 points of which:

units may be selected, which does not exceed a maximum value of sixty (60) points, from Group A, and; units must be selected, with a minimum value of eighty (80) and do not exceed a maximum value of one hundred and forty (140) points, from Group B. Electives must be industry relevant as well as be approved by the Polytechnic. Note: Units from Group A, include imported units from other training packages and/or state accredited courses which are first packaged at AQF Level 3.

If units have not been assigned a weighting by the relevant EE-Oz Industry Technical Advisory Committee, their weighting will be ten (10) points.

CORE UNITS

UEENEEO20B	Participate in electrical work and competency development activities	20
UEENEEE101A	Apply Occupational Health and Safety regulations, codes and practices in the workplace	20
UEENEEE102A	Fabricate, assemble and dismantle utilities industry components	40
UEENEEE104A	Solve problems in d.c. circuits	80
UEENEEE105A	Fix and secure electrotechnology equipment	20
UEENEEE107A	Use drawings, diagrams, schedules, standards, codes and specifications	40
UEENEEE137A	Document and apply measures to control OHS risks associated with electrotechnology work	20
UEENEEG006A	Solve problems in single and three phase low voltage machines	80
UEENEEG033A	Solve problems in single and three phase low voltage electrical apparatus and circuits	60
UEENEEG063A	Arrange circuits, control and protection for general electrical installations	40
UEENEEG101A	Solve problems in electromagnetic devices and related circuits	60
UEENEEG102A	Solve problems in low voltage a.c. circuits	80
UEENEEG103A	Install low voltage wiring and accessories	20
UEENEEG104A	Install appliances, switchgear and associated accessories for low voltage electrical installations	20
UEENEEG105A	Verify compliance and functionality of low voltage general electrical installations	60

UEENEEG106A	Terminate cables, cords and accessories for low voltage circuits	40
UEENEEG107A	Select wiring systems and cables for low voltage general electrical installations	80
UEENEEG108A	Troubleshoot and repair faults in low voltage electrical apparatus and circuits	80
UEENEEG109A	Develop and connect electrical control circuits	80
UEENEEK142A	Apply environmental and sustainable procedures in the energy sector	20
ELECTIVE UNITS		
Group A		
UEENEEG101A	Use computer applications relevant to a workplace	20
Group B		
UEENEEF102A	Install and maintain cabling for multiple access to telecommunication services	120

Recognition of Prior Learning and/or Credit Transfers

Previous completion of units at the Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the qualification and be assessed as appropriate by the Polytechnic.

Certificate IV in Industrial Automation and Control

Course Code: UEE43211

Campus: Industry, Sunshine.

About this course: Develop skills in setting up and maintaining automated equipment and systems with a Certificate IV in Industrial Automation and Control. You will develop the skills required to assemble, set up, fault and maintain automated equipment associated with circuits and systems. Industrial automation and process control is a key trade area allowing many processes to run with minimal supervision. You will learn technical skills including:

- assembly and set up of electrical and pneumatic control systems;
- programming of logic controllers and SCADA systems;
- automation and process control problem solving and fault finding, and;
- industrial machinery repair and maintenance.

As part of your studies you will also learn the skills to supervise plant maintenance programs and provide technical advice to process staff.

Course Objectives: This qualification provides competencies to assemble, set up and program, fault find, repair and maintain automated equipment, apparatus, associated circuits and systems. It includes the supervision of plant maintenance programs and providing technical advice to process staff.

Careers: Possible career opportunities emerging from completing UEE43211 Certificate IV in Industrial Automation and Control include:

- Electrical Supervisor;
- Electrical Technician;
- Estimator;
- Electrical Designer;
- Project Manager;
- Electrical Drafter, and;
- Electrical Technical Sales and Support Representative.

Course Duration: 1 year

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

Selection Processes: OtherN/A

COURSE STRUCTURE

To be awarded UEE43211 Certificate IV in Industrial Automation and Control, a student must successfully complete the following units of competency, comprising of:

- all core units, and;
- a combination of elective units achieving a total weighting of 760 points, of which:
 - units may be selected, which does not exceed a maximum value of two hundred and twenty (220) points, from Group A;
 - units may be selected, which does not exceed a maximum value of five hundred and forty (540) points, from Group B, and;
 - units must be selected, with a minimum value of two hundred and twenty (220) and does not exceed a maximum value of seven hundred and sixty (760) points, from Group C.

Electives must be industry relevant as well as be approved by the Polytechnic. Note: Units from Group A, include imported units from other training packages and/or state accredited courses which are first packaged at AQF Level 4. If units have not been assigned a weighting by the relevant EE-Oz Industry Technical Advisory Committee, their weighting will be ten (10) points.

CORE UNITS

UEENEEG104A	Use engineering applications software on personal computers	40
UEENEEE038B	Participate in development and follow a personal competency development plan	20
UEENEEE101A	Apply Occupational Health and Safety regulations, codes and practices in the workplace	20
UEENEEE102A	Fabricate, assemble and dismantle utilities industry components	40
UEENEEE104A	Solve problems in d.c. circuits	80
UEENEEE107A	Use drawings, diagrams, schedules, standards, codes and specifications	40

UEENEEE117A	Implement and monitor energy sector OHS policies and procedures	20	UEENEEP024A	Attach cords and plugs to electrical equipment for connection to a single phase 230 volt supply	20
UEENEEE119A	Solve problems in multiple path extra low voltage (ELV) a.c. circuits	40	UEENEEP025A	Attach cords, cables and plugs to electrical equipment for connection to 1000 Va.c. or 1500 Vd.c. supply	20
UEENEEE124A	Compile and produce an energy sector detailed report	60	UEENEEP026A	Conduct in-service safety testing of electrical cord connected equipment and cord assemblies	20
UEENEEE137A	Document and apply measures to control OHS risks associated with electrotechnology work	20	Group C		
UEENEEI138A	Provide solutions to extra low voltage (ELV) electro-pneumatic control systems and drives	60	UEENEEI117A	Install and configure network systems for internetworking	120
UEENEEK145A	Implement and monitor energy sector environmental and sustainable energy policies and procedures	20	UEENEEI151A	Develop, enter and verify word and analogue control programs for programmable logic controllers	60
UEPOPS202B	Apply quality systems to work	20	UEENEEI152A	Develop, enter and verify programs in Supervisory Control and Data Acquisition systems	60
UEPOPS337B	Maintain quality systems within the team	20	UEENEEI155A	Develop structured programs to control external devices	40
UEPOPS416B	Monitor the implementation of the enterprise's production-maintenance quality control procedures	40			
ELECTIVE UNITS					
Group A					
BSBINN301A	Promote innovation in a team environment	40	Recognition of Prior Learning and/or Credit Transfers		
UEENEEO01B	Maintain documentation	20	Previous completion of units at Victoria University Polytechnic or any other Registered Training Organisation and/or previous attainment of skills and knowledge may be credited towards this course. Units must satisfy the completion rules of the training package and be assessed as appropriate by Victoria University Polytechnic.		
UEENEEO02B	Source and purchase material/parts for installation or service jobs	20	Advanced Diploma of Engineering Technology - Electrical		
UEENEEO03B	Provide quotations for installation or service jobs	20	Course Code: UEE62111		
UEENEEO10B	Deliver a service to customers	20	Campus: Industry, Sunshine.		
UEENEEI101A	Use computer applications relevant to a workplace	20	About this course: Gain the equipment and systems skills for a career in electrical engineering with an Advanced Diploma of Engineering Technology – Electrical at the Polytechnic. Electrical engineers improve the production and distribution of energy, which is increasingly critical with our dependence on electrical and electronic devices. You will learn the technical skills to design, validate and evaluate electrical equipment and systems including:		
UEENEEE020B	Provide basic instruction in the use of electrotechnology apparatus	20	<ul style="list-style-type: none"> • motor control; • Programmable Logic Controller (PLC) programming; • electronic design; • sustainable practices; • Supervisory Control and Data Acquisition (SCADA), and; • low voltage installations. 		
Group B					
UEENEEI102A	Assemble, set-up and test computing devices	80	You will also learn to provide technical or sales advice. Successful completion of this course means you will be qualified to work in the electrical industry.		
UEENEEI146A	Set up and configure basic local area network (LAN)	40	Course Objectives: This qualification provides enabling competencies to design and validate/evaluate electrical equipment and systems and provide technical advice/sales.		
UEENEEG101A	Solve problems in electromagnetic devices and related circuits	60	Careers:- Electronics Technician; - Electrical Technician; - Electrical Engineer, and; - Technical Officer (Electrical).		
UEENEEG102A	Solve problems in low voltage a.c. circuits	80			
UEENEEG106A	Terminate cables, cords and accessories for low voltage circuits	40			
UEENEEI150A	Develop, enter and verify discrete control programs for programmable controllers	60			

Course Duration: 2 years

Admission Requirements: Prior to enrolment, all applicants will be required to complete a literacy and numeracy assessment to assist with determining eligibility and to identify learning support needs.

Admission Requirements International: IELTS 5.5 or equivalent.

Selection Processes: Other/Not Applicable.

COURSE STRUCTURE

To be awarded UEE621 11 Advanced Diploma of Engineering Technology - Electrical, a student must successfully complete the following units of competency, comprising of:

- all core units, and;
- a combination of elective units achieving a total weighting of 720 points of which:

units may be selected, which does not exceed a maximum value of three hundred and sixty (360) points from Group A; units may be selected, which does not exceed a maximum value of one hundred and sixty (160) points, from Group B; units may be selected, which does not exceed a maximum value of two hundred and twenty (220) points, from Group C; units may be selected, which does not exceed a maximum value of two hundred and twenty (220) points, from Group D, and; units must be selected, with a minimum value of two hundred (200) and does not exceed a maximum value of seven hundred and twenty (720) points, from Group E.

Electives must be industry relevant as well as be approved by the Polytechnic. Note: Units from Group A, include imported units from other training packages and/or state accredited courses which are first packaged at AQF Level 6. If units have not been assigned a weighting by the relevant EE-Oz Industry Technical Advisory Committee, their weighting will be ten (10) points.

CORE UNITS

UEENEED104A	Use engineering applications software on personal computers	40
UEENEEE011C	Manage risk in electrotechnology activities	60
UEENEEE015B	Develop design briefs for electrotechnology projects	40
UEENEEE071B	Write specifications for electrical engineering projects	40
UEENEEE080A	Apply industry and community standards to engineering activities	20
UEENEEE081A	Apply material science to solving electrotechnology engineering problems	60
UEENEEE082A	Apply physics to solving electrotechnology engineering problems	60
UEENEEE083A	Establish and follow a competency development plan in an electrotechnology engineering discipline	20
UEENEEE101A	Apply Occupational Health and Safety regulations,	20

codes and practices in the workplace

UEENEEE102A	Fabricate, assemble and dismantle utilities industry components	40
UEENEEE104A	Solve problems in d.c. circuits	80
UEENEEE107A	Use drawings, diagrams, schedules, standards, codes and specifications	40
UEENEEE117A	Implement and monitor energy sector OHS policies and procedures	20
UEENEEE124A	Compile and produce an energy sector detailed report	60
UEENEEE125A	Provide engineering solutions for problems in complex multiple path circuits	60
UEENEEE126A	Provide solutions to basic engineering computational problems	60
UEENEEE137A	Document and apply measures to control OHS risks associated with electrotechnology work	20
UEENEEG006A	Solve problems in single and three phase low voltage machines	80
UEENEEG033A	Solve problems in single and three phase low voltage electrical apparatus and circuits	60
UEENEEG063A	Arrange circuits, control and protection for general electrical installations	40
UEENEEG101A	Solve problems in electromagnetic devices and related circuits	60
UEENEEG102A	Solve problems in low voltage a.c. circuits	80
UEENEEG106A	Terminate cables, cords and accessories for low voltage circuits	40
UEENEEG107A	Select wiring systems and cables for low voltage general electrical installations	80
UEENEEG149A	Provide engineering solutions to problems in complex polyphase power circuits	60
UEENEEG169A	Manage large electrical projects	40
UEENEEG170A	Plan large electrical projects	60
UEENEEK132A	Develop energy sector strategies to address environmental and sustainability issues	20

ELECTIVE UNITS

Group A		
UEENEEO01B	Maintain documentation	20

UEENEEO02B	Source and purchase material/parts for installation or service jobs	20	UEENEI141A	Develop electrical integrated systems	20
UEENEEO03B	Provide quotations for installation or service jobs	20	UEENEI150A	Develop, enter and verify discrete control programs for programmable controllers	60
UEENEEO10B	Deliver a service to customers	20	UEENEK125A	Solve basic problems in photovoltaic energy apparatus and systems	40
UEENEED101A	Use computer applications relevant to a workplace	20	Group C		
UEENEE020B	Provide basic instruction in the use of electrotechnology apparatus	20	UEENEEO05B	Estimate electrotechnology projects	40
Group B			UEENE125A	Plan electrical installations with a low voltage demand up to 400 A per phase	40
UEENEE105A	Fix and secure electrotechnology equipment	20	UEENE128A	Plan low voltage switchboard and control panel layouts	40
UEENEE121A	Plan an integrated cabling installation system	40	UEENE179A	Develop detailed electrical drawings	60
UEENEE190A	Prepare engineering drawings using manual drafting and CAD for electrotechnology/utilities applications	60	UEENE184A	Provide photometric data for illumination system design	80
UEENEE191A	Prepare electrotechnology/utilities drawings using manual drafting and CAD equipment and software	60	UEENE185A	Select effective and efficient light sources and luminaries for given locations and designs	60
UEENE102A	Install and maintain cabling for multiple access to telecommunication services	120	UEENE186A	Design effective and efficient lighting for residential and commercial buildings	60
UEENE104A	Install and modify performance data communication copper cabling	40	UEENE188A	Prepare quotations for the supply of effective and efficient lighting products for lighting projects	40
UEENE111A	Carry out basic repairs to electrical components and equipment	40	UEENEI142A	Develop an electrical integrated system interface for access through a touch screen	20
UEENE120A	Select and arrange equipment for special LV electrical installations	60	UEENEI143A	Develop access control of electrical integrated systems using logic-based programming tools	20
UEENE182A	Supply effective and efficient lighting products for domestic and small commercial applications	20	UEENEI144A	Develop interfaces for multiple access methods to monitor, schedule and control an electrical integrated system	20
UEENE183A	Provide advice on the application of energy efficient lighting for ambient and aesthetic effect	20	UEENEI151A	Develop, enter and verify word and analogue control programs for programmable logic controllers	60
UEENEH102A	Repairs basic electronic apparatus faults by replacement of components	40	UEENEI152A	Develop, enter and verify programs in Supervisory Control and Data Acquisition systems	60
UEENEH111A	Troubleshoot single phase input d.c. power supplies	40	UEENEI155A	Develop structured programs to control external devices	40
UEENEH150A	Assemble and set up basic security systems	80	UEENEK135A	Design grid connected photovoltaic power supply systems	60
UEENEI101A	Use instrumentation drawings, specification, standards and equipment manuals	40	Group D		
UEENEI116A	Assemble, enter and verify operating instructions in microprocessor equipped devices	20	UEENEEO06B	Prepare tender submissions for electrotechnology projects	60
UEENEI138A	Provide solutions to extra low voltage (ELV) electro-pneumatic control systems and drives	60	UEENEED147A	Develop energy sector directory services	80
UEENEI140A	Plan the electrical installation of integrated systems	20	UEENE127A	Design electrical installations with a low voltage	40

	demand greater than 400 a per phase			and control problems	
UEENEEG131A	Evaluate performance of low voltage electrical apparatus	40	UEENEEG160A	Evaluate performance of LV electrical machines	40
UEENEEG180A	Develop detailed and complex drawings for electrical systems using CAD systems	80	UEENEEG161A	Design and develop modifications to LV electrical machines	60
UEENEEG187A	Design effective and efficient lighting for public, open and sports areas	60	UEENEEH147A	Assess electronic apparatus compliance	60
UEENEEI145A	Diagnose and rectify faults in a.c. motor drive systems	60	UEENEEH188A	Design and develop electronics- computer systems projects	40
UEENEEI146A	Diagnose and rectify faults in d.c. motor drive systems	60	UEENEEI123A	Design electronic control systems	60
UEENEEI147A	Diagnose and rectify faults in servo drive systems	60	UEENEEI129A	Set up electronically controlled mechanically operated complex systems	80
UEENEEI156A	Develop and test code for microcontroller devices	60	UEENEEI153A	Design and configure Human-Machine Interface (HMI) networks	60
UEENEEI157A	Configure and maintain industrial control system networks	60	UEENEEI154A	Design and use advanced programming tools PC networks and HMI interfacing	120
Group E					
UEENEED149A	Develop energy sector computer network applications infrastructure	80	UEENEK133A	Design hybrid renewable power systems	80
UEENEEE078B	Contribute to risk management in electrotechnology systems	20	UEENEK139A	Design stand-alone renewable energy (RE) systems	40
UEENEEE127A	Use advanced computational processes to provide solutions to energy sector engineering problems	120	UEENEK140A	Develop engineering solutions to renewable energy (RE) problems	60
UEENEEE128A	Develop engineering solutions to photonic system problems	80	UEENEK146A	Design energy management controls for electrical installations in buildings	80
UEENEEE160A	Provide engineering solutions for uses of materials and thermodynamic effects	100	UEENEK151A	Develop effective engineering strategies for energy reduction in buildings	120
UEENEEE161A	Analyse static and dynamic parameters of electrical equipment	80	UEENEEM052A	Classify hazardous areas - gas atmospheres	40
UEENEEE162A	Select drive components for electrical equipment design	80	UEENEEM053A	Classify hazardous areas - dust atmospheres	40
UEENEEE163A	Analyse materials for suitability in electrical equipment	80	UEENEEM057A	Design explosion-protected electrical systems and installations - gas atmospheres	20
UEENEEE164A	Design electrical machine drives and production layout plans	80	UEENEEM058A	Design explosion-protected electrical systems and installations - dust atmospheres	20
UEENEEG130A	Design switchboards rated for high fault levels (greater than 400 A)	60	UEENEEM059A	Design explosion-protected electrical systems and installations - pressurisation	20
UEENEEG143A	Develop engineering solution for synchronous machine and control problems	60	UEENEEM068A	Assess the fitness-for-purpose of hazardous areas explosion-protected equipment - gas atmospheres	60
UEENEEG144A	Develop engineering solutions for D.C. machine and control problems	60	UEENEEM075A	Design explosion-protected electrical systems - coal mining	20
UEENEEG145A	Develop engineering solutions for induction machine	60	UEENEEM079A	Design of gas detection systems	20
			Recognition of Prior Learning and/or Credit Transfers		
			Previous completion of units at the Polytechnic or any other Registered Training		

Organisation, may be credited towards this course. Units must satisfy the completion rules of the training package and be assessed as appropriate by the Polytechnic.

UNITS

3113EN101 Foundation English 1

Locations: Footscray Nicholson.

Prerequisites: Nil.

Description: The Foundation English is for students who need additional time and assistance to strengthen and refine their literacy skills to support their study in VCE English/ESL. The course is also for students who may require a more vocationally orientated approach to English or may be aiming to directly enter the workforce upon completing their postcompulsory secondary studies. Unit deals with Essentials of English, Communication and the workplace and Technology and communication. This unit is delivered in Year 11.

Required Reading: Lecturer will provide teaching and learning materials as required in the form of VU produced workbooks.

Assessment: Demonstration of 'Satisfactory completion' by a selection of Assessment tasks and Level of Performance by SAC (Tests) and Exams .

3113EN102 Foundation English 2

Locations: Footscray Nicholson.

Prerequisites: Nil.

Description: The Foundation English is for students who need additional time and assistance to strengthen and refine their literacy skills to support their study in VCE English/ESL. The unit is also for students who may require a more vocationally orientated approach to English or may be aiming to directly enter the workforce upon completing their post-compulsory secondary studies. The unit deals with the study of texts, the analysis and construction of argument, information literacy. This unit is delivered in Year 11.

Required Reading: Lecturer will provide teaching and learning materials as required in the form of VU produced workbooks.

Assessment: Demonstration of 'Satisfactory completion' by a selection of Assessment tasks and Level of Performance by SAC (Tests) and Exams .

AC011 Accounting 1

Locations: Footscray Nicholson.

Prerequisites: Nil.

Description: This unit explores the establishment of a business and the role of accounting in the determination of business success or failure. In this, it considers the importance of accounting information to stakeholders. Students analyse, interpret and evaluate the performance of the business using financial and non-financial information. They use these evaluations to make recommendations regarding the suitability of a business as an investment. This unit is delivered in Year 11.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge in accordance with each unit's learning outcomes, including the setting of practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following knowledge: Outcome 1 On completion of this unit the student should be able to describe the resources required to establish and operate a business, and select and use accounting reports and other information to discuss the success or otherwise of the business. Outcome 2 On completion of this unit the student should be able to identify and record financial data, report and explain accounting information for a service business, and suggest and apply appropriate financial and

non-financial indicators to measure business performance. Assessment will follow the requirements set out in the VCE Accounting Study Guide: The award of satisfactory completion for a unit is based on whether the student has demonstrated the set of outcomes specified for the unit. A variety of learning activities and assessment tasks will provide a range of opportunities for students to demonstrate the key knowledge and key skills in the outcomes. Assessment will be a part of the regular teaching and learning program and will be completed mainly in class and within a limited time-frame. All assessments at Units 1 and 2 are school-based. For this unit students are required to demonstrate achievement of two outcomes. As a set these outcomes encompass all areas of study in the unit.

AC022 Accounting 2

Locations: Footscray Nicholson.

Prerequisites: Nil.

Description: In this unit students develop their knowledge of the accounting process for sole proprietors operating a trading business, with a focus on inventory, accounts receivable, accounts payable and non-current assets. Students use manual processes and ICT, including spreadsheets, to prepare historical and budgeted accounting reports. Students analyse and evaluate the performance of the business relating to inventory, accounts receivable, accounts payable and non-current assets. They use relevant financial and other information to predict, budget and compare the potential effects of alternative strategies on the performance of the business. Using these evaluations, students develop and suggest to the owner strategies to improve business performance. This unit is delivered in Year 11.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge in accordance with each unit's learning outcomes, including the setting of practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following knowledge: Outcome 1 On completion of this unit the student should be able to record and report for inventory and discuss the effect of relevant financial and non-financial factors, and ethical considerations, on the outcome of business decisions. Outcome 2 On completion of this unit the student should be able to record and report for accounts receivable and accounts payable, and analyse and discuss the effect of relevant decisions on the performance of the business including the influence of ethical considerations. Outcome 3 On completion of this unit the student should be able to record and report for non-current assets and depreciation. Assessment will follow the requirements set out in the VCE Accounting Study Guide: The award of satisfactory completion for a unit is based on whether the student has demonstrated the set of outcomes specified for the unit. A variety of learning activities and assessment tasks will provide a range of opportunities for students to demonstrate the key knowledge and key skills in the outcomes. Assessment will be a part of the regular teaching and learning program and will be completed mainly in class and within a limited time-frame. All assessments at Units 1 and 2 are school-based. For this unit students are required to demonstrate achievement of three outcomes. As a set these outcomes encompass all areas of study in the unit.

AC033 Accounting 3

Locations: Footscray Nicholson.

Prerequisites: Nil.

Description: This unit focuses on financial accounting for a trading business owned by a sole proprietor, and highlights the role of accounting as an information system.

Students use the double entry system of recording financial data and prepare reports using the accrual basis of accounting and the perpetual method of inventory recording. Students develop their understanding of the accounting processes for recording and reporting and consider the effect of decisions made on the performance of the business. They interpret reports and information presented in a variety of formats and suggest strategies to the owner to improve the performance of the business. This unit is delivered in Year 12.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge in accordance with each unit's learning outcomes, including the setting of practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following knowledge: Outcome 1 On completion of this unit the student should be able to record financial data using a double entry system; explain the role of the General Journal, General Ledger and inventory cards in the recording process; and describe, discuss and analyse various aspects of the accounting system, including ethical considerations. Outcome 2 On completion of this unit the student should be able to record transactions and prepare, interpret and analyse accounting reports for a trading business. Assessment will follow the requirements set out in the VCE Accounting Study Guide: SCHOOL-BASED ASSESSMENT 1. Satisfactory completion The award of satisfactory completion for a unit is based on whether the student has demonstrated the set of outcomes specified for the unit. A variety of assessment tasks will provide a range of opportunities for students to demonstrate the key knowledge and key skills in the outcomes. 2. Assessment of levels of achievement The student's level of achievement in Unit 3 will be determined by School-assessed Coursework (SAC). SAC will be completed mainly in class and within a limited time-frame. SAC for Unit 3 will contribute 25 per cent to the study score. SAC for Unit 4 will contribute 25 per cent to the study score (AC034 Accounting 4). EXTERNAL ASSESSMENT The level of achievement for Units 3 and 4 is also assessed by an end-of-year examination, which will contribute 50 per cent to the study score.

AC034 Accounting 4

Locations:Footscray Nicholson.

Prerequisites:AC033 - Accounting 3

Description:In this unit students further develop their understanding of accounting for a trading business owned by a sole proprietor and the role of accounting as an information system. Students use the double entry system of recording financial data, and prepare reports using the accrual basis of accounting and the perpetual method of inventory recording. Both manual methods and ICT are used to record and report. Students extend their understanding of the recording and reporting process with the inclusion of balance day adjustments and alternative depreciation methods. They investigate both the role and importance of budgeting in decision-making for a business. They analyse and interpret accounting reports and graphical representations to evaluate the performance of a business. From this evaluation, students suggest strategies to business owners to improve business performance. This unit is delivered in Year 12.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge in accordance with each unit's learning outcomes, including the setting of practical application tasks designed to provide evidence of competence outcomes, within

periodic and scheduled timelines. Students will be expected to demonstrate the following knowledge: Outcome 1 On completion of this unit the student should be able to record financial data and balance day adjustments using a double entry system, report accounting information using an accrual-based system and evaluate the effect of balance day adjustments and alternative methods of depreciation on accounting reports. Outcome 2 On completion of this unit the student should be able to prepare budgeted accounting reports and variance reports for a trading business using financial and other relevant information, and model, analyse and discuss the effect of alternative strategies on the performance of a business. Assessment will follow the requirements set out in the VCE Accounting Study Guide: SCHOOL-BASED ASSESSMENT 1. Satisfactory completion The award of satisfactory completion for a unit is based on whether the student has demonstrated the set of outcomes specified for the unit. A variety of assessment tasks will provide a range of opportunities for students to demonstrate the key knowledge and key skills in the outcomes. 2. Assessment of levels of achievement The student's level of achievement in Unit 4 will be determined by School-assessed Coursework (SAC). SAC will be completed mainly in class and within a limited time-frame. SAC for Unit 3 will contribute 25 per cent to the study score (AC033 Accounting 3). SAC for Unit 4 will contribute 25 per cent to the study score. EXTERNAL ASSESSMENT The level of achievement for Units 3 and 4 is also assessed by an end-of-year examination, which will contribute 50 per cent to the study score.

AHCLSC202 Construct low-profile timber or modular retaining walls

Locations:Werribee, Sunshine.

Prerequisites:Nil.

Description:This unit of competency describes the skills and knowledge required to construct low-profile timber or modular retaining walls in landscape settings. This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - read and interpret site and construction plans; - identify work health and safety hazards; - calculate materials required and mark out the area to be retained; - mark out the site and assemble materials; - construct footings and place reinforcing; - construct retaining walls as specified, and; - clear up the site and dispose of waste. Students will also be expected to demonstrate the following knowledge: - the principles and practices of low profile retaining walls; - construction approaches and methods; - construction materials for retaining walls; - safe lifting practices for large and heavy components; - methods of disposing soil and waste materials in order to minimise damage to the environment; - the environmental effects of altering water flow when installing retaining walls with or without drainage media, and; - the environmental impact of soil disturbance when excavating an area to be retained.

AUMATA5008 Produce drawings manually

Locations:Industry, Sunshine.

Prerequisites:Nil.

Description:This unit describes the application of the required skills and knowledge to

produce drawings, using manual drafting techniques, required in the design, development and production of bus/truck/trailers.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - speak clearly and directly in order to review drawings with appropriate personnel; - apply teamwork to a range of situations, including the preparation of drawings; - solve problems particularly in teams in order to meet performance indicators; - show initiative in adapting to changing work conditions or contexts particularly when working across a variety of work areas; - access, interpret and apply information on relevant organisation policies, procedures and instructions, particularly to ensure drawings are documented and stored in accordance with organisation procedures and project requirements; - manage time when planning, preparing and organising work priorities, and; - take responsibility for organising own work priorities. Students will also be expected to demonstrate the following knowledge: - relevant Occupational Health and Safety and Environmental regulations and organisation policies and procedures needed to carry out work in a manner which ensures the safety of people, equipment and the environment; - organisation technical work documentation covering procedures, specifications, schedules and work plans; - organisation cost minimisation/waste avoidance policies, procedures and practices; - environmental protection requirements relating to the disposal of waste material; - established communication channels and protocols; - problem identification and resolution techniques; - processes to clarify manual drafting requirements; - processes to select tools, equipment and media; - processes to make required measurements; - processes to check drawings; - processes to document drawings, and; - processes to store drawings.

AURVTP009 Apply vehicle body film wrapping

Locations:Sunshine.

Prerequisites:Nil.

Description:This unit describes the performance outcomes required to prepare vehicle body surfaces and apply vinyl film wrapping materials. It involves preparing for the task, selecting and using specialist tools, selecting vinyl film materials, checking vinyl film quality, and completing workplace processes and documentation. It applies to those working in the automotive paint refinishing repair industry. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - apply vinyl film wrapping on three different vehicles. Students will also be expected to demonstrate the following knowledge: - work health and safety (WHS) and occupational health and safety (OHS) requirements relating to applying vehicle body film wrapping, including procedures for, selecting and using personal protective equipment (PPE), using

specialist tools; - environmental requirements, including procedures for trapping, storing and disposing of waste material; - types and uses of vinyl film wrapping materials and tools; - vinyl film supplier recommended methods and techniques for applying vinyl film wrapping, including, surface preparation, surface measurements and pattern development, quality requirements relating to vinyl film wrapping; - procedures for protecting vehicle and components when applying film wrapping, and; - procedures for final inspection of vehicle vinyl film wrapping.

AURVTP2009 Apply vehicle body film wrapping

Locations:Sunshine.

Prerequisites:Nil.

Description:This unit describes the performance outcomes required to prepare various vehicle body surfaces and apply vinyl film wrapping materials.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to follow work instructions; - initiative and enterprise skills to recognise a workplace problem or potential problem and take action; - learning skills to identify sources of information, assistance and expert knowledge to expand skills, knowledge and understanding; - literacy skills to read and follow information in written job instructions, specifications, standard operating procedures, charts, lists, drawings and other reference documents; - numeracy skills to measure and calculate film-wrapping materials; - planning and organising skills to: plan own work requirements and prioritise actions to achieve required outcomes and ensure tasks are completed on time; plan film-wrapping application following job specification, and; identify risk factors and take action to minimise them; - problem-solving skills to refer problems outside area of responsibility to appropriate person and suggest possible causes; - self-management skills to: select and use appropriate film-wrapping products, materials, processes and procedures; recognise own limitations and seek advice, and; follow workplace policies and documentation, such as codes of practice; - technical skills to use film-wrapping specialist tools and equipment, and; - technology skills to use tools and equipment to collect and provide information on film-wrapping processes. Students will also be expected to demonstrate the following knowledge: - industry codes of practice relating to vehicle body film wrapping; - WHS, environmental and emergency requirements and procedures; - automotive film wrapping application techniques; - workplace policies and procedures and quality requirements relating to film wrapping, and; - procedures for the correct use of film wrapping tools and equipment.

BI011 Biology 1

Locations:Footscray Nicholson.

Prerequisites:Nil.

Description:In this unit, students are introduced to some of the challenges to an organism in sustaining life. Students examine the cell as the structural and functional unit of life, from the single celled to the multicellular organism, and the requirements for sustaining cellular processes in terms of inputs and outputs. They analyse types of adaptations that enhance the organism's survival in a particular environment and consider the role homeostatic mechanisms play in maintaining the internal environment. Students investigate how a diverse group of organisms form a

living interconnected community that is adapted to, and utilises, the abiotic resources of its habitat. The role of a keystone species in maintaining the structure of an ecosystem is explored. Students consider how the planet's biodiversity is classified and the factors that affect the growth of a population. This unit is delivered in Year 11.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge in accordance with each unit's learning outcomes, including the setting of practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following knowledge: Outcome 1 On completion of this unit the student should be able to investigate and explain how cellular structures and systems function to sustain life. Outcome 2 On completion of this unit the student should be able explain how various adaptations enhance the survival of an individual organism, investigate the relationships between organisms that form a living community and their habitat, and analyse the impacts of factors that affect population growth. Outcome 3 On completion of this unit the student should be able to design and undertake an investigation related to the survival of an organism or species, and draw conclusions based on evidence from collected data. Assessment will follow the requirements set out in the VCE Biology Study Guide: The award of satisfactory completion for a unit is based on whether the student has demonstrated the set of outcomes specified for the unit. A variety of learning activities and assessment tasks will provide a range of opportunities for students to demonstrate the key knowledge and key skills in the outcomes. Assessment will be a part of the regular teaching and learning program and will be completed mainly in class and within a limited time-frame. All assessments at Units 1 and 2 are school-based. For this unit students are required to demonstrate achievement of three outcomes. As a set these outcomes encompass all areas of study in the unit. Practical work is a central component of learning and assessment. As a guide, between 3½ and 5 hours of class time should be devoted to student practical work and investigations for each of Areas of Study 1 and 2. For Area of Study 3, between 6 and 8 hours of class time should be devoted to undertaking the investigation and communicating findings.

BI011A Biology 1

Locations: Footscray Nicholson.

Prerequisites: Nil.

Description: In this unit students examine the cell as the structural and functional unit of the whole organism. Students investigate the needs of individual cells, how specialised structures carry out cellular activities and how the survival of cells depends on their ability to maintain a dynamic balance between their internal and external environments. This unit is delivered in year 11.

Required Reading: Lecturer will provide teaching and learning materials as required in the form of VU produced workbooks.

Assessment: Demonstration of 'Satisfactory completion' by a selection of Assessment tasks and Level of Performance by SAC (Tests) and Exams.

BI022 Biology 2

Locations: Footscray Nicholson.

Prerequisites: Nil.

Description: In this unit students focus on cell reproduction and the transmission of biological information from generation to generation. Students learn that all cells are derived from pre-existing cells through the cell cycle. They examine the process of

DNA replication and compare cell division in both prokaryotic and eukaryotic organisms. Students explore the mechanisms of asexual and sexual reproductive strategies, and consider the advantages and disadvantages of these two types of reproduction. The role of stem cells in the differentiation, growth, repair and replacement of cells in humans is examined, and their potential use in medical therapies is considered. Students use chromosome theory and terminology from classical genetics to explain the inheritance of characteristics, analyse patterns of inheritance, interpret pedigree charts and predict outcomes of genetic crosses. They explore the relationship between genes, the environment and the regulation of genes in giving rise to phenotypes. They consider the role of genetic knowledge in decision making about the inheritance of autosomal dominant, autosomal recessive and sex-linked genetic conditions. In this context the uses of genetic screening and its social and ethical issues are examined. This unit is delivered in Year 11.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge in accordance with each unit's learning outcomes, including the setting of practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following knowledge: Outcome 1 On completion of this unit the student should be able to compare the advantages and disadvantages of asexual and sexual reproduction, explain how changes within the cell cycle may have an impact on cellular or tissue system function and identify the role of stem cells in cell growth and cell differentiation and in medical therapies. Outcome 2 On completion of this unit the student should be able to apply an understanding of genetics to describe patterns of inheritance, analyse pedigree charts, predict outcomes of genetic crosses and identify the implications of the uses of genetic screening and decision making related to inheritance. Outcome 3 On completion of this unit the student should be able to investigate and communicate a substantiated response to a question related to an issue in genetics and/or reproductive science. Assessment will follow the requirements set out in the VCE Biology Study Guide: The award of satisfactory completion for a unit is based on whether the student has demonstrated the set of outcomes specified for the unit. A variety of learning activities and assessment tasks will provide a range of opportunities for students to demonstrate the key knowledge and key skills in the outcomes. Assessment will be a part of the regular teaching and learning program and will be completed mainly in class and within a limited time-frame. All assessments at Units 1 and 2 are school-based. For this unit students are required to demonstrate achievement of three outcomes. As a set these outcomes encompass all areas of study in the unit. Practical work is a central component of learning and assessment. As a guide, between 3½ and 5 hours of class time should be devoted to student practical work and investigations for each of Areas of Study 1 and 2. For Area of Study 3, between 6 and 8 hours of class time should be devoted to undertaking the investigation and communicating findings.

BI033 Biology 3

Locations: Footscray Nicholson.

Prerequisites: Nil.

Description: The cell is a dynamic system of interacting molecules that define life. An understanding of the workings of the cell enables an appreciation of both the capabilities and the limitations of living organisms whether animal, plant, fungus or microorganism. The convergence of cytology, genetics and biochemistry makes cell biology one of the most rapidly evolving disciplines in contemporary biology. In this unit students investigate the workings of the cell from several perspectives. They

explore the importance of the insolubility of the plasma membrane in water and its differential permeability to specific solutes in defining the cell, its internal spaces and the control of the movement of molecules and ions in and out of such spaces. Students consider base pairing specificity, the binding of enzymes and substrates, the response of receptors to signalling molecules and reactions between antigens and antibodies to highlight the importance of molecular interactions based on the complementary nature of specific molecules. Students study the synthesis, structure and function of nucleic acids and proteins as key molecules in cellular processes. They explore the chemistry of cells by examining the nature of biochemical pathways, their components and energy transformations. Cells communicate with each other using a variety of signalling molecules. Students consider the types of signals, the transduction of information within the cell and cellular responses. At this molecular level students study the human immune system and the interactions between its components to provide immunity to a specific antigen. This unit is delivered in Year 12.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge in accordance with each unit's learning outcomes, including the setting of practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following knowledge: Outcome 1 On completion of this unit the student should be able to explain the dynamic nature of the cell in terms of key cellular processes including regulation, photosynthesis and cellular respiration, and analyse factors that affect the rate of biochemical reactions. Outcome 2 On completion of this unit the student should be able to apply a stimulus-response model to explain how cells communicate with each other, outline immune responses to invading pathogens, distinguish between the different ways that immunity may be acquired, and explain how malfunctions of the immune system cause disease. Assessment will follow the requirements set out in the VCE Biology Study Guide: SCHOOL-BASED ASSESSMENT 1. Satisfactory completion The award of satisfactory completion for a unit is based on whether the student has demonstrated the set of outcomes specified for the unit. A variety of assessment tasks will provide a range of opportunities for students to demonstrate the key knowledge and key skills in the outcomes. 2. Assessment of levels of achievement The student's level of achievement in Unit 3 will be determined by School-assessed Coursework (SAC). SAC will be completed mainly in class and within a limited time-frame. SAC for Unit 3 will contribute 16 per cent to the study score. SAC for Unit 4 will contribute 24 per cent to the study score (BI034 Biology 4). Practical work is a central component of learning and assessment. As a guide, between 3½ and 5 hours of class time should be devoted to student practical work and investigations for each of Areas of Study 1 and 2. EXTERNAL ASSESSMENT The level of achievement for Units 3 and 4 is also assessed by an end-of-year examination, which will contribute 60 per cent to the study score.

BI033A Biology 3

Locations:Footscray Nicholson.

Prerequisites:Nil.

Description: In this unit students consider the molecules and biochemical processes that are indicators of life. They investigate the synthesis of biomolecules and biochemical processes that are common to autotrophic and heterotrophic life forms. Students consider the universality of DNA and investigate its structure; the genes of an organism, as functional units of DNA and code for the production of a diverse range of proteins in an organism. This unit is delivered in Year 12.

Required Reading:Lecturer will provide teaching and learning materials as required in the form of VU produced workbooks.

Assessment:Demonstration of 'Satisfactory completion' by a selection of Assessment tasks and Level of Performance by SAC (Tests) and Exams .

BI034 Biology 4

Locations:Footscray Nicholson.

Prerequisites:BI033 - Biology 3

Description: In this unit students consider the continual change and challenges to which life on Earth has been subjected. They investigate the relatedness between species and the impact of various change events on a population's gene pool. The accumulation of changes over time is considered as a mechanism for biological evolution by natural selection that leads to the rise of new species. Students examine change in life forms using evidence from palaeontology, biogeography, developmental biology and structural morphology. They explore how technological developments in the fields of comparative genomics, molecular homology and bioinformatics have resulted in evidence of change through measurements of relatedness between species. Students examine the structural and cognitive trends in the human fossil record and the interrelationships between human biological and cultural evolution. The biological consequences, and social and ethical implications, of manipulating the DNA molecule and applying biotechnologies is explored for both the individual and the species. This unit is delivered in Year 12.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge in accordance with each unit's learning outcomes, including the setting of practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following knowledge: Outcome 1 On completion of this unit the student should be able to analyse evidence for evolutionary change, explain how relatedness between species is determined, and elaborate on the consequences of biological change in human evolution. Outcome 2 On completion of this unit the student should be able to describe how tools and techniques can be used to manipulate DNA, explain how biological knowledge is applied to biotechnical applications, and analyse the interrelationship between scientific knowledge and its applications in society. Outcome 3 On the completion of this unit the student should be able to design and undertake a practical investigation related to cellular processes and/or biological change and continuity over time, and present methodologies, findings and conclusions in a scientific poster. Assessment will follow the requirements set out in the VCE Biology Study Guide: SCHOOL-BASED ASSESSMENT 1. Satisfactory completion The award of satisfactory completion for a unit is based on whether the student has demonstrated the set of outcomes specified for the unit. A variety of assessment tasks will provide a range of opportunities for students to demonstrate the key knowledge and key skills in the outcomes. 2. Assessment of levels of achievement The student's level of achievement in Unit 4 will be determined by School-assessed Coursework (SAC). SAC's will be completed mainly in class and within a limited time-frame. SAC for Unit 3 will contribute 16 per cent to the study score (BI033 Biology 3). SAC for Unit 4 will contribute 24 per cent to the study score. Practical work is a central component of learning and assessment. As a guide, between 3½ and 5 hours of class time should be devoted to student practical work and investigations for each of Areas of Study 1 and 2. In Area of Study 3, between 7 and 10 hours of class time should be devoted to the investigation to be undertaken in either Unit 3 or Unit 4, or across both Units 3 and 4, including the

writing of the sections of the scientific poster. **EXTERNAL ASSESSMENT** The level of achievement for Units 3 and 4 is also assessed by an end-of-year examination, which will contribute 60 per cent to the study score.

BI034A Biology 4

Locations: Footscray Nicholson.

Prerequisites: Nil.

Description: In this unit students examine evidence for evolution of life forms over time. Students explore hypotheses that explain how changes to species have come about. In addition to observable similarities and differences between organisms, students explore the universality of DNA, and conservation of genes as evidence for ancestral lines of life that have given rise to the present biodiversity of our planet. This unit is delivered in Year 12.

Required Reading: Lecturer will provide teaching and learning materials as required in the form of VU produced workbooks.

Assessment: Demonstration of 'Satisfactory completion' by a selection of Assessment tasks and Level of Performance by SAC (Tests) and Exams .

BM011 Business Management 1

Locations: Footscray Nicholson.

Prerequisites: Nil.

Description: Businesses of all sizes are major contributors to the economic and social wellbeing of a nation. Therefore how businesses are formed and the fostering of conditions under which new business ideas can emerge are vital for a nation's wellbeing. Taking a business idea and planning how to make it a reality are the cornerstones of economic and social development. In this unit students explore the factors affecting business ideas and the internal and external environments within which businesses operate, and the effect of these on planning a business. This unit is delivered in Year 11.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skills in accordance with each unit's learning outcomes, including the setting of practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following knowledge: Outcome 1 On completion of this unit the student should be able to describe how and why business ideas are created and developed, and explain the methods by which a culture of business innovation and entrepreneurship may be fostered in a nation. Outcome 2 On completion of this unit the student should be able to describe the external environment of a business and explain how the macro and operating factors within it may affect business planning. Outcome 3 On completion of this unit the student should be able to describe the internal business environment and analyse how factors from within it may affect business planning. Assessment will follow the requirements set out in the VCE Business Management Study Guide: The award of satisfactory completion for a unit is based on whether the student has demonstrated the set of outcomes specified for the unit. A variety of learning activities and assessment tasks will provide a range of opportunities for students to demonstrate the key knowledge and key skills in the outcomes. Assessment will be a part of the regular teaching and learning program and will be completed mainly in class and within a limited time-frame. All assessments at Units 1 and 2 are school-based. For this unit students are required to demonstrate achievement of three outcomes. As a set these outcomes encompass all areas of study in the unit.

BM012 Business Management 1

Locations: Footscray Nicholson.

Prerequisites: Nil.

Description: Small rather than large businesses make up the large majority of all businesses in the Australian economy. It is the small business sector that provides a wide variety of goods and services for both consumers and industries, such as manufacturing, construction and retail. This, combined with employment opportunities, makes the small business sector a vital component in the success, growth and stability of Australia. Small businesses are tangible to students as they are visible and accessible in daily life. This unit provides an opportunity for students to explore the operations of a small business and its likelihood of success. This unit is delivered in Year 11.

Required Reading: Lecturer will provide teaching and learning materials as required in the form of VU produced workbooks.

Assessment: Demonstration of 'Satisfactory completion' by a selection of Assessment tasks and Level of Performance by SAC (Tests) and Exams.

BM022 Business Management 2

Locations: Footscray Nicholson.

Prerequisites: Nil.

Description: This unit focuses on the establishment phase of a business's life. Establishing a business involves complying with legal requirements as well as making decisions about how best to establish a system of financial record keeping, staff the business and establish a customer base. In this unit students examine the legal requirements that must be satisfied to establish a business. They investigate the essential features of effective marketing and consider the best way to meet the needs of the business in terms of staffing and financial record keeping. Students analyse various management practices in this area by applying this knowledge to contemporary business case studies from the past four years. This unit is delivered in Year 11.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge in accordance with each unit's learning outcomes, including the setting of practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following knowledge: Outcome 1 On completion of this unit the student should be able to explain the importance when establishing a business of complying with legal requirements and financial record keeping, and establishing effective policies and procedures. Outcome 2 On completion of this unit the student should be able to explain the importance of establishing a customer base and a marketing presence to achieve the objectives of the business, analyse effective marketing and public relations strategies and apply these strategies to business-related case studies. Outcome 3 On completion of this unit the student should be able to discuss the staffing needs for a business and evaluate the benefits and limitations of management strategies in this area from both an employer and an employee perspective. Assessment will follow the requirements set out in the VCE Business Management Study Guide: The award of satisfactory completion for a unit is based on whether the student has demonstrated the set of outcomes specified for the unit. A variety of learning activities and assessment tasks will provide a range of opportunities for students to demonstrate the key knowledge and key skills in the outcomes. Assessment will be a part of the regular teaching and learning program and will be completed mainly in class and within a limited time-frame. All

assessments at Units 1 and 2 are school-based. For this unit students are required to demonstrate achievement of three outcomes. As a set these outcomes encompass all areas of study in the unit.

BM033 Business Management 3

Locations: Footscray Nicholson.

Prerequisites: Nil.

Description: In this unit students explore the key processes and issues concerned with managing a business efficiently and effectively to achieve the business objectives. Students examine the different types of businesses and their respective objectives. They consider corporate culture, management styles, management skills and the relationship between each of these. Students investigate strategies to manage both staff and business operations to meet objectives. Students develop an understanding of the complexity and challenge of managing businesses and through the use of contemporary business case studies from the past four years have the opportunity to compare theoretical perspectives with current practice. This unit is delivered in Year 12.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge in accordance with each unit's learning outcomes, including the setting of practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following knowledge: Outcome 1 On completion of this unit the student should be able to discuss the key characteristics of businesses and stakeholders, and analyse the relationship between corporate culture, management styles and management skills. Outcome 2 On completion of this unit the student should be able to explain theories of motivation and apply them to a range of contexts, and analyse and evaluate strategies related to the management of employees. Outcome 3 On completion of this unit the student should be able to analyse the relationship between business objectives and operations management, and propose and evaluate strategies to improve the efficiency and effectiveness of business operations. Assessment will follow the requirements set out in the VCE Business Management Study Guide: SCHOOL-BASED ASSESSMENT 1. Satisfactory completion The award of satisfactory completion for a unit is based on whether the student has demonstrated the set of outcomes specified for the unit. A variety of assessment tasks will provide a range of opportunities for students to demonstrate the key knowledge and key skills in the outcomes. 2. Assessment of levels of achievement The student's level of achievement in Unit 3 will be determined by School-assessed Coursework (SAC). SAC will be completed mainly in class and within a limited time-frame. SAC for Unit 3 will contribute 25 per cent to the study score. SAC for Unit 4 will contribute 25 per cent to the study score (BM034 Business Management 4) EXTERNAL ASSESSMENT The level of achievement for Units 3 and 4 is also assessed by an end-of-year examination, which will contribute 50 per cent to the study score.

BM034 Business Management 4

Locations: Footscray Nicholson.

Prerequisites: BM033 - Business Management 3

Description: Businesses are under constant pressure to adapt and change to meet their objectives. In this unit students consider the importance of reviewing key performance indicators to determine current performance and the strategic management necessary to position a business for the future. Students study a theoretical model to undertake change, and consider a variety of strategies to

manage change in the most efficient and effective way to improve business performance. They investigate the importance of leadership in change management. Using a contemporary business case study from the past four years, students evaluate business practice against theory. This unit is delivered in Year 12.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge in accordance with each unit's learning outcomes, including the setting of practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following knowledge: Outcome 1 On completion of this unit the student should be able to explain the way business change may come about, use key performance indicators to analyse the performance of a business, discuss the driving and restraining forces for change and evaluate management strategies to position a business for the future. Outcome 2 On completion of this unit the student should be able to evaluate the effectiveness of a variety of strategies used by managers to implement change and discuss the effect of change on the stakeholders of a business. Assessment will follow the requirements set out in the VCE Business Management Study Guide: SCHOOL-BASED ASSESSMENT 1. Satisfactory completion The award of satisfactory completion for a unit is based on whether the student has demonstrated the set of outcomes specified for the unit. A variety of assessment tasks will provide a range of opportunities for students to demonstrate the key knowledge and key skills in the outcomes. 2. Assessment of levels of achievement The student's level of achievement in Unit 4 will be determined by School-assessed Coursework (SAC). SAC will be completed mainly in class and within a limited time-frame. SAC for Unit 3 will contribute 25 per cent to the study score (BM033 Business Management 3). SAC for Unit 4 will contribute 25 per cent to the study score. EXTERNAL ASSESSMENT The level of achievement for Units 3 and 4 is also assessed by an end-of-year examination, which will contribute 50 per cent to the study score.

BSBADM302 Produce texts from notes

Locations: Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine, Online.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to take notes from oral or printed sources to produce accurate text. It applies to individuals employed in a range of work environments who produce notes and texts from oral and printed sources. They may work as individuals providing administrative support within an enterprise, or they may be responsible for the production of their own notes and other documentation.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - take accurate notes from oral and printed sources according to task requirements, and; - produce accurate texts from notes that meet workplace requirements and predetermined timelines. Students will also be expected to demonstrate the following knowledge: - describe methods and techniques for taking notes from oral sources and written sources; - describe

organisational requirements for production of documents, and; - describe the requirements of an organisational style guide.

BSBADM303B Produce texts from audio transcription

Locations: Footscray Nicholson, City Queen.

Prerequisites: Nil.

Description: This unit describes the performance outcomes, skills and knowledge required to transcribe from an audio source using keyboarding techniques and to produce accurate texts.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to clarify intended meaning, to predict words from context, and to interpret intonation and stress; - listening skills to identify different speakers from their voices, and; - literacy skills to: read and understand organisational procedures; produce a range of documents; proofread and edit work for accuracy against original. Students will also be expected to demonstrate the following knowledge: - key provisions of relevant legislation from all forms of government, standards and codes that may affect aspects of business operations; - formats and styles of workplace documents; - organisational policy and procedures requirements, and; - types of audio transcriptions.

BSBADM405 Organise meetings

Locations: Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to organise meetings including making arrangements, liaising with participants, and developing and distributing meeting related documentation. It applies to individuals employed in a range of work environments who are required to organise a variety of meetings. They may provide administrative support within an enterprise, or have responsibility for these tasks in the context of a particular team, workgroup or project.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - organise a meeting and advise participants accordingly; - prepare and distribute all documentation required for the meeting; - take meeting notes which accurately reflect what was discussed during the meeting; - produce minutes based on own notes providing an accurate account of the meeting, and; - circulate copies of meeting minutes within predetermined timeframes. Students will also be expected to demonstrate the following knowledge: - describe culturally appropriate communication techniques; - identify the relevant formats for agendas and minutes; - list the key provisions of relevant legislation, and; - outline organisational procedures relevant to the task.

BSBADM409 Coordinate business resources

Locations: Industry, Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to determine and analyse existing and required resources, their effective application and the accountability for their use.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - monitor resource usage; - maintain records of resource requirements and usage; - calculate costs and expenditures in relation to use and maintenance of business resources; - acquire and allocate physical resources and services to team members; - consult and communicate with individuals and teams about acquiring and using resources; - monitor, review and report on resource use acquisition, allocation, use and procedures, and; - follow organisational policies and procedures in relation to business resource acquisition and monitoring. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - describe the functions of business equipment used in an organisation and identify common faults, and; - identify organisational policies, plans and procedures in relation to business resource acquisition and monitoring.

BSBADM502 Manage meetings

Locations: Footscray Park, Industry, Footscray Nicholson, Werribee.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to manage a range of meetings including overseeing the meeting preparation processes, chairing meetings, organising the minutes and reporting meeting outcomes. It applies to individuals employed in a range of work environments who are required to organise and manage meetings within their workplace, including conducting or managing administrative tasks in providing agendas and meeting material. They may work as senior administrative staff or may be individuals with responsibility for conducting and chairing meetings in the workplace.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - apply conventions and procedures for formal and informal meetings including: developing and distributing agendas and papers; identifying and inviting meeting participants; organising and confirming meeting arrangements; running the meeting and following up; - organise, take part in and chair a meeting; - record and store meeting documentation, and; - follow organisational policies and procedures. Students will also be expected to demonstrate the following knowledge: - outline meeting terminology, structures,

arrangements; - outline responsibilities of the chairperson and explain group dynamics in relation to managing meetings; - describe options for meetings including face-to-face, teleconferencing, web-conferencing and using webcams, and; - identify the relevant organisational procedures and policies regarding meetings, chairing and minutes including identifying organisational formats for minutes and agendas.

BSBADM502B Manage meetings

Locations: Industry, Footscray Nicholson, St Albans.

Prerequisites: Nil.

Description: This unit describes the performance outcomes, skills and knowledge required to manage a range of meetings including overseeing the meeting preparation processes, chairing meetings, organising the minutes and reporting meeting outcomes.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - participate in sustained complex interpersonal exchanges and to interact with others; - listen to, incorporate and encourage feedback; - conduct oral presentations to a group, to consult participants and to answer questions; - manage and work with a group to construct an action plan; - chair meetings; - categorise and organise information; - assess information for relevance and accuracy; - identify and elaborate on key agenda items and source additional information; - numeracy and time management skills to allow for sufficient meeting preparation, and; - problem-solving skills to choose appropriate solutions from available options. Students will also be expected to demonstrate the following knowledge: - culturally appropriate techniques to communicate with people from diverse backgrounds and people with diverse abilities; - key provisions of relevant legislation from all forms of government, standards and codes that may affect aspects of business operations; - formats for minutes and agendas; - group dynamics; - meeting terminology, structures, arrangements and responsibilities of chairperson, and; - organisational procedures and policies regarding meetings, chairing and minutes.

BSBADM503 Plan and manage conferences

Locations: Footscray Nicholson, Werribee.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to plan, promote and coordinate conferences, ensuring follow-up procedures are incorporated.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - prepare and investigate conference requirements; - promote the conference using public relations strategies according to predetermined budgets and deadlines; - coordinate conference proceedings including addressing any problems as they arise, and; - fulfil all post-

conference requirements according to organisational requirements. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - summarise relevant organisational policies and procedures for planning and managing conferences; - outline tools that could be used in managing conferences; - explain budgeting strategies used for projects, and; - identify techniques for conference planning including setting milestones.

BSBADM504 Plan and implement administrative systems

Locations: Footscray Nicholson, Werribee.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to plan for or review the requirements of effective administrative systems and procedures for implementing, monitoring and reviewing the system.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - work with relevant personnel and stakeholders to identify administrative system improvements; - document necessary requirements or modifications; - provide training and support for staff to use the new or modified system, and; - monitor the new system and identify future improvements and staff training needs. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - summarise relevant legislative and organisational policies and procedures for reviewing administrative systems.

BSBADM506 Manage business document design and development

Locations: Industry, Footscray Nicholson, Werribee.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to establish standards for the design and production of organisational documents and to manage document design and production processes to ensure agreed standards are met. It applies to individuals employed in a range of work environments who require well-developed skills in the use of a range of software packages. They use these skills to establish, document and implement consistent standards of document design within an organisation.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - identify the organisational needs, requirements and information technology capabilities relevant to the design and production of documents; - establish documentation standards to meet organisational requirements; - design, test and amend document templates; - develop and implement documentation and training to support use of standard templates and macros, and; - monitor the implementation of standard documentation templates and

macros and make improvements in line with organisational requirements. Students will also be expected to demonstrate the following knowledge: - describe document production processes; - identify costs involved with the implementation of standard documentation; - explain the software applications relevant to document design and development in the organisation; - identify key provisions of relevant legislation and regulations, codes and standards affecting document production; - outline organisational policies and procedures relating to document production, and; - list sources of expertise available externally to the organisation or workgroup.

BSBCMM201 Communicate in the workplace

Locations: Industry, Footscray Nicholson, Werribee, City Flinders, City King St, Sunshine, Online, Victoria University is authorised by Trades Recognition Australia (TRA) to conduct skills assessment services for persons seeking temporary or permanent migration. For more information on these programs and the countries in which VU conducts these assessments please refer to:

<http://www.vu.edu.au//skilled-migration>. Geelong Learning Links.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to communicate in the workplace including gathering, conveying and receiving information and completing routine written correspondence. It applies to individuals who perform a range of routine workplace communication tasks using a limited range of practical skills and fundamental knowledge of effective listening, questioning and non-verbal communication in a defined context under direct supervision or with limited individual responsibility.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communicate information and ideas verbally and non-verbally, taking cultural differences and language barriers into consideration; - produce written material, used routinely in day to day work, which is clear, concise and effectively convey the intended meaning to the recipient; - complete workplace forms; - use style, format and level of accuracy appropriate to the type of written material, and; - provide prompt responses to requests for information in accordance with organisational requirements. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - identify any organisational policies, plans and procedures which detail organisation's standards or protocols for workplace communication; - describe different communication styles, and; - outline barriers to communication.

BSBCMM401 Make a presentation

Locations: Footscray Park, Industry, Footscray Nicholson, City King St, Online.

Prerequisites: Nil.

Description: This unit covers the skills and knowledge required to prepare, deliver and review a presentation to a target audience. This unit applies to individuals who may be expected to make presentations for a range of purposes, such as marketing, training and promotions. They contribute well developed communication skills in presenting a range of concepts and ideas.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic

and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following performance criteria: - prepare and deliver presentations related to occupation or area of interest which demonstrate the use of: - effective presentation strategies and communication principles; - aids and materials to support the presentation, and; - select and implement methods to review the effectiveness of own presentation and document any changes which would improve future presentations. Students will also be expected to demonstrate the following knowledge: - identify information collection methods that will support review and feedback of presentations; - identify regulatory and organisational obligations and requirements relevant to presentations; - describe the principles of effective communication, and; - describe the range of presentation aids and materials available to support presentations.

BSBCMM501 Develop and nurture relationships

Locations: Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to develop, nurture and maintain various networks and relationships with client, customers and colleagues in order to promote the organisation, to improve business practices and to find and secure new business relationships. It applies to individuals who use communication and networking skills to develop and consolidate relationships with people in a range of sectors.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communicate with others in accordance with organisational and legislative requirements; - use business and professional networks to benefit the organisation; - use available communication channels to identify new business relationships, and; - follow up on opportunities to build and develop ongoing business relationships. Students will also be expected to demonstrate the following knowledge: - briefly summarise the relevant legislation, regulations and codes of practice; - explain the relevance of an organisation's social, business or ethical standards to the development of professional relationships; - explain the interpersonal and communication skills needed to build and maintain business relationships; - list and describe communication channels that could be used to find and secure new business relationships, and; - identify sources of information about relevant associations, conferences and other relationship building opportunities.

BSBCOM406 Conduct work within a compliance framework

Locations: Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to identify statutory, legislative and regulatory requirements and relate them to individual work practices to ensure ongoing adherence to the compliance framework.

Required Reading: The qualified trainer and assessor will provide teaching and

learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - conduct work according to relevant statutory, legislative and regulatory requirements relating to work practices; - analyse and keep up to date with compliance requirements; - map compliance requirements to work practices and position description; - seek advice and discuss ethical considerations, and; - reflect on personal actions. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - identify statutory, legislative and regulatory requirements relevant to job role, occupation or profession; - outline codes of practice relevant to job role, occupation or profession; - explain organisational policies and procedures relevant to workplace; - explain individual work requirements and practices as contained in position description and occupational standards, and; - outline statutory requirements and codes of conduct in context of individual job role.

BSBCOM501 Identify and interpret compliance requirements

Locations: Industry, Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to identify and interpret the range of internal and external compliance requirements and obligations that must be fulfilled by an organisation.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - analyse an organisation's operations to identify areas subject to compliance requirements; - interpret and analyse information from Australian and international standards, legislation, regulations, industry and organisational codes of practice to determine their relevance to the organisation; - document and store the outcomes of identification and interpretation activities related to the organisation's compliance requirements, and; - report on key compliance requirements and the implications of these for the organisation. Students will also be expected to demonstrate the following knowledge: - outline elements of compliance programs and related management systems breaches, and; - identify relevant Australian and international standards.

BSBCRT301 Develop and extend critical and creative thinking skills

Locations: Footscray Nicholson, St Albans, Werribee, Sunshine, Geelong Learning Links..

Prerequisites: Nil.

Description: This unit describes skills and knowledge required to develop the habit of thinking in a more creative way through looking at things differently, musing, testing, experimenting and challenging existing thought patterns. It applies to individuals who need to develop and extend their critical and creative thinking skills to different issues and situations and have a range of problem solving, evaluation

and analysis skills.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - ask relevant questions to challenge and enhance creative thinking; - use various information sources to provide answers to own questions; - use a range of creative thinking techniques to generate ideas or responses to questions or issues, and; - record ideas in response to a predetermined issue or situation. Note: if a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - explain why it is important to consider different perspectives when asking questions; - list and describe different creative thinking techniques; - describe common blockers to creative thinking; - explain boundaries that need to be considered when generating ideas and responses, and; - describe ways of extending and developing individual creative thinking skills.

BSBCRT401 Articulate, present and debate ideas

Locations: Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to articulate, present and debate ideas in a work or broader life context using creative techniques in order to provoke response, reaction and critical discussion.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - present ideas and information to a unfamiliar audience and environment that provoke interest and response; - reflect on and appraise the views of others; - participate actively and confidently in critical debate and discussion of ideas while responding to new and different communication situations, and; - investigate and evaluate creative and different ways of expressing and communicating ideas while making an opportunity pitch. Students will also be expected to demonstrate the following knowledge: - explain different ways in which individuals receive and respond to ideas and information, and what influences their response; - identify the enabling skills and attributes of people needed to effectively discuss ideas; - describe the nature and role of risk taking in the presentation and debate of ideas; - explain the role of storytelling in communicating ideas and key storytelling techniques, and; - describe common techniques to tailor comments to particular audiences.

BSBCRT402 Collaborate in a creative process

Locations: Footscray Nicholson, City King St.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to collaborate in a creative process that is underpinned by a commitment to trust and ethics. It applies to individuals who are involved in what is traditionally considered a creative

endeavour but is also very important in broader business and community activities where creative team effort is highly valued.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - make a positive contribution to a collaborative creative process that generates, expands and develops ideas into a well-conceived solution;- reflect on and evaluate own role in the collaborative process, and;- identify and act on ways to enhance own ability to contribute effectively to a collaborative creative process. Note: if a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - outline the legal framework that applies to the creative process;- describe the concepts of trust and ethical behaviour in the context of creative endeavour;- identify different roles people may play in a collaborative creative process and how these roles contribute to the overall effort;- describe how the potential for creativity can be maximised within a team, and;- explain barriers to creativity in a group environment.

BSBCRT402A Collaborate in a creative process

Locations:Footscray Nicholson, Online.

Prerequisites:Nil.

Description:This unit describes the performance outcomes, skills and knowledge required to collaborate in a creative process.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to nurture trust, to model open and supportive communication, and to articulate potentially complex ideas;- creative thinking skills to generate and explore ideas;- learning and self-management skills to reflect on and enhance own ability to contribute effectively to a collaborative creative process, and;- problem-solving skills to continually be evaluating and challenging ideas and moving them forward towards solutions. Students will also be expected to demonstrate the following knowledge: - concept of shared intellectual property from collaborative creativity;- concepts of trust and ethical behaviour in the context of creative endeavour;- different roles people may play in a collaborative creative process and how this contributes to the overall effort;- how the creative process works in different situations (e.g. as an individual, as part of a group);- how the potential for creativity can be maximised within a team;- legal framework that affects copyright, moral rights and intellectual property issues, and;- what stops creativity in a group environment.

BSBCRT403 Explore the history and social impact of creativity

Locations:Footscray Nicholson.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to explore the

history and social impact of creativity. It applies to individuals who develop and apply a broad knowledge of the history of creativity. Understanding the concept of creativity, how creative people think and how creativity has been applied throughout history can provide individuals with inspiration and ideas to take into their own work and lives.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: Conduct at least ONE research project into the historical and social impact of creativity that includes: - using a range of information sources;- presenting findings and encourage discussion and debate, respecting different perspectives and ideas, and;- identifying and accessing ways to build own creative thinking skills. Note: if a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - describe the impact of creativity at different points in history, including contemporary perspectives;- explain the potential links between the history of creativity and current individuals and communities;- identify sources of information on the history and social impact of creativity, and;- outline different factors that impact on creativity.

BSBCRT403A Explore the history and social impact of creativity

Locations:Footscray Nicholson, Online.

Prerequisites:Nil.

Description:This unit describes the performance outcomes, skills and knowledge required to explore the history and social impact of creativity.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to discuss and explore ideas about creativity with others, and;- comprehension skills to interpret information dealing with potentially complex ideas. Students will also be expected to demonstrate the following knowledge: - impact of creativity at different points in history, including contemporary perspectives;- potential links between the history of creativity and current individuals and communities;- sources of information on the history and social impact of creativity, and;- ways in which different factors impact on creativity and how it is demonstrated in various cultural contexts.

BSBCRT501 Originate and develop concepts

Locations:Footscray Nicholson, City King St.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to originate and develop concepts for products, programs, processes or services to an operational level.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic

and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - generate concepts and ideas that provide innovative solutions to identified issues; - evaluate and test concepts and ideas; - present ideas and information to others and reflect on responses, and; - develop at least two concepts, substantiated and supported with sufficient information to allow implementation to occur. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - describe the broad context in which concepts are being developed; - outline cultural, social and environmental issues and impacts to be considered in developing new concepts; - identify issues and requirements to commercialise the concept; - outline practical and operational issues to be considered in a specific work or community context; - describe the range of broad practical and operational issues that determine whether a concept can be implemented, and; - identify techniques for generating creative ideas and solutions, and for translating these ideas into workable concepts.

BSBCUS201 Deliver a service to customers

Locations: Footscray Park, Industry, Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to deliver all aspects of customer service at an introductory level. It includes creating a relationship with customers, identifying their needs, delivering services or products and processing customer feedback. It applies to individuals who perform a range of routine tasks in the workplace using a limited range of practical skills and fundamental knowledge of customer service in a defined context under direct supervision or with limited individual responsibility.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - greet customer and establish rapport/relationship in accordance with organisational requirements; - identify customer needs using appropriate interpersonal skills; - provide prompt service to address customer needs in accordance with organisational requirements; - identify and follow up opportunities to increase the quality of service and products, and; - respond to and record all customer feedback according to organisational standards, policies and procedures. Students will also be expected to demonstrate the following knowledge: - identify and briefly describe key provisions of relevant legislation from all forms of government that apply to provision of customer services, and; - identify and explain workplace organisational policies and procedures relating to customer service and the customer service process.

BSBCUS301 Deliver and monitor a service to customers

Locations: Industry, Footscray Nicholson, Werribee, Sunshine, Online, Learning Links Geelong.

Prerequisites: Nil.

169

Description: This unit describes the skills and knowledge required to identify customer needs, deliver and monitor customer service and identify improvements in the provision of customer service. It applies to individuals who apply a broad range of competencies in various work contexts. In this role, individuals often exercise discretion and judgement using appropriate theoretical knowledge of customer service to provide technical advice and support to customers over short or long term interactions.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - use communication skills to establish rapport and build relationships with customers in accordance with organisational requirements; - identify customer needs using appropriate questioning and active listening skills; - provide customer service in accordance with organisational requirements; - respond to and record customer feedback and action taken according to organisational standards, policies and procedures, and; - produce a report which identifies and recommends ways to improve service delivery. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - summarise key provisions of relevant legislation from all levels of government that may affect aspects of business operations; - explain organisational policy and procedures for customer service, including handling customer complaints; - provide examples of verifiable evidence that could be used to review customer satisfaction, and; - outline the interpersonal skills needed for serving customers, including customers with specific needs.

BSBCUS301B Deliver and monitor a service to customers

Locations: Footscray Nicholson, City Queen.

Prerequisites: Nil.

Description: This unit describes the performance outcomes, skills and knowledge required to identify customer needs and monitor service provided to customers. Operators may exercise discretion and judgement using appropriate theoretical knowledge of customer service to provide technical advice and support to customers over either a short or long term interaction.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - analytical skills to identify trends and positions of products and services; - communication skills to monitor and advise on customer service strategies; - edit and proofread texts to ensure clarity of meaning and accuracy of grammar and punctuation; - prepare general information and papers according to target audience; - read and understand a variety of texts; - problem-solving skills to deal with customer enquiries or complaints; - technology skills to select and use technology appropriate to a task; - comply with policies and procedures; - consistently evaluate and monitor own performance, and; - seek

learning opportunities. Students will also be expected to demonstrate the following knowledge: - key provisions of relevant legislation from all levels of government that may affect aspects of business operations; - organisational policy and procedures for customer service including handling customer complaints; - service standards and best practice models; - public relations and product promotion, and; - techniques for dealing with customers, including customers with specific needs.

BSBCUS402 Address customer needs

Locations: Footscray Park, Footscray Nicholson, City King St.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to manage an ongoing relationship with a customer over a period of time. This includes helping customers articulate their needs and managing networks to ensure customer needs are addressed. It applies to individuals who are expected to have detailed product knowledge in order to recommend customised solutions. In this role, individuals would be expected to apply organisational procedures and be aware of, and apply as appropriate, broader factors involving ethics, industry practice and relevant government policies and regulations.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following performance criteria: - communicate effectively with customers; - helping customers to articulate their needs and evaluate options; - explaining products/services and how they match customer needs; - establishing regular communication; - explaining customer rights and responsibilities; - address customer's needs; - use organisational procedures to document customer satisfaction; - develop and maintain networks to support meeting customer needs, and; - identify potential difficulties in meeting customer needs and taking appropriate action. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - explain organisational procedures and standards for establishing and maintaining customer service relationships; - describe informed consent; - explain consumer rights and responsibilities; - describe ways to establish effective regular communication with customers, and; - outline details of products or services including with reference to: possible alternative products and services; variations within a limited product and service range.

BSBCUS501 Manage quality customer service

Locations: Industry, Footscray Nicholson, Online.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to develop strategies to manage organisational systems that ensure products and services are delivered and maintained to standards agreed by the organisation. It applies to individuals who supervise the provision of quality customer service within an organisation's procedures framework by others. At this level, individuals must exercise considerable discretion and judgement, using a range of problem solving and decision making strategies.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - develop and manage organisational systems for quality customer service; - develop and review plans, policies and procedures for delivering and monitoring quality customer service; - implement policies and procedures to ensure quality customer service; - solve complex customer complaints and system problems that lead to poor customer service; - monitor and assist teams to meet customer service requirements, and; - develop, procure and use human and physical resources to support quality customer service delivery. Students will also be expected to demonstrate the following knowledge: - outline the legislative and regulatory context of the organisation relevant to customer service; - describe organisational policy and procedures for customer service including handling customer complaints; - identify service standards and best practice models; - summarise public relations and product promotion; - outline techniques for dealing with customers including customers with specific needs, and; - explain techniques for solving complaints including the principles and techniques involved in the management and organisation of: customer behaviour; customer needs research; customer relations; ongoing product and/or service quality; problem identification and resolution; quality customer service delivery; record keeping and management methods; strategies for monitoring, managing and introducing ways to improve customer service relationships; strategies to obtain customer feedback.

BSBDES305 Source and apply information on the history and theory of design

Locations: Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to source information on design history and theory, and to apply that information in the individual's design work. It applies to individuals who work in design and need to develop and maintain a general knowledge of design history and theory.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - show how the history and theory of design can be adapted and used in own professional practice, and; - maintain currency of theoretical and design knowledge. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - summarise current design trends; - describe the evolution of design; - identify the organisational information practices and their application, and; - outline sources of information on design history and theory relevant to own design work.

BSBDES401 Generate design solutions

Locations: Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to generate design

solutions in response to a particular design need. It applies to individuals who generate concepts and solutions in response to a design challenge in any industry context. The starting point may be an open or closed brief; a spontaneous idea; modification of an existing product, service, process or system; or a point in an ongoing design process.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - develop and document a design solution through research, reflection, and generation and refinement of ideas, and; - demonstrate effective collaboration with others in the design process. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - explain the elements and principles of design and their application in the relevant design context; - describe key features of the wider industry, and the economic, social and historical context design solutions are being generated in; - discuss design trends and technologies including other designs and the work of other design practitioners in the relevant industry context; - identify sources of information that support the development of technical and other knowledge, and; - describe the materials, tools, equipment, techniques and processes used in the generation of design solutions in the relevant industry context.

BSBDES402 Interpret and respond to a design brief

Locations:Footscray Nicholson, City King St.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to interpret and creatively respond to a design brief through the production of work. It applies to individuals working in any industry or design context where work is prescribed by a commissioning agent/client in a brief. Individuals are required to integrate the creative, communication and planning processes that support effective response to a design brief. Work is carried out independently, although guidance is available if required.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - articulate and document the process of developing own design practice by learning to develop new skills, ideas and a unique voice; - adjust work processes via peer feedback and self-evaluation, and; - identify work options and incorporate networking in career development. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - list current and emerging designers in the relevant design discipline; - discuss current and emerging trends and technologies in the relevant design discipline, and the opportunities and challenges they represent; - identify professional development

information and resources available to designers, and; - summarise sources of information relating to work opportunities and career planning.

BSBDES402A Interpret and respond to a design brief

Locations:Footscray Nicholson, Online.

Prerequisites:Nil.

Description:This unit describes the performance outcomes, skills and knowledge required to interpret and creatively respond to a design brief through the production of work.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to liaise with clients and colleagues on design concepts, and to effectively present potentially complex ideas; - creative thinking skills to generate and explore a range of possible responses to design brief requirements; - critical thinking and problem-solving skills to work out different ways of meeting different design and production challenges; - research, literacy and analytical skills to interpret a brief and to source and evaluate information pertinent to the brief; - planning and organisational skills to integrate and coordinate creative, communication and planning issues into the work process, and; - self-management skills to take pro-active responsibility for all the elements involved in responding to a design brief. Students will also be expected to demonstrate the following knowledge: - copyright, moral rights and intellectual property issues and legislation relevant to the ways design concepts are developed and presented; - different ways of presenting, communicating and documenting design concepts (as relevant to the context of work); - format of design brief typically used in the relevant industry or design context; - principles and key features of project management relevant to a design project; - specific project management factors that apply to a design project, and; - terminology typically used in a range of design briefs.

BSBDES403 Develop and extend design skills and practice

Locations:Footscray Nicholson, City King St.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to develop and extend skills as a practising designer. It applies to individuals who work as a designer, in any industry context, either independently or employed by an organisation. Designers must continually refine, develop and evaluate their own conceptual and technical skills. Research, experimentation and collaboration are key factors in this process.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - use strategies to develop or extend skills, ideas and a unique voice; - adjust work processes as a result of peer

feedback and self-evaluation, and; - research work options, networking and promotional opportunities and incorporate information into own work and career development. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - list current and emerging designers in the relevant design discipline; - discuss current and emerging trends and technologies in the relevant design discipline, and the opportunities and challenges they represent; - identify professional development information and resources available to designers, and; - summarise sources of information relating to work opportunities and career planning.

BSBDES501 Implement design solutions

Locations: Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to take a design concept or solution to the implementation stage. The outcome of work could be a completed product, object, system or service, but is more likely to be a complete or partial prototype or model for the design. The focus of the unit is on a general knowledge of design techniques and processes, and practical application to a specific design context.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - undertake critical analysis, testing and development of a model, prototype or aspect of a design solution to meet an identified need, and; - present model to key stakeholders using the most appropriate best practice methods. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - explain the elements and principles of design and their application in relevant design context; - describe key features of the wider industry, with the economic, social and historical context for the design solution; - discuss design trends and technologies including other designs and the work of other design practitioners in the relevant context; - summarise sources of information that support the development of technical and other knowledge, and; - describe the technical expertise, resources, materials, tools, equipment, techniques and industry processes required for the area the design solutions are being implemented in.

BSBDIV301 Work effectively with diversity

Locations: Industry, Footscray Nicholson, St Albans, Werribee, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to recognise and interact productively with diversity in the workplace. It covers sensitive responses to, and interactions with, all manner of diversity that might be encountered during the course of work. It applies to individuals who work in a variety of contexts where they will be expected to interact with a diverse client and/or co-worker population. They may also provide some leadership and guidance to others and have some limited responsibility for the output of others.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - adjust language and behaviour as required by interactions with diversity; - identify and respect individual differences in colleagues, clients and customers, and; - apply relevant regulations, standards and codes of practice. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - identify major groups in the workplace and community, as defined by cultural, religious and other traditions and practices; - identify reasonable adjustments that facilitate participation by people with a disability, and; - explain the value of diversity to the economy and society in terms of: workforce development; Australia's place in the global economy; innovation; social justice.

BSBDIV501 Manage diversity in the workplace

Locations: Footscray Park, Industry, Footscray Nicholson, Online, Victoria University is authorised by Trades Recognition Australia (TRA) to conduct skills assessment services for persons seeking temporary or permanent migration. For more information on these programs and the countries in which VU conducts these assessments please refer to: <http://www.vu.edu.au//skilled-migration..>

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to manage diversity in the workplace. It covers implementing the organisation's diversity policy, fostering diversity within the work team and promoting the benefits of a diverse workplace. It applies to individuals who direct the work of others in teams of variable sizes. They may work with staff from different cultures, races, religions, generations, or other forms of difference in any industry context.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - demonstrate the application of diversity policy in a work context; - critically review a diversity policy; - implement strategies to ensure that diversity is understood and respected in the work team; - demonstrate compliance with procedures for handling complaints or harassment allegations, and; - promote the benefits of diversity to others. Students will also be expected to demonstrate the following knowledge: - outline formal and informal complaints procedures, and; - identify and outline key features of relevant current legislation regarding: age discrimination; disability discrimination; racial discrimination; sex discrimination; human rights, and; equal opportunity.

BSBEBU401 Review and maintain a website

Locations: Footscray Nicholson, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to undertake data analysis, review website content, and update and maintain a website. It applies to individuals who have knowledge of the relationship between a website and the core functions of an organisation. They also have working knowledge and skills to

perform basic updates to website content. They may provide administrative support within an organisation or be individuals who have been delegated this responsibility.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - analyse data to make recommendations about changes to website; - update web pages according to organisational requirements, and; - analyse data, identify and resolve faults, errors and/or complaints on website. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - identify and review knowledge of key provisions of relevant legislation, regulations, and standards and codes of practice that may affect aspects of business operations; - explain basic principles of website design and maintenance, and; - outline online security issues.

BSBEBU501 Investigate and design e-business solutions

Locations: Industry, Footscray Nicholson.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to evaluate e-business models and strategies, as well as incorporate the results of these evaluations into the design of an e-business solution. It applies to individuals who possess skills and knowledge in a specialist business area, as well as knowledge of software and other technologies. They apply these skills and knowledge in the evaluation, selection and implementation of new strategies for business, which incorporate e-business solutions. They may be responsible for overseeing these tasks along with technical or other knowledge experts.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - analyse and evaluate e-business opportunities involving new business models and not simply electronic versions of existing businesses; - provide supporting evidence for choice of e-business solution, and; - implement, monitor and evaluate an e-business solution. Students will also be expected to demonstrate the following knowledge: - explain the role of a value chain analysis when assessing potential e-business solutions; - identify relevant legislation, regulations, standards and codes of practice that may affect the implementation of the e-business solution; - list key features of a range of e-business models, and; - outline the policies and guidelines relating to the implementation of the e-business solution.

BSBFIA301 Maintain financial records

Locations: Industry, Werribee.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to maintain daily financial records such as reconciling debtors' and creditors' systems, preparing and

maintaining a general ledger and trial balance and includes activities associated with monitoring cash control for accounting purposes. It applies to individuals who are skilled operators and apply a broad range of competencies in various work contexts and may exercise discretion and judgement using appropriate theoretical knowledge of financial records.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - maintain daily transactions and identify and respond to discrepancies and errors; - transfer and record financial data accurately, and; - reconcile expenditures and revenue in a timely manner. Students will also be expected to demonstrate the following knowledge: - identify the key provisions of relevant legislation, codes of practice and national standards that may affect financial record keeping; - discuss organisational policies and procedures relating to maintaining financial records; - define credits/creditors and debits/debtors; - describe principles of double entry bookkeeping, and; - identify methods of presenting financial data.

BSBFIA302 Process payroll

Locations: Footscray Park, Industry, Footscray Nicholson, City King St.

Prerequisites:Nil.

Description:This unit describes skills and knowledge required to process payroll from provided data using manual and computerised payroll systems. It applies to individuals employed in a range of work environments who are responsible for payroll functions within an organisation. They may work as individuals providing administrative support within an enterprise, or may be other members of staff who have been delegated payroll responsibilities.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - plan and perform payroll calculations in accordance with all legislative and organisational requirements, and predetermined timelines, and; - refer enquiries outside area of responsibility to an appropriate authority. Students will also be expected to demonstrate the following knowledge: - identify the key provisions of relevant legislation, standards and codes of practice that may affect payroll operations; - outline relevant organisational policies and procedures, and; - list the different types of payroll systems.

BSBFIA303 Process accounts payable and receivable

Locations: Industry, Footscray Nicholson, Werribee.

Prerequisites:Nil.

Description:This unit describes skills and knowledge required to maintain accounts payable and accounts receivable records, including processing payments to creditors and handling overdue accounts receivable. It applies to individuals employed in a range of work environments supporting the accounting functions and aspects of an

enterprise. They may provide administrative support within an enterprise, or may be members of staff who have been delegated accounting responsibilities.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - accurately enter data into journal and subsidiary ledger system; - maintain journals and subsidiary ledger systems; - reconcile subsidiary ledger system with journal or general ledger data, and; - complete all tasks in accordance with legal and organisational responsibilities, within scope of own responsibility. Students will also be expected to demonstrate the following knowledge: - list key provisions of relevant legislation and regulations, standards and codes of practice that may affect aspects of financial operations; - briefly describe the organisational accounting systems and procedures; - explain how to check for errors or discrepancies, and; - list and describe tasks that are outside own scope of responsibility.

BSBFIA304 Maintain a general ledger

Locations:Industry, Footscray Nicholson.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to maintain a computerised or manual general ledger system within an organisation, including processing journal entries and preparing a trial balance. It applies to individuals employed in a range of work environments with responsibility for simple accounting functions within an organisation. They may work as individuals providing administrative support within an enterprise, or may be other members of staff with delegated responsibilities relating to general ledger maintenance.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - accurately enter data; - reconcile subsidiary ledger systems with general ledger and prepare a trial balance; - implement double-entry principles; - systematically trace errors or refer them to appropriate people, and; - complete all tasks in accordance with accounting principles, legal and organisational responsibilities, and within scope of own responsibility. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - office equipment and resources; - computer equipment and relevant software; - examples of source journals, and; - case studies and, where possible, real situations.

BSBFIA401 Prepare financial reports

Locations:Industry, Footscray Nicholson, St Albans, Werribee, City King St, Sunshine.

Prerequisites:Nil.

Description:This unit describes skills and knowledge required to record general journal adjustment entries and to prepare end of period financial reports. It applies to

individuals employed in a range of work environments who are responsible for preparing financial reports. They may be individuals providing administrative support within an enterprise, or they might have responsibility for these tasks in relation to their own workgroup or role.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - produce a detailed asset register and depreciation schedule; - accurately record entries for balance day adjustments; - prepare financial reports; - trace and reconcile errors systematically or seek expert advice if required; - apply double-entry principles, and; - complete all tasks according to organisational policies and industry standards. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - explain double-entry bookkeeping principles; - identify general journal and general ledger entries; - list the key provisions of relevant legislation, regulations, standards and codes of practice that may affect preparation of financial reports; - describe organisational accounting systems, and; - outline relevant organisational policies, procedures and accounting standards.

BSBFIA402 Report on financial activity

Locations:Footscray Park, Industry, Footscray Nicholson, City King St.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to report financial activity for business both in response to client requests and to meet statutory requirements such as the completion of financial reports. This unit applies to individuals with a broad knowledge of financial activities who contribute financial skills and knowledge to address reporting requirements of clients and legal authorities. They may have responsibility to provide guidance or to delegate aspects of these tasks to others.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - organise and present financial data including budget variances, budgets and forecasts, cash flow/profit reports, balance sheets, financial year reports, operating statements, expenditure and receipts and profit and loss statements to highlight relevant features and meet workplace requirements; - use conversion and consolidation procedures such as moving averages, standardised variables, trend analysis and unit costs; - identify, resolve or refer discrepancies such as absence of auditable trail, expenditure report mismatches, incorrect payments and unreconciled cash flows; - record income and expenditure to meet statutory requirements; - calculate liabilities for tax including completing Business Activity Statements; - provide financial business recommendations; - apply knowledge of relevant legislation and regulations, and; - perform double entry

bookkeeping and accrual accounting. Students will also be expected to demonstrate the following knowledge: - identify the key provisions of legislation, regulation and codes of practice relevant to financial operations; - describe the techniques used for forecasting and analysis, and; - identify the options, methods and practices for deductions, benefits and depreciations.

BSBFIA412 Report on financial activity

Locations:Footscray Park, Footscray Nicholson, City King St.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to prepare financial reports in line with statutory reporting requirements. It encompasses compiling and analysing data. This unit applies to individuals that are required to apply specialised knowledge and analytical skills to prepare financial reports as part of their job role.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - organise and present financial data to highlight relevant features and meet workplace requirements including budget variances, budgets and forecasts, cash flow/profit reports, balance sheets, financial year reports, operating statements, expenditure and receipts and profit and loss statements; - use conversion and consolidation procedures such as moving averages, standardised variables, trend analysis and unit costs; - identify, resolve or refer discrepancies such as absence of auditable trail, expenditure report mismatches and incorrect payments and unreconciled cash flows; - record income and expenditure to meet statutory requirements; - calculate liabilities for tax including completing Business Activity Statements, where applicable; - provide financial business recommendations; - apply knowledge of relevant legislation and regulations, and; - perform double entry bookkeeping and accrual accounting. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - key provisions of legislation, regulation and codes of practice relevant to financial operations; - key techniques used for forecasting and analysis; - key features of the options, methods and practices for deductions, benefits and depreciations; - current business taxation requirements for preparing corporate accounting reports; - current financial legislation and statutory requirements relating to taxable transactions and reporting requirements; - ethical requirements associated with preparing financial reports for corporate entities, including conflict of interest, confidentiality, and disclosure requirements, and; - industry-standard methods and formats used to present financial data.

BSBFIM501 Manage budgets and financial plans

Locations:Industry, Footscray Nicholson.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to undertake financial management within a work team in an organisation. It includes planning and implementing financial management approaches, supporting team members whose role involves aspects of financial operations, monitoring and controlling finances and reviewing and evaluating effectiveness of financial management processes. It applies to managers in a wide range of organisations and sectors who have responsibility for ensuring that work team financial resources are used

effectively and are managed in line with financial objectives of the team and organisation.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - use financial skills to work with and interpret budgets, ageing summaries, cash flow, petty cash, Goods and Services Tax (GST), and profit and loss statements; - communicate with relevant people to clarify budget/financial plans, negotiate changes and disseminate information; - prepare, implement and modify financial contingency plans; - monitor expenditure and control costs; - support and monitor team members; - report on budget and expenditure; - review and make recommendations for improvements to financial processes, and; - meet record keeping requirements for the Australian Taxation Office (ATO) and for auditing purposes. Students will also be expected to demonstrate the following knowledge: - describe basic accounting principles; - identify and explain the relevant legislation and current requirements of the Australian Taxation Office, including the Goods and Services Tax (GST); - explain the key requirements for financial record keeping and auditing, and; - describe the principles and techniques involved in managing: budgeting; cash flows; electronic spreadsheets; GST; ledgers and financial statements; profit and loss statements.

BSBFIM502 Manage payroll

Locations:Footscray Nicholson, Werribee.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to establish and monitor security procedures for managing organisational payroll services and to calculate and process salary payments, group taxation and related payments. It applies to individuals, employed in a range of work environments, who are required to establish and work with payroll systems and may have responsibility for managing payroll systems and calculations.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - document steps undertaken to establish payroll system; - use data and calculations to reconcile salaries, wages and deductions in accordance with all legislative and organisational requirements, and; - create accurate payroll management records. Students will also be expected to demonstrate the following knowledge: - explain key provisions of relevant legislation, standards, regulations and codes of practice that may affect aspects of payroll operations, and; - outline organisational policies and procedures across the full range of tasks for the required payroll processes.

BSBFIM601 Manage finances

Locations:Industry, Footscray Nicholson.

Prerequisites:Nil.

Description: This unit describes the skills and knowledge required to undertake budgeting, financial forecasting and reporting and to allocate and manage resources to achieve the required outputs for the business unit. It includes contributing to financial bids and estimates, allocating funds, managing budgets and reporting on financial activity. It applies to individuals who have managerial responsibilities which include overseeing the management of financial and other resources across a business unit, a series of business units or teams, or an organisation. It covers all areas of broad financial management. In a larger organisation this work would be supported by specialists in financial management.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - plan for financial management; - read and review profit and loss statements, cash flows and aging summaries; - prepare, implement and revise a budget which aligns with the business plan, is based on research and analysis of previous financial data and cash flow trends, and meets all compliance requirements; - contribute to financial bids and estimates; - establish a budget and allocate funds in accordance with statutory and organisational requirements; - communicate with other people including: reporting on financial activity and making recommendations; identifying and prioritising significant issues, and; ensuring managers and supervisors are clear about budgets, and; - analyse the effectiveness of existing financial management approaches including reviewing financial management software, managing risks of misappropriation of funds, ensuring systems are in place to record all transactions, maintaining an audit trail and complying with due diligence. Students will also be expected to demonstrate the following knowledge: - identify the requirements for financial probity; - describe the principles of accounting and financial systems; - explain Australian, international and local legislation and conventions that are relevant to financial management in the organisation, and; - outline the requirements of the Australian Tax Office, including Goods and Services Tax Company Tax, Pay As You Go. .

BSBFLM303 Contribute to effective workplace relationships

Locations: Footscray Nicholson, St Albans, Werribee, Sunshine, Geelong Learning Links..

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to gather information and maintain effective relationships and networks, with particular regard to communication and representation. This unit applies to individuals who use leadership skills including motivation, mentoring and coaching to develop efficient, effective and unified teams and facilitate communication between team members and management of the organisation.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of

competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - access and analyse information to achieve planned outcomes; - apply techniques for resolving problems and conflicts and dealing with poor performance within organisational and legislative requirements; - review and improve workplace outcomes in consultation with relevant personnel; - adjust interpersonal style and communications to respond to cultural and social diversity; - apply relationship management and communication skills with a range of people; - communicate ideas and information to diverse audiences, and; - develop networks and build team relationships. Students will also be expected to demonstrate the following knowledge: - give examples of how work relationships and the cultural and social environment can support or hinder achieving planned outcomes; - explain techniques for developing positive work relationships and building trust and confidence in a team; - identify relevant legislation from all levels of government that affects business operation; - describe a range of methods and techniques for communicating information and ideas to a range of stakeholders; - outline problems solving methods; - explain methods to resolve workplace conflict; - explain methods to manage poor work performance, and; - explain how to monitor, analyse and introduce ways to improve work relationships.

BSBFLM309 Support continuous improvement systems and processes

Locations: Industry, Werribee.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to support the organisation's continuous improvement systems and processes. Particular emphasis is on actively encouraging the team to participate in the process, monitoring and reporting on specified outcomes and supporting opportunities for further improvements. It applies to individuals with roles of responsibility who use initiative, organisational and communication skills to influence the ongoing development of the organisation. At this level, work will normally be carried out within known routines, methods and procedures, and may also involve complex or non-routine activities that require some discretion and judgement.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - perform actions to support continuous improvement; - using work performance to identify improvement; - adjusting plans to reflect changes; - communicating effectively with all stakeholders; - using technology to monitor operational progress, and; - applying suitable record keeping processes. Students will also be expected to demonstrate the following knowledge: - explain principles and techniques relating to: continuous improvement systems and processes; benchmarking, and; best practice; - describe the benefits of continuous improvement; - list quality approaches which the organisation may implement; - explain methods that can be used in continuous improvement; - outline barriers to continuous improvement, and; - explain recording, reporting and recommendation processes to facilitate continuous improvement applied within the organisation.

BSBFLM312 Contribute to team effectiveness

Locations: Industry, Werribee, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to contribute to the effectiveness of the work team. It involves planning with the team to meet expected outcomes, developing team cohesion, participating in and facilitating the work team, and communicating with the management of the organisation. It applies to individuals who play a prominent part in motivating, mentoring, coaching and developing team cohesion through team leadership and forming the link between the management of the organisation and the team members. At this level, work will normally be carried out within known routines, methods and procedures, and may also involve complex or non-routine activities that require some discretion and judgement.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - discuss and clarify goals and responsibilities with a team of people; - apply management and communication skills with a range of people that: provides direction and leadership; assists individuals to achieve goals; motivates and builds team cohesion, and; fosters contribution of and respect for ideas; - apply techniques for resolving problems within organisational and legislative requirements; - communicate effectively with management including escalating problems outside own area of responsibility, and; - manage communication of information to, and between, the team. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - list organisational goals, objectives and plans that relate to the team; - identify legislation, regulations, standards or codes of practice that may impact team performance and outcomes; - describe the organisational structure with reference to the organisational chart; - describe options for addressing performance issues in the organisation; - explain the principles and techniques of: group dynamics and processes; motivation, and; negotiation; - explain why considering individual behaviour and differences is important to a manager.

BSBGOV403A Analyse financial reports and budgets

Locations: Industry.

Prerequisites: Nil.

Description: This unit describes the performance outcomes, skills and knowledge required to analyse financial reports and budgets as a member of a Board of governance of an organisation. Some aspects of governance activities may be subject to legislation, rules, regulations and/or codes of practice relevant to different job roles and jurisdictions

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - culturally appropriate communication skills to relate to people from diverse backgrounds and to people with diverse abilities; - communication and negotiation skills to work cooperatively

with other Board members, management and staff of the organisation, key stakeholders and members of the community; - literacy skills to read and interpret rules, regulations, policies and other workplace documentation; - numeracy skills to evaluate and make decisions based on financial data, and; - technology skills to understand management and accounting systems. Students will also be expected to demonstrate the following knowledge: - cultural context relevant to the community and location: as boards of governance oversee a wide variety of organisations, they must therefore ensure that they operate within the traditional and cultural values of the relevant context/s; - key provisions of relevant legislation from all levels of government that affects business operations, codes of practice and national standards, and; - organisational constitution, codes of conduct functions, policies and procedures.

BSBGOV503 Conduct organisational strategic planning

Locations: Industry.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to plan and conduct organisational strategic processes. It includes arranging board or committee strategic planning procedures, which incorporate rules, legislation, regulations and codes of practice relevant to the organisation. It applies to individuals responsible for monitoring, guiding and undertaking decision making activities as members of committees or boards of governance.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communicate and negotiate to work cooperatively with: other board or committee members; management and/or staff of the organisation, and; key stakeholders; - evaluate the progress of the strategic plan and analyse: organisational values, vision, purpose, objectives and key performance indicators and targets; economic and/or political trends relevant to the organisation; potential for strategic alliances and/or partnerships, and; stakeholder aspirations, interests and needs; - monitor operational processes to ensure organisational objectives and targets are met, and; - document organisational performance for the agreed strategic planning period. Students will also be expected to demonstrate the following knowledge: - discuss the roles and responsibilities of board or committee and management in strategic planning; - explain geographic, social, economic and political contexts in which relevant organisations operate and how these may impact upon strategic planning; - explain the principles and components of the strategic planning cycle; - discuss organisational policies and procedures relevant to strategic planning; - list provisions of federal, state or territory legislation and funding body requirements that may influence decision making, and; - list resources required to undertake strategic planning.

BSBHRM403 Support performance-management processes

Locations: Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to assist in the effective implementation of a performance management system and to facilitate employee performance. It applies to human resource officers, or people in similar roles, who work under the direction of a human resource manager.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - promote the implementation of the performance management system and analyse its strengths and weaknesses; - provide advice and information to employees on the benefits of effective performance management, and how it links with performance development; - review the performance management system, and; - make recommendations for improvement. Students will also be expected to demonstrate the following knowledge: - describe key elements and purposes of performance management processes, and their contribution to organisational objectives and the human resource cycle; - analyse the strengths and weaknesses of a performance management system; - outline rewards and incentives schemes, and; - identify warning systems and grievance procedures.

BSBHRM404 Review human resources functions

Locations:Footscray Nicholson.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to undertake research that supports work across a range of human resource functional areas. It applies to individuals who require a broad understanding of human resource functions, associated policy frameworks and the administrative requirements to support these functions and policies.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - prepare reports reviewing key human resource functions applying all ethical, organisational and legislative considerations, and; - use appropriate technology to collect and analyse workforce data. Students will also be expected to demonstrate the following knowledge: - identify the key provisions of legal and compliance requirements that apply to the organisation; - summarise relevant organisational policy and procedure frameworks; - summarise relevant ethical parameters; - explain how information technology can help analyse human resource metrics, and; - outline the roles and responsibilities of human resource practitioners.

BSBHRM405 Support the recruitment, selection and induction of staff

Locations:Industry, Footscray Nicholson, Werribee.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to execute tasks associated with the recruitment cycle and apply in-depth knowledge of the work of the organisation, and how recruitment and selection practices fit with other human resources functions. This unit applies to individuals who support recruitment, selection and induction functions under the direction of a human resource manager.

Required Reading:The qualified trainer and assessor will provide teaching and

learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - prepare job descriptions; - use job descriptions to support sourcing, selecting and appointing suitable staff; - use different advertising channels to promote vacancies and/or establish a potential talent pool; - consult with managers to gain approvals; - develop selection criteria and interview questions in consultation with relevant personnel; - schedule interviews and advise relevant people of times, dates and venues; - participate in interviews and other selection techniques including assessing candidates against selection criteria to short list them; - obtain referees' reports; - prepare and distribute a selection report including feedback to give unsuccessful candidates; - advise unsuccessful candidates of the results; - secure preferred candidate's agreement and provide an employment contract, and; - advise other staff of the successful candidate and arrange induction. Students will also be expected to demonstrate the following knowledge: - identify documentation required for recruitment, selection and induction; - explain human resources life cycle and the place of recruitment and selection; - identify legislation relevant to recruitment, selection and induction of staff; - describe channels and technology to advertise vacancies, and; - explain a range of interviewing techniques and other selection processes and their application.

BSBHRM602 Manage human resources strategic planning

Locations:Industry, Footscray Nicholson.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to develop, implement and maintain a strategic approach to managing human resources in an organisation ensuring that the organisation has the structure and staff to meet current and foreseeable business and performance objectives. It applies to individuals employed as human resource managers after a firm grounding has been established in a range of human resource activities.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - analyse information from a range of internal and external sources, and; - consult and communicate effectively with relevant stakeholders to develop, implement, monitor and review a strategic human resource plan. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - describe human resource practices and functions; - explain the relevant legislative, regulatory and industrial requirements for the business; - outline common options for sourcing labour; - explain the impact of technology on job roles; - outline labour market options for sourcing labour supply, and; - describe the requirements of a strategic plan.

BSBHRM604 Manage employee relations

Locations:Industry, Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge to develop and maintain a positive and productive workplace environment. It covers all aspects of employee relations impacting on managers at the strategic level. It applies to individuals who are non-specialist human resource managers and covers a broad range of employee relations activities.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - consult with relevant stakeholders to develop, implement, monitor and review employee relations strategies and policies including: diversity; recruitment; induction; training and development, and; performance management; - develop an employee relations risk management strategy; - negotiate employment awards, agreements and contracts; - maintain high standards of performance in respect to equal opportunity and the management of diversity, and; - manage conflict and early intervention in respect to employee grievances and problems. Students will also be expected to demonstrate the following knowledge: - identify human resource specialist assistance requirements; - describe the principles of relevant industrial agreements; - determine key result areas of the organisation; - outline organisational plans (strategic, tactical and operational) for human resource planning; - identify and summarise organisational policies relating to balancing family/work relationships; - outline external and internal organisational support services for employees; - explain performance measurement systems utilised within the organisation; - outline relevant legislative and regulatory requirements; - outline staff development strategies, and; - explain unfair dismissal rules and due process.

BSBIND201 Work effectively in a business environment

Locations: Footscray Park, Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to work effectively in a business environment. It includes identifying and working to organisational standards, managing workload, and working as part of a team. It applies to individuals developing basic skills and knowledge in preparation for working in a broad range of settings. No licensing, legislative or certification requirements apply to this unit at the time of publication.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the ability to work within organisational requirements including: - complying with duty of care, and goals and objectives of organisation; - complying with legal responsibilities and seeking advice when necessary; - understanding workers' rights and responsibilities; - understanding employers' rights and responsibilities, and; - achieving a work/life balance. Students will also be

expected to demonstrate the ability to work effectively in a team including: - completing all tasks; - seeking assistance when difficulties arise; - applying communication principles, and; - applying appropriate legislation. Students will also be expected to demonstrate the following knowledge: - identify the legislation that applies to working effectively in a business environment; - outline the organisational documents that are relevant to working effectively, and; - outline terms and conditions of employment.

BSBINM201 Process and maintain workplace information

Locations: Footscray Nicholson, St Albans, Werribee, Sunshine, Geelong Learning Links..

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to correctly operate word processing applications in production of workplace documents. It applies to individuals who perform a range of routine tasks in the workplace, using a limited range of practical skills and fundamental knowledge of word processing and software in a defined context, under direct supervision or with limited individual responsibility.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - collect and process workplace information according to organisational policies and procedures and related regulatory requirements; - record and document information accurately within expected timeframes, and; - store, classify and maintain documents and records correctly. Students will also be expected to demonstrate the following knowledge: - identify key provisions of relevant legislation, regulations, standards and codes of practice that may affect information management; - outline organisational policies and procedures relating to collecting and processing workplace information; - identify and describe organisational recordkeeping/filing systems and security procedures, and; - describe a range of filing systems including paper-based and software-based.

BSBINM301 Organise workplace information

Locations: Industry, Footscray Nicholson, Werribee, City King St.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to gather, organise and apply workplace information in the context of an organisation's work processes and knowledge management systems. It applies to individuals who perform a defined range of skilled operations in various work contexts. They may exercise discretion and judgement using appropriate knowledge of information management to provide technical advice and support to a team.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - efficiently and effectively gather, assess, organise and use workplace information as part of own job role; -

provide accurate information for defined purposes; - maintain and handle data and documents systematically; - use business technology to manage information; - communicate with colleagues and clients using effective interpersonal skills to obtain and check workplace information; - apply relevant legislation and regulations to workplace information, and; - monitor, review and modify information processes. Students will also be expected to demonstrate the following knowledge: - explain how legislation and regulations may affect the gathering organising and distribution of workplace information; - describe methods for checking validity of information and its sources; - describe organisational recordkeeping and filing systems, security procedures and safe recording practices, and; - identify workplace policies and procedures relating to workplace information.

BSBINM501 Manage an information or knowledge management system

Locations: Industry.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to organise training for others for an information or knowledge management system and to manage the use of the system. It applies to individuals who are responsible for seeing that key information and corporate knowledge are retained, accessible to others and improve business outcomes. The unit applies to information or knowledge management systems which comprise policies, protocols, procedures and practices to manage information or knowledge within the organisation and among relevant stakeholders.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - identify learning needs and plan and implement learning activities to enable personnel to use information or knowledge management system; - providing human, financial and physical resources as required; - use of coaching, mentoring, information sessions, workshops, training programs and e-learning as appropriate; - monitor performance and address issues and contingencies as they arise; - accessing technical specialists as required; - correct application of policies and procedures for the information or knowledge management system; - alignment and effectiveness of the policies and procedures; - effectiveness of information or knowledge management system for intended outcomes, and; - recommend improvements to systems, policies and practices as appropriate. Students will also be expected to demonstrate the following knowledge: - outline relevant legislation, codes of practice and national standards relevant to privacy, freedom of information and knowledge management; - explain organisational policies and procedures; - records management; - information management; - customer service; - commercial confidentiality, and; - describe the organisational operations and existing data and information systems. .

BSBINN301 Promote innovation in a team environment

Locations: Industry, Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to be an effective and proactive member of an innovative team. It applies to individuals who play a proactive role in demonstrating, encouraging or supporting innovation in a team environment. The individual may be a team participant or a team leader. Teams may be formal or informal and may comprise a range of personnel.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following performance criteria: - apply practices that promote innovation within a team; - encourage others to contribute to innovation in the team, and; - implement improvements and communicate about them. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - explain what innovation is, the different types of innovation and the benefits of innovation; - describe the internal and external factors that contribute to a team becoming and remaining innovative, and; - explain how activities can encourage or hinder innovation in a team.

BSBINN301A Promote innovation in a team environment

Locations: Industry, Sunshine.

Prerequisites: Nil.

Description: This unit describes the performance outcomes, skills and knowledge required to be an effective and pro active member of an innovative team.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to work collaboratively as part of a team, to provide guidance and support to others, and to participate in open and constructive discussions; - creative thinking skills to generate, explore, test and challenge ideas; - learning skills to stretch boundaries of own knowledge and skills; - literacy skills to analyse a wide range of information from varied sources; - planning and organisational skills to participate in the effective allocation of work in a team context; - problem-solving skills to work constructively to overcome issues and challenges of both a practical and conceptual nature and to make ideas become realities, and; - self-management skills to take a pro-active team role and to reflect on own performance in modelling and encouraging behaviour that supports innovation. Students will also be expected to demonstrate the following knowledge: - barriers to innovation that can occur within a team and broader barriers that sometimes hinder innovation; - broad concepts of innovation including what innovation is, different types of innovation and the benefits of innovation; - characteristics of teams that are more likely to be innovative and characteristics of broader environments that support and encourage innovation; - different roles that people may play within a team, how this impacts on the way a team works and what it might achieve, and; - group dynamics in a team.

BSBINN502 Build and sustain an innovative work environment

Locations: Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to create an environment that enables and supports the application of innovative practice focusing

on a holistic approach to the integration of innovation across all areas of work practice. It applies to individuals working in leadership or management roles in any industry or community context. The individual could be employed by the organisation, but may also be an external contractor, the leader of a cross organisation team or of a self-formed team of individuals. The work group could be permanent or temporary in nature.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - establishing procedures and practices that foster innovation; - reinforcing the value of innovation to the vision and objectives of the organisation; - modelling behaviour including being receptive to ideas, giving constructive advice, evaluating own work, establishing and maintaining relationships based on mutual respect and trust, taking considered risks that provide opportunities for innovation; - evaluating how the physical environment can be enhanced to support innovation and collaboration and collaborating on ideas to make improvements including in the selection of physical resources and equipment, and the design, fit-out and decoration of the workspaces, and; - making changes to a workspace that will encourage innovation in at least one of: design; fit-out; decoration. Students will also be expected to demonstrate the following knowledge: - explain the concepts and theories of innovation and how these link to innovation in practice; - explain the context for innovation in the workplace including core business values, overall objectives, broader environmental context and the need to ensure the value and benefit of innovative ideas and projects; - discuss the factors and tools that can motivate individuals to use creative thinking and apply innovative work practices; - research the legislative framework that impacts on operations in the relevant workplace context; - explain how different approaches to management and leadership can support or hinder innovation, and; - discuss typical challenges and barriers to innovation within teams and organisations and ways of overcoming these including rewarding and celebrating innovation, coaching and learning, modelling behaviour and managing the physical environment.

BSBINN601 Lead and manage organisational change

Locations:Industry, Footscray Nicholson.

Prerequisites:Nil.

Description:This unit describes skills and knowledge required to determine strategic change requirements and opportunities; and to develop, implement and evaluate change management strategies. It applies to managers with responsibilities that extend across the organisation or across significant parts of a large organisation. They may have a dedicated role in human resources management, human resources development, or work in a strategic policy or planning area. The unit takes a structured approach to change management and applies to people with considerable work experience and organisational knowledge.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting

of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - analyse and interpret information about the organisation's internal and external environment and consult with stakeholders to identify requirements and opportunities for changes that support organisational objectives; - prioritise opportunities for changes with input from managers; - develop a change management project plan for the priority changes incorporating resource requirements, risk management and timelines; - develop strategies to communicate or educate the changes and embed them; - obtain approvals and agree reporting protocols with relevant managers and implement the plan including addressing barriers to change. and; - review and evaluate the change management project plan and modify as needed to achieve objectives. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - explain the change management process or cycle and strategies for communicating and embedding change; - explain how organisational behaviour and the external environment can impact on change strategies; - describe the components of a change management project plan, and; - list potential barriers to change and explain possible strategies to address barriers.

BSBIPR401 Use and respect copyright

Locations:Footscray Nicholson, Online.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to use and respect copyright. It covers maintaining control over the copyright owner's work, commercialising copyright material, preventing the unauthorised use of an original work and using other party's original work legitimately. It applies to people who may be authors, creators or other owners of works covered by copyright. It also applies to employees who have a role in ensuring that their organisation's copyright is protected and/or that their organisation uses others' copyright appropriately to benefit the organisation without infringing the rights of copyright owners.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - review and interpret information to determine how copyright applies in the organisation; - implement and review organisational policies and procedures to ensure that own and others' original works are protected; - recommend actions to address risks and infringements; - communicate advice or recommendations about copyright to a range of stakeholders, and; - identify the need for training on copyright and implement training as appropriate. Students will also be expected to demonstrate the following knowledge: - outline the legislative framework for copyright and its application to the organisation; - list and describe the types of works that attract copyright; - identify sources of information and advice on copyright; - explain methods to limit or deter unauthorised use of copyright material; - explain direct and indirect infringement; - give examples of action to take if infringement occurs; - give examples of when authorisation for use of copyright material is needed and how to obtain it; - outline different types of licenses and how they apply to the organization, and; - outline options for commercialisation of copyright and potential benefits for the organisation.

BSBIPR501 Manage intellectual property to protect and grow business

Locations:Footscray Nicholson.

Prerequisites:Nil.

Description:This unit describes the performance outcomes, skills and knowledge required to protect, secure and effectively use intangible assets of value to an organisation. It focuses on establishing and maintaining systems to protect and exploit an organisation's intellectual property to ensure business growth.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - identify and analyse information and advice from a range of sources to determine; - legislation, regulations and organisational policies and procedures relevant to intellectual property (IP); - organisation's assets, their value and where they are created or procured; - IP from other people or organisations that is used by the business; - organisation's IP rights and options for protection; - costs, benefits and risks of protecting IP; - potential for business growth through organisation's IP; - review or develop organisational strategy, policies and procedures for protection, management and use of IP; - recordkeeping; - ensuring employees, partners and contractors protect IP; - identifying and responding to infringements; - promoting a culture of compliance and respect for the intellectual property rights; - review and evaluate strategies, policies and procedures for IP and make adjustments and improvements as appropriate, and; - manage and contribute to the development and implementation of commercialisation of organisation's IP. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - describe types of intellectual property as they relate to the organisation; - explain processes for identifying and valuing the organisation's IP; - give examples of options for commercialisation of IP; - outline typical barriers to implementing policy and procedures to manage IP and possible strategies to address them; - identify relevant legislation and regulations relating to the organisation's intellectual property rights and responsibilities, and; - outline internal and external sources of information and advice relevant to intellectual property.

BSBITB501 Establish and maintain a workgroup computer network

Locations:Footscray Nicholson.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to establish a workgroup computer network with an information technology consultant and to manage the network by keeping records, responding to problems, assisting users and providing training. It applies to individuals employed in a range of work environments who are required to apply broad knowledge of computer networks; they may be responsible for installing and maintaining the network, but they will work closely with computer professionals in all aspects of this process. In doing so, they may provide administrative support within an enterprise, or may have been delegated these responsibilities for their workgroup or organisation.

Required Reading:Lecturer will provide teaching and learning materials as required in the form of VU produced Workbooks.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge

and skill competence within set and controlled parameters in accordance with each competency unit's learning outcomes and performance criteria requirements, including the setting of project and work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - choose, install and maintain software and hardware in accordance with network and organisation requirements; - identify and address network problems; - consult with information technology (IT) professionals; - provide training or assistance to users on using the network. Students will also be expected to demonstrate the following knowledge: - explain the features of computer networking; - outline organisational policies and procedures relating to the tasks required; - describe software licensing rights and responsibilities. .

BSBITU102 Develop keyboard skills

Locations:Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to develop basic keyboard skills using touch typing techniques in a broad range of settings. It applies to individuals who perform a range of mainly routine tasks and generally work under direct supervision using limited practical skills and fundamental knowledge.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - follow ergonomic and organisational and work health and safety (WHS) requirements; - use keyboard functions to enter alpha and numeric data; - develop touch-typing techniques and speed and accuracy, and; - proofread and edit documents. Students will also be expected to demonstrate the following knowledge: - identify key provisions of relevant legislation from all forms of government that may affect aspects of business operations, such as WHS, and; - identify organisational benchmarks for keyboarding.

BSBITU201 Produce simple word processed documents

Locations:Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine, Online, Geelong Learning Links..

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to correctly operate word processing applications in production of workplace documents. It applies to individuals who perform a range of routine tasks in the workplace, using a limited range of practical skills and fundamental knowledge of word processing and software in a defined context, under direct supervision or with limited individual responsibility.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - produce documents following correct ergonomic, conservation requirements and organisational policies and

procedures; - adhere to organisational style manual when formatting documents; - refer to help function and user documentation to rectify document problems; - use system features, and; - follow designated timelines when preparing documents. Students will also be expected to demonstrate the following knowledge: - identify basic formatting styles and their effect on formatting, readability and appearance of documents; - describe purpose, use and function of word processing software; - outline organisational requirements for ergonomics, work periods and breaks, and conservation techniques, and; - describe what is contained in an organisational style guide.

BSBITU202 Create and use spreadsheets

Locations: Industry, Footscray Nicholson, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to correctly create and use spreadsheets and charts using spreadsheet software. It applies to individuals who perform a range of routine tasks in the workplace using a limited range of practical skills and fundamental knowledge of creating spreadsheets in a defined context under direct supervision or with limited individual responsibility.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - produce documents following correct ergonomic, conservation, organisational and statutory requirements; - consult with appropriate personnel as required; - adhere to organisational style and presentation requirements; - refer to online help function and user documentation to rectify document problems; - create and modify simple charts; - follow designated timelines and ensure high accuracy when preparing documents, and; - demonstrate ability to prevent data loss and damage. Students will also be expected to demonstrate the following knowledge: - demonstrate knowledge of how to format workplace documents; - describe organisational requirements for ergonomic standards, work periods and breaks, and conservation techniques; - outline organisational guidelines on spreadsheet manipulation and processing, and; - explain purpose and range of use of spreadsheet functions.

BSBITU302 Create electronic presentations

Locations: Industry, Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to design and produce electronic presentations for speakers, for self access and online access. It applies to individuals employed in a range of work environments who design electronic presentations. They may work as individuals providing administrative support within an enterprise, or may be responsible for production of their own electronic presentations.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of

competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - adhere to organisational requirements and strategies when creating electronic presentations including: ergonomic requirements, and; energy and resource requirements; - adhere closely to task requirements: following designated timelines; achieving consistency of design and layout; ensuring correct editing and style requirements; - use advanced software features; - communicate effectively with personnel, and; - print and store presentation. Students will also be expected to demonstrate the following knowledge: - outline key provisions of relevant legislation, standards and codes that affect aspects of business operations, and; - explain how design features affect the readability and appearance of electronic presentations.

BSBITU303 Design and produce text documents

Locations: Industry, Footscray Nicholson, St Albans, Werribee, Sunshine, Online, Geelong Learning Links.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to design and develop text-based documents using advanced features of word processing software. It applies to individuals who possess fundamental skills in computer operations and keyboarding, and basic skills in operation of word processing software. They may work as individuals who provide administrative support within an enterprise, or may be technical/knowledge experts responsible for production of their own word processed documents.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - adhere to organisational requirements and strategies when creating text documents; - adhere closely to task requirements and required specifications; - use advanced software features; - communicate effectively with personnel, and; - overcome problems by referring to user documentation, manuals and online help. Students will also be expected to demonstrate the following knowledge: - outline various formatting styles and their impact on formatting, readability and appearance of documents; - explain organisational requirements for ergonomics, work periods and breaks, and conservation techniques; - describe purpose and contents of an organisational style guide, and; - identify purpose, uses and functions of word processing software.

BSBITU303A Design and produce text documents

Locations: Industry, Footscray Nicholson, City Queen, Online.

Prerequisites: Nil.

Description: This unit describes the performance outcomes, skills and knowledge required to design and develop predominantly text based documents using advanced features of word processing software.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of

competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to clarify requirements of documents; - editing and proofreading skills to check own work for accuracy against original; - keyboarding skills to enter text and numerical data; - literacy skills to read and understand the organisation's procedures, and to use models to produce a range of documents, and; - problem-solving skills to use processes flexibly and interchangeably. Students will also be expected to demonstrate the following knowledge: - formatting styles and their impact on formatting, readability and appearance of documents; - organisational requirements for ergonomics, work periods and breaks, and conservation techniques; - organisational style guide, and; - purposes, uses and functions of word processing software.

BSBITU304 Produce spreadsheets

Locations: Footscray Park, Industry, Footscray Nicholson, Werribee.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to develop spreadsheets through the use of spreadsheet software. It applies to individuals employed in a range of environments who tend to be personally responsible for designing and working with spreadsheets under minimal supervision.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - design spreadsheets that address a range of data and organisational requirements; - use software functions, graphics and support materials to create spreadsheets, and; - apply knowledge of formatting requirements for workplace documents. Students will also be expected to demonstrate the following knowledge: - describe formatting requirements of workplace documents; - identify organisational guidelines on spreadsheet design and use, and; - explain organisational requirements for ergonomic standards, work periods and breaks, and conservation techniques.

BSBITU304A Produce spreadsheets

Locations: Footscray Nicholson, City Queen.

Prerequisites: Nil.

Description: This unit describes the performance outcomes, skills and knowledge required to develop spreadsheets through the use of spreadsheet software.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to clarify requirements of spreadsheet; - editing and proofreading skills to check own work for accuracy against original; - keyboarding skills to enter text and numerical data; - literacy skills to read and understand organisational procedures, and to use basic models to produce a range of spreadsheets, and; - mathematical and statistical

skills to use spreadsheet functions such as sum, counts and averages. Students will also be expected to demonstrate the following knowledge: - formatting requirements of workplace documents; - organisational guidelines on spreadsheet design and use, and; - organisational requirements for ergonomic standards, work periods and breaks, and conservation techniques.

BSBITU306 Design and produce business documents

Locations: Footscray Park, Footscray Nicholson, St Albans, Werribee, City King St, Sunshine, Online, Geelong Learning Links..

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to design and produce various business documents and publications. It includes selecting and using a range of functions on a variety of computer applications. It applies to individuals who possess fundamental skills in computer operations and keyboarding. They may exercise discretion and judgement using appropriate theoretical knowledge of document design and production to provide technical advice and support to a team.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - select appropriate technology and software for design and production of business documents; adhere to organisational requirements when: selecting layout and style; opening and generating files; producing documents within designated timelines; naming and storing documents; printing and presenting documents; - adhere to task requirements when producing documents including: applying basic design principles; applying consistent formatting; using appropriate styles; using correct layouts; proofreading as required; - use appropriate data storage options; - apply knowledge of functions and features of contemporary computer applications, and; - print and present completed documents. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - identify appropriate technology for production requirements; - describe functions and features of contemporary computer applications; - outline organisational policies, plans and procedures, and; - list organisational requirements for document design e.g. style guide.

BSBITU306A Design and produce business documents

Locations: Footscray Nicholson, City Queen, Online.

Prerequisites: Nil.

Description: This unit describes the performance outcomes, skills and knowledge required to design and produce various business documents and publications. It includes selecting and using a range of functions on a variety of computer applications.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be

expected to demonstrate the following required skills: - keyboarding and computer skills to complete a range of formatting and layout tasks; - literacy skills to read and understand a variety of texts; to prepare general information and papers according to target audience; and to edit and proofread documents to ensure clarity of meaning and conformity to organisational requirements; - numeracy skills to access and retrieve data, and; - problem-solving skills to determine document design and production processes. Students will also be expected to demonstrate the following knowledge: - appropriate technology for production requirements; - functions and features of contemporary computer applications; - organisational policies, plans and procedures, and; - organisational requirements for document design e.g. style guide.

BSBITU307A Develop keyboarding speed and accuracy

Locations: Footscray Nicholson, City Queen.

Prerequisites: Nil.

Description: This unit describes the performance outcomes, skills and knowledge required to develop keyboard skills with speed and accuracy using touch typing techniques

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - keyboarding skills to enter text and numerical data; - literacy skills to read, proofread and edit documents, and; - numeracy skills to collate and present data, graphs and annotated references. Students will also be expected to demonstrate the following knowledge: - key provisions of relevant legislation from all forms of government that may affect aspects of business operations, such as: privacy laws, copyright, and OHS.

BSBITU309A Produce desktop published documents

Locations: Footscray Nicholson, Online.

Prerequisites: Nil.

Description: This unit describes the performance outcomes, skills and knowledge required to design and produce desktop published documents.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to clarify requirements of documents; - culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities; - editing and proofreading skills to check own work for accuracy against original; - keyboarding skills to enter text and numerical data; - literacy skills to read and understand the organisation's procedures and to use models or exemplars to produce a range of documents, and; - problem-solving skills to edit documents and to resolve issues of consistency of design. Students will also be expected to demonstrate the following knowledge: - energy and resource conservation techniques; - organisational requirements for ergonomics, work periods and breaks; - organisational style guides;

- purposes, uses and functions of desktop publishing software, and; - styles and their effect on formatting, readability and appearance of document. .

BSBITU401 Design and develop complex text documents

Locations: Footscray Park, Footscray Nicholson, City King St.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to design and develop business documents using complex technical features of word processing software. It applies to individuals who work in a range of business environments and have skills which may be applied in the provision of administrative support within an enterprise, or by technical/knowledge experts responsible for producing their own word processed documents.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - follow organisational and safe work practices; - adhere to organisational requirements; - adhere to task requirements when producing complex documents; - resolve issues by referring to user documentation and online help; - use appropriate data storage options; - apply knowledge of complex operation and functions of industry software applications, and; - communicate with relevant personal. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - outline various formatting styles and their effect on formatting, readability and appearance of documents; - explain organisational requirements for ergonomics, work periods and breaks, and conservation techniques, and; - describe purpose and contents of an organisational style guide.

BSBITU402 Develop and use complex spreadsheets

Locations: Footscray Park, Footscray Nicholson, St Abans, Werribee, City King St, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to use spreadsheet software to complete business tasks and produce complex documents. It applies to individuals employed in a range of work environments who require skills in creation of complex spreadsheets to store and retrieve data. They may work as individuals providing administrative support within an enterprise, or may be independently responsible for designing and working with spreadsheets relevant to their own work roles.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - follow organisational and safe work practices; - adhere to organisational requirements; - adhere to identified or task requirements when producing documents; - resolve issues by referring to user

documentation and online help; - use appropriate data storage options; - evaluate tasks to improve efficiency; - apply knowledge of functions and features of contemporary computer applications, and; - communicate with relevant personnel. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - explain advanced functions of spreadsheet software applications; - describe impact of formatting and design on presentation and readability of data, and; - explain organisational requirements for ergonomics, work periods and breaks, and conservation techniques.

BSBITU404 Produce complex desktop published documents

Locations:Footscray Park.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to design and produce complex desktop published documents. This unit applies to individuals employed in a range of work environments who require well-developed skills in desktop publishing. They may be individuals providing administrative support within an enterprise, or others responsible for production of their own documents.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - follow organisational and safe work practices including: ergonomic requirements; energy and resource conservation techniques; - adhere to organisational requirements for: ensuring consistency of style and image; logically sequencing data; producing documents within designated timelines; naming and storing documents; - adhere to task requirements when producing documents, and; - resolve any issues including: formatting issues; errors and omissions; problems with design and production. Students will also be expected to demonstrate the following knowledge: - outline various formatting styles and their effect on formatting, readability and appearance of documents; - explain organisational requirements for ergonomics, work periods and breaks, and energy and resource conservation techniques; - identify purposes, uses and functions of desktop publishing software, and; - describe purpose and contents of an organisational style guide. .

BSBITU404A Produce complex desktop published documents

Locations:Footscray Nicholson, Online.

Prerequisites:Nil.

Description:This unit describes the performance outcomes, skills and knowledge required to design and produce complex desktop published documents.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to clarify requirements of documents; - culturally appropriate communication skills to

relate to people from diverse backgrounds and people with diverse abilities; - editing and proofreading skills to check own work for accuracy against original; - keyboarding skills to enter text and numerical data; - literacy skills to read and understand organisation's procedures and to use models or exemplars to produce a range of documents, and; - problem-solving skills to edit documents and to resolve issues of consistency of design. Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - review organisational policies to determine information that may be subject to confidentiality; - negotiate and present persuasively; - identify relevant stakeholder groups; - communicate clearly with key stakeholders to position the business to best effect including listening actively, understanding the information needs of others and adapting communication to suit the audience; - prepare for, participate in, and lead meetings to obtain outcomes, and; - prepare and make presentations to groups of people including: - identifying suitable fora for presentations; - presenting reliable information; - designing the presentation to meet the needs of the audience, and; - answering questions clearly and concisely. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - key industry, media and government organisations, events and communication channels that are relevant to the organisation; - key principles of cross-cultural communication; - key features of various techniques for negotiation, mediation, conflict resolution and incident de-escalation; - key features of structured and inclusive meeting procedures; - key features of relevant organisational objectives, and; - key features of relevant organisational policies and procedures, including in relation to the confidentiality of information.

BSBLDR805 Lead and influence change

Locations:Industry.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to apply organisational leadership in change management through influencing and shaping an organisational culture that is receptive to and embraces the opportunities for change. The unit includes influencing organisational culture, anticipating change and providing strategic leadership in change management. It applies to people who use cognitive and creative skills to review, critically analyse, consolidate and synthesise knowledge, in order to generate ideas and provide solutions to complex problems. They use communication skills to demonstrate their understanding of theoretical concepts and to transfer knowledge and ideas to others.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - plan and implement a strategic review of organisational culture in an organisation and develop a vision for the future; - research and anticipate the likelihood of change for the organisation; - identify, support and promote the advantages of change to stakeholders by communication, role modelling and celebrating success; - embed change management into organisational policies, procedures and practices including recruitment, training, procurement and resourcing, and; - implement and monitor change management in a continuous improvement cycle. Students will also be expected to demonstrate the following knowledge: - explain change management models and current best practice; - give examples of change management leadership strategies; - outline the effects of change and ways to ensure strategic advantage; - list the key factors driving change in the internal and external operating environment of the business and community; - outline organisational goals, policies, procedures and guidelines relevant to change management, and; - outline the relevant legislative and regulatory context of the organisation as it relates to change management.

BSBLED401 Develop teams and individuals

Locations:Footscray Park, Industry, Footscray Nicholson, Werribee, City King St, Sunshine.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to determine individual and team development needs and to facilitate the development of the workgroup. It applies to individuals with a broad knowledge of learning and development who apply their skills in addressing development needs to meet team objectives. They may have responsibility to provide guidance or to delegate aspects of tasks to others.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be

expected to demonstrate the following performance criteria: - systematically identify and implement learning opportunities for others; - collect feedback on team and individual performance; - give and receive feedback from team members to encourage participation in and effectiveness of the team; - collaboratively develop learning plans to match skill needs of individuals and groups; - provide mentoring and coaching assistance to teams and individuals, and; - monitor and review workplace learning. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - describe facilitation techniques to encourage team development and improvement; - outline organisational policies, plans and procedures for developing teams, and; - identify career paths and competency standards relevant to the industry.

BSBLED501 Develop a workplace learning environment

Locations: Industry, Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to encourage and support the development of a learning environment in which work and learning come together. Particular emphasis is on the development of strategies to facilitate and promote learning and to monitor and improve learning performance. It applies to individuals who have a prominent role in encouraging, supporting and facilitating the development of a learning environment in which work and learning come together. At this level, work will normally be carried out within complex and diverse methods and procedures, which require the exercise of considerable discretion and judgement, using a range of problem solving and decision making strategies.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - collaboratively review performance development needs of individuals and teams; - plan professional development for individuals and teams that enhances organisational performance; - develop and implement learning plans; - liaise with training and development specialists; - recognise workplace achievement by giving feedback, recognition and rewards; - monitor and improve workplace learning, and; - record and report workplace learning outcomes. Students will also be expected to demonstrate the following knowledge: - explain how management of relationships can achieve a learning environment, and; - identify principles and techniques involved in the management and organisation of: adult learning; coaching and mentoring; consultation and communication; improvement strategies; leadership; learning environment and learning culture; monitoring and reviewing workplace learning; problem identification and resolution; record keeping and management methods; structured learning; work-based learning.

BSBLED503 Maintain and enhance professional practice

Locations: Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required by individuals to manage their own professional development and ongoing performance.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic

and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - adhere to organisation's framework when setting personal goals and plans; - determine personal learning needs incorporating feedback obtained from colleagues and clients; - document personal learning needs in a professional development plan; - use networking and professional development activities to maintain own professional practice, and; - identify and implement improvements to own professional practice and keep records of progress. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - describe organisational goals and objectives and how they impact personal work goals and objectives; - list a range of continuous improvement techniques and processes, and their application; - identify networks relevant to professional practice; - describe the types and availability of professional development activities and opportunities, and; - outline relevant legislation, codes of practice and standards that apply to professional practice.

BSBLEG403 Maintain trust accounts

Locations: Footscray Nicholson, City Queen.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to maintain trust monies related to specific files, under instruction of a legal practitioner. It applies to individuals who work under supervision and use well-developed skills and a broad knowledge base to provide support in a range of legal service settings. They apply solutions to a range of unpredictable problems, and analyse and evaluate information from a variety of sources.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - comply with organisation's trust accounting policies and procedures demonstrating honesty, integrity and accuracy in calculations and reconciliations; - prepare accurate and compliant documentation, and; - resolve or appropriately refer discrepancies and irregularities. Students will also be expected to demonstrate the following knowledge: - outline scope of own role; - explain legal terminology in relation to trust accounting; - list relevant Australian Taxation Office regulations, current legislation governing trust accounts, and legal processes; - explain required documentation for trust account transactions, and security, confidentiality and privacy requirements; - discuss statutory charges, taxes and other fees applicable to institutions, and; - summarise accepted codes of practice relevant to the workplace.

BSBLEG418A Produce complex legal documents

Locations: Footscray Nicholson, City Queen.

Prerequisites: Nil.

Description: This unit describes the performance outcomes, skills and knowledge required to produce complex legal documents using a range of advanced functions

within at least one software package and integrating functions from at least two software packages. A range of legislation, rules, regulations and codes of practice may apply to this unit at the time of endorsement, depending on job roles and jurisdictions.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - follow and interpret instructions; - provide clear and specific instructions about information required; - edit and proofread to ensure: clarity of meaning and conformity to enterprise requirements; accuracy and consistency of information; - numeracy skills to collate and present data, graphs and annotated references; - problem-solving skills to use processes flexibly and interchangeably; - technology skills to use a range of software applications, and; - organisational skills to select and apply the procedures and strategies needed to perform a range of tasks within designated timelines. Students will also be expected to demonstrate the following knowledge: - application of organisation's policies and procedures in relation to precedent design; - developing and testing templates, and; - accepted codes of practice relevant to the workplace.

BSBLEG510 Apply legal principles in family law matters

Locations:Footscray Nicholson.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to apply legal principles within the family law framework.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - collect accurate and detailed facts from clients about property, support and parenting, and interpret and communicate outcomes according to law; - provide appropriate information and documentation to clients at appropriate stages of legal process; - calculate and document relevant costing according to organisational requirements, and; - complete and present documentation for review. Students will also be expected to demonstrate the following knowledge: - explain relevant court processes for family law matters; - outline legal processes required in this role; - describe family law as it applies to scope of workplace responsibilities; - outline documentation required in family law matters, and; - summarise the organisation's required policies and procedures pertinent to this role.

BSBLEG511 Apply legal principles in criminal law matters

Locations:Footscray Nicholson.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to carry out administrative tasks within criminal law frameworks.

Required Reading:The qualified trainer and assessor will provide teaching and

learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - prepare appropriate documentation according to organisation's policies and procedures and provide it to required people at the appropriate time; - communicate with clients in a sensitive, discreet and professional manner, and; - conduct work according to legislative requirements and within accepted codes of conduct. Students will also be expected to demonstrate the following knowledge: - outline the scope of job role in the context of legislation, regulations and codes of practice; - explain relevant court processes; - summarise current criminal law legislation; - outline documentation required in criminal law matters, and; - identify the organisation's required policies and procedures pertinent to this role.

BSBLEG512 Apply legal principles in property law matters

Locations:Footscray Nicholson.

Prerequisites:Nil.

Description:This unit describes skills and knowledge required in the conduct and administration of straightforward property law matters.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - prepare, give and obtain appropriate and accurate information and documents from the parties at the required stages of the legal process; - conduct duties according to organisational and legislative requirements; - apply the principles of property law in the buying and selling of property and preparation and execution of leases, and; - prepare documentation and carry out the administrative activities associated with buying and selling property and preparing leasing contracts. Students will also be expected to demonstrate the following knowledge: - outline the scope of job role in context of legislation, regulations and codes of practice; - explain relevant court processes; - summarise current property law; - outline legal processes required in this role; - outline documentation required in property law, and; - discuss the organisation's policies and procedures pertinent to this role.

BSBLEG513 Apply legal principles in corporation law matters

Locations:Footscray Nicholson.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to establish business structures and prepare associated documentation within corporation law frameworks.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting

of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - prepare and lodge accurate and appropriate documentation at required stages of legal process; - conduct all duties according to legislative and organisational requirements, and; - provide assistance to others to achieve joint outcomes when necessary. Students will also be expected to demonstrate the following knowledge: - outline scope of job role in the context of relevant legislation, regulations and codes of practice; - explain relevant court processes; - summarise current corporation law principles; - outline legal processes required in this role; - outline documentation required in corporation law matters, and; - discuss organisation's required policies and procedures pertinent to this role.

BSBLEG514 Assist with civil procedure

Locations: Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to assist in civil procedure contexts and processes of litigation.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - assess matters in dispute and prepare accurate costing documents; - obtain and prepare accurate, compliant and complete litigation documents according to legislative and organisational requirements, and; - complete administrative tasks for the discovery process. Students will also be expected to demonstrate the following knowledge: - explain alternative methods of dispute resolution; - explain what purpose of discovery means in civil matters; - outline documentation required for civil procedure matters; - identify the organisation's policies and procedures pertinent to civil procedures; - summarise the legislation and accepted codes of practice relevant to civil procedure matters, and; - outline the role of the courts and associated personnel for civil matters.

BSBLEG515 Apply legal principles in wills and probate matters

Locations: Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to prepare wills and probates, powers of attorney and other deceased estate documentation.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - determine and obtain information required to handle will and probate matters; - prepare appropriate documentation, including wills, probate and other deceased estate documentation, and; - conduct all work according to legislative and organisational requirements. Students will also be expected to demonstrate the following knowledge: - outline the

scope of the job role in the context of legislation, regulations and codes of practice; - summarise the organisation's policies and procedures for wills and probate matters; - outline the roles and responsibilities of parties involved in wills and probate matters, and; - briefly outline the forms, documents and annexures relevant to wills and probate.

BSBLIB201 Assist with circulation services

Locations: Footscray Nicholson, Online.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to process loan transactions and respond to circulation and lending enquiries from customers. It applies to individuals working under supervision within established policies and procedures, in frontline library and information services roles.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - apply knowledge of circulation services processing and procedures to complete several customer transactions and/or enquiries; - process loans and returns within required time constraints and according to procedures, and; - communicate courteously and effectively with customers. Students will also be expected to demonstrate the following knowledge: - outline important features of circulation systems and technology in different industry contexts; - describe relevant systems, policies and procedures for: customer service; handling money and security; inter-library loans and lending; pre-paid services; - describe key principles underpinning operation of manual and automated circulation systems, including self-service systems, and; - discuss security protocols for: clients; money; staff; theft; vandalism.

BSBLIB202 Process information resource orders

Locations: Footscray Nicholson, Online.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to determine, order and receive orders for information resources according to organisational acquisition procedures. It applies to individuals undertaking straightforward administrative and organisational functions in a library or information services context, generally under supervision, within established procedures.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - accurately process orders for information resources; - apply knowledge of bibliographic and catalogue record components to determine order requirements; - process multiple orders for different types of resources, and; - work within realistic industry time constraints. Students will also be expected to demonstrate the following knowledge: - explain how to interpret organisational procedures, including systems for determining availability of resources;

- describe a range of available print and electronic information resources, and; - describe typical ordering processes and systems used by information services providers.

BSBLIB303 Provide multimedia support

Locations: Footscray Nicholson, Online.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to use a range of multimedia equipment and programs at a non-specialist level. It applies to individuals who work under supervision and have some responsibility to complete work within established guidelines.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - use current multimedia equipment and programs; - assist others to use multimedia equipment and programs; - correct minor operational faults, and; - report on use of multimedia equipment and programs and make recommendations for upgrading. Students will also be expected to demonstrate the following knowledge: - explain range of current multimedia options relevant to the work context at a generalist level; - describe features and general operating functions of different multimedia options; - list common faults and ways of rectifying these in multimedia equipment and programs used; - outline scope of repair and maintenance activities that can be undertaken without specialist assistance; - identify sources of information on multimedia equipment and programs, and; - explain conditions of current licences and equipment maintenance agreements.

BSBLIB304 Develop and use information literacy skills

Locations: Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to define, locate, select, evaluate and present information in response to identified needs. It applies to individuals employed in any capacity, as well as members of the wider community, as information literacy skills have broad application in all industries, as well as to life skills in general. At this level, work is usually undertaken under supervision, though some autonomy and judgement can be expected within established parameters.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - define, locate, select and evaluate relevant information in response to identified needs; - present information in a logical, well-organised and appropriate manner; - assess and develop strategies to improve own information literacy skills, and; - complete tasks in industry realistic timelines and conditions. Students will also be expected to demonstrate the following knowledge: - identify types of information resources available on a range of topics relevant to job role or required outcome; - discuss techniques and procedures

for accessing different information sources, including use of current technology, and; - discuss relevant protocols or organisational policies and procedures in relation to presentation of different types of information. .

BSBLIB305 Use established cataloguing tools

Locations: Footscray Nicholson, Online.

Prerequisites: Nil.

Description: This unit describes skills and knowledge required to select and use established tools, systems, technologies, conventions and standards to search, retrieve and validate data from catalogues at an introductory level. It applies to individuals working in a library or information services context, under supervision, who apply a general understanding of cataloguing and bibliographic concepts in their job.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - apply general knowledge of cataloguing tools and standards to work activities; - demonstrate an understanding of cataloguing entries and components to search and retrieve records, and; - use current industry systems, technologies and conventions. Students will also be expected to demonstrate the following knowledge: - identify principal cataloguing tools used in libraries and information services in Australia endorsed by the Australian Committee on Cataloguing (ACOC); - describe application of tools to different areas of work; - outline rationale behind cataloguing tools and systems in the broad library and information services context; - explain basic components and structure of bibliographic records, including descriptive cataloguing records and machine readable cataloguing (marc) formats, and; - describe commonly used classification and subject heading schemes.

BSBLIB402 Consolidate and maintain industry knowledge

Locations: Footscray Nicholson, Online.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to develop and apply knowledge of library and information services and/or the cultural industry sectors of museums and galleries, and maintain its currency. It applies to individuals who are working in or seeking work in organisations providing library and information services and/or galleries and museums, and who work autonomously according to established procedures.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - source, assess and evaluate a range of information for the relevant industry sector; - explain value and principles of relevant industry sector, and how they relate to funding and service delivery; - recognise legislation relevant to the workplace and ethical issues; - identify major

industry trends and technology developments, and; - identify a career path. Students will also be expected to demonstrate the following knowledge: - identify sources of information on library and information services and/or cultural industry sectors of museums and galleries; - outline historical development of relevant industry sectors; - explain underpinning values, principles and philosophies of the relevant industry sectors; - identify legislation and ethical practices impacting the relevant industry sectors; - outline career opportunities and career pathways in the relevant industry sectors; - discuss current trends within the relevant industry sectors and the potential impacts and opportunities they present; - explain the nature, role and functions of relevant major professional associations or industry bodies, and; - discuss employee and employer obligations.

BSBLIB403 Complete a range of cataloguing activities

Locations: Footscray Nicholson, Online.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to design systems and structures related to copy and original descriptive cataloguing; to search, retrieve and edit material from existing records and to undertake general catalogue maintenance. This requires application of a sound knowledge of cataloguing standards and systems. It applies to individuals in information services organisations, working according to established procedures and guidelines, with minimal supervision, and with responsibility for maintaining catalogues, as well as for copy and original descriptive cataloguing.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - create, edit and maintain catalogue records accurately, and in the process demonstrate: - sound knowledge of bibliographic and catalogue record components; - knowledge of cataloguing standards; - use of current industry systems, and; - complete activities within realistic workplace time constraints. Students will also be expected to demonstrate the following knowledge: - reference cataloguing standards and systems used in Australian libraries endorsed by the Australian Committee on Cataloguing (ACOC); - apply commonly used automated cataloguing systems and shared cataloguing networks; - analyse frequently occurring cataloguing problems; - describe principles of bibliographic description and access; - compare and contrast ways of preparing original and copy cataloguing records; - describe procedures for maintaining cataloguing records, and; - discuss copyright, moral rights and intellectual property issues and legislation that impact cataloguing.

BSBLIB404 Use integrated library management systems

Locations: Footscray Nicholson, Online.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to apply a basic understanding of the interrelated functions of integrated library management systems (ILMS) to use online catalogues, process loan transactions, and provide circulation and lending services to meet customer needs.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - use integrated library management systems (ILMS); - maintain knowledge of trends and emerging technologies affecting ILMS, and; - demonstrate provision of customer support, including resolution of customer enquiries and complaints. Students will also be expected to demonstrate the following knowledge: - describe basic functions of ILMS; - provide examples demonstrating the interrelation of different modules in the ILMS; - describe and illustrate interrelation between different functions of an automated library management system, including cataloguing, circulation, and acquisitions modules; - describe basic features of online catalogues; - describe basic features of automated circulation systems, including self-charging systems and associated technologies; - discuss application of organisational policies and procedures, and; - identify safe work practices relating to using an ILMS.

BSBLIB405 Assist customers to access information

Locations: Footscray Nicholson, Online.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to help customers obtain information they need, that can be found in readily accessible sources. It applies to individuals working in frontline information services roles in any industry sector. They may be working in library and information services organisations, records management units, government departments, tourist information centres or community advisory organisations. These roles are undertaken within established guidelines under general supervision.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - use bibliographic tools and industry-current technology; - communicate information to several customers using a range of print and electronic information sources; - apply well-developed information literacy skills, and; - respond constructively to a wide range of information requests within established collections. Students will also be expected to demonstrate the following knowledge: - reference organisational policies in relation to customer assistance; - describe typical customer requests and appropriate information sources for responding; - describe techniques for using print and electronic reference resources and tools, including formulating search strategies; - analyse a range of information resources, formats and delivery options, including: document delivery and supply processes; electronic and print; interlibrary loans; - outline copyright, moral rights and intellectual property legislation, and issues relevant to information services providers, and; - explain cultural considerations when working with customers and potentially sensitive material.

BSBLIB406 Obtain information from external and networked sources

Locations: Footscray Nicholson, Online.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to establish the

information needs of customers, and then search external and networked sources to meet those needs. It applies to individuals working in frontline information services roles within established guidelines and under general supervision in library and information services contexts. They may be working in public, school, medical, law, business, or academic libraries. Work relates to information requests that cannot be satisfied from sources within the organisation.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communicate effectively and efficiently with customers; - apply well-developed information literacy skills; - use external sources and bibliographic tools, including electronic sources, to obtain different types of information, and; - search external sources effectively to meet a range of different information needs. Students will also be expected to demonstrate the following knowledge: - describe components of bibliographic records; - identify and discuss copyright, moral rights and intellectual property legislation and issues of interlibrary loans and document supply; - evaluate document delivery services and options, including for electronic formats; - identify external sources of information; - analyse information services networks that facilitate access to external sources; - locate and reference interlibrary lending policies and standards, such as the Australian Interlibrary Resource Sharing (ILRS) code; - evaluate range of available information sources for print and electronic materials; - evaluate range of available interlibrary lending networks and document delivery services and organisations, and; - discuss and compare search strategies for external and networked sources.

BSBLIB407 Search library and information databases

Locations:Footscray Nicholson, St Albans, Werribee, Sunshine, Online, Geelong Learning Links..

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to search and analyse information from a range of bibliographic and full text databases, evaluate these against specific criteria, and then present this information to clients. It applies to individuals who undertake regular database searches as part of their information services role. Work is undertaken with limited supervision and according to organisational and system guidelines.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - analyse and evaluate a range of databases; - adopt appropriate search techniques to source information in response to a range of customer needs; - use current industry systems and equipment efficiently and effectively, and; - respond effectively and appropriately to multiple and varied information requests. Students will also be expected to demonstrate the following knowledge: - describe role of databases in context of the information

services industry; - describe scope and type of databases available to information services providers; - define features of commonly used databases; - describe differences between database and internet searching; - compare and contrast several database searching techniques and procedures, and; - identify relevant copyright, moral rights and intellectual property issues and legislation relevant to the use of information from databases.

BSBLIB503 Develop and promote activities, events and public programs

Locations:Footscray Nicholson, Online.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to plan, develop and promote activities, events and public programs for different customer groups. It applies to individuals who work in a broad range of industry contexts and who focus on short-term planning and promotion of an activity, event or public program, and may have responsibility for the work outcomes of others.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - research, plan, develop and promote activities, events or public programs to meet specified needs, and; - conduct and evaluate effectiveness of activities, events or public programs. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - identify subject matter around which activities, events or public programs are developed; - outline features of typical policies, procedures and practices relating to provision of activities, events and public programs; - explain the concept of sustainable practice and its relevance to development of public programs; - identify sources of advice and specialist assistance for activity development; - discuss techniques for planning and scheduling activities, events and public programs; - outline interpretation techniques suitable for a wide range of audiences; - identify resources for planning, promoting, delivering and evaluating activities, events and public programs; - explain cultural protocols to be observed in developing programs, including those relating to Aboriginal or Torres Strait Islander contexts, and; - identify copyright, moral rights, privacy and intellectual property issues and legislation that impact development of activities, including those relevant to Aboriginal and Torres Strait Islander cultures, child protection and trade practices.

BSBLIB506 Maintain digital repositories

Locations:Footscray Nicholson, Online.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to populate and manage digital collections of information resources. It applies to individuals, working autonomously within established guidelines, with significant technical skills and knowledge in using, maintaining, improving and describing content and context of digital collections according to organisational and system guidelines.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each

unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - add to and remove resources from digital repositories using organisational policies and procedures, and ensuring the access and integrity of these, and; - create and edit metadata for digital repository resources. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - identify and describe access and preservation standards for digitisation; - discuss copyright, moral rights, digital rights management and intellectual property issues and legislation that impact digital repositories; - describe different digital file formats; - describe digital preservation techniques; - review information management principles for description and access; - maintain knowledge of current trends in digital repositories; - identify and describe licensing agreements covering digital resources; - reference metadata standards and systems used in Australian institutions, and; - review organisational procedures regarding digital repositories.

BSBLIB507 Promote literature and reading

Locations: Footscray Nicholson, Online.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to research and implement strategies that encourage and enhance literature and reading in a wide variety of contexts. Particular emphasis is on improving the literacy of customers by creating environments that provide access to relevant and attractive reading material in a variety of formats to suit a range of ages, reading levels and needs. It applies to individuals responsible for promoting literature and reading to clients as a way of meeting their needs. It applies in many industries, including libraries, information and cultural services, community services and health. Work is undertaken with limited supervision according to organisational guidelines.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - develop, implement and evaluate strategies to promote literature and reading; - meet customer literature requests; - apply information literacy skills when promoting literature and reading, and; - promote use of an organisation's collections and resources. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - define the concept of literacy and describe the role organisations play in promoting reading; - analyse scope and arrangement of literature collections in libraries and related organisations; - identify relevant literature information sources located in publications; - describe and contrast methods for arranging literature collections; - identify several frequently asked literature requests and outline strategies for answering such requests; - identify several literature reference resources and describe their applications, and; - describe categories and genres into which literature is divided.

BSBLIB509 Provide subject access and classify material

Locations: Footscray Nicholson, Online.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to analyse and catalogue complex material which requires application of bibliographic organisation methods and the ability to use interpretation and judgement to deviate from precedents where necessary. It applies to information services professionals with highly developed technical skills who work autonomously to facilitate customer access to information.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - construct subject access points and accurately classify material to be catalogued; - analyse subject content for cataloguing and classification purposes; - maintain and apply knowledge of bibliographic and catalogue record components, and cataloguing standards and conventions; - demonstrate a collaborative approach to resolving complex problems, and; - demonstrate use of current industry cataloguing systems. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - describe the purpose and function of various cataloguing tools; - select and apply appropriate classification schemes relevant to work context; - demonstrate subject access and control of methods; - demonstrate application of authority systems and files; - select and apply common automated cataloguing modules relevant to work context; - critically review catalogue maintenance principles and activities; - compare and contrast ways of modifying and upgrading records to suit customer needs; - analyse precedents and their use to inform cataloguing of complex materials and demonstrate interpretation and judgement to deviate from precedents where necessary; - identify and apply national and international cataloguing standards; - review current industry trends relating to cataloguing and classification processes, and; - discuss copyright, moral rights and intellectual property issues and legislation relevant to cataloguing practices.

BSBLIB510 Use and monitor advanced functions of integrated library management systems

Locations: Footscray Nicholson, Online.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to use and evaluate the functionality of integrated library management systems (ILMS) at an advanced level and to analyse the interrelated functions of an ILMS, as well as evaluate the systems and services. It applies to individuals working autonomously, within established policies and procedures, in functional areas of libraries. In some contexts, work may involve supervisory or team leader roles.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - use basic and advanced

features of an ILMS to locate information resources for customers; - conduct basic and advanced online catalogue searches; - provide information to customers in a courteous and helpful manner; - source and evaluate information regarding current industry trends in relation to ILMS, and; - evaluate functionality of an ILMS and make recommendations regarding new systems, upgrades and add-ons. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - describe basic operation of automated library management systems, including interrelation between cataloguing, circulation, online catalogue and acquisitions modules; - describe basic and advanced features of automated library management systems, including customer self-service systems and associated technologies; - discuss implications of relevant workplace policies and procedures in relation to lending and interlibrary loans; - describe procedures for document delivery modules; - describe procedures for handling money and security; - discuss best practice customer service policies and procedures, and; - analyse impact of relevant legislation on provision of library and information services.

BSBLIB511 Research and analyse information to meet customer needs

Locations: Footscray Nicholson, Online.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to provide customers with access to, and an analysis of, diverse and complex sources of information. It applies to individuals working in public, corporate or institutional libraries, record management units, government departments, tourist information centres, community advisory organisations or other library and information services contexts, who respond to complex information needs, working autonomously with limited guidance from others.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - analyse information to ensure suitability to meet customer needs; - apply knowledge of the organisation's reference, research and general collections; - apply knowledge of types and scope of databases and other accessible reference tools; - define, locate, analyse and evaluate information; - demonstrate effective interviewing, communication and negotiation with customers about information needs; - efficiently and effectively respond to complex and varied information requests; - demonstrate effective search techniques using a range of print and electronic information sources and tools, and; - demonstrate working within time constraints that reflect industry practice and standards. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - describe scope and range of information sources available in print and electronic formats, including databases and technologies, such as current and emerging web applications; - analyse various techniques for searching and retrieving information from a range of sources, including the internet and other electronic sources; - compare and contrast strategies for obtaining information from external agencies or specialist organisations; - describe a range of available delivery options for presentation of information resources; - outline legal considerations relating to accessing information sources; - define bibliographic standards; - evaluate

several reference sources and databases, both print and online, and; - identify and describe protocols associated with culturally sensitive material, including Aboriginal or Torres Strait Islander cultural material.

BSBLIB513 Monitor compliance with copyright and licence requirements

Locations: Footscray Nicholson, Online.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to monitor compliance with copyright and licence requirements for collections held by Australian archives, galleries, libraries and museums. It applies to individuals who are responsible for monitoring the organisation's compliance with copyright and licence requirements regarding collections held in Australian archives, galleries, libraries and museums, and who operate autonomously but in consultation with other colleagues and broader stakeholders.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - source information about copyright relevant to an organisation; - thoroughly review policies, procedures and licences to ensure compliance with legislation, and; - conscientiously follow procedures to minimise risk of infringements of copyright and licence conditions. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - identify relevant copyright and licensing laws and regulations relating to an organisation; - explain digital preservation; - outline licensing and role of collecting societies; - explain open source copyright licences; - identify organisational policies, protocols and procedures on copyright and licences; - outline principal features of the Copyright Act 1968 (Commonwealth) and Copyright Regulations 1969 and how they are applicable; - explain the rights of copyright owners, including digital rights management; - identify sources of information and advice on copyright, and; - explain protocols for handling culturally sensitive material, including Aboriginal and Torres Strait Islander cultural material.

BSBLIB603 Contribute to collection management

Locations: Footscray Nicholson, Online.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to assist with the selection, acquisition and evaluation of collections and resource materials, and the development of policies and procedures that guide this work. It applies to individuals involved in managing collections in a library or information services context to meet stakeholder needs, working autonomously but in consultation with other colleagues and wider stakeholders.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be

expected to demonstrate the following required skills: - analyse usage data; - apply knowledge of collection strategies and policies that address requirements and constraints in specific workplace contexts; - make acquisition and disposal recommendations based on detailed analysis; - develop recommendations that address selection criteria for a variety of collections and formats, and; - demonstrate the ability to monitor the performance of contractors. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - analyse current and emerging trends in relation to libraries and publishing; - review selection, acquisition and de-selection processes and procedures; - identify and analyse issues that impact collection management; - review collection management policies and processes for selecting, weeding and stocktaking, and; - discuss, in-depth, information services trends and practices.

BSBLIB604 Extend own information literacy skills to locate information

Locations:Footscray Nicholson, Online.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to research, analyse and communicate information, ideas and concepts at a complex level, as well as evaluate and continuously improve personal information literacy skills to optimally service requests for information from customers. It applies to individuals operating autonomously with limited guidance from others, in any industry sector with particular relevance to those working in the library and information services sectors. It also applies to occupations required to use technology to locate authoritative information for customers from local and other sources.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - select and adapt search strategies and tools for the purpose; - source and present varied complex information, ideas or concepts; - evaluate search results and take action to enhance final presentation to customer; - implement planned strategies to develop and extend own information literacy skills, and; - use complex and contemporary technology to provide information in response to customer requests; Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - compare and contrast concepts of information literacy and the information literate person; - analyse a range of information sources and technologies available to meet a wide range of information needs; - identify copyright, moral rights and intellectual property issues and legislation that impact research, use and distribution of information; - describe a broad range of information and resources available for development of information literacy skills; - evaluate professional development opportunities and career development strategies in relevant work context; - discuss principles of lifelong learning and how they relate to information literacy, and; - discuss role of information literacy in different occupations.

BSBMED301 Interpret and apply medical terminology appropriately

Locations:Industry, Footscray Nicholson, St Albans, Werribee, Sunshine.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to understand and

respond to instructions; to carry out routine tasks and communicate with a range of internal/external clients in a medical environment, as well as use appropriate medical terminology. It applies to individuals who apply a broad range of competencies in various medical administration contexts. They may exercise discretion and judgment using appropriate knowledge to provide technical advice and support to a team.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - interpret and follow written instructions containing medical terminology; - produce documents containing correct medical terminology according to organisational requirements; - use medical terminology correctly in oral communications, and; - identify and use appropriate abbreviations for medical terms and associated processes. Note: if a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - outline medical terminology relevant to the practice, including the fundamental word structure used in medical terms; - outline the relevant policies and procedures, and; - identify sources of information available to check on medical terminology.

BSBMED301B Interpret and apply medical terminology appropriately

Locations:Online.

Prerequisites:Nil.

Description:This unit describes the performance outcomes, skills and knowledge required to understand and respond to instructions; to carry out routine tasks and communicate with a range of internal/external clients in a medical environment; and to use appropriate advanced medical terminology.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - literacy skills to interpret policies, signs and instructions and to use correct spelling, grammar and punctuation; - learning skills to research and increase own knowledge of medical terminology, and; - communication skills to understand, clarify and explain instructions and procedures. Students will also be expected to demonstrate the following knowledge: - medical terminology, including the fundamental word structure used in medical terms; - basic systems of the body; - organisational documentation and recording requirements; - source of information relating to medical terminology, and; - key provisions of relevant legislation from all levels of government that affects business operations, codes of practice and national standards.

BSBMED302 Prepare and process medical accounts

Locations:Industry, Werribee.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to provide advice to

patients regarding fee structures and process referrals, as well as prepare and process medical accounts for a range of patients. This unit applies to individuals who apply a broad range of competencies in various medical administration contexts. They may exercise discretion and judgement using appropriate knowledge to provide technical advice and support to a team.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - provide accurate and clear advice to patients about a range of entitlements and benefits; - use an appointment system to schedule medical appointments; - process referrals according to legislative and organisational requirements; - prepare, process and store medical accounts and payment records according to legislative and organisational requirements, and; - follow up unpaid accounts. Students will also be expected to demonstrate the following knowledge: - outline Medicare entitlements; - outline public and private health insurance systems; - discuss key aspects of relevant legislation, regulations, standards and codes of practice that affect workplace operations; - describe the differences between workers' compensation, TAC and Veterans' Affairs claims, and; - explain procedures for patients without a Medicare card or number.

BSBMED303 Maintain patient records

Locations:Industry, Werribee.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to maintain patient records within an existing medical records management system, under the supervision of a senior receptionist or practice manager. It applies to individuals who apply a broad range of competencies in various medical administration contexts. They are skilled operators who are expected to exercise discretion and judgement in accessing and maintaining patient records while fully respecting patient privacy and the confidentiality of their details.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - use record and file management systems to create, access, store and maintain accurate records, according to organisational requirements; - identify and recommend improvements to record keeping system or own work practices, and; - communicate with relevant people about patient data. Students will also be expected to demonstrate the following knowledge: - outline relevant legislation, regulations, standards and codes of practice that affect patient recordkeeping; - explain workplace policies and procedures related to patient recordkeeping, including privacy and confidentiality; - describe filing record management processes, and; - explain how medical coding is used to help access and maintain patient records. .

BSBMED305B Apply the principles of confidentiality, privacy and security within the medical environment

Locations:Online.

Prerequisites:Nil.

Description:This unit describes the performance outcomes, skills and knowledge required to apply principles and requirements relating to confidentiality, privacy and security to own work within the medical environment.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to clarify requirements and to resolve difficult issues with patients, their families and others, and; - planning and organising skills to access and secure records. Students will also be expected to demonstrate the following knowledge: - occupational health and safety (OHS) for example: safe handling of specific dangerous goods (as relevant for enterprise); manual handling; relevant legislation from all levels of government that affects business operations; - codes of practice and national standards, such as: anti-discrimination legislation; ethical principles; privacy laws; Freedom of Information Act, and; - enterprise policies and procedures for confidentiality, privacy and security.

BSBMED401 Manage patient recordkeeping system

Locations:Footscray Park, Werribee, City King St, Whitten Oval.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to manage a patient recordkeeping system within a medical environment and to supervise others. It covers clarifying roles and responsibilities, managing the operation of a patient recordkeeping system, and reviewing and improving the system. The unit does not cover the design of a new system but does cover reviews and improvements to an existing system.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - manage a patient recordkeeping system and supervise its use; - document how records have been accessed and archived by staff or self in accordance with organisational and legislative requirements, and; - provide activities to others that support correct use of a patient record system. Note: if a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - outline relevant legislation, regulations, standards and codes of practice for maintaining records in a medical environment; - explain enterprise policies and procedures; - patient recordkeeping including archiving and records transfer; - privacy and confidentiality; - access to records; - describe filing

systems and record management processes, and; - explain how medical coding is used to help access and maintain patient records.

BSBMGT401 Show leadership in the workplace

Locations: Industry, Werribee, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to lead teams and individuals by modelling high standards of conduct to reflect the organisation's standards and values. It applies to individuals who are making the transition from being a team member to taking responsibility for the work and performance of others and providing the first level of leadership within the organisation. These managers have a strong influence on the work culture, values and ethics of the teams they supervise.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - identify the organisation's standards and values, whether stated or implied by the way the organisation conducts its business; - evaluate own behaviour and performance against these and adjust to achieve required standards; - develop and implement performance plans and key performance indicators (KPIs) to meet organisation's goals and objectives; - use established communication channels to raise questions about standards and values that may be damaging to the organisation; - ensure own behaviour and performance contributes to the integrity and credibility of the organisation; - facilitate processes to make decisions, and; - communicate about making and implementing decisions. Students will also be expected to demonstrate the following knowledge: - explain how to identify an organisation's standards and values when they are stated and implied; - articulate organisational values and expectations of behaviour; - explain basic theory of group behaviour; - outline the organisation's process for raising questions about standards and values; - give examples of behaviours and performance that would typically be considered damaging to an organisation, and; - explain concepts including: organisational values, role modelling, integrity, credibility and leadership.

BSBMGT402 Implement operational plan

Locations: Industry, Footscray Nicholson, Werribee, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to implement the operational plan by monitoring and adjusting operational performance, planning and acquiring resources and providing reports on performance as required. It applies to individuals who plan activities to achieve the measurable, stated objectives of the team and the organisation. At this level work will normally be carried out within routine and non-routine methods and procedures which require planning, evaluation, leadership and guidance of others.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting

of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following performance criteria: - interact with a range of people/groups to identify resource requirements, performance objectives, systems, procedures and records relating to the operational plan; - vary the operational plan and gain approval to deal with contingencies; - monitor operational performance against the performance objectives and budgets and take action to rectify unsatisfactory performance; - plan and acquire physical and human resources using organisation's systems and procedures; - manage and support personnel to achieve performance objectives. including inducting new employees and providing mentoring and coaching; - present information and recommendations to support implementation and variation of the operational plan, and; - document and provide reports on performance as required by the organisation. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - describe performance monitoring systems and processes; - describe methods for problem solving, and; - explain how organisational policies and procedures relate to the operational plan.

BSBMGT403 Implement continuous improvement

Locations: Industry, Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to implement the organisation's continuous improvement systems and processes. It covers using systems and strategies to actively encourage the team to participate in the process, monitoring and reviewing performance, and identifying opportunities for further improvements. It applies to managers who have an active role in implementing the continuous improvement process to achieve the organisation's objectives.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - implement continuous improvement systems and provide mentoring and coaching support to enable individuals and teams to participate in decisions, take responsibility, show initiative and implement improvement processes; - implement processes to inform team members about savings and productivity/service improvements achievements; - communicate effectively to support the continuous improvement system and implementation of improvements; - apply continuous improvement to customer services including internal and external customers; - implement, monitor and adjust improvement plans, processes and procedures to improve performance; - document performance to identify further opportunities for improvement, and; - manage records and reports within the organisation's systems and procedures. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - give examples of continuous improvement processes; - list typical areas of need for coaching and mentoring to support continuous improvement; - explain how change management techniques can support continuous improvement and initiative, and; - identify the organisation's systems and data that can be used for benchmarking and monitoring performance for continuous improvement.

BSBMGT502 Manage people performance

Locations: Industry, Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to manage the performance of staff who report to them directly. Development of key result areas and key performance indicators and standards, coupled with regular and timely coaching and feedback, provide the basis for performance management. It applies to individuals who manage people. It covers work allocation and the methods to review performance, reward excellence and provide feedback where there is a need for improvement. The unit makes the link between performance management and performance development, and reinforces both functions as a key requirement for effective managers.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - consult with relevant stakeholders to identify work requirements, performance standards and agreed performance indicators; - develop work plans and allocate work to achieve outcomes efficiently and within organisational and legal requirements; - monitor, evaluate and provide feedback on performance and provide coaching or training, as needed; - reinforce excellence in performance through recognition and continuous feedback; - seek assistance from human resources specialists where appropriate, and; - keep records and documentation in accordance with the organisational performance management system. Students will also be expected to demonstrate the following knowledge: - outline relevant legislative and regulatory requirements; - outline relevant awards and certified agreements; - explain performance measurement systems utilised within the organisation; - explain unlawful dismissal rules and due process, and; - describe staff development options and information.

BSBMGT502B Manage people performance

Locations: Industry.

Prerequisites: Nil.

Description: This unit describes the performance outcomes, skills and knowledge required to manage the performance of staff who report to them directly. Development of key result areas and key performance indicators and standards, coupled with regular and timely coaching and feedback, provide the basis for performance management.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following performance criteria: - communication skills to articulate expected standards of performance, to provide effective feedback and to coach staff who need development; - risk management skills to analyse, identify and develop mitigation strategies for identified risks, and; - planning and organisation

skills to ensure a planned and objective approach to the performance management system. Students will also be expected to demonstrate the following knowledge: - relevant legislation from all levels of government that affects business operation, especially in regard to occupational health and safety and environmental issues, equal opportunity, industrial relations and anti-discrimination; - relevant awards and certified agreements; - performance measurement systems utilised within the organisation; - unlawful dismissal rules and due process, and; - staff development options and information.

BSBMGT516 Facilitate continuous improvement

Locations: Industry, Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to lead and manage continuous improvement systems and processes. Particular emphasis is on the development of systems and the analysis of information to monitor and adjust performance strategies, and to manage opportunities for further improvements. It applies to individuals who take an active role in managing a continuous improvement process in order to achieve an organisation's objectives. At this level, work will normally be carried out using complex and diverse methods and procedures which require the exercise of considerable discretion and judgement, using a range of problem-solving and decision-making strategies.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - facilitate effective contributions to and communications about continuous improvement processes and outcomes; - address sustainability requirements; - incorporate mentoring, coaching and other support to enable people to participate effectively in continuous improvement processes, and; - capture insights, experiences and ideas for improvements and incorporate them into the organisation's knowledge management systems and future planning. Students will also be expected to demonstrate the following knowledge: - explain how systems and procedures can support effective continuous improvement, and; - explain how continuous improvement systems and processes relate to other business systems and requirements including, knowledge management, quality, performance management and sustainability.

BSBMGT517 Manage operational plan

Locations: Industry, Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to develop and monitor implementation of the operational plan to provide efficient and effective workplace practices within the organisation's productivity and profitability plans.

Management at a strategic level requires systems and procedures to be developed and implemented to facilitate the organisation's operational plan. This unit applies to individuals who manage the work of others and operate within the parameters of a broader strategic and/or business plan.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge

and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - develop and implement an operational plan using a variety of information sources and consultation (including using specialist advice if required) which includes: resource requirements; key performance indicators; monitoring processes; contingency plans; - communicate effectively with relevant stakeholders to explain the plan and supporting information, seek approvals, negotiate variations and engage work teams, and; - develop and implement strategies to achieve the operational plan within the organisation's policies, practices and procedures including: recruiting, inducting and developing personnel; acquiring physical resources and services; protecting intellectual property; making variations to the plan; monitoring and documenting performance. Students will also be expected to demonstrate the following knowledge: - describe models and methods for operational plans; - explain the role of an operational plan in achieving the organisation's objectives; - explain budgeting processes; - list alternative approaches to developing key performance indicators to meet business objectives; - outline the legislative and regulatory context relevant to the operational plan of the organisation, and; - outline the organisation's policies, practices and procedures that directly relate to the operational plan.

BSBMGT518 Develop organisation policy

Locations: Industry, Footscray Nicholson.

Prerequisites: Nil.

Description: This unit covers the development or review of 'in house' policy in an organisation. It covers anticipating and confirming the need for policy development or review; planning the policy development process; gathering and analysing information; determining policy direction; and drafting, releasing and promoting policy. It applies to managers who draft and review policy that is formulated to facilitate the implementation of decisions made by senior executives, business owners, and boards of management or similar.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - analyse internal and external factors and consult with stakeholders to identify needs for policy development or review and recommend priorities; - plan, develop and implement policy using: - an analytical framework; - iterative and consultative processes with input from representative stakeholders; - risk management; - stakeholder and issues management strategies, and; - quality assurance, monitoring and evaluation mechanisms. Students will also be expected to demonstrate the following knowledge: - explain policy development processes and practices; - explain the operation of policy cycles; - describe how to use analytical policy development frameworks; - identify the role of current policies underpinning the work area and how they relate to identified area for policy development or review, and; - outline the legislative and regulatory context relevant to the development of the organisation's policies.

BSBMGT605 Provide leadership across the organisation

Locations: Industry, Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to demonstrate senior leadership behaviour and personal and professional competence. Business ethics are also addressed in this unit. It applies to individuals who have a role in inspiring and motivating others to achieve organisational goals and to model professionalism in their organisation and industry. Leadership is seen in the context of the organisational mission.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - clearly communicate the organisation's objectives, values and standards to a range of - stakeholders using appropriate media and language; - influence, support and provide resources for individuals and groups to: participate in consultations and decision making processes; contribute to innovation and improvements; achieve their responsibilities and objectives; - facilitate consultative decision making processes with relevant internal and external stakeholders; - demonstrate ethical conduct and professional competence and continuing professional development, and; - encourage others to adopt business ethics and build their commitment to the organization. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - explain business ethics and their application to leadership; - outline leadership styles and their application in supporting the organisation's mission; - objectives and values; - explain the impact of legislation in providing leadership in the organization; - explain the organisation's mission, purpose and values; - describe organisation objectives, plans and strategies, and; - explain organisational change processes.

BSBMGT608 Manage innovation and continuous improvement

Locations: Industry, Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to sustain and develop an environment in which continuous improvement, innovation and learning are promoted and rewarded. It applies to people with managerial responsibilities who aim to build a better and more effective work environment. Continuous improvement and innovation have links with the model of the learning organisation and people working at this level play an important role in building the culture, values and attitudes of the organisation.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - analyse and evaluate systems and performance in key areas of the organisation and identify opportunities

for improvement, seeking advice from experts as appropriate; - promote the value of creativity, innovation and sustainability and recognise successes; - support the testing and trialling of new ideas and undertake risk management and cost-benefit analysis for options; - plan for and implement improvements using organisation's processes for approvals, project management and change management; - facilitate effective contributions to and communications about continuous improvement and innovation, and; - capture insights, experiences and ideas for improvements and incorporate them into the organisation's knowledge management systems and future planning. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - outline cost-benefit analysis methods; - describe creativity and innovation theories and concepts; - list organisational learning principles; - identify quality management and continuous improvement theories; - describe relevant risk management concepts, and; - outline relevant sustainability practices.

BSBMGT617 Develop and implement a business plan

Locations: Industry, Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to run a business operation and covers the steps required to develop and implement a business plan. It applies to individuals who are running an organisation or who take a senior role in determining the effective functioning and success of the organisation. As such, they may oversee the work of a number of teams and other managers.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - analyse and research business vision, mission, values, objectives, goals, competitors; - financial targets, management arrangements, marketing approaches and strategic, business and operational plans; - write a business plan which includes a description of the business, products and services, financial, physical and human resource requirements, permit and licence requirements, marketing activity, financial indicators, productivity and performance targets for key result areas; - implement a business plan including ensuring skilled labour is available, and that training is provided where appropriate; - monitor and respond to business performance including evaluation of performance against key results indicators including profit and loss, community awareness or branding, environmental impact, governance, quality, sales, triple bottom line and the workforce; - consult, communicate with and report to key stakeholders including business partners, financiers, customers, staff and technical advisers, and; - provide an analysis of the strengths and weaknesses of a business plan. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - outline processes for developing business plans; - describe performance objectives and measures including key performance indicators, and; - identify key stakeholders.

BSBMKG401 Profile the market

Locations: Industry, Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to profile a target market or market segments in accordance with a marketing plan and to develop

market positioning strategies. It applies to individuals working in a variety of marketing communications occupational roles who have responsibility for a range of tasks involving analysis and planning.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - develop a market positioning strategy that documents market segmentation, consumer profiling, targeting and strategies relevant to a product or service being offered to the marketplace. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - identify relevant information relating to the Australian Marketing Institute Code of Professional Conduct; - outline requirements of legislation affecting marketing roles; - explain data collection and analysis techniques; - outline relevant industry knowledge; - explain marketing communications concepts and processes; - identify organisational structures, roles, responsibilities, business and marketing plans; - demonstrate knowledge of relevant product and service standards and best practice models, and; - outline relevant statistical terms used by the Australian Bureau of Statistics.

BSBMKG413 Promote products and services

Locations: Footscray Park, Footscray Nicholson, City King St.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to coordinate and review the promotion of an organisation's products and services. It applies to individuals with a broad knowledge of the promotion of products and services specific to an organisation. They may have responsibility to provide guidance or to delegate aspects of these tasks to others.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - identify the context for the promotional activities; - consult with relevant stakeholders to plan promotional activities to meet objectives, budget and timelines; - coordinate promotional activities, and; - analyse feedback and data to evaluate the effectiveness of planning processes and promotional activities and make recommendations on future directions of promotional activities. Students will also be expected to demonstrate the following knowledge: - outline the legislative and regulatory context of the organisation as relevant to the marketing plan; - outline the planning processes for organising promotional activities; - explain the organisation's marketing objectives and how they support the overall business objectives, and; - explain how common promotional activities could be used to support the marketing objectives.

BSBMKG414 Undertake marketing activities

Locations: Footscray Park, Footscray Nicholson, City King St.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to plan, implement and manage basic marketing and promotional activities. It is a foundation unit covering general and basic marketing and promotional activities that do not require detailed or complex planning or implementation.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - research marketing practices of the organisation; - plan and implement a marketing activity; - record activities and processes used in marketing activity, and; - review effectiveness of marketing plan. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - describe basic foundations of marketing practices; - describe organisational policies and procedures on marketing, and; - outline specific product knowledge related to products and services being marketed.

BSBMKG501 Identify and evaluate marketing opportunities

Locations: Footscray Park, Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to identify, evaluate and take advantage of marketing opportunities by analysing market data, distinguishing characteristics of possible markets and assessing viability of changes to operations. It applies to individuals working in a supervisory or management marketing or advertising role within a marketing or advertising team or media organisation.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - identify and evaluate marketing opportunities to determine whether they can meet organisational objectives, and; - document how current business operations need to be modified, and list resources required, to take advantage of newly identified and evaluated opportunities. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - outline key provisions of relevant legislation, codes of practice and national standards affecting marketing operations; - describe organisational marketing plan, structure, products and services; - explain principles of marketing and marketing mix, and; - describe statistical methods and techniques to evaluate marketing opportunities, including forecasting techniques.

BSBMKG514 Implement and monitor marketing activities

Locations: Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to apply and

observe marketing plan objectives and action necessary improvements. It applies to individuals who possess a sound theoretical knowledge base in advertising management, and demonstrate a range of managerial skills. In this role, they usually lead and coordinate a marketing team, implement a marketing plan, monitor performance of marketing strategies and evaluate their effectiveness. They also involve team members in identifying improvements for marketing strategies and formulating recommendations for future marketing activities.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - successfully implement marketing strategies identified in an organisation's marketing plan; - coordinate personnel involved in conducting marketing activities; - monitor, evaluate and report on marketing activities against defined objectives, and; - modify marketing activities in line with new or emerging trends. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - outline organisational strategic and marketing objectives, plans and performance measures; - summarise principles of marketing mix, and; - explain key provisions of relevant legislation, codes of practice and national standards affecting marketing operations. .

BSBOHS403B Identify hazards and assess OHS risks

Locations: Industry, Sunshine.

Prerequisites: Nil.

Description: This unit describes the performance outcomes, skills and knowledge required to identify hazards and to assess occupational health and safety (OHS) risks in the workplace.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse - abilities across all levels of an organisation; - information management skills to evaluate OHS data; - interpersonal skills to establish rapport and to build networks with a range of internal and external stakeholders; - organisational and time management skills to sequence tasks and meet timelines; - research and data analysis skills to evaluate interactions between employees, their activities, equipment, environment and work systems, and; - technology skills to access internal and external OHS data. Students will also be expected to demonstrate the following knowledge: - basic principles of incident causation and injury processes; - legislative requirements; - organisational culture as it impacts on the workgroup; - organisational policies and procedures for managing OHS; - organisational work processes for managing OHS; - appropriate data collection methods for OHS issues; - concepts of risks, factors that affect risk and difference between a hazard and a risk; - internal

and external sources for OHS information and data; - principles and practices of systematic approaches to managing OHS; - principles, tools and techniques to identify and control workplace hazards and to manage risks in the OHS context; - relevant state/territory and commonwealth OHS legislation, codes of practice and standards; - roles and responsibilities of personnel as specified in relevant OHS legislation, and; - sources of OHS data.

BSBOHS504B Apply principles of OHS risk management

Locations: Industry, Werribee, Sunshine.

Prerequisites: Nil.

Description: This unit describes the performance outcomes, skills and knowledge required to use a generic approach to identify hazards, and to assess and control occupational health and safety (OHS) risks.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - identify areas for OHS risk improvement; - analyse relevant workplace information and data; - contribute to the assessment of the resources needed to systematically manage OHS and, where appropriate, access resources; - attention to detail when making observations and recording outcomes; - research skills to access relevant OHS information and data; - numeracy skills to carry out simple arithmetical calculations (e.g. % change), and to produce graphs of workplace information and data to identify trends and recognise limitations; - conduct effective formal and informal meetings and to communicate effectively with personnel at all levels of the organisation, OHS specialists and, as required, emergency services personnel; - prepare reports for a range of target groups including OHS committee, OHS representatives, managers and supervisors; - use language and literacy skills appropriate to the workgroup and the task; - consultation and negotiation skills to develop plans and to implement and monitor designated actions; - project management skills to achieve change in OHS matters; - organisational skills to manage own tasks within a timeframe, and; - information technology skills to access and enter internal and external information and data on OHS and to use a range of communication media. Students will also be expected to demonstrate the following knowledge: - organisational behaviour and culture as it impacts on OHS and on change; - basic physiology relevant to understanding mode of action of physical, biological and chemical agents on the body and how they produce harm; - basic principles of incident causation and injury processes; - characteristics of major hazard types; - concept of common law duty of care; - difference between hazard and risk; - ethics related to professional practice; - how the characteristics impact on risk and the systematic approach to managing OHS; - internal and external sources of OHS information and data; - language, literacy and cultural profile of the workgroup; - legislative requirements for OHS information and data, and consultation; - limitations of generic hazard and risk checklists, and risk ranking processes; - methods of providing evidence of compliance with OHS legislation; - nature of workplace processes and hazards relevant to the particular workplace; - organisational culture as it impacts on the workgroup; - organisational OHS policies and procedures; - other function areas that impact on the management of OHS; - principles and practices of systematic approaches to managing OHS; - professional liability in relation to providing advice; - requirements under hazard specific OHS legislation and codes of practice; - risk as a measure of uncertainty and

the factors that affect risk; - roles and responsibilities under OHS legislation of employees, including supervisors and contractors; - standard industry controls for a range of hazards; - state/territory and commonwealth OHS legislation (acts, regulations, codes of practice, associated standards and guidance material); - structure and forms of legislation including regulations, codes of practice, associated standards and guidance material, and; - types of hazard identification tools, including job safety analysis (JSA).

BSBPMPG404A Apply quality management techniques

Locations: Industry.

Prerequisites: Nil.

Description: This unit describes the performance outcomes, skills and knowledge required to enhance project outcomes through contributing to quality planning, applying quality policies and procedures and contributing to continuous improvement within projects.

Required Reading: Stephen Hartley (2003). Project management - A competency-based approach. Australia: Pearson/ Prentice Hall. Will Baker (2005). Manage projects effectively. Australia: Pearson/ Prentice Hall.

Assessment: Oral and written questioning Oral presentation Practical demonstration Research assignment Written report

BSBPMPG406A Apply communications management techniques

Locations: Industry.

Prerequisites: Nil.

Description: This unit describes the performance outcomes, skills and knowledge required to provide a critical link between people, ideas and information at all stages in the project lifecycle. It covers assisting the project team to plan communications, communicating information related to the project and reviewing communications.

Required Reading: Stephen Hartley (2003). Project management - A competency-based approach. Australia: Pearson/ Prentice Hall. Will Baker (2005). Manage projects effectively. Australia: Pearson/ Prentice Hall.

Assessment: Oral and written questioning Oral presentation Practical demonstration Research assignment Written report

BSBPMPG407A Apply risk management techniques

Locations: Sunshine, Learning Links Geelong.

Prerequisites: Nil.

Description: This unit describes the performance outcomes, skills and knowledge required to assist with aspects of risk management within a project. It specifically involves assisting the project team to plan for, control and review risks associated with the project.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - planning, organising and analytical skills to assist with risk analysis, risk management planning and review of risk management outcomes; - communication and teamwork skills to contribute to collective processes for risk management, and; - initiative and enterprise to think laterally about risks and how they might occur. Students will also be expected to

demonstrate the following knowledge: - risk management framework and risk management processes.

BSBPMG415 Apply project risk management techniques

Locations:Sunshine, Learning Links Geelong.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to assist with aspects of risk management in a project. It specifically involves planning for, controlling and reviewing risks associated with the project, and assisting in this process where required. It applies to individuals who are project practitioners working in a project support role.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - assist others in identifying and prioritising potential risks and developing risk-management strategies, plans and reporting mechanisms; - apply, monitor and review risk-control measures, including contingency measures to mitigate risks, and; - evaluate, review and report on risk-management processes and make recommendations for future improvements. Students will also be expected to demonstrate the following knowledge: - identify tools to help determine potential risks for a specific project; - explain strategies for managing project risks and their application in different situations, and; - explain the importance of risk-contingency measures.

BSBPMG415A Apply project risk-management techniques

Locations:Industry, Sunshine.

Prerequisites:Nil.

Description:This unit describes the performance outcomes, skills and knowledge required to assist with aspects of risk management in a project. It specifically involves planning for, controlling and reviewing risks associated with the project, and assisting in this process where required.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication and teamwork skills to contribute to collective processes for risk management; - initiative and enterprise skills to think laterally about risks and how they may occur, and; - planning, organising and analytical skills to assist with risk analysis, risk-management planning and review of risk-management outcomes. Students will also be expected to demonstrate the following knowledge: - risk-management methods and standards, and; - risk-management processes. .

BSBPMG416 Apply project procurement procedures

Locations:Industry, Werribee, Sunshine.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to assist with procurement for a project. It involves identifying procurement requirements, assisting with supplier selection, conducting procurement activities, and assisting with procurement finalisation activities for the project. It applies to individuals who are project practitioners working in a project support role. The individual may be operating in a large or small organisation, and applying skills in the context of enterprise projects. The project practitioner may be part of a project team under the direction of a project manager, or may work as part of a smaller scale, self-directed team. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - document procurement requirements for a workplace project, including clear descriptions of product and service, quality specifications, resource identification, supply and delivery requirements and supply and engagement metrics; - apply procurement-management procedures to a workplace project, including selection criteria, testing and accepting, monitoring and receiving supplies, and; - finalise procurement agreements. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - identify and describe procurement-management policy, processes and procedures; - explain the procurement documentation requirements; - describe the components of contractual documentation and the legal obligations of all parties; - explain the process used to select preferred contractors, and; - identify and describe project procurement-management tools and techniques.

BSBPMG505A Manage project quality

Locations:Industry, Sunshine.

Prerequisites:Nil.

Description:This unit describes the performance outcomes, skills and knowledge required to manage quality within projects. It covers determining quality requirements, implementing quality assurance processes, and using review and evaluation to make quality improvements in current and future projects.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - literacy skills to develop quality objectives and criteria; - communication and leadership skills to motivate staff, convey expectations and ensure outcomes are met; - analytical skills to monitor achievement of project outcomes against quality criteria, and; - coaching and mentoring skills to boost performance. Students will also be expected to demonstrate the following knowledge: - quality management theory, techniques, tools and methodologies; - roles and responsibilities in project management; - methods for

managing and improving performance; - relevant legislation codes and national standards; - award and enterprise agreements and industrial instruments; - industry codes of practice, and; - legislation from all levels of government that affects business operation, especially in regard to occupational health and safety and environmental issues, equal opportunity, industrial relations and anti-discrimination. .

BSBPMG507A Manage project communications

Locations: Industry.

Prerequisites: Nil.

Description: This unit describes the performance outcomes, skills and knowledge required to link people, ideas and information at all stages in the project life cycle. Project communications management ensures the timely and appropriate generation, collection, dissemination, storage and disposal of project information through formal structures and processes.

Required Reading: No text required.

BSBPMG508A Manage project risk

Locations: Industry, Sunshine.

Prerequisites: Nil.

Description: This unit describes the performance outcomes, skills and knowledge required to manage risk within a project to avoid adverse effects on project outcomes. It covers determining, monitoring and controlling project risks, and assessing risk management outcomes.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - literacy skills to write risk management plans; - problem-solving skills to control risks; - lateral thinking skills to identify risks; - planning and organisational skills to monitor project progress, and; - analytical skills to review project outcomes in terms of risk management. Students will also be expected to demonstrate the following knowledge: - risk management framework, and; - risk management techniques, tools and approaches.

BSBPMG510A Manage projects

Locations: Industry, Footscray Nicholson, Online.

Prerequisites: Nil.

Description: This unit describes the performance outcomes, skills and knowledge required to manage a straightforward project or a section of a larger project. This unit addresses the management of projects including the development of a project plan, administering and monitoring the project, finalising the project and reviewing the project to identify lessons learnt for application to future projects.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication and

negotiation skills to work with team members and other stakeholders to maintain project schedules; - literacy skills to read, write and review a range of documentation; - planning and organising skills to develop, monitor and maintain implementation schedules; - numeracy skills to analyse data, and to compare time lines and promotional costs against budgets, and; - culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities. Students will also be expected to demonstrate the following knowledge: - relevant legislation from all levels of government that may affect aspects of business operations; - organisational structure, and lines of authority and communication within the organisation, and; - how the project relates to organisation's overall mission, goals, objectives and operations.

BSBPMG511 Manage project scope

Locations: Industry, Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to determine and manage project scope. It involves obtaining project authorisation, developing a scope management plan, and managing the application of project scope controls. It applies to individuals responsible for managing and leading a project in an organisation, business or as a consultant. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - complete project authorisation activities; - collaborate with stakeholders to produce a scope-management plan; - implement scope-management plan according to procedures, and; - review and document scope-management implementation and recommend improvements. Students will also be expected to demonstrate the following knowledge: - identify components of a project scope-management plan; - describe factors likely to impact the project scope; - explain formal change-control processes; - describe methods for measuring work outcomes and progress against plans; - describe methods for segmenting and documenting a work breakdown structure; - identify and describe problem areas likely to be encountered in scope management; - explain procedures for reporting scope change; - explain project life cycle and the significance of scope management; - identify project management tools used for managing scope; - outline roles and responsibilities of project manager in relation to project planning, and; - identify types of project initiation documentation.

BSBPMG512 Manage project time

Locations: Footscray Nicholson, Online.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to manage time during projects. It involves determining and implementing the project schedule, and assessing time management outcomes. It applies to individuals responsible for managing and leading a project in an organisation, business, or as a consultant. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic

and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - develop a project schedule using project management tools and techniques; - implement, analyse and monitor a project schedule, and; - conduct a review of project scheduling and recommend improvements for the future. Students will also be expected to demonstrate the following knowledge: - explain estimation techniques to determine task duration and resource effort; - explain procedures for identifying critical path; - explain procedures for managing project baselines, establishment and variance; - summarise project life cycle phases and describe each phase; - explain best practice time management methodologies, their capabilities, limitations, applications and outcomes summarise key tools for project scheduling, and; - explain work breakdown structures and application to project schedules.

BSBPMG513 Manage project quality

Locations: Footscray Nicholson, Online.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to manage quality within projects. It involves determining quality requirements, implementing quality control and assurance processes, and using review and evaluation to make quality improvements in current and future projects. It applies to individuals responsible for managing and leading a project in an organisation, business, or as a consultant. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - work with others to decide a project's quality requirements; - document a quality-management plan; - implement quality control and assurance processes for a defined project using a range of tools and methodologies, and; - review outcomes and recommend process improvements. Students will also be expected to demonstrate the following knowledge: - explain quality management theory; - explain relevant standards that apply in the organisation; - describe quality assurance and control techniques, key tools and methodologies; - describe roles and responsibilities of quality management personnel, and; - explain methods for managing continuous improvement.

BSBPMG514 Manage project cost

Locations: Industry, City King St.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to identify, analyse and refine project costs to produce a budget, and to use this budget as the principal mechanism to control project cost. It applies to individuals responsible for managing and leading a project in an organisation, business, or as a consultant. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

208

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - work closely with others to determine resources against budgetary frameworks; - prepare a budget and cost-management plan for a project; - monitor costs across a project's life cycle including solving cost variations and analysing possible alternatives, and; - record expenditure, create accurate financial reports and review cost-management processes. Students will also be expected to demonstrate the following knowledge: - explain appropriate budgeting processes, tools and techniques; - describe methods and tools for costing and cost analysis; - explain strategies for managing costs and their application in different situations; - outline processes for reviewing costs against outcomes, and; - summarise key organisational policies and procedures applicable to this role.

BSBPMG515 Manage project human resources

Locations: Footscray Nicholson, Online.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to manage human resources related to projects. It involves planning for human resources, implementing personnel training and development, and managing the project team. It applies to individuals responsible for managing and leading a project in an organisation, business, or as a consultant. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - plan and allocate human resources to a project; - identify and organise project personnel training and development; - manage project personnel to achieve project outcomes, and; - apply human resource management (HRM) methods, techniques and tools to the project. Students will also be expected to demonstrate the following knowledge: - summarise human resource management (HRM) methods, techniques and tools; - explain strategies for managing project human resources and their application to different situations; - explain processes used to measure individuals' performance against agreed criteria, and; - explain techniques for managing and improving performance.

BSBPMG516 Manage project information and communication

Locations: Footscray Nicholson, Online.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to link people, ideas and information at all stages in the project life cycle. Project communication management ensures timely and appropriate generation, collection, dissemination, storage and disposal of project information through formal structures and processes. It applies to individuals responsible for managing and leading a project in an organisation, business, or as a consultant. No licensing, legislative, regulatory or

certification requirements apply to this unit at the time of publication.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - develop a communication management plan and an information system for a specific project; - implement a project information system with a systematic approach to storage, searching, retrieval and archiving of relevant information; - implement and maintain communication processes, and; - review project outcomes and document suggestions for improvements to managing project information and communication for future projects. Students will also be expected to demonstrate the following knowledge: - explain alternative communication methods and media and their application on various projects; - identify effective project management information systems and their various applications, and; - explain methods used to evaluate information systems and communication processes.

BSBPMG517 Manage project risk

Locations:Footscray Nicholson, Online.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to manage risks that may impact achievement of project objectives. It involves identifying, analysing, treating and monitoring project risks, and assessing risk management outcomes. It applies to individuals responsible for managing and leading a project in an organisation, business, or as a consultant. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - conduct effective risk management for a project of sufficient complexity to demonstrate the full range of performance requirements, and; - apply risk management techniques, strategies and tools. Students will also be expected to demonstrate the following knowledge: - identify project risks in a range of risk categories; - explain key components of a risk management plan; - outline industry sector risk classifications and relate these to different risk contexts; - summarise organisational and industry standard risk frameworks, and; - identify and describe characteristics, techniques and appropriate applications of quantitative and qualitative risk management techniques and approaches.

BSBPMG519 Manage project stakeholder engagement

Locations:Industry, Footscray Nicholson.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to manage stakeholder relationships. It applies to individuals responsible for managing and leading a project in an organisation, business, or as a consultant. No licensing,

legislative, regulatory or certification requirements apply to this unit at the time of publication.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - develop and implement stakeholder engagement for a project of sufficient complexity to demonstrate the full - range of performance requirements; - implement a range of appropriate stakeholder communication mechanisms for a project, and; - demonstrate effective team leadership for project team and stakeholders. Students will also be expected to demonstrate the following knowledge: - identify common problems leading to variances in stakeholder engagement; - explain and analyse interests and expectations of stakeholders; - describe levels and means of stakeholder engagement; - identify and explain stakeholder engagement theory and strategies, and; - describe types of project stakeholders.

BSBPMG521 Manage project integration

Locations:Footscray Nicholson, Online.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to integrate and balance overall project management functions of scope, time, cost, quality, human resources, communications, risk and procurement across the project life cycle; and to align and track project objectives to comply with organisational goals, strategies and objectives. It applies to individuals responsible for managing and leading a project in an organisation, business, or as a consultant. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - work closely with others to integrate all project management functions across a project life cycle according to organisational objectives; - negotiate with internal and external stakeholders; - create accurate project management documentation, and; - make suggestions for improvements to managing project integration in the future. Students will also be expected to demonstrate the following knowledge: - summarise project governance models; - describe range of methodologies to break project objectives into achievable project deliverables; - outline role of project life cycle stages, phases and structures relevant to industry and project context, and; - identify and describe appropriate organisational documentation for recording strategies and goals for integration processes.

BSBPMG522 Undertake project work

Locations:Footscray Park, Industry, Footscray Nicholson, Werribee, City King St.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to undertake a

straightforward project or a section of a larger project. It covers developing a project plan, administering and monitoring the project, finalising the project and reviewing the project to identify lessons learned for application to future projects. This unit applies to individuals who play a significant role in ensuring a project meets timelines, quality standards, budgetary limits and other requirements set for the project. The unit does not apply to specialist project managers. For specialist project managers, the other units of competency in the project management field (BSBPMG) will be applicable.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - define the parameters of the project; - use project management tools to develop and implement a project plan; - consult and communicate with relevant stakeholders to generate input and engagement in planning, implementing and reviewing the project; - provide support to team members to enable them to achieve deliverables and to transition them as appropriate at completion of the project; - finalise the project including documentation, sign-offs and reporting, and; - review and document the project outcomes. Students will also be expected to demonstrate the following knowledge: - give examples of project management tools and how they contribute to a project; - outline types of documents and other sources of information commonly used in defining the parameters of a project; - explain processes for identifying and managing risk in a project; - outline the organisation's mission, goals, objectives and operations and how the project relates to them; - explain the organisation's procedures and processes that are relevant to managing a project, and; - outline the legislative and regulatory context of the organisation in relation to project work, including work health and safety (WHS) requirements.

BSBPUB403A Develop public relations documents

Locations:Footscray Nicholson, Online.

Prerequisites:Nil.

Description:This unit describes the performance outcomes, skills and knowledge required to design, produce and edit public relations documents for various target audiences, and to evaluate their effectiveness in the marketplace.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities; - information management skills to retrieve, record and store public relations documents; - literacy skills sufficient to write public relations documents in a range of styles and tones for a range of target publics and audiences; - organisational and time-management skills to sequence tasks and meet timelines; - research and data collection skills to analyse previous communication documents and to identify

relevant information relating to the client, target public, audience and organisation, and; - technology skills to use a range of office equipment such as computers and software such as word processing. Students will also be expected to demonstrate the following knowledge: - current issues or trends which affect the public relations industry; - overview knowledge of key provisions of relevant legislation from all levels of government, codes of practice and national standards that affect business operations; - industry structures, networks within the public relations industry; - organisational and client operating environments, structures and business and marketing plans, and; - principles and practices of marketing communications and media strategies.

BSBREL401 Establish networks

Locations:Footscray Park, Footscray Nicholson, City King St.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to develop and maintain effective work relationships and networks through relationship building and negotiation skills required by workers within an organisation as well as freelance or contract workers. It applies to individuals with a broad knowledge of networking and negotiation who contribute well developed skills in creating solutions to unpredictable problems through analysis and evaluation of information from a variety of sources. They may have responsibility to provide guidance or to delegate aspects of tasks to others.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - identify and use networking opportunities; - maintain records of relevant contacts; - use written and verbal communication skills to establish, cultivate and promote professional business relationships, and; - use feedback to improve promotional activities. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - list and describe strategies for establishing and maintaining business relationships; - identify relevant networks, organisations, agencies, associations or individuals; - describe the principles and techniques needed to negotiate positive outcomes; - explain client or organisational policies, plans and procedures relevant to business relationships, and; - outline methods for obtaining feedback on promotional activities.

BSBREL402 Build client relationships and business networks

Locations:Industry, Footscray Nicholson.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to establish, maintain and improve client relationships and to actively participate in networks to support attainment of key business outcomes. It applies to individuals such as marketing and sales professionals who depend on excellent interpersonal relationships and communication skills to achieve outcomes but may also apply to other individuals working in any industry.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge

and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - identify clients' preferred communication styles and methods and potential barriers to communications and use appropriate communication styles and strategies; - apply communication techniques to establish rapport and promote two-way communication; - develop and implement client loyalty strategies and service standards based on business objectives and client information; - develop and implement strategies to elicit feedback from clients and use it to improve relationships and customer satisfaction, and; - maintain contacts and participate in formal and informal networks that support the business and enhance personal knowledge of the market. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - give examples of strategies that can build client loyalty including those that focus on: financial incentives and special offers; premium services and private/dedicated facilities; loyalty programs, rewards and recognition; - outline issues that are commonly addressed in client care/service standards in the industry; - outline typical barriers to communicating with clients and possible strategies to address them; - give examples of strategies for feedback; - describe the principles and techniques for effective communication and networking; - outline networking opportunities relevant to the business with reference to: government, industry and professional associations; trade shows, conferences, briefings and other professional development activities; existing groups or networks; businesses and individuals, and; - outline aspects of organisational policies, procedures and processes that are relevant to communicating with clients and participating in networks.

BSBRES401 Analyse and present research information

Locations: Footscray Park, Industry, Footscray Nicholson, St Albans, Werribee, City King St.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to gather, organise, analyse and present workplace information using available systems. This includes identifying research requirements and sources of information, applying information to a set of facts, evaluating the quality of the information, and preparing and producing reports. It applies to individuals who are required to apply their broad knowledge of the work environment to analysis and research tasks, evaluate information from a variety of sources and apply solutions to a range of unpredictable problems.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - identify or confirm research requirements and objectives; - gather, organise and present workplace information and data; - update, modify, maintain and store information; - maintain and handle data and documents systematically and securely; - prepare and produce reports; - use Boolean operators and other search tools, and; - analyse, evaluate and interpret data to support organisational activities. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - explain organisational systems for

recordkeeping/filing, including security procedures; - identify organisational policies and procedures and legal and ethical obligations relating to workplace information; - explain concepts related to research and analysis including reliability and validity; - give examples of techniques for data analysis and how they are applied, and; - explain research processes and strategies to identify new sources (online and print) of information and to use them most efficiently and effectively.

BSBRES401A Analyse and present research information

Locations: Footscray Nicholson, City Queen, Sunshine.

Prerequisites: Nil.

Description: This unit describes the performance outcomes, skills and knowledge required to gather, organise and present workplace information using available systems

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following performance criteria: - literacy skills to read, write and understand a variety of texts; and to edit and proofread documents to ensure clarity of meaning, accuracy and consistency of information; - problem-solving skills to deal with information which is contradictory, ambiguous, inconsistent or inadequate; - technology skills to select and use technology appropriate to a task, and; - research skills to identify and access information. Students will also be expected to demonstrate the following knowledge: - key provisions of relevant legislation from all levels of government that may affect aspects of business operations; - organisational record keeping/filing systems, security procedures and safe recording practices; - organisational policies and procedures relating to distribution of workplace information, and legal and ethical obligations, and; - research processes and strategies to identify new sources (online and print) of information and to use them most efficiently and effectively.

BSBRES411 Analyse and present research information

Locations: Footscray Park, Footscray Nicholson, City King St.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to gather, organise, analyse and present workplace information using available systems and sources. This includes identifying research requirements and sources of information, applying information to a set of facts, evaluating the quality and reliability of the information, and preparing and producing reports. It applies to individuals in roles in which they are required to apply their broad knowledge of the work environment to analysis and research tasks, evaluate information from a variety of sources and apply solutions to a range of predictable and unpredictable problems. No licensing, legislation or certification requirements apply to this unit at the time of publication.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be

expected to demonstrate the following required skills: - identify research requirements and objectives; - gather, organise and present research information; - communicate effectively with research stakeholders to clarify requirements; - maintain and handle information and documents systematically and securely; - preparing reports on research findings including: recommendations based on the analysis of research information, clear and justified assumptions and conclusions, and use of efficient and reliable research methods, and; - analyse, evaluate and interpret research information to support organisational activities. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - Key features of organisational policies and procedures relating to: the access of digital information, the storage/transmission of information, and legal and ethical obligations relating to workplace information; - key concepts related to research and analysis including reliability and validity, and; - key features of research processes and strategies to identify new sources (online and print) of information and efficient and effective use.

BSBRES502 Research legal information using secondary sources

Locations: Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to undertake legal research using secondary sources and under supervision. This includes identifying research requirements and sources of information, applying information to a set of facts, evaluating the quality of the information, and preparing and producing reports.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - prepare a research plan including: liaising with others to clarify needs or to delegate tasks; prioritising required tasks; identifying resources, technical requirements and timelines; - conduct research using secondary sources according to organisational and legal requirements; - edit research findings and use relevant information to prepare draft report; - review draft, seek feedback from relevant person(s) and implement modifications, and; - produce a final report using appropriate format and language, according to the requirements of the request and within agreed timelines. Students will also be expected to demonstrate the following knowledge: - list and describe sources of legal data and information; - explain some situations where there would be an obligation to refer matters to supervisors and/or obtain sign-off on legal work; - briefly explain the organisation's policies and procedures relating to researching, accessing and using legal information; - briefly explain the legislative requirements that apply when researching, accessing and using legal information, and; - describe the format for presenting written reports.

BSBRK401 Identify risk and apply risk management processes

Locations: Footscray Park, Industry, Footscray Nicholson, Werribee.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to identify risks and to apply established risk management processes to a defined area of operations that are within the responsibilities and obligations of the role. It applies to individuals with a broad knowledge of risk analysis or project management who contribute well developed skills in creating solutions to unpredictable problems through analysis and

evaluation of information from a variety of sources. They may have responsibility to provide guidance or to delegate aspects of these tasks to others. In this unit, risks applicable within own work responsibilities and area of operation, may include projects being undertaken individually or by a team, or operations within a section of the organisation.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - identify risks; - consult with relevant stakeholders to analyse and evaluate risks; - identify and evaluate control measures; - develop and implement treatment plans for own area or responsibility; - refer risks that are beyond own area of responsibility to others, and; - maintain risk management documentation. Students will also be expected to demonstrate the following knowledge: - outline techniques for identifying and evaluating risks; - outline organisational policies, procedures or processes for risk management; - give examples of areas where risks are commonly identified in an organisation; - outline the purpose and key elements of current risk management standards; - outline the legislative and regulatory context of the organisation in relation to risk management, and; - describe the organisation's auditing requirements relating to risk management.

BSBRK501 Manage risk

Locations: Industry, Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes skills and knowledge required to manage risks in a range of contexts across an organisation or for a specific business unit or area in any industry setting. It applies to individuals who are working in positions of authority and are approved to implement change across the organisation, business unit, program or project area. They may or may not have responsibility for directly supervising others.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - analyse information from a range of sources to identify the scope and context of the risk management process; - consult and communicate with relevant stakeholders to identify and assess risks, determine appropriate risk treatment actions and priorities and explain the risk management processes; - develop and implement an action plan to treat risks; - monitor and evaluate the action plan and risk management process, and; - maintain documentation. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - outline the purpose and key elements of current risk management standards; - outline the legislative and regulatory context of the organisation in relation to risk management, and; - outline organisational policies, procedures and processes for risk management.

BSBSMB301 Investigate micro business opportunities

Locations: Industry, Footscray Nicholson, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to consider the major elements of a business idea, undertake research to determine viability of the business opportunity and present the idea with reference to the legislative frameworks affecting the business.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - research and analyse information from a range of sources to investigate a business opportunity; - review data for potential impact on the market, products, services and customers, and; - match products and services to the business opportunity. Students will also be expected to demonstrate the following knowledge: - locate and outline legislation and regulation relevant to specific micro business opportunities being investigated; - identify sources of specialist advice on trends in new and emerging markets and decline and risk factors; - summarise benefits and challenges of digital technologies relevant to micro business opportunities, and; - describe appropriate business research methods and data collection tools and software.

BSBSMB304 Determine resource requirements for the micro business

Locations: City King St.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to select options for resource acquisition, develop procedures and systems for efficient installation, and use and maintain resources. It applies to individuals who are establishing or operating a micro business providing self-employment.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - determine appropriate resource levels in line with micro business profile and desired profit; - identify, assess and select digital technologies; - select options for resource acquisition suited to the micro business and financial position, including stakeholder needs; - establish relationship with suppliers including negotiating and reviewing supplies to suit profile of micro business, and; - develop procedures and systems to allow for efficient and effective installation and use of resources, including monitoring and maintenance as required. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - identify legislative requirements relating to micro business operations; - describe the functions of key digital technologies and their benefits and challenges to micro business; - list functions of a range of business equipment and machinery; - outline the micro business profile and structure; - describe procedures and systems for

use of and routine maintenance of resources, and; - summarise types of resources required as per the micro business profile.

BSBSMB306 Plan a home based business

Locations: Footscray Park, Industry, Werribee.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to employ useful strategies to set up a business from home. It applies to individuals who are establishing or operating a micro business providing self-employment.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following performance criteria: - identify practical requirements of running a home based business, including calculation of costs; - plan suitable workspace; - preparing concept plan for possible modifications to structure of building; - obtaining relevant approvals from external sources; - following required legislation; - implement procedures and protocols to ensure home based business runs smoothly; - creating work schedule. and; - identifying and establishing contingency plans for areas of possible conflict. Students will also be expected to demonstrate the following knowledge: - list factors to consider in setting up a home based business, including prohibitive factors; - list commonwealth, state/territory and local government legislative requirements relating to business operation, especially for health and safety and environmental issues; - outline constraints of home based businesses, and; - summarise relevant services and available infrastructure.

BSBSMB401 Establish legal and risk management requirements of small business

Locations: Footscray Park, Industry, Werribee, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to identify and comply with all regulations affecting the business. It applies to individuals operating a small business who use analytical skills to interpret legislation and regulations and develop procedures to manage compliance.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - demonstrate a systematic approach to identifying, managing and meeting legal and regulatory requirements, specifically in regard to WHS, business registration and environmental requirements; - ensure compliance, by: following taxation and industrial relations principles; updating and maintaining legal documents; investigating areas of non-compliance; monitoring provision of products and services; taking corrective action where necessary; - negotiate and arrange contracts, including: seeking legal advice; investigating procurement rights; identifying options of leasing or ownership of business premises, and; - identify, assess and treat risks specific to the business including: prioritising

risks with highest probability of occurrence and greatest negative impact on the business, and identifying insurance requirements. Students will also be expected to demonstrate the following knowledge: - outline business registration and licensing requirements; - identify all government legislative requirements relating to the specific business operation; - explain creation and termination of relevant legal contracts; - summarise relevant cultural differences and legal implications; - describe legal rights and obligations of alternative ownership structures; - outline necessary record keeping to meet minimum legal and taxation requirements; - summarise relevant consumer legislation and industry codes of practice; - outline the key steps in the risk management process, and; - explain relevant insurance requirements and products.

BSBSMB401A Establish legal and risk management requirements of small business

Locations: Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the performance outcomes, skills and knowledge required to identify and comply with the regulatory, legal, taxation and insurance requirements, and risk management needs of small business. Specific legal requirements apply to the management of a small business.

Required Reading: No required text.

Assessment: Students are required to complete a Report / Assignment outlining the business and legal requirements of their proposed / actual business venture. 22091VIC Diploma of Professional Writing and Editing Assessment may include: assignments; classwork; projects; case studies; presentations; demonstration and observation.

BSBSMB403 Market the small business

Locations: Footscray Park, Werribee, City King St.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to select options for resource acquisition, develop procedures and systems for efficient installation, and use and maintain resources. It applies to individuals who are establishing or operating a micro business providing self-employment.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - determine appropriate resource levels in line with micro business profile and desired profit; - identify, assess and select digital technologies; - select options for resource acquisition suited to the micro business and financial position, including stakeholder needs; - establish relationship with suppliers including negotiating and reviewing supplies to suit profile of micro business, and; - develop procedures and systems to allow for efficient and effective installation and use of resources, including monitoring and maintenance as required. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - identify legislative requirements relating to micro business operations; - describe the functions of key digital technologies and their benefits and challenges to micro business; - list functions of a range of business equipment and machinery; - outline the micro business profile and structure; - describe procedures and systems for

use of and routine maintenance of resources, and; - summarise types of resources required as per the micro business profile.

BSBSMB404 Undertake small business planning

Locations: Footscray Park, Industry, Werribee, City King St, Sunshine, Whitten Oval; Learning Links Geelong.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to research and develop an integrated business plan for achieving business goals and objectives. It applies to individuals who operate a small business that operates independently, or as part of a larger organisation. Individuals in this role interpret business information and numerical data competently and are skilled communicators.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - develop a business plan which provides for finance, marketing and provision of products/services to facilitate all business goals and objectives; - identify and plan all work health and safety (WHS) responsibilities, and; - develop risk management strategies including a contingency plan for non-conformance. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - discuss commonwealth, state/territory and local government legislative requirements and industry codes of practice relating to small business planning; - explain methods of evaluation; - summarise WHS responsibilities and procedures for identifying hazards relevant to the business; - outline planning processes; - describe preparation of a business plan; - identify principles of risk management relevant to business planning; - explain reasons for, and benefits of, business planning; - outline setting goals and objectives, and; - explain types of business planning - feasibility studies; strategic, operational, financial and marketing planning.

BSBSMB404A Undertake small business planning

Locations: Industry, Sunshine.

Prerequisites: Nil.

Description: This unit describes the performance outcomes, skills and knowledge required to research and develop an integrated business plan for achieving business goals and objectives. Specific legal requirements apply to the management of a small business.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to assess business performance; - literacy skills to enable interpretation of business information, and; - numeracy skills to analyse data. Students will also be expected to demonstrate the following knowledge: - commonwealth, state/territory and local

government legislative requirements relating to business operation, especially in regard to OHS and environmental issues, equal employment opportunity, industrial relations and anti-discrimination; - methods of evaluation; - OHS responsibilities and procedures for identifying hazards relevant to the business; - planning processes; - preparation of a business plan; - principles of risk management relevant to business planning; - reasons for and benefits of, business planning; - relevant industry codes of practice; - setting goals and objectives, and; - types of business planning - feasibility studies; strategic, operational, financial and marketing planning.

BSBSMB406 Manage small business finances

Locations: Footscray Park, Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: Nil.

Description: It applies to individuals who operate a small business that stands alone, or is part of a department within a larger organisation. Individuals in this role interpret financial reports and other numerical data to develop financial management strategies.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - operate the business according to the business plan, including: - adhering to legal requirements; - meeting requirements of financial backers; - defining strategies for debt collection and contingencies for debtors; - managing cash flow; - defining key performance indicators; - communicating with relevant people, and; - monitor the business against financial plan and make changes as required. Students will also be expected to demonstrate the following knowledge: - discuss benchmarking; - explain financial decision-making relevant to the business; - summarise significant financial indicators; - outline purposes of financial reports; - clarify preparation and interpretation of budget/actual reports; - identify principles for preparing balance sheets and their interpretation; - outline debt collection procedures or strategies; - characterise principles for preparing profit and loss statements and their interpretation, and; - discuss stock records and stock control relevant to the business.

BSBSMB406A Manage small business finances

Locations: Sunshine, Learning Links Geelong.

Prerequisites: Nil.

Description: This unit describes the performance outcomes, skills and knowledge required to implement, monitor and review strategies for the ongoing management of a small business's finances. It also includes day to day financial management of the small business. Specific legal requirements apply to the management of a small business.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each competency unit's learning outcomes and performance criteria requirements, including the setting of project and work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - analytical

skills to interpret financial data; - communication skills to negotiate capital and to report on performance; - literacy skills to interpret legal requirements and financial reports, and; - numeracy skills to calculate costs, prices, profit and other financial information. Students will also be expected to demonstrate the following knowledge: - benchmarking; - financial decision making relevant to the business; - financial indicators; - purpose of financial reports; - preparation and interpretation of budget/actual reports; - principles for preparation of balance sheets and their interpretation; - principles for preparation of profit and loss statements and their interpretation, and; - stock records/stock control relevant to the business.

BSBSMB412 Introduce cloud computing into business operations

Locations: Footscray Nicholson, St Albans, Werribee, City King St, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to understand the fundamentals of internet computing and cloud services. It involves undertaking a basic review of business computing needs and identifying options for introducing cloud computing services into a small business or work area in an organisation. It applies to individuals who use problem-solving skills and take responsibility for adopting and promoting approaches to improve business operations.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - review and analyse business computing use and needs, including equipment and software requirements; - collect and analyse information about cloud computing; - make the business case to introduce cloud computing, and; - prepare a plan and support others to implement cloud computing. Students will also be expected to demonstrate the following knowledge: - explain fundamentals of cloud computing, including key terms and concepts; - outline sources of information about cloud computing for micro or small business, and options specific to the business; - describe how to undertake a cost-benefit analysis and prepare a budget, and; - summarise business protocols for using services of specialist advisors.

BSBSMB421 Manage small business finances

Locations: Sunshine, Learning Links Geelong.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to implement and review financial management strategies on a regular basis, including by using new and emerging digital technologies. It applies to individuals who operate a small business that stands alone, or that is part of a department within a larger organisation. Individuals in this role interpret financial reports and other numerical data to develop financial management strategies.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be

expected to demonstrate the following required skills: - manage the business according to financial goals; - monitor the business against financial plan and make changes as required, and; - identify opportunities to implement new and emerging digital technologies to support the financial management of the business. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - key features of benchmarking; - key features of financial decision-making relevant to the business; - key features of significant financial indicators; - key purposes of financial reports; - key features of balance sheet preparation and interpretation; - key features of debt collection procedures or strategies; - key features of profit and loss statement preparation and interpretation, and; - key features of stock records and stock control relevant to the business.

BSBSUS201 Participate in environmentally sustainable work practices

Locations: Footscray Park, Industry, Footscray Nicholson, St Albans, Werribee, City King St, Online, Victoria University is authorised by Trades Recognition Australia (TRA) to conduct skills assessment services for persons seeking temporary or permanent migration. For more information on these programs and the countries in which VU conducts these assessments please refer to: <http://www.vu.edu.au//skilled-migration> Geelong Learning Links..

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to effectively measure current resource use and carry out improvements, including reducing the negative environmental impact of work practices. It applies to individuals, working under supervision or guidance, who are required to follow workplace procedures and instructions, and work in an environmentally sustainable manner within scope of competency, authority and own level of responsibility.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following performance criteria: - locate and interpret a range of environment/sustainability legislation and procedural requirements; - participate in and support discussions for an improved resource efficiency process; - identify, document and measure usage of resources, and; - collaborate with team members on suggestions for improving workplace practices. Students will also be expected to demonstrate the following knowledge: - identify environmental and resource hazards/risks as well as environmental or sustainability legislation, regulations and codes of practice applicable to own role; - outline sustainability requirements in the workplace; - identify reporting channels and procedures to report breaches and potential issues, and; - identify where to find environmental and resource efficiency systems and procedures.

BSBSUS401 Implement and monitor environmentally sustainable work practices

Locations: Industry, Footscray Nicholson, St Albans, Werribee, Sunshine, Online, Victoria University is authorised by Trades Recognition Australia (TRA) to conduct skills assessment services for persons seeking temporary or permanent migration. For more information on these programs and the countries in which VU conducts these assessments please refer to: <http://www.vu.edu.au//skilled-migration>..

Prerequisites: Nil.

216

Description: This unit describes the skills and knowledge required to effectively analyse the workplace in relation to environmentally sustainable work practices and to implement improvements and monitor their effectiveness. It applies to individuals with responsibility for a specific area of work or who lead a work group or team and addresses the knowledge, processes and techniques necessary to implement and monitor environmentally sustainable work practices, including the development of processes and tools.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - analyse information from a range of sources to identify current procedures, practices and compliance requirements in relation to environmental and resource sustainability; - consult and communicate with relevant stakeholders to seek input and encourage engagement with developing and implementing sustainability improvements, encourage feedback and suggestions and report on outcomes; - plan and organise work group activities to: - measure current resource usage; - solve problems and generate ideas for improvements; - evaluate and implement strategies to improve resource usage; - plan, implement and integrate improvements into operations; - meet environmental requirements; - apply continuous improvement approach to sustainability performance, and; - apply change management techniques to support sustainability performance. Students will also be expected to demonstrate the following knowledge: - identify relevant internal and external sources of information and explain how they can be used to identify sustainability improvements; - explain the compliance requirements for the work area with reference to legislation, regulations, codes of practice and workplace procedures that relate to environmental and resource issues; - outline common environmental and energy efficiency issues within the industry; - give examples of benchmarks for environmental and resource sustainability that are relevant to the organisation, and; - outline organisational systems and procedures that relate to environmental and resource sustainability improvements including: supply chain, procurement and purchasing; quality assurance; making recommendations and seeking approvals.

BSBSUS501 Develop workplace policy and procedures for sustainability

Locations: Industry, Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to develop and implement a workplace sustainability policy and to modify the policy to suit changed circumstances. It applies to individuals with managerial responsibilities who undertake work developing approaches to create, monitor and improve strategies and policies within workplaces and engage with a range of relevant stakeholders and specialists.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of

competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - scope and develop organisational policies and procedures that comply with legislative requirements and support the organisation's sustainability goals covering at a minimum: minimising resource use; resource efficiency; reducing toxic material and hazardous chemical use; employing life cycle management approaches; continuous improvement; - plan and implement sustainability policy and procedures including: agreed outcomes; performance indicators; activities to be undertaken; assigned responsibilities; record keeping, review and improvement processes; - consult and communicate with relevant stakeholders to generate engagement with sustainability policy development, implementation and continuous improvement, and; - review and improve sustainability policies. Students will also be expected to demonstrate the following knowledge: - outline the environmental or sustainability legislation, regulations and codes of practice applicable to the organisation identify internal and external sources of information and explain how they can be used to plan and develop the organisation's sustainability policy; - explain policy development processes and practices; - outline organisational systems and procedures that relate to sustainability, and; - outline typical barriers to implementing policies and procedures in an organisation and possible strategies to address them.

BSBWHS201 Contribute to health and safety of self and others

Locations: Footscray Park, Industry, Footscray Nicholson, St Albans, Werribee, City King St, Sunshine, Geelong Learning Links.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to work in a manner that is healthy and safe in relation to self and others and to respond to emergency incidents. It covers following work health and safety (WHS) and emergency procedures and instructions, implementing WHS requirements and participating in WHS consultative processes. It applies to individuals who require a basic knowledge of WHS to carry out work in a defined context under direct supervision or with some individual responsibility, in a range of industry and workplace contexts. NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Act has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - follow all relevant procedures and instructions relating to work health and safety (WHS) and emergency incidents; - identify and report hazards to designated personnel, and; - contribute to WHS consultative processes. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - explain workplace safety procedures and instructions; - explain emergency procedures including those for fires and incidents; - define the meaning of commonly used hazard signs and safety symbols; - summarise the duty holder responsibilities, as specified in WHS Acts, regulations and codes of practice; - explain the difference between hazards and risks; - describe typical WHS

hazards that may be present in the workplace, the harm they can cause and how this harm occurs, and; - outline the process of hazard identification and risk reduction.

BSBWHS201A Contribute to health and safety of self and others

Locations: Online.

Prerequisites: Nil.

Description: This unit describes the performance outcomes, skills and knowledge required to participate in work health and safety (WHS) processes to protect own health and safety, and that of others.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to contribute to workplace meetings; - literacy skills to: contribute to workplace meetings, inspections and other WHS consultative activities; interpret safety signs, symbols, notices and other WHS documents; record and report hazards, risks, emergency incidents and injuries, and; - problem-solving skills to follow procedures in an emergency. Students will also be expected to demonstrate the following knowledge: - emergency procedures, including procedures for fires and incidents; - meaning of commonly used hazard signs and safety symbols, and; - responsibilities, as specified in WHS Acts, regulations and codes of practice, of: self; persons conducting businesses or undertakings (PCBUs) or their officers, and fellow workers.

BSBWHS301A Maintain workplace safety

Locations: Footscray Nicholson, City Queen.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to implement and monitor the organisation's work health and safety (WHS) policies, procedures and programs as part of a small work team. The unit applies to individuals who have a key role in maintaining workplace safety in an organisation. In their role they closely monitor aspects of work associated with the safe delivery of products and services, and they have a responsibility for influencing safety in the workplace.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following performance criteria: - implement and monitor the organisation's work health and safety (WHS) policies and procedures; - identify hazards and assess and control risks; - assist in explaining and improving WHS policies, procedures and legislative requirements applicable to the organisation; - assist in explaining hazards identification and risk assessment outcomes to other team members; - implement and monitor consultation about WHS according to legislative and organisational requirements; - deal promptly with issues raised as a result of WHS consultation; - encourage work team to contribute to identifying and implementing improvements to WHS feedback; - assist others to develop WHS

competence and provide advice on training needs, and; - complete WHS documentation. Students will also be expected to demonstrate the following knowledge: - describe characteristics and composition of the work team; - describe procedures for identifying hazards and assessing and controlling associated risks to health and safety, including the hierarchy of control; - outline organisational WHS policies and procedures including those relating to risk management, fire, emergencies, evacuation, incident investigation and reporting; - describe relevant Acts, regulations and codes of practice from all levels of government that impact on business operations, especially with regard to WHS and environmental issues, equal opportunity, industrial relations and anti-discrimination, and; - identify WHS aspects of other organisational systems and procedures.

BSBWHS303 Participate in WHS hazard identification, risk assessment and risk control

Locations: Footscray Park, Industry, Werribee.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to maintain a healthy and safe workplace through participation in the process of identifying work health and safety (WHS) hazards and assessing and controlling WHS risks, and the promotion and support of worker consultation. It applies to individuals who assist with the identification of workplace hazards and the assessment and control of WHS risks as part of their WHS responsibilities, which are in addition to their main duties.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - participate in selection and use of required methods to identify, report and record hazards; - assess and record risks for identified hazards; - promote and support worker consultation and participation in hazard identification and risk assessment, and; - participate in developing, selecting and implementing risk control options and plans. Students will also be expected to demonstrate the following knowledge: - outline the relevant Commonwealth and state or territory Acts, regulations, codes of practice standards, guidance material and other relevant publications; - summarise work health and safety (WHS) legislative requirements about: communication, consultation and participation; notification of incidents; recordkeeping; specific hazard identification and risk assessment and control methods; - list the basic principles of incident causation and injury processes; - explain the concept of hazards, risks and risk factors; - describe hazard identification and risk assessment methods; - identify internal and external sources of WHS information and data, and how to access them; - summarise organisational WHS policies, procedures, processes and systems; - describe the range of WHS hazards that may be present in the workplace, the harm they can cause and how this harm occurs; - describe risk control options for different hazards and work situations; - identify types of hazard and risk registers, and; - describe the workplace communication processes for sharing information about hazard identification, and risk assessment and control.

BSBWHS304 Participate effectively in WHS communication and consultation processes

Locations: Industry, Footscray Nicholson, St Albans, Werribee, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to participate in work health and safety (WHS) communication and consultation processes. It applies to individuals who participate in WHS communication and consultation processes as part of their work health and safety responsibilities, which are in addition to their main duties.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - participate in work health and safety (WHS) communication and consultation processes, including communicating WHS information to others; - raise WHS issues in meetings and follow up on outcomes; - take appropriate actions to remove barriers to communication and consultation processes, and; - support others to raise relevant WHS issues. Students will also be expected to demonstrate the following knowledge: - describe the purpose of organisational WHS policies, procedures, processes and systems; - outline the key requirements of relevant commonwealth and state/territory WHS Acts, regulations, codes of practice, standards and guidance material, and other relevant publications; - describe potential barriers to WHS consultation processes and how the barriers may be overcome; - explain the roles and responsibilities of WHS personnel; - describe how the consultation process influences and is related to workplace information management procedures, processes and systems, and; - describe methods to engage others with workplace procedures, and information sourcing and sharing.

BSBWHS308 Participate in WHS hazard identification, risk assessment and risk control processes

Locations: Footscray Park, Footscray Nicholson, Werribee, City King St, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to participate in the processes of work health and safety (WHS) hazard identification, risk assessment and risk control. It includes participating in worker consultation and support to contribute to a healthy and safe workplace. The unit applies to those who assist with identifying workplace hazards and assessing and controlling WHS risks as part of their WHS responsibilities, which are in addition to their main duties. NOTES The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where model WHS laws have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements. The model WHS laws include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information. No licensing, legislative or certification requirements apply to this unit at the time of publication.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting

of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - participate in selecting and using required methods to identify, report and record hazards; - assess and record risks for identified hazards; - promote and support worker consultation and participation in hazard identification and risk assessment, and; - participate in developing, selecting and implementing risk control options and plans for identified hazards. Students will also be expected to demonstrate the following knowledge: - work health and safety (WHS) legislative requirements, regulations, codes of practice and standards; - internal and external sources of WHS information and data, and procedures for accessing them; - concept of hazards, risks and risk factors; - basic principles of incident causation and injury processes, and; - WHS organisational policies and procedures relating to identifying hazards, and assessing and controlling risks.

BSBWHS309 Contribute effectively to WHS communication and consultation processes

Locations: Footscray Park, Footscray Nicholson, Werribee, City King St, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to contribute to work health and safety (WHS) communication and consultation in the workplace. It involves communicating WHS information to required personnel, and taking appropriate follow-up action to assist in ensuring that communication and consultation processes are effective and conducive to others in the workplace who raise WHS issues. The unit applies to those who contribute to WHS communication and consultation as part of their work health and safety responsibilities, which are in addition to their main duties. NOTES The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where model WHS laws have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements. The model WHS laws include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - contribute to two different work health and safety (WHS) communication and consultation processes. During the above, the candidate must: - communicate WHS information to others; - raise WHS issues in meetings and follow up on outcomes; - take appropriate actions to assist with removing any barriers to communication and consultation processes identified during above processes, and; - support others to raise relevant WHS issues. Students will also be expected to demonstrate the following knowledge: - purpose of organisational WHS policies, procedures, processes and systems; - organisational WHS obligations relating to communication and consultation; - commonwealth and state/territory WHS laws and publications relating to identifying and recording key stakeholders, and WHS communication and consultation processes; - organisational

policies and procedures relating to consultation and communication methods, and processes for revising them, addressing barriers to effective WHS consultation and participation processes, including barrier reporting protocols, and recording and communicating WHS discussions, and; - elements of WHS communication and consultation including potential barriers to WHS consultation and participation processes, and methods to overcome them, roles and responsibilities of WHS personnel, how the consultation process influences and is related to workplace information management procedures, processes and systems, and methods to engage others with workplace procedures, and information sourcing and sharing.

BSBWHS401 Implement and monitor WHS policies, procedures and programs to meet legislative requirements

Locations: Footscray Park, Industry, Footscray Nicholson, St Albans, Werribee, City King St, Sunshine, Online.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to implement and monitor an organisation's work health and safety (WHS) policies, procedures and programs in the relevant work area in order to meet legislative requirements. It applies to individuals with supervisory responsibilities for implementing and monitoring the organisation's WHS policies, procedures and programs in a work area. These individuals have a broad knowledge of WHS policies and contribute well developed skills in creating solutions to unpredictable problems through analysis and evaluation of information from a variety of sources. They provide supervision and guidance to others and have limited responsibility for the output of others.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - explain clearly and accurately to work team the relevant work health and safety (WHS) information; - ensure that the team has access to information about WHS policies, procedures and programs in appropriate structure and language, and; - implement and monitor procedures according to organisational and legislative WHS requirements. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - outline the legal responsibilities and duties of managers, supervisors, persons conducting businesses or undertakings (PCBUs) and workers in relation to WHS risk management in the workplace; - identify key provisions of relevant WHS Acts, regulations and codes of practice that apply to the business and outline how they apply in the work area; - explain organisational policies and procedures relating to hazard identification, risk management, fire, emergency and evacuation, incident investigation and reporting; - explain the importance of effective consultation mechanisms in managing health and safety risks in the workplace, and; - explain how the hierarchy of control applies in the work area.

BSBWHS412 Assist with workplace compliance with WHS laws

Locations: Footscray Nicholson, Online.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to assist with establishing and maintaining workplace compliance with work health and safety (WHS) laws. It includes identifying applicable WHS laws, duties, rights and

obligations, and the necessary actions to ensure WHS compliance in the workplace. It also includes assisting with providing advice about the legislative duties, rights and obligations of individuals and parties prescribed in WHS laws and those of WHS regulators. The unit applies to those working in a broad range of WHS roles across all industries.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - assist with establishing workplace compliance with work health and safety (WHS) laws in relation to at least two different compliance matters and within scope of own role. During the above, the candidate must assist with: - identifying current WHS legal requirements for the workplace; - providing advice about current WHS legal requirements for the workplace; - assessing and maintaining workplace compliance with WHS legislative requirements; - making recommendations for implementing workplace changes in order to achieve WHS legal compliance, and; - monitoring compliance with WHS laws according to organisational policies and procedures. Students will also be expected to demonstrate the following knowledge: - internal and external sources of WHS information, and procedures for accessing them; - duties, rights and obligations of work team as specified in WHS laws, and location of relevant information about WHS laws; - functions and powers of relevant WHS regulator and how they are exercised; - regulatory compliance matters, including objectives and principles underpinning WHS laws methods used for assessing and maintaining WHS compliance, determining training needs in relation to WHS compliance, and implementing changes to policies, procedures, processes and systems to achieve WHS compliance; - organisational policies and procedures for documenting compliance requirements, assessing WHS compliance obligations and processes to address non-compliance. recording and documenting compliance assessment.

BSBWHS413 Contribute to implementation and maintenance of WHS consultation and participation processes

Locations: Footscray Nicholson, Online.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to contribute to implementing and maintaining work health and safety (WHS) consultation and participation as prescribed in legislation. It also covers contributing to communicating relevant information, identifying feedback opportunities, and improving consultation and participation. The unit applies to those working in a broad range of WHS roles across all industries.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: On at least two occasions contribute to each of the following, as applicable to own role and work area: -

implementing and maintaining work health and safety (WHS) consultation and participation to ensure that required personnel are encouraged to participate; - communicating information and data about WHS consultation and participation processes; - explaining to individuals and parties the legal roles, duties, rights and responsibilities of self and others regarding WHS consultation and participation processes; - creating opportunities for feedback on consultation and participation processes, and; - identifying barriers to, and opportunities for improving, effectiveness of WHS consultation and participation processes, and to implement and maintain improvement measures. Students will also be expected to demonstrate the following knowledge: - requirements under WHS laws for consultation and participation processes, training requirements, and the roles and responsibilities of individuals and parties required to participate; - essential components of WHS consultation processes; - organisational policies and procedures for identifying and communicating WHS consultation and participation information, documenting consultation barriers, opportunities and feedback and storing WHS information and data; - internal and external sources of WHS information and data, and procedures for accessing them; - key principles, uses and components of the hierarchy of control measures that assist with implementing and maintaining WHS consultation and participation processes, and; - methods for obtaining feedback from individuals and/or parties on consultation and participation processes.

BSBWHS414 Contribute to WHS risk management

Locations: Footscray Nicholson, Online.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to contribute to WHS risk management, which includes the processes for identifying work health and safety (WHS) hazards and assessing and controlling the risk relating to those identified hazards. It involves contributing to the development, implementation and evaluation of risk controls according to legislative and organisational requirements. The unit applies to those working in a broad range of roles across all industries. WHS hazard identification and risk control processes are those defined in written workplace procedures.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - identifying at least two different (WHS) hazards and controlling the risks associated with those hazards, and; - evaluating the effectiveness of the above risk controls. During each of the above occasions, the candidate must: - identify and interpret information and data about WHS requirements and apply them to the selection and application of techniques, tools and processes for hazard identification, risk assessment and risk control; - contribute to documenting processes; - communicate with required people about WHS requirements and compliance; - comply with WHS requirements for hazard identification, risk assessment, and risk control activities, and; - identify WHS duty holders and their duties. Students will also be expected to demonstrate the following knowledge: - internal and external sources of WHS information and data relating to the performance evidence, and procedures for accessing them; - WHS hazard identification, risk assessment and risk control processes specified in required WHS laws, organisational WHS policies, procedures, processes, and systems; - risk management requirements, including identifying duty holders and their roles and

responsibilities, selecting and using hazard identification tools and techniques, undertaking, documenting and communicating risk assessments, evaluating risk controls and documenting and communicating risk control plan; - differences between hazards and risks in the workplace; - range of common workplace hazards, and the nature, severity and likelihood of those hazards, and; - risk assessment and controls that can eliminate or minimise risks.

BSBWHS415 Contribute to implementing WHS management systems

Locations: Footscray Nicholson, Online.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to contribute to implementing a plan for a work health and safety management system (WHSMS) that applies to own role. The unit applies to individuals with responsibilities for contributing to the implementation of an organisation's WHSMS as part of their work health and safety (WHS) responsibilities in a range of industry and workplace contexts.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - planning the implementation of a work health and safety management system (WHSMS) that incorporates return-to-work and injury management procedures, and other key relevant WHSMS elements, and; - implementing the WHSMS plan and reviewing its effectiveness. During the above, the candidate must: - communicate and explain the WHSMS plan and associated WHS policy to others to facilitate their contribution to implementing the system. Students will also be expected to demonstrate the following knowledge: - elements of organisation's WHSMS and associated plan with reference to required commonwealth and state/territory WHS laws and standards, including required policies and procedures, including those concerning return-to-work and injury management, duty holders and their responsibility, safe systems of work, consultation and communication arrangements, required training and induction and WHS risk assessment; - organisational WHS policies, procedures, processes and systems relevant to implementing WHSMS in own work role; - tools, methods and processes for implementing and reviewing WHSMS plan, including consultation with required personnel, and; - regulatory authority WHSMS tools, standards, guidance material and procedures required to contribute to implementing WHS management systems.

BSBWHS416 Contribute to workplace incident response

Locations: Footscray Nicholson, Online.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to assist with actions and activities performed in response to workplace incidents according to work health and safety (WHS) legislative and organisational requirements. The unit applies to those who contribute to workplace incident responses by undertaking a varied range of activities in a structured and familiar work environment as defined in written procedures. It applies to people who work in a broad range of WHS roles across all industries.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic

and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - contribute to responding to at least two different workplace incidents according to work health and safety (WHS) legislative and organisational requirements. During the above, the candidate must: - identify duty holders relevant to incident response, and; - contribute to communicating WHS requirements clearly and accurately to individuals and/or parties involved, reporting each incident according to WHS legislative and organisational requirements, obtaining information about each incident using appropriate data-collection techniques, developing and contributing to implementing required actions in response to each incident, investigating incident and communicating and implementing recommendations from investigation. Students will also be expected to demonstrate the following knowledge: - WHS laws about investigating and reporting workplace incidents; - sources of internal and external WHS information and data relating to incidents, and procedures for accessing them; - organisational policies, procedures, processes and systems relevant to own role or work area that relate to incident response and investigation, including those for recording information relating to workplace incident responses, reporting information to external authorities, and implementing improvements to policies, procedures, processes and systems as a result of an incident; - communication strategies to facilitate engagement of individuals and/or parties in incident response, and; - roles and responsibilities of self and duty holders in responding to workplace incidents.

BSBWHS418 Assist with managing WHS compliance of contractors

Locations: Industry, Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to assist with managing the work health and safety (WHS) implications of using contractors. It involves identifying contractor duties, establishing organisational WHS compliance requirements associated with those duties, establishing and communicating the requirements expected of contractors, monitoring contractor compliance with WHS requirements, and implementing required responses to identified non-compliance. The unit applies to those who work in a broad range of WHS roles across all industries in organisations that use contractors to supply services, including labour hire and temporary workers, cleaning, catering, security, maintenance, repairs, installations and alterations, and major contracts and projects, as relevant to the organisation. This includes casual and volunteer workers. It does not cover visitors, or outworkers or suppliers of goods, materials or products to workplaces.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - assist with managing the work health and safety (WHS) compliance of two contractors, each providing different services. During the above, the candidate must assist with: - identifying contractor WHS arrangements, including required organisational WHS policies, procedures and systems, WHS induction and guidance information; - reviewing

contractor work processes, procedures and activities, and; - addressing within scope of own role and reporting contractor non-compliance with WHS requirements. Students will also be expected to demonstrate the following knowledge: - internal and external sources of information and data relevant to contractor WHS arrangements, and procedures for accessing them; - organisational WHS policies, procedures, processes and systems relevant to contractors; - contexts, situations and arrangements where contractor services are supplied to the organisation; - contractor WHS arrangements with reference to relevant commonwealth and state/territory WHS laws; - key WHS requirements about workplace, contracted work, and organisational policies and procedures to be covered in contractor induction; - workplace documentation required for managing contractor WHS compliance with services involved in the performance evidence, including formal contracts and agreements to supply services or relevant parts thereof, supporting documents about contracts and agreements, organisational WHS policies and procedures, WHS laws, and; - duties, rights and obligations of individuals and parties as specified in relevant WHS laws with regard to supply of services by contractors.

BSBWHS419 Contribute to implementing WHS monitoring processes

Locations: Industry, Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to contribute to monitoring a range of physical agents and conditions relating to work health and safety (WHS) in the workplace. It involves the use of a range of measuring devices to collect, interpret and report on workplace information and data in relation to those physical agents and conditions. The unit applies to those working in a broad range of WHS roles across all industries. The unit does not extend to hazard identification, risk assessment or developing risk controls based on the outcomes of monitoring, which are covered in BSBWHS414 Contribute to WHS risk management. This unit does not qualify individuals to perform duties as a registered officer under any legislation.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - contribute to monitoring at least three different physical agents or conditions relating to work health and safety (WHS) typically found in the workplace. During each of these occasions, the candidate must: - identify regulatory requirements and standards that apply to monitoring physical agents and/or conditions relevant to WHS; - identify context of measurements to be undertaken, including, physical agents and/or conditions to be measured and their characteristics, where measurements will be taken, area or space available, movements of people and equipment, tasks or activities being undertaken, number of persons occupying area, and other factors that may impact on the sampling or data-collection processes and the health and safety of self and others and physical features of equipment, such as emitting sources; - prepare and collect WHS data and information; - consult and communicate with individuals and parties regarding monitoring process, and; - seek expert advice, support and equipment as required. Students will also be expected to demonstrate the following knowledge: - internal and external sources of WHS information and data; - typical physical agents and/or conditions relevant to WHS, including biological agents, such as insects, mites and bacteria, electricity, fibres, dusts and particulates, fumes, mists, gases and

vapours, heat and humidity, light, noise, radiation, including ionising, non-ionising and laser and vibration; - aspects of WHS laws and standards relevant to using testing equipment and measuring physical agents and/or conditions and how they apply to the organisation; - mode of action of common physical agents and/or conditions on the body and how they produce discomfort and harm; - characteristics, modes of action and units of measurement for major physical agents and/or conditions; - environmental conditions that impact on measurements; - types of measuring and monitoring equipment and techniques for correct and safe use, including limitations on use and output, adjustment, maintenance and any in-built alarms; - personal communication strategies to facilitate engagement with workplace parties and individuals, and; - organisational policies and procedures for identifying physical agent and/or condition to be measured, determining sampling process and defining a plan, checking operability of equipment to ensure it meets organisational and work activity requirements, maintaining own health and safety and that of others present during process described in the performance evidence, reinstating equipment to pre-use condition, including for dismantling and cleaning equipment and parts, storing and re-using equipment and retaining results and records.

BSBWHS501 Ensure a safe workplace

Locations: Industry, Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to establish, maintain and evaluate the organisation's work health and safety (WHS) policies, procedures and programs in the relevant work area, according to WHS legislative requirements. It takes a systems approach and addresses compliance with relevant legislative requirements. This unit applies to managers working in a range of contexts who have, or are likely to have responsibility for WHS as part of their broader management role. It is relevant for people with obligations under WHS legislation, for example persons conducting a business or undertaking (PCBUs) or officers, as defined by relevant legislation.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - establish, implement, maintain and evaluate a work health and safety (WHS) management system for a work area of an organisation in accordance with WHS legislation including policies, procedures and record keeping; - ensure organisational WHS compliance; - establish, implement, maintain and evaluate effective and compliant participation arrangements for managing WHS including identifying duty holders, identifying and approving the required resources and developing and implementing a training program; - establish, implement, maintain and evaluate procedures for effectively identifying hazards, and assessing and controlling risks using the hierarchy of risk control; - provide information and complete documentation for a WHS management system, and; - identify requirements for and request expert WHS advice. Students will also be expected to demonstrate the following knowledge: - identify and detail relevant WHS Acts, regulations and codes of practice; - specify relevant WHS organisational policies, procedures, programs and practices; - explain hazard identification and risk-management processes; - describe the hierarchy of risk control

and how it is applied in the workplace, and; - specify in-house and WHS legislative reporting requirements.

BSBWHS521 Ensure a safe workplace for a work area

Locations: Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to establish, maintain and evaluate an organisation's work health and safety (WHS) policies, procedures and programs in a work area to ensure a safe workplace, according to WHS legislative requirements. It takes a systems approach and addresses compliance with relevant legislative requirements. The unit applies to those working in a range of contexts who have, or are likely to have, responsibility for WHS as part of their broader management role. It is relevant for people with obligations under WHS laws, for example persons conducting a business or undertaking (PCBUs) or officers, as defined by WHS laws.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - establish, implement, maintain and evaluate one work health and safety management system (WHSMS) for a work area of an organisation that complies with WHS laws, and organisational policies and procedures. During the above, the candidate must: - establish, implement, maintain and evaluate effective and compliant consultative arrangements for managing WHS, including, identifying duty holders, identifying and approving required resources, developing and implementing a training program, and; - establish, implement, maintain and evaluate procedures for effectively identifying hazards, and assessing and controlling risks using the hierarchy of control measures. Students will also be expected to demonstrate the following knowledge: - details of relevant WHS laws relating to ensuring a safe workplace; - WHS organisational policies, procedures, programs and practices required for the performance evidence; - hazard identification and risk-management processes; - key principles, uses and components of the hierarchy of control measures and procedures for applying it in the workplace, and; - organisational and WHS legislative reporting requirements.

BSBWOR202 Organise and complete daily work activities

Locations: Industry, Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to seek feedback for performance improvement and use current technology appropriate to the task. It applies to individuals working under direct supervision who develop basic skills and knowledge for working in a broad range of settings.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - plan and organise workload

with the assistance of others; - complete tasks, using appropriate digital tools, within specified timelines seeking assistance as required; - use effective communication skills to seek assistance or feedback from others, and; - seek and use feedback from others to monitor and improve work performance. Students will also be expected to demonstrate the following knowledge: - outline the organisational standards, policies and procedures that relate to own work role; - explain the relationship between an individual's work goals and plans and the organisation's goals and plans; - list some factors that can affect the ability to get work done, and explain the action to take, and; - explain how to plan and manage time.

BSBWOR203 Work effectively with others

Locations: Industry, Footscray Nicholson, Online, Geelong Learning Links..

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to work cooperatively with others and deal effectively with issues, problems and conflict. It applies to individuals who perform a range of routine tasks using a limited range of practical skills, and a fundamental knowledge of teamwork in a defined context under direct supervision or with limited individual responsibility.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - identify own responsibilities in relation to the team and the organisation's requirements; - work effectively in a workgroup; - supporting team members; - using culturally appropriate communication skills; - acting on constructive feedback; - cooperating and contributing to team goals; - identifying improvement opportunities, and; - identify problems and conflicts and address them appropriately. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - outline the organisational standards, policies and procedures that relate to own work role; - outline team responsibilities and duties and their relationship to individual responsibilities and duties, and; - summarise conflict resolution techniques.

BSBWOR204 Use business technology

Locations: Footscray Park, Industry, Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to select and use computer software and organise electronic information and data. It applies to individuals who apply a limited range of practical skills with a fundamental knowledge of equipment use and the organisation of data in a defined context, under direct supervision or with limited individual responsibility.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - select and use technology

safely and according to organisational requirements; - access, retrieve and store required data; - demonstrate basic maintenance on a range of equipment using manuals or help-files, and; - identify and address faults according to requirements. Students will also be expected to demonstrate the following knowledge: - outline the organisation's work health and safety requirements; - outline the organisation's requirements for file naming and storage; - explain why regular back-ups of data are done; - list 'routine maintenance' tasks, and; - summarise the procedure for addressing equipment faults.

BSBWOR301 Organise personal work priorities and development

Locations: Footscray Park, Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to organise own work schedules, to monitor and obtain feedback on work performance and to maintain required levels of competence. This unit applies to individuals who exercise discretion and judgement and apply a broad range of competencies in various work contexts.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - prepare a work plan according to organisational requirements and work objectives; - use business technology to schedule, prioritise and monitor completion of tasks in a work plan; - assess and prioritise own work load and deal with contingencies; - monitor and assess personal performance against job role requirements by seeking feedback from colleagues and clients, and; - identify personal development needs and access, complete and record skill development and learning. Note: if a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - outline key provisions of legislation that relate to own work role; - describe goals, objectives or key performance indicators of own work role; - explain ways to elicit, analyse and interpret feedback when communicating with other people in the workplace; - explain the principles and techniques of goal setting, measuring performance, time management and personal assessment of learning and development needs; - explain signs and sources of stress and strategies to deal with stress in the workplace, and; - identify methods to identify and prioritise personal learning needs.

BSBWOR401A Establish effective workplace relationships

Locations: Footscray Nicholson, Sunshine, Online.

Prerequisites: Nil.

Description: This unit describes the performance outcomes, skills and knowledge required to collect, analyse and communicate information and to use that information to develop and maintain effective working relationships and networks, with particular regard to communication and representation

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each

unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following performance criteria: - coaching and mentoring skills to provide support to colleagues; - literacy skills to research, analyse, interpret and report information, and; - relationship management and communication skills to: deal with people openly and fairly; forge effective relationships with internal and/or external people, and to develop and maintain these networks; gain the trust and confidence of colleagues; respond to unexpected demands from a range of people, and use supportive and consultative processes effectively. Students will also be expected to demonstrate the following knowledge: - relevant legislation from all levels of government that affects business operation, especially in regard to occupational health and safety (OHS), and environmental issues, equal opportunity, industrial relations and anti-discrimination, and; - theory associated with managing work relationships to achieve planned outcomes: developing trust and confidence; maintaining consistent behaviour in work relationships; understanding the cultural and social environment; identifying and assessing interpersonal styles; establishing, building and maintaining networks; identifying and resolving problems; resolving conflict; managing poor work performance; monitoring, analysing and introducing ways to improve work relationships.

BSBWOR404 Develop work priorities

Locations: Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to monitor and obtain feedback on own work performance and access learning opportunities for professional development. This unit applies to individuals who are required to design their own work schedules and work plans and to establish priorities for their work. They will typically hold some responsibilities for the work of others and have some autonomy in relation to their own role.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - prepare and communicate own work plan; - schedule work objectives and tasks to support the achievement of the workgroup goals; - review own work performance against workgroup objectives through self-assessment and seeking and acting on feedback from clients and colleagues, and; - plan and access learning opportunities to extend personal work competencies. Note: if a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - explain how business technology applications can be used to schedule tasks and plan work; - explain techniques to prepare personal plans and establish priorities; - identify methods to identify and prioritise personal learning needs; - outline a range of professional development options; - explain methods to elicit, analyse and interpret feedback, and; - provide a detailed explanation of methods that can be used to evaluate own performance.

BSBWOR501 Manage personal work priorities and professional development

Locations: Industry, Footscray Nicholson, Werribee, Online.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to create systems and process to organise information and prioritise tasks. It applies to individuals working in managerial positions who have excellent organisational skills. The work ethic of individuals in this role has a significant impact on the work culture and patterns of behaviour of others as managers at this level are role models in their work environment.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - use business technology to create and use systems and processes to organise and prioritise tasks and commitments; - measure and maintain personal work performance including assessing competency against competency standards and seeking feedback; - maintain an appropriate work-life balance to manage personal health and stress; - participate in networks; - develop a personal development plan which includes career objectives and an action plan, and; - develop new skills. Students will also be expected to demonstrate the following knowledge: - explain principles and techniques involved in the management and organisation of: performance measurement; personal behaviour, self-awareness and personality traits identification; a personal development plan; personal goal setting; time; - discuss management development opportunities and options for self; - describe methods for achieving a healthy work-life balance; - outline organisation's policies, plans and procedures; - explain types of learning style/s and how they relate to the individual, and; - describe types of work methods and practices that can improve personal performance.

BSBWOR501B Manage personal work priorities and professional development

Locations: Footscray Nicholson, Online.

Prerequisites: Nil.

Description: This unit describes the performance outcomes, skills and knowledge required to manage own performance and professional development. Particular emphasis is on setting and meeting priorities, analysing information and using a range of strategies to develop further competence.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to receive, analyse and report on feedback; - literacy skills to interpret written and verbal information about workplace requirements, and; - organisational skills to set and achieve priorities. Students will also be expected to demonstrate the following knowledge: - principles and techniques involved in the management and organisation of: performance measurement; personal behaviour, self-awareness and personality traits identification; personal development plan; personal goal setting; time

management; - management development opportunities and options for self; - organisation's policies, plans and procedures; - types of learning style/s and how they relate to the individual, and; - types of work methods and practices that can improve personal performance.

BSBWOR502 Lead and manage team effectiveness

Locations: Footscray Park, Industry, Footscray Nicholson, Werribee, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to lead teams in the workplace and to actively engage with the management of the organisation. It applies to individuals working at a managerial level who facilitate work teams and build a positive culture within their work teams. At this level, work will normally be carried out using complex and diverse methods and procedures requiring the exercise of considerable discretion and judgement, using a range of problem solving and decision making strategies.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - use leadership techniques and strategies to facilitate team cohesion and work outcomes; - encouraging and fostering shared understanding of purpose, roles and responsibilities; - identifying and resolving problems; - providing feedback to encourage, value and reward others; - modelling desired behaviour and practices; - develop policies and procedures to ensure team members take responsibility for own work and assist others to undertake required roles and responsibilities; - establish processes to address issues and resolve performance issues; - support team to meet expected performance outcomes including providing formal and informal learning opportunities as needed; - develop performance plans with key performance indicators (KPIs), outputs and goals for individuals or the team which incorporate input from stakeholders; - communicate effectively with a range of stakeholders about team performance plans and team performance; - facilitate two-way flow of information between team and management relevant to team performance, and; - evaluate and take necessary corrective action regarding unresolved issues, concerns and problems raised by internal or external stakeholders. Students will also be expected to demonstrate the following knowledge: - explain how group dynamics can support or hinder team performance; - outline strategies that can support team cohesion, participation and performance; - explain strategies for gaining consensus, and; - explain issue resolution strategies.

BSBWOR502B Ensure team effectiveness

Locations: Footscray Nicholson, City Queen.

Prerequisites: Nil.

Description: This unit describes the performance outcomes, skills and knowledge required to facilitate all aspects of teamwork within the organisation. It involves taking a leadership role in the development of team plans, leading and facilitating teamwork and actively engaging with the management of the organisation.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge

and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to explain team goals, to address team conflict and to build an environment of trust, and; - planning and organisational skills to keep team on track and focussed on work outcomes. Students will also be expected to demonstrate the following knowledge: - group behaviour; - strategies for mentoring and coaching to informally guide and instruct team members; - issue resolution, and; - strategies for gaining consensus.

BSBWRK411 Support employee and industrial relations procedures

Locations: Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to communicate and implement industrial relations policies and procedures to effectively represent organisations/employers. It applies to individuals who work in support positions, assisting others in dealing with industrial relations conflicts and issues.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - locate information required to identify relevant legislation, agreements, policies and procedures in relation to industrial matters; - use effective communication techniques to support the resolution of workplace grievances and conflicts; - provide accurate written and oral advice about industrial matters, and; - use strategies to monitor and gather feedback on the implementation of industrial relations policies and procedures. Students will also be expected to demonstrate the following knowledge: - outline relevant industrial relations policies and procedures; - summarise grievance resolution policy and procedures; - describe relevant legislation, codes of practice and national standards; - describe the relevant state/territory and federal industrial relations systems, and; - identify sources of expert advice.

BSBWRK510 Manage employee relations

Locations: Industry.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to manage employee and industrial relations matters in an organisation. It involves developing and implementing employee and industrial relations policies and plans and managing conflict resolution negotiations. It applies to those who are authorised to oversee industrial relations and manage conflict and grievances in an organisation. They will have a sound theoretical knowledge base in human resources management and industrial relations as well as current knowledge of industrial relations trends and legislation.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting

of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - analyse organisational documentation to determine long-term employee relations objectives and current employee relations performance; - collaborate with others to develop and review industrial relations policies and plans; - develop implementation and contingency plans for industrial relations policies; - identify the skills and knowledge needed to implement the plan and organise training and development for self and staff; - document and communicate strategies and procedures for eliminating and dealing with grievances and disputes; - train others in conflict resolution techniques, and; - manage industrial relations conflicts, including advocating the organisation's position during negotiations and documenting, implementing and following up agreements. Students will also be expected to demonstrate the following knowledge: - explain relevant industrial relations legislation or regulations; - summarise enterprise and workplace bargaining processes; - summarise key entities in the current Australian industrial relations system, including courts and tribunals, trade unions and employer bodies, and; - identify sources of expert advice.

BSBWRT301 Write simple documents

Locations: Industry, Footscray Nicholson, Werribee, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to plan, draft and finalise a basic document. It applies to individuals who apply a broad range of competencies in various work contexts and may exercise some discretion and judgement to produce a range of workplace documentation.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - plan, draft and finalise three different simple documents that accurately convey the required basic information in a format suitable for the intended audience and in accordance with organisational policies and procedures for document production. Note: If a specific volume or frequency is not stated, then evidence must be provided at least once. Students will also be expected to demonstrate the following knowledge: - identify the process for checking basic grammar, spelling and punctuation; - describe different communication methods, and; - describe how audience, purpose and method of communication influence the tone of a document.

BSBWRT401 Write complex documents

Locations: Footscray Park, Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, City King St, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to plan documents, draft text, prepare final text and produce documents of some complexity. It applies to individuals who work in a range of business environments and are skilled in the creation of reports, information and general promotion documents that are more complex than basic correspondence, memos or forms and that require review and analysis of a range of information sources.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic

and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - plan, draft and finalise complex documents that require review and analysis of a range of information sources; - use business technology to apply formatting, and incorporate graphics; - edit the draft text to ensure accuracy and clarity of information, obtain feedback on the draft and revise the draft, and; - apply the enterprise style guide/house style. Students will also be expected to demonstrate the following knowledge: - identify the enterprise style guide/house style; - outline formatting styles and their impact on formatting, readability and appearance of documents, and; - explain rules and conventions for written English, as defined by general and specialist sources.

BSBWRT401A Write complex documents

Locations: Footscray Nicholson, City Queen, Online.

Prerequisites: Nil.

Description: This unit describes the performance outcomes, skills and knowledge required to plan documents, draft text, prepare final text and produce documents of some complexity.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to clarify requirements of documents; - literacy skills to edit and proofread documents; to create documents with a complex, organised structure of linked paragraphs which use simple and complex syntactic structure; - numeracy skills to collate and present data, graphs and annotated references, and; - problem-solving skills to use processes flexibly and interchangeably. Students will also be expected to demonstrate the following knowledge: - enterprise style guide/house style; - formatting styles and their impact on formatting, readability and appearance of documents; - organisational requirements for ergonomics, work periods and breaks, and resource conservation techniques, and; - rules and conventions for written English, as defined by general and specialist dictionaries and books about grammar.

CH011 Chemistry 1

Locations: Footscray Nicholson.

Prerequisites: Nil.

Description: The development and use of materials for specific purposes is an important human endeavour. In this unit students investigate the chemical properties of a range of materials from metals and salts to polymers and nanomaterials. Using their knowledge of elements and atomic structure students explore and explain the relationships between properties, structure and bonding forces within and between particles that vary in size from the visible, through nanoparticles, to molecules and atoms. Students examine the modification of metals, assess the factors that affect the formation of ionic crystals and investigate a range of non-metallic substances from molecules to polymers and giant lattices and relate their structures to specific

applications. Students are introduced to quantitative concepts in chemistry including the mole concept. They apply their knowledge to determine the relative masses of elements and the composition of substances. Throughout the unit students use chemistry terminology including symbols, formulas, chemical nomenclature and equations to represent and explain observations and data from experiments, and to discuss chemical phenomena. This unit is delivered in Year 11.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge in accordance with each unit's learning outcomes, including the setting of practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following knowledge: Outcome 1 On completion of this unit the student should be able to relate the position of elements in the periodic table to their properties, investigate the structures and properties of metals and ionic compounds, and calculate mole quantities. Outcome 2 On completion of this unit the student should be able to investigate and explain the properties of carbon lattices and molecular substances with reference to their structures and bonding, use systematic nomenclature to name organic compounds, and explain how polymers can be designed for a purpose. Outcome 3 On completion of this unit the student should be able to investigate a question related to the development, use and/or modification of a selected material or chemical and communicate a substantiated response to the question. Assessment will follow the requirements set out in the VCE Chemistry Study Guide: The award of satisfactory completion for a unit is based on a decision that the student has demonstrated the set of outcomes specified for the unit. Teachers should use a variety of learning activities and assessment tasks that provide a range of opportunities for students to demonstrate the key knowledge and key skills in the outcomes. Assessment will be a part of the regular teaching and learning program and will be completed mainly in class and within a limited time-frame. All assessments at Units 1 and 2 are school-based. For this unit students are required to demonstrate achievement of three outcomes. As a set these outcomes encompass all areas of study in the unit. Practical work is a central component of learning and assessment. As a guide, between 3½ and 5 hours of class time should be devoted to student practical work and investigations for each of Areas of Study 1 and 2. For Area of Study 3, between 4 and 6 hours of class time should be devoted to undertaking the investigation and communicating findings. .

CH011A Chemistry 1

Locations: Footscray Nicholson.

Prerequisites: Nil.

Description: Students study the models for metallic, ionic and covalent bonding. They consider the widespread use of polymers as an example of the importance of chemistry to their everyday lives. Students investigate the uses of materials and how these have changed. Examples could include improved corrosion prevention or limitation and carbon nanotubes and self-repairing materials. Students are also introduced to the development and application of 'smart' materials. This unit is delivered in Year 11.

Required Reading: Lecturer will provide teaching and learning materials as required in the form of VU produced workbooks.

Assessment: Demonstration of 'Satisfactory completion' by a selection of Assessment tasks and Level of Performance by SAC (Tests) and Exams.

CH022 Chemistry 2

Locations: Footscray Nicholson.

Prerequisites: Nil.

Description: Water is the most widely used solvent on Earth. In this unit students explore the physical and chemical properties of water, the reactions that occur in water and various methods of water analysis. Students examine the polar nature of a water molecule and the intermolecular forces between water molecules. They explore the relationship between these bonding forces and the physical and chemical properties of water. In this context students investigate solubility, concentration, pH and reactions in water including precipitation, acid-base and redox. Students are introduced to stoichiometry and to analytical techniques and instrumental procedures, and apply these to determine concentrations of different species in water samples, including chemical contaminants. They use chemistry terminology including symbols, units, formulas and equations to represent and explain observations and data from experiments, and to discuss chemical phenomena. Students explore the solvent properties of water in a variety of contexts and analyse selected issues associated with substances dissolved in water.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge in accordance with each unit's learning outcomes, including the setting of practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following knowledge: Outcome 1 On completion of this unit the student should be able to relate the properties of water to its structure and bonding, and explain the importance of the properties and reactions of water in selected contexts. Outcome 2 On completion of this unit the student should be able to measure amounts of dissolved substances in water and analyse water samples for salts, organic compounds and acids and bases. Outcome 3 On completion of this unit the student should be able to design and undertake a quantitative laboratory investigation related to water quality, and draw conclusions based on evidence from collected data. Assessment will follow the requirements set out in the VCE Chemistry Study Guide: The award of satisfactory completion for a unit is based on a decision that the student has demonstrated the set of outcomes specified for the unit. Teachers should use a variety of learning activities and assessment tasks that provide a range of opportunities for students to demonstrate the key knowledge and key skills in the outcomes. Assessment will be a part of the regular teaching and learning program and will be completed mainly in class and within a limited time-frame. All assessments at Units 1 and 2 are school-based. For this unit students are required to demonstrate achievement of three outcomes. As a set these outcomes encompass all areas of study in the unit. Practical work is a central component of learning and assessment. As a guide, between 3½ and 5 hours of class time should be devoted to student practical work and investigations for each of Areas of Study 1 and 2. For Area of Study 3, between 4 and 6 hours of class time should be devoted to undertaking the investigation and communicating findings.

CH033 Chemistry 3

Locations: Footscray Nicholson.

Prerequisites: Nil.

Description: The global demand for energy and materials is increasing with world population growth. In this unit students explore energy options and the chemical production of materials with reference to efficiencies, renewability and the minimisation of their impact on the environment. Students compare and evaluate different chemical energy resources, including fossil fuels, biofuels, galvanic cells and fuel cells. They investigate the combustion of fuels, including the energy

transformations involved, the use of stoichiometry to calculate the amounts of reactants and products involved in the reactions, and calculations of the amounts of energy released and their representations. Students consider the purpose, design and operating principles of galvanic cells, fuel cells and electrolytic cells. In this context they use the electrochemical series to predict and write half and overall redox equations, and apply Faraday's laws to calculate quantities in electrolytic reactions. Students analyse manufacturing processes with reference to factors that influence their reaction rates and extent. They investigate and apply the equilibrium law and Le Chatelier's principle to different reaction systems, including to predict and explain the conditions that will improve the efficiency and percentage yield of chemical processes. They use the language and conventions of chemistry including symbols, units, chemical formulas and equations to represent and explain observations and data collected from experiments, and to discuss chemical phenomena. This unit is delivered in Year 12.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge in accordance with each unit's learning outcomes, including the setting of practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following knowledge: Outcome 1 On completion of this unit the student should be able to compare fuels quantitatively with reference to combustion products and energy outputs, apply knowledge of the electrochemical series to design, construct and test galvanic cells, and evaluate energy resources based on energy efficiency, renewability and environmental impact. Outcome 2 On completion of this unit the student should be able to apply rate and equilibrium principles to predict how the rate and extent of reactions can be optimised, and explain how electrolysis is involved in the production of chemicals and in the recharging of batteries. Assessment will follow the requirements set out in the VCE Chemistry Study Guide: SCHOOL-BASED ASSESSMENT 1. Satisfactory completion The award of satisfactory completion for a unit is based on whether the student has demonstrated the set of outcomes specified for the unit. A variety of assessment tasks will provide a range of opportunities for students to demonstrate the key knowledge and key skills in the outcomes. 2. Assessment of levels of achievement The student's level of achievement in Unit 3 will be determined by School-assessed Coursework (SAC). SAC will be completed mainly in class and within a limited time-frame. SAC for Unit 3 will contribute 16 per cent to the study score. SAC for Unit 4 will contribute 24 per cent to the study score (CH034 Chemistry 4). Practical work is a central component of learning and assessment. As a guide, between 3½ and 5 hours of class time should be devoted to student practical work and investigations for each of Areas of Study 1 and 2. EXTERNAL ASSESSMENT The level of achievement for Units 3 and 4 is also assessed by an end-of-year examination, which will contribute 60 per cent to the study score.

CH033A Chemistry 3

Locations: Footscray Nicholson.

Prerequisites: Nil.

Description: In this unit students investigate the scope of techniques available to the analytical chemist. Chemical analysis is vital in the work of the forensic scientist, the quality control chemist at a food manufacturing plant, the geologist in the field, and the environmental chemist monitoring the health of a waterway. This unit is delivered in Year 12.

Required Reading: Lecturer will provide teaching and learning materials as required in

the form of VU produced workbooks.

Assessment:Demonstration of 'Satisfactory completion' by a selection of Assessment tasks and Level of Performance by SAC (Tests) and Exams .

CH034 Chemistry 4

Locations:Footscray Nicholson.

Prerequisites:CH033 - Chemistry 3

Description:The carbon atom has unique characteristics that explain the diversity and number of organic compounds that not only constitute living tissues but are also found in the fuels, foods, medicines and many of the materials we use in everyday life. In this unit students investigate the structural features, bonding, typical reactions and uses of the major families of organic compounds including those found in food. Students study the ways in which organic structures are represented and named. They process data from instrumental analyses of organic compounds to confirm or deduce organic structures, and perform volumetric analyses to determine the concentrations of organic chemicals in mixtures. Students consider the nature of the reactions involved to predict the products of reaction pathways and to design pathways to produce particular compounds from given starting materials. Students investigate key food molecules through an exploration of their chemical structures, the hydrolytic reactions in which they are broken down and the condensation reactions in which they are rebuilt to form new molecules. In this context the role of enzymes and coenzymes in facilitating chemical reactions is explored. Students use calorimetry as an investigative tool to determine the energy released in the combustion of foods. This unit is delivered in Year 12.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge in accordance with each unit's learning outcomes, including the setting of practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following knowledge: Outcome 1 On completion of this unit the student should be able to compare the general structures and reactions of the major organic families of compounds, deduce structures of organic compounds using instrumental analysis data, and design reaction pathways for the synthesis of organic molecules. Outcome 2 On completion of this unit the student should be able to distinguish between the chemical structures of key food molecules, analyse the chemical reactions involved in the metabolism of the major components of food including the role of enzymes, and calculate the energy content of food using calorimetry. Outcome 3 On the completion of this unit the student should be able to design and undertake a practical investigation related to energy and/or food, and present methodologies, findings and conclusions in a scientific poster. Assessment will follow the requirements set out in the VCE Chemistry Study Guide: SCHOOL-BASED ASSESSMENT 1. Satisfactory completion The award of satisfactory completion for a unit is based on whether the student has demonstrated the set of outcomes specified for the unit. A variety of assessment tasks will provide a range of opportunities for students to demonstrate the key knowledge and key skills in the outcomes. 2. Assessment of levels of achievement The student's level of achievement in Unit 4 will be determined by School-assessed Coursework (SAC). SAC will be completed mainly in class and within a limited time-frame. SAC for Unit 3 will contribute 16 per cent to the study score (CH033 Chemistry 3). SAC for Unit 4 will contribute 24 per cent to the study score. Practical work is a central component of learning and assessment. As a guide, between 3½ and 5 hours of class time should be devoted to student practical work and investigations for each of Areas of Study 1 and 2. For Area of Study 3, between

7 and 10 hours of class time should be devoted to the investigation related to energy and/or food, to be undertaken in either Unit 3 or Unit 4, or across both Units 3 and 4, including writing of the sections of the scientific poster. EXTERNAL ASSESSMENT The level of achievement for Units 3 and 4 is also assessed by an end-of-year examination, which will contribute 60 per cent to the study score.

CH034A Chemistry 4

Locations:Footscray Nicholson.

Prerequisites:Nil.

Description:In this unit students investigate the industrial production of chemicals and the energy changes associated with chemical reactions. This unit is delivered in Year 12.

Required Reading:Lecturer will provide teaching and learning materials as required in the form of VU produced workbooks.

Assessment:Demonstration of 'Satisfactory completion' by a selection of Assessment tasks and Level of Performance by SAC (Tests) and Exams.

CHCADV001 Facilitate the interests and rights of clients

Locations:Industry, Footscray Nicholson, St Albans, Werribee, Sunshine.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to assist clients to identify their rights, voice their needs and concerns and realise their interests, rights and needs. This unit applies to workers of all levels in a range of health or community services settings who provide services using a human rights based approach and have direct interaction with clients.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - worked in collaboration with 1 client to identify their interests, needs and rights; - advocated on behalf of 1 client to achieve a specific outcome, and; - supported 1 client throughout an organisational or legal complaints process. Students will also be expected to demonstrate the following knowledge: - Universal Declaration of Human Rights; - relationship between human needs and human rights; - human rights frameworks, approaches, instruments; - legal and ethical considerations (international, national, state/territory, local) related to facilitation of client rights and interests and how these impact individual workers; - duty of care; - human rights; - mandatory reporting; - discrimination; - privacy, confidentiality and disclosure; - informed consent; - organisation and legal complaints processes; - rights and responsibilities of clients, workers and organisations; - common risks to client safety and wellbeing; - relevance of child protection across all health and community services contexts, including duty of care when child is not the client, indicators of risk and adult disclosure; - actions that constitute discrimination and techniques for addressing it; - types of community resources, networks and referral options relevant to the nature of client service; - potential conflict between client needs and organisation requirements; - differences between negotiation, advocacy, mediation; - negotiation, advocacy, mediation techniques for the facilitation of client rights, and; - empowerment and disempowerment.

CHCADV005 Provide systems advocacy services

Locations: Footscray Nicholson, Werribee, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to advocate and ensure that government, community and organisational systems broadly support and uphold human rights. This unit applies to workers in a health, community services or advocacy settings who undertake a leadership role in influencing social and system changes. Workers at this level will also advocate for change and continuous improvement at the organisational level to improve client outcomes and service quality.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - provided systems advocacy for 1 specific client or client group or community to achieve a specific outcome; - consulted with members of the client group and/or community to identify issues and concerns; - facilitated 1 formal meeting with the client or client group or community to develop strategies for action; - pursued opportunities to advocate, mediate and negotiate through community organisations and government agencies; - represented client issues within broader social, political and community structures, and; - identified 1 opportunity for improved service delivery within the organisation and provided recommendation(s) for change. Students will also be expected to demonstrate the following knowledge: - universal declaration of human rights; - relationship between human needs and human rights; - human rights frameworks, approaches, instruments; - legal and ethical considerations for advocacy work and how these are applied in organisations; - guardianship including the legal status of parents and guardians of people under the age of 18; - rights and responsibilities of clients, workers and organisations; - structural, political and other social factors which operate to maintain discrimination against clients, consumers and service users; - specific range of issues affecting the client group; - context and relationship of client issues to community, society and government policy; - political lobbying processes, including electronic campaigning and use of media (traditional, social and digital) for advocacy purposes; - relevant agencies and services which may assist in promoting and advocating; - balance between the rights of the general community and the rights of people with specific issues; - power and power structures; - community consultation, participation and decision-making processes; - processes and structures relevant to organisation goals and objectives or work role; - industry culture; - models of negotiation; - models of management and leadership, and; - advocacy issues.

CHCAGE001 Facilitate the empowerment of older people

Locations: Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, City King St, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to respond to the goals and aspirations of older people and provide support services in a manner that focuses on improving health outcomes and quality of life, using a person-centred approach. This unit applies to support workers in residential or community contexts.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic

and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - responded to the goals and aspirations of at least 2 older people, 1 in a simulated environment and 1 in the workplace, and; - used oral communication skills to maintain positive and respectful relationships. Students will also be expected to demonstrate the following knowledge: - structure and profile of the aged care sector; - key issues facing older people; - implications for work in the sector; - the ageing process and related physiological and psychological changes, including sexuality and gender issues; - strategies that the older person may adopt to promote healthy lifestyle practices; - legal and ethical considerations for working with older people; - indicators of abuse and/or neglect; - reporting requirements for suspected abuse situations, and; - the impact of own attitudes on working with older people.

CHCAGE003 Coordinate services for older people

Locations: Industry, Footscray Nicholson, St Albans, Werribee, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge to provide services to an older person. It involves following and contributing to an established individual plan. This unit applies to workers in a residential or community context, or those in personal care or support services that work with older people. Work performed requires some discretion and judgement and is carried out under regular direct or indirect supervision.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - coordinated the service needs for at least 3 older people requiring varying levels or types of support. Students will also be expected to demonstrate the following knowledge: - the social model of disability; - aspects of elder abuse; - indications of neglect or abuse; - emotional impact of abuse; - appropriate management of issues surrounding abuse; - manifestations and presentation of common health problems associated with ageing, appropriate actions in response to these problems and when to refer; - role and function of various relevant health professionals; - relevant community and support services; - principles and practices of case management, and; - organisation standards, policies and procedures. .

CHCAGE004 Implement interventions with older people at risk

Locations: Industry, Footscray Nicholson, St Albans, Werribee, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to work in partnership with older people and their carers to implement interventions in the context of an individualised plan to reduce risk. This unit applies to support workers in a residential or community context. Work performed requires a range of well developed skills where some discretion and judgement is required. Workers will take responsibility for their own outputs under direct or indirect supervision.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - assisted with the assessment of risk and the implementation and evaluation of risk minimisation strategies for at least 2 older people, 1 in a simulated environment and 1 in the workplace, in a manner that is respectful of the older person's dignity and privacy. Students will also be expected to demonstrate the following knowledge: - the tensions which may exist between an individual's rights and the organisation's responsibility to individuals; - legal and ethical considerations for working in aged care; - duty of care; - human rights; - privacy, confidentiality and disclosure; - work role boundaries - responsibilities and limitations; - the major issues, trends and policies relating to the health and wellbeing of older people; - standardised tools for risk assessment and the management and monitoring of risks; - major risk areas for ageing population, and; - documentation requirements including the importance of accurate and appropriately detailed records.

CHCAGE005 Provide support to people living with dementia

Locations: Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, City King St, Sunshine.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to provide person-centred care and support to people living with dementia. It involves following and contributing to an established individual plan. This unit applies to workers in a residential or community context, including family homes. Work performed requires some discretion and judgement and may be carried out under regular direct or indirect supervision. The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - provided support to 2 different people living with dementia: using a person-centred approach to support; using appropriate communication strategies, and; assisting in implementing a range of suitable activities that meet the person's needs. Students will also be expected to demonstrate the following knowledge: - up to date research on dementia and the different manifestations of dementia; - dementia as a progressive neurological condition, including pathological; - common indicators and symptoms of dementia; - behaviours of concern, needs driven behaviour model and de-escalation procedures; - progression of dementia and potential impact on the person with dementia, their family and significant others; - principles of person-centred approach to support; - relevant activities which enhance self-esteem and pleasure in the person's life, minimise boredom, and distract from or eliminate behavioural and psychological

symptoms of dementia; - competency and image enhancement as a means of addressing devaluation, and; - verbal and non-verbal communication strategies.

CHCAOD001 Work in an alcohol and other drugs context

Locations: Industry, Footscray Nicholson, Werribee, City Flinders, Sunshine.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to establish and work within the current context, philosophy and values of the alcohol and other drugs (AOD) sector. This unit applies to workers who come into contact with clients affected by alcohol and other drugs.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - used critical thinking skills to evaluate information about current values and philosophy of the AOD sector, and; - worked with at least 2 people who have alcohol and/or drugs issues in ways that are consistent with the current values and philosophy of the AOD sector. Students will also be expected to demonstrate the following knowledge: - impact of current and changing social, political, economic and legal contexts of AOD; - historical, current and emerging models of alcohol and drugs practice and their evidence base; - legal and ethical considerations (international, national, state/territory, local) in AOD work, and how they are applied in organisations and individual practice; - specific contexts for AOD work and their characteristics; - social constructs of the AOD sector and the impact of own attitudes on working with people affected by AOD; - historic, current and emerging patterns of drug and alcohol use; - services, prevention and intervention strategies available to AOD clients; - risks and mitigation strategies when working with people affected by alcohol and/or other drugs, and; - drug fundamentals.

CHCAOD002 Work with clients who are intoxicated

Locations:Footscray Nicholson, Werribee, Sunshine.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to respond to the immediate and ongoing needs of people intoxicated by alcohol and/or other drugs, with a focus on harm minimisation. This unit applies to people working in alcohol and other drugs (AOD) services and other community service delivery contexts.

Required Reading:Lecturer will provide teaching and learning materials as required in the form of VU produced Workbooks.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each competency unit's learning outcomes and performance criteria requirements, including the setting of project and work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - provided services to at least 2 intoxicated clients; - used the following communication and interpersonal skills in dealing with intoxicated clients: - management of difficult and aggressive behaviour; - non-judgmental communication; - conflict resolution; - negotiation; - self-protection. Students will also be expected to demonstrate the following knowledge: - legal and ethical considerations (international, national, state/territory, local) in AOD work, and how they are applied in organisations and

individual practice; - children in the workplace; - codes of conduct; - codes of practice; - discrimination; - dignity of risk; - duty of care; - human rights; - informed consent; - mandatory reporting; - practice standards; - privacy, confidentiality and disclosure, including limitations; - policy frameworks; - records management; - rights and responsibilities of workers, employers and clients; - specific AOD legislation; - work role boundaries - responsibilities and limitations; - work health and safety; - infection control; - contexts in which interactions with intoxicated persons may take place: - night patrols; - detoxification/withdrawal units; - sobering up shelters; - emergency departments and other health environments; - other community service delivery environments; - signs and symptoms of alcohol and/or drug use; - signs and symptoms that indicate need for assistance from a health professional; - ways to assess intoxication and/or drug use level/s; - concurrent medical illnesses which may mimic/mask withdrawal; - strategies for dealing with aggressive and potentially violent clients, including protective/risk management strategies; - types of daily living assistance that may be provided: - personal hygiene; - food and drink; - transportation/assistance with travel; - current information on alcohol and other drugs issues; - available support services and resources; - emergency and crisis contacts; - sobering up services; - withdrawal services; - mental health services.

CHCAOD004 Assess needs of clients with alcohol and other drugs issues

Locations: Industry, Footscray Nicholson, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to prepare for and conduct assessments of alcohol and other drugs (AOD) clients to determine eligibility, service requirements and referral needs. This includes knowledge of factors affecting assessment for a range of different client groups including different genders, youth, older people, mandated and voluntary clients, Aboriginal and/or Torres Strait Islander people and those from culturally and linguistically diverse backgrounds. This unit applies to people involved in the assessment of clients with AOD issues using established organisation or jurisdictional AOD assessment tools.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - assessed at least 2 clients in different settings, presenting with alcohol and/or other drug issues, and; - used communication skills, including: interpreting verbal and non-verbal communication; establishing rapport with client; managing conflict; active listening; negotiating. Students will also be expected to demonstrate the following knowledge: - legal and ethical considerations (international, national, state/territory, local) in AOD work, and how these are applied in organisations and individual practice; - requirements related to client registration, allocation and referral; - context for the provision of services - agency role, agency target group and the impacts on the local community; - risk assessment processes in relation to interventions for people with drug and/or alcohol and co-existing issues; - AOD assessment tools; - client information required for assessment and the scope and depth of information needed; - established processes and protocols; - common co-existing conditions and associated issues relating to assessment of people with drug and/or alcohol issues; - factors for consideration when working with different types of clients; - considerations when working with clients at risk of self-harm, suicide or with mental health issues; -

professional responsibilities when presenting cases fall outside of practitioner's current scope; - how to apply pharmacological factors to the assessment process; - patterns of drug use; - consequences and effects of drug substitution/replacement, and; - poly drug use, common drug interactions and effects of prescribed drugs on the use of other drugs.

CHCAOD005 Provide alcohol and other drugs withdrawal services

Locations: Footscray Nicholson, Werribee, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to provide support and assistance to people going through the process of withdrawing from alcohol, tobacco or other drugs, including combinations of these. This unit applies to those working with clients going through alcohol and other drugs (AOD) withdrawal in residential or non-residential settings following established withdrawal guidelines.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - provided withdrawal services according to organisation protocols to 2 clients presenting with different needs. Students will also be expected to demonstrate the following knowledge: - legal and ethical considerations (international, national, state/territory, local) in AOD work, and how these are applied in organisations and individual practice; - organisation protocols for the assessment, monitoring and evaluation of: home-based withdrawal; residential withdrawal and any restrictions on clients, and outpatient withdrawal; - stages of AOD withdrawal and specific signs and symptoms; - responses to the stages of withdrawal; - concurrent medical illnesses which may mimic/mask withdrawal; - support agencies in the AOD sector and the services they provide, including post withdrawal services, and; - current information on alcohol and other drugs issues relevant to withdrawal, including relapse prevention and planning.

CHCAOD006 Provide interventions for people with alcohol and other drugs issues

Locations: Industry, Footscray Nicholson, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to confirm, conduct and monitor intervention strategies to address alcohol and other drugs (AOD) issues. This unit applies to workers who provide support to people with AOD issues within the scope of an established individual treatment plan. Interventions would be ongoing and be conducted under the guidance of a supervisor.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - planned, conducted and monitored interventions for at least 2 people with AOD issues as detailed in their treatment plan, using evidence based interventions, at least 1 of which, must be

motivational interviewing. Students will also be expected to demonstrate the following knowledge: - legal and ethical considerations (international, national, state/territory, local) in AOD work, and how these are applied in organisations and individual practice; - roles and responsibilities of people involved in the intervention; - types of information and terminology found in client treatment plan and how to interpret these; - factors that may influence a client's ability to participate in an intervention; - theoretical frameworks about motivation to change alcohol and/or other drug use; - treatment interventions, and their use, appropriate to AOD and scope of role; - techniques for motivational interviewing/counselling; - strategies to support clients during interventions; - strategies for managing difficult situations, and; - types and availability of service to which client may be referred.

CHCAOD007 Develop strategies for alcohol and other drugs relapse prevention and management

Locations: Industry, Footscray Nicholson, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to work collaboratively with clients to develop strategies for preventing and managing relapse, should it occur, as well as ways to deal effectively with potentially harmful behaviour. This unit applies to workers who develop strategies with, and for, clients with alcohol and other drugs (AOD) issues within established organisation guidelines. The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - conducted a relapse planning session with at least 2 clients with alcohol and/or drug issues that incorporate supporting clients with: problem solving; goal setting; coping; self monitoring and management; recognising and managing cravings; cognitive restructuring; harm minimisation; used effective communication skills. Students will also be expected to demonstrate the following knowledge: - legal and ethical considerations (international, national, state/territory, local) in relapse prevention and management work, and how these are applied in organisations and individual practice; - roles and responsibilities of different people in the relapse prevention process, including scope of own role; - principles of: effective communication, including motivational interviewing, active listening and questioning; crisis management; harm minimisation; - effects of AOD and the behavioural responses associated with AOD issues; - models of relapse prevention; - factors that typically trigger relapse; - factors that influence substance use, including environmental, cultural, economic and individual that are risk factors for relapse; - risk assessment and management considerations including ways of minimising risk; - relapse/lapse management strategies; - pharmacotherapies and other therapies to assist in relapse prevention, and; - strategies to assist with harm minimisation to client and others.

CHCAOD008 Provide advanced interventions to meet the needs of clients with alcohol and other drugs issues

Locations: Industry, Footscray Nicholson, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to design, implement and monitor ongoing therapeutic interventions drawing on evidence informed models and techniques. It involves holistic consideration of all client needs, and collaboration with other services. This unit applies to individuals who work with significant autonomy in the provision of interventions and support to clients with alcohol and other drugs (AOD) issues. While work is carried out in the context of an existing treatment plan, the worker may also design and adapt specific strategies. The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - autonomously planned and provided intervention and support strategies to 2 different clients with AOD issues, and; - used at least 2 of the following approaches/models: cognitive behavioural therapy or mindful integrated cognitive behavioural therapy (MiCBT); rational emotive therapy; reality therapy; dialectical behaviour therapy; acceptance and commitment therapy; solution focussed therapy; narrative therapy; resilience based interventions; family counselling; group work and group counselling. Students will also be expected to demonstrate the following knowledge: - legal and ethical considerations (international, national, state/territory, local) in AOD work, and how these are applied in organisations and individual practice; - counselling and other therapeutic models and techniques appropriate to client AOD issues and scope of role; - ways that different models and techniques may be integrated and when this may be appropriate; - techniques for teaching clients self-management skills and self-report measures; - factors affecting support work with people from specific groups; - techniques for dealing with difficult communication situations, and; - measures for monitoring client outcomes.

CHCAOD009 Develop and review individual alcohol and other drugs treatment plans

Locations: Industry, Footscray Nicholson, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to work collaboratively with clients to establish treatment goals, and to develop and evaluate individual treatment plans to meet those goals. This unit applies to workers who develop treatment plans with, and for, clients with alcohol and other drugs (AOD) issues on the basis of an existing assessment and within established organisation guidelines. Depending on the context, development of the plan may be autonomous or collaborative. Workers may or may not be the person conducting the assessment.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of

competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - developed a treatment plan based on existing assessments and within organisation guidelines for 2 people requiring different types of interventions and service supports. Students will also be expected to demonstrate the following knowledge: - legal and ethical considerations (international, national, state/territory, local) in AOD work, and how these are applied in organisations and individual practice: - different approaches and models of service planning and case management; - principles of: person centred approach; effective communication and negotiation techniques; - organisation policies, procedures and guidelines for individual treatment plans; - types of issues beyond the scope of AOD services where referral or inter-agency collaboration may be required; - role of family members and others in the client support network in relation to successful treatment planning, implementation and review; - types of information and terminology found in client assessments and how to interpret these; - what constitutes effective treatment goals for AOD issues; - AOD service delivery models; - brief and longer term treatments and interventions available, when and how they are used; - processes for the matching of treatment goals to different interventions and strategies aimed at abstinence and controlled AOD use; - ways of using stages of change to identify appropriate treatment goals, strategies and referral options; - barriers and cultural factors that may impact on a person with AOD issues achieving treatment goals and ways to address this; - how and where to access specialist AOD information, and; - factors affecting support work with people from specific groups.

CHCCCS001 Address the needs of people with chronic disease

Locations: Footscray Park, Industry, Footscray Nicholson, St Albans, Werribee, City King St, Sunshine, Whitten Oval.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to determine and address specific issues faced by people who have a chronic disease, in the context of contributing to a holistic approach to support. The unit applies to workers providing services to people with chronic disease in diverse community services and health contexts. The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - determined and addressed the needs of at least 3 people presenting with different types of chronic disease and lifestyle situations. Students will also be expected to demonstrate the following knowledge: - broad context for chronic disease; - strategies to address and manage chronic disease in the relevant work context; - ways to communicate appropriately and effectively with a person with a chronic disease, and; - roles and responsibilities of different people in chronic disease management and their contribution to coordinated service delivery.

CHCCCS002 Assist with movement

Locations: Industry, Footscray Nicholson, St Albans, Werribee, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to support people

who require assistance with basic physical movement which may be due to incapacity. This unit applies to workers in a range of community services or health contexts who provide front line support services within the context of an established individualised plan.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - provided assistance with moving a person in at least 6 of the following situations: - assisting a person up off the floor; - assisting a person to be weighed on chair weighing scales; - assisting a person to change position in bed; - assisting a person to use crutches or other walking aids; - assisting a person or co-worker to use a hoist or mechanical lifter for transfers; - moving a person to a seated position; - moving a person by wheelchair or trolley; - moving a person between wheelchair or trolley and bed; - moving a person to a standing position; - transfers from wheelchair to shower chair and toilet; - assisting a person who is falling. Students will also be expected to demonstrate the following knowledge: - basic body biomechanics, soft tissue joint structure; - importance of maintaining skin integrity; - organisation policy and procedures in relation to: infection control as it relates to assisting with movement, and supervisory and reporting protocols; - legal and ethical considerations and how these are applied in an organisation and individual practice; - risk factors and techniques used when environment or residence are not custom fitted with aids, and; - techniques for assisting with movement.

CHCCCS003 Increase the safety of individuals at risk of suicide

Locations: Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, City King St.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge to identify and manage immediate suicide risk and work with the individual to achieve safe outcomes. It includes the requirements for developing a clear safety plan for addressing any immediate danger to the person at risk or others, mobilising access to emergency medical help when needed and facilitating links with further support. This unit applies to people in formal helping roles in any community service context. Suicide safety may involve face-to-face, telephone or remote contact with the person involved. The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - responded to at least 3 different situations where there is risk of suicide. Students will also be expected to demonstrate the following knowledge: - indicators of potential suicide risk, including

risk of any type of self-harm; - principles and practices of suicide intervention; - referral options and procedures for accessing services; - procedures for facilitating emergency interventions; - personal values, beliefs and attitudes that facilitate or impede suicide intervention; - consideration of how the presence of mental health concerns might influence the helper's intervention role and inform referral options; - principles and practices of self-care and supervision, and; - legal and ethical considerations and how these are applied in an organisation and individual practice.

CHCCCS004 Assess co-existing needs

Locations: Industry, Footscray Nicholson, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to assess the diverse and multi-faceted needs of people and determine both internal and external services required to meet those needs. This unit applies in a range of community service contexts.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - assessed and appropriately responded to the requirements of at least 3 people presenting with co-existing needs, and; - used analytical and critical thinking skills in each case: applying a strengths-based approach to assessment; analysing information about co-existing issues; making evidence-based judgements about the person's needs. Students will also be expected to demonstrate the following knowledge: - different types of assessment and their use in different contexts; - assessment process; - nature and impact of diverse and multi-faceted needs and issues affecting client groups, and potential interrelationships between them; - common service requirements and basic features of those services; - networks and specialist services available, and; - legal and ethical considerations relating to assessment processes.

CHCCCS006 Facilitate individual service planning and delivery

Locations: Industry, Footscray Nicholson, St Albans, Werribee, City King St, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to contribute to the development, implementation and review of individualised support. This unit applies to workers in a range of community services and service delivery contexts. Work will involve collaborating with the person requiring support and other people involved in the support network. Service needs may be complex or multiple.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - worked within established guidelines to contribute to the planning and reviewing of services which meet the needs of at least 3 people, and; - contributed to the planning processes by communicating effectively with the person and other stakeholders using active

listening and questioning. Students will also be expected to demonstrate the following knowledge: - role and responsibilities of different people in the planning process; - human development across the lifespan and influences on service delivery; - strengths-based planning processes; - features and modes of service delivery; - legal and ethical considerations related to planning and service delivery and how these are applied in an organisation and individual practice; - risk management considerations and ways of minimising risk, and; - continuous improvement processes.

CHCCCS007 Develop and implement service programs

Locations: Industry, Footscray Nicholson, Werribee, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to engage consumers, analyse service needs of particular groups and develop programs and services to meet those needs. This unit applies to workers coordinating or managing teams and operations in varied service delivery contexts.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - developed, implemented and evaluated at least 1 community sector service program. Students will also be expected to demonstrate the following knowledge: - program planning principles and processes; - program design; - program resourcing; - implementation systems and procedures; - feedback and complaints procedures; - evaluation and continuous improvement; - accountability and governance; - funding framework, including not-for-profit, government funding; - supports needed for effective consumer participation at all levels of program planning; - requirements of specific service user groups and individuals; - diverse and multi-faceted needs and issues service user participation opportunities and barriers; - opportunities for collaboration and service partnerships; - risk, regulatory and sustainability considerations, and; - standards, codes and legislation compliance.

CHCCCS009 Facilitate responsible behaviour

Locations: Footscray Nicholson, Werribee, City King St, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to monitor individuals, respond to behaviours of concern, deal with conflict and support responsibility for behaviour management and change.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - recognised and responded to at least 3 different situations where behaviours of concern are present, and; - communicated effectively in at least 1 situation of conflict by: engaging positively and supportively; using negotiation and problem solving skills, and; modelling assertive behaviour. Students will also be expected to demonstrate the following

knowledge: - legal and ethical considerations related to addressing behaviours of concern and how these are applied in an organisation and individual practice; - types of behaviours of concern, underlying reasons and appropriate ways to respond; - cultural practices and customs of the service users' population and their impact on behaviour in the particular environment; - principles of effective communication for conflict management; - principles of responding to human behaviour relating to violence, aggression and suicide; - reporting procedures for incidents and accidents; - specific statutory requirements related to treatment of people with special needs and requiring special support; - specialist services and referral options, and; - critical incident procedures.

CHCCCS010 Maintain high standard of service

Locations: Industry, Footscray Nicholson, St Albans, Werribee, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge to deliver and maintain a high standard of service. This unit applies to workers in a range of community services and health contexts where direct support services are provided. Work performed requires some discretion and judgement and may be carried out under regular direct or indirect supervision.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - delivered services to 3 different people using appropriate verbal and non-verbal communication styles in a non-discriminatory, supportive and inclusive manner. Students will also be expected to demonstrate the following knowledge: - characteristics of excellent standards of service; - how to access interpreter services; - cultural differences in Australia; - legal and ethical consideration and how these are applied in an organisation and individual practice; - organisation policies and procedures for responding to: behaviours of concern and complaints; - roles and responsibilities of self and other workers within the organisation, and; - situations when people's issues need to be referred to an appropriate professional.

CHCCCS011 Meet personal support needs

Locations: Industry, Footscray Nicholson, St Albans, Werribee, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to determine and respond to an individual's physical personal support needs and to support activities of daily living. This unit applies to workers who provide support to people according to an established individualised plan in any community services context. Work performed requires some discretion and judgement and may be carried out under regular direct or indirect supervision. The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting

of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - safely supported at least 2 individuals by performing the activities outlined in the performance criteria of this unit. This includes following support requirements of an established individualised plan and supporting each of the following activities: bed bathing; dressing, undressing and grooming; eating and drinking using appropriate feeding techniques; oral hygiene; shaving; showering; toileting and the use of continence aids; using aids and equipment including devices used by the person; - performed the following hazardous manual handling scenarios at least once: transferring a person between bed and chair; transferring a person in and out of car and falls recovering. Students will also be expected to demonstrate the following knowledge: - different contexts for provision of personal support and impacts on the way services are provided; - role and responsibilities of the personal support providers and workers; - concepts of enablement and re-enablement; - legal and ethical requirements related to the provision of personal support, and how these are applied in an organisation and individual practice; - basics of: body hygiene; grooming; oral hygiene; human body system; - personal safety and security risks associated with provision of personal support and strategies to minimise those risks; - features, functions and safe use of equipment and aids used in provision of personal support and devices used by the person including the importance of adjusting equipment and aids to the needs of the individual; - techniques for completing physical support routines; - infection control procedures, and; - organisational reporting technologies.

CHCCCS012 Prepare and maintain beds

Locations: Industry, Footscray Nicholson, St Albans, Werribee, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to apply bed making and cleaning practices to a range of beds to ensure that people can safely occupy a clean bed. This unit applies to workers in a range of settings where beds may be occupied or unoccupied. Where beds in an acute setting are occupied, bed making will usually be performed in an assisting role or under the supervision of an appropriate health professional according to organisation policy. The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - bed linen items; - organisation policies and procedures, and; - clinical waste disposal, including waste minimisation, environmental responsibility and sustainable practice issues. Students will also be expected to demonstrate the following knowledge: - use of suitable facilities, equipment and resources.

CHCCCS014 Provide brief interventions

Locations: Footscray Nicholson, Werribee, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to assess intervention needs, and then to implement and monitor brief intervention strategies for people at various stages of the change process. This unit applies to workers in a

range of community services contexts.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - undertaken the brief intervention process for at least 2 people presenting with different issues at different stages of the change process; - used each of the following at least once to support the intervention process: active listening; non-judgmental language; supportive approach; facilitation and negotiation that assists the person's decision-making. Students will also be expected to demonstrate the following knowledge: - brief intervention scope and process; features of brief interventions; role as public health strategy; reasons for using brief interventions; step by step process; record-keeping requirements; - stages of behaviour change model; - options and approaches to support behaviour change; - health and wellbeing considerations; - broader contexts for the person's current behaviour; - barriers and challenges for positive intervention outcomes and how to address these, and; - legal and ethical considerations for interventions.

CHCCCS015 Provide individualised support

Locations: Industry, Footscray Nicholson, St Albans, Werribee, Sunshine, VU Learning Link in Altona Meadows.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to organise, provide and monitor support services within the limits established by an individualised plan. The individualised plan refers to the support or service provision plan developed for the individual accessing the service and may have many different names in different organisations. This unit applies to workers who provide support under direct or indirect supervision in any community services or health context. The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - used individualised plans as the basis for the support of 3 individuals. Students will also be expected to demonstrate the following knowledge: - rationale and processes underpinning individualised support planning and delivery; - roles and responsibilities of different people and the communication between them; - service delivery models in the relevant sector; - legal and ethical requirements and how these are applied in an organisation and individual practice; - factors that affect people requiring support; - practices that support skill maintenance and development; - indicators of unmet needs and ways of responding, and; - risk management considerations and ways to respond to identified risks.

CHCCCS016 Respond to client needs

Locations: Industry, Footscray Nicholson, Werribee, City King St.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to respond holistically to client needs. Clients may have a range of issues outside and in addition to the area of immediate focus or expertise of the worker and their organisation. The unit applies to workers in a range of community services contexts who provide person-centred support to clients. The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - responded holistically to the needs of at least 5 clients. Students will also be expected to demonstrate the following knowledge: - legal and ethical considerations for working with clients and how these are applied in an organisation and individual practice; - organisation policies and procedures; - identification of the impact of, and interrelationships between issues relating to: physical health; mental health; child protection; domestic violence; disability; homelessness; unemployment; financial; alcohol and other drugs (AOD); trauma; culture and religion, and; - organisation requirements and referral options for working with people experiencing issues related to: physical health; mental health; child protection; domestic violence; disability; homelessness; unemployment; AOD and trauma.

CHCCCS019 Recognise and respond to crisis situations

Locations: Industry, Footscray Nicholson, St Albans, Werribee, City King St, Sunshine.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to recognise situations where people may be in imminent crisis, and then to work collaboratively to minimise any safety concerns and make plans to access required support services. This unit applies to any community services worker involved in crisis intervention. Management of the crisis may involve face-to-face, telephone or remote contact with persons involved. The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. CHCCDE010 Develop and lead community engagement strategies to enhance participation

Locations: Footscray Nicholson, Werribee, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to apply advanced community engagement skills to increase participation in the community development environment. The high level engagement skills described in this unit apply to a range of workplace contexts involving skill development, application and evaluation of engagement strategies to ensure effective community participation in relevant projects and activities. This unit applies to workers in both health and community sectors and/or a community development work context. Workers at this level will be part of a professional team and have the responsibility of supervision of others.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - developed 1 engagement plan; - facilitated at least 3 group discussions; - used a range of group facilitation strategies to enhance interactions between group members and to gather relevant feedback, and; - provided feedback to the group regarding outcomes. Students will also be expected to demonstrate the following knowledge: - communication styles and techniques; - group facilitation processes and mechanisms for group support; - principles of effective community engagement and participation; - traditional and contemporary models of engagement; - community engagement techniques including online tools and use of social media; - methods of research; - sustainability; - empowerment; community control and hegemony; - capacity building; - asset based

community development; - methods of engagement and participation; - evaluation and review; - building and maintaining partnerships; - social capital; - reporting mechanisms, and; - reengagement strategies for individuals who are disengaged.

CHCCDE011 Implement community development strategies

Locations: Footscray Nicholson, Werribee, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to work with individuals, groups and the community to identify issues and develop cooperative processes to facilitate change. This unit applies to workers in both health and community sectors and/or a community development work context. Workers at this level will be part of a professional team and have the responsibility of supervision of others.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - conducted research and analysis of at least 1 community priority and identified the structures and systems contributing to the concern; - engaged collaboratively with at least 1 community group to develop strategies to address their priorities; - supported at least 3 activities to facilitate community participation, and; - developed and maintained public processes to address common issues. Students will also be expected to demonstrate the following knowledge: - relevant legislation and public policies; - community processes and protocols; - funding sources and their policies and strategies for encouraging community input and participation; - principles and practices of community development work; - traditional community development approaches; - principles and practices of contemporary community development approaches and techniques for mobilisation; - representation, lobbying and advocacy; - power and conflict management; - principles of networking and the role of partnerships; - policies and processes for data collection and analysis; - key methods of information dissemination and the benefits of use; - general and cultural issues relating to specific client community groups, and; - group processes.

CHCCDE012 Work within organisation and government structures to enable community development outcomes

Locations: Footscray Nicholson, Werribee, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to work within community and government structures to enable community development processes. This unit applies to workers in both health and community sectors and/or a community development work context. Workers at this level will be part of a professional team and have the responsibility of supervision of others.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be

expected to demonstrate the following required skills: - identified aspects of at least 1 organisation's structure and philosophy which support community development work and the potential implicit barriers to that work, and; - prepared at least 1 report on community development activities and projects in a comprehensive and accurate manner and presented to relevant stakeholders and management. Students will also be expected to demonstrate the following knowledge: - relevant legislation and public policies; - structures and systems that support or present barriers to community development; - principles of participatory democracy; - range of management and governance structures operating with the community services industry; - social, economic, political, cultural and economic development; - all possible funding sources; - critical theories for analysing human service organisations; - critique of managerial approaches, and; - change management principles.

CHCCOM001 Provide first point of contact

Locations: Footscray Park, Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, City King St, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to greet clients and exchange routine information, to prioritise the individual's needs, and to respond to immediate needs. This unit applies to service delivery in all community services and health contexts. Workers at this level work under supervision with limited responsibility.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - provided information to 3 people presenting with multi-faceted needs; - collected and documented identifying information for 3 people accessing the service, and; - used communication and problem solving skills to respond appropriately to the behaviours of each of the following individuals at least once: a person demonstrating aggressive behaviour; a person who is distressed, and; a person with a cognitive impairment. Students will also be expected to demonstrate the following knowledge: - factors to consider when providing information and service; - strategies and techniques for dealing with problems and challenging behaviours and situations; - assertive communication and conflict avoidance techniques; - specific organisation or sector information, and; - legal and ethical considerations.

CHCCOM002 Use communication to build relationships

Locations: Footscray Park, Industry, Footscray Nicholson, Werribee, City Flinders, City King St, Sunshine, Whitten Oval - Footscray.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge to apply specific communication techniques to establish, build and maintain relationships with clients, colleagues and other stakeholders based on respect and trust. This unit applies to work across a range of workplace contexts where workers at all levels may communicate with individuals and/or groups both in person and in writing.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge

and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - obtained feedback from 3 clients or colleagues on effectiveness of communication and responded appropriately; - prepared 3 types of written correspondence in accordance with organisation communication protocols; - facilitated resolution of 1 difficult situation with a client, colleague or service provider, and; - facilitated 1 meeting around a workplace issue. Students will also be expected to demonstrate the following knowledge: - organisation communication policies and protocols; - different communication styles and techniques, and how they impact on interpersonal communication; - communication strategies; - types of interpretation and translation services specific to the client group, and how to access them; - factors that commonly contribute to the development of communication barriers including high emotions, mistrust or misunderstandings; - professional relationship boundaries; - digital media and use in community services and health sector, and; - written correspondence protocols and style guides, including letters, emails, minutes, case notes, reports.

CHCCOM003 Develop workplace communication strategies

Locations: Industry, Footscray Nicholson, Werribee, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to develop communication protocols for a team or business unit. This unit applies to workers responsible for overseeing the communication of organisation-specific information to a range of internal and external stakeholders.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - developed and presented 1 new communication strategy and associated protocols for a business unit or team, and; - developed and implemented 1 strategy for using digital media to provide information and promote organisation to clients. Students will also be expected to demonstrate the following knowledge: - political, economic, social and technological factors; - competitors; - stakeholders; - organisational business and strategic plans; - SWOT analysis (strengths, weaknesses, opportunities and threats); - legal and ethical considerations relating to communication; - organisation communication channels; - a range of different communication strategies and plans including crisis communication plans; - financial implications including budgeting and return on investment; - mentoring and coaching principles and practices; - traditional media; - digital media including types, etiquette and marketing; - evaluation processes.

CHCCOM005 Communicate and work in health or community services

Locations: Industry, Footscray Nicholson, St Albans, Werribee, Sunshine, VU Learning Links at Altona Meadows.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to communicate effectively with clients, colleagues, management and other industry providers. This unit applies to a range of health and community service contexts where workers may communicate face-to-face, in writing or using digital media and work with limited

responsibility under direct or indirect supervision. The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - demonstrated effective communication skills in 3 different work situations; - clarified workplace instructions and negotiated timeframes with 2 colleagues; - responded appropriately to 3 different situations where communication constraints were present, and; - completed 2 written or electronic workplace documents to organisation standards. Students will also be expected to demonstrate the following knowledge: - legal and ethical considerations in relation to communication; - sources of information and the application of legal and ethical aspects of health and community services work; - ethical decision making and conflicts of interest; - principles of effective communication, including models, modes and types; - communication techniques; - influences on communication; - potential constraints to effective communication in health and community service contexts; - health and community services industry terminology relating to role and service provision; - importance of grammar, speed and pronunciation for verbal communication; - when and how to use and recognise non-verbal communication; - structure, function and interrelationships between different parts of the health and community service system; - organisation structure and different models to support optimum client service, and; - digital media and use in community services and health sector, including: web; email; social media; podcast and videos; tablets and applications; newsletters and broadcasts, and; intranet. .

CHCCOM006 Establish and manage client relationships

Locations: Footscray Park, Werribee, City King St, Whitten Oval.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge to establish and manage professional one-to-one relationships with clients in the context of providing an ongoing health service or intervention. This unit applies to community services or health workers who have defined responsibilities to work independently with clients within broad but established guidelines.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - established and managed client relationships and boundaries appropriately during the provision of services to 3 clients, and; - developed responses to 3 different situations involving difficult or challenging behaviour. Students will also be expected to demonstrate the following knowledge: - legal and ethical considerations for establishing and managing client relationships and how these are applied; - modes and techniques for effective communication; - role of motivational interviewing during client interactions; -

techniques for motivational interviewing; - barriers and influences on communication and ways to respond; - techniques for dealing with difficult communication situations, and; - types of information that may be provided to clients as relevant.

CHCCSL003 Facilitate the counselling relationship and process

Locations: Footscray Nicholson, Werribee, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge to support clients to identify and work through concerns, and to manage the overall counselling process to its conclusion. This unit applies to individuals whose job role involves working with clients on personal and psychological issues within established policies, procedures and guidelines.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - facilitated the counselling process for at least 3 different clients with varying presenting issues, in at least 3 sessions per client; - facilitated client sessions using all aspects of the counselling process; - identifying concerns; - working through concerns; - monitoring the counselling relationship, and; - followed processes to bring the counselling process to an end on at least 2 occasions. Students will also be expected to demonstrate the following knowledge: - legal and ethical considerations for the counselling relationship, and how these are applied in individual practice; - different agency and organisation models of counselling and intervention; - the counselling process; - obstacles to the counselling process; - indicators of needs requiring referral, and referral options; - structure of key stages of a counselling session, and techniques for managing each stage, and; - self-awareness.

CHCCSM002 Implement case management practice

Locations: Industry, St Albans, Werribee.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to develop and implement an action plan for complex case management based on existing goal directed plans that address predetermined needs. Workers at this level will demonstrate autonomy, well-developed judgement, adaptability and responsibility and are typically already experienced in working intensively with clients requiring support. This unit applies to work in a range of health and community service sector contexts. The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - implemented case management practice for 3 complex cases involving people with a diverse range of

issues, goals and barriers. Students will also be expected to demonstrate the following knowledge: - case management practice and approaches; - case management models and practices literature and current literature in area of practice; - current national standards for practice of case management; - wide range of services and resources available to clients; - components of service delivery system; - funding processes and bodies related to provision of relevant services and resources; - characteristics and needs of identified client population; - nature and significance of service setting; - legal and ethical considerations relevant to case management and how these are applied in organisations and individual practice; - documentation requirements and practices; - complex case management processes; - complex client needs, and; - barriers that may restrict client's ability to meet identified goals.

CHCCSM005 Develop, facilitate and review all aspects of case management

Locations: Industry, Footscray Nicholson, Werribee, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to undertake case management meetings to plan, monitor and review service provision. Workers at this level work autonomously and are responsible for own outputs within organisation guidelines. This unit applies to work in a range of health and community services contexts.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - developed, facilitated and reviewed all aspects of case management for 3 clients. Students will also be expected to demonstrate the following knowledge: - evidence based practice requirements; - approaches to service delivery; - contemporary behaviour change models, practices and interventions; - privacy and confidentiality; - formal meeting processes; - relevant organisation and regulatory standards, policy, procedures, legislation and statutory mandates; - risks and responsibilities relating to duty of care; - considerations, protocols, history and special needs of diverse client populations, including: - culturally and linguistically diverse (CALD); - Aboriginal and/or Torres Strait Islander people; - people with disability; - lesbian, gay, bi-sexual, transgender, intersex (LGBTI); - people experiencing or at risk of homelessness; - older people; - children and young people; - family structure, dynamics, communication and decision-making; - relevant documentation protocols; - monitoring and review processes; - range of available services; - rights, roles and responsibilities of people within the decision making process; - the impact of values systems of worker, client and key stakeholder on outcomes, and; - ways of addressing experience, skills values and development of participants.

CHCDEVO01 Confirm client developmental status

Locations: Footscray Nicholson, Werribee, City King St, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to review the developmental status of a client. Note that the client may be a child or a young person. Work at this level may require guidance and/or supervision from appropriately qualified personnel, especially where provision of direct client services is involved. This unit applies to people working in a range of community service contexts including: juvenile justice, alcohol and other drugs services, mental health,

and child protection.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - observed and questioned at least one client and their family and documented information relevant to the developmental status of the client; - confirmed client's developmental status prior to delivering services; - identified variations from normal development status and recognised and referred potentially serious issues in line with organisational requirements; - identified potential factors responsible for significant variations from normal developmental status and determined an appropriate response; - referred to or sought assistance from an appropriate person or authority in relation to variations from normal functioning, and; - complied with mandatory reporting requirements where appropriate. Students will also be expected to demonstrate the following knowledge: - detailed aspects of human development throughout the lifespan; - key factors that may impact on the individual at identified stages of human development and their potential effects, e.g. the impact of trauma; - legal obligations, particularly in relation to child protection and elder abuse issues; - appropriate range of referral sources and associated protocols; - awareness of own values and attitudes and their potential impact on clients; - indicators of significant issues, and; - organisational standards, policies and procedures.

CHCDEV002 Analyse impacts of sociological factors on clients in community work and services

Locations:Industry, Footscray Nicholson, Werribee, Sunshine.

Prerequisites:Nil.

Description:This unit of competency describes the skills and knowledge required to function independently and to plan and undertake community work and associated services. The unit describes the application of knowledge of the broad social and cultural context in which work is planned and implemented in the community services industry. This unit applies to workers who seek to better understand their client groups and issues that impact on the lives of their clients and hence on their delivery of services.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - advised, referred or provided at least three clients with access to services based on socio-cultural information gathered; - monitored and reviewed effectiveness of work and/or services provided to clients; - revised work and/or services provided to clients to enhance client outcomes and better address their social and cultural issues, and; - performed the activities outlined in the performance criteria of this unit during a period of at least 100 hours of work within a community services workplace. Students will also be expected to demonstrate the following knowledge: - functions of social and cultural

institutions within Australian society; - factors contributing to client experiences of inequality and the possible effects and consequences on their role in society; - effects and consequences of unemployment on clients and in our society; - contemporary frameworks and influences underpinning social policy; - political and economic theory and systems; - concepts of inequality and how they impact on individuals and society; - different beliefs about various stratifications in our society and the ways in which stereotypes develop, and their impact; - specific policy decisions and their impact on community work, and; - organisational standards, policies and procedures.

CHCDFV001 Recognise and respond appropriately to domestic and family violence

Locations:Industry, Footscray Nicholson, Werribee, Sunshine.

Prerequisites:Nil.

Description:This unit describes the knowledge and skills required to identify and respond to the needs of clients who may be experiencing domestic and family violence, including responding to immediate intervention and support needs. This unit applies to health and community service workers providing services according to established organisation procedures. These workers may not be specialised family violence workers. The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - identified and responded to the needs of at least 3 clients affected by domestic and family violence, according to legal and ethical requirements, and; - used the following interpersonal skills with clients: questioning; active listening; rapport building. Students will also be expected to demonstrate the following knowledge: - legal and ethical considerations for workers interacting with clients affected by domestic and family violence, and how these are applied in organisations and individual practice; - domestic violence and its context; - underpinning values and philosophies in responding to domestic and family violence; - the differences between responding to clients in a crisis situation and those requiring long term support; - immediate needs for assessment; - organisation procedures, practices and standards; - groups represented within the local community and an understanding of the issues that arise when working with those groups; - referral sources and associated protocols, and; - own values and attitudes and their potential impact on clients.

CHCDFV003 Promote community awareness of domestic and family violence

Locations:Industry, Footscray Nicholson, Werribee, Sunshine.

Prerequisites:Nil.

Description:This unit describes the knowledge and skills required to identify gaps in existing information, services and resources and to promote community awareness of domestic and family violence issues to support prevention. This unit applies to workers in a range of community service contexts. These workers may not be specialised family violence workers.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - developed at least 1 program to promote community awareness of domestic and family violence including using communication methods suited to the specific community. Students will also be expected to demonstrate the following knowledge: - legal and ethical considerations (national and state/territory) for domestic and family violence, and how these are applied in organisations and individual practice; - general principles and practices of community development, education and consciousness raising; - domestic violence and its context; - underpinning values and philosophies relating to domestic violence; - cultural and language groups represented within the local/regional community, and a respect for their values and beliefs; - impacts of cultural, sub-cultural, social, sexual identity, religious, gender, age, disability, language issues, etc. on attitudes towards domestic violence; - key people and groups within the community who are able to influence community values; - current theory and research knowledge in the domestic violence area; - processes used to formally and informally communicate the domestic violence prevention needs of the community; - organisation current domestic violence activities, programs and services; - current organisation procedures, protocols and practice for promotion of services, and; - program planning techniques.

CHCDIS001 Contribute to ongoing skills development using a strengths-based approach

Locations: Footscray Nicholson, St Albans, Werribee, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to assist with supporting the ongoing skill development of a person with disability. It involves following and contributing to an established individual plan and using a positive, strengths-based approach. This unit applies to individuals who work with people with disability in a range of community services and health contexts. Work performed requires some discretion and judgement and may be carried out under regular direct or indirect supervision.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - contributed to ongoing skills development, using a strengths-based approach, for at least 3 people with disability. Students will also be expected to demonstrate the following knowledge: - current practices, philosophies and theories; - concepts of vulnerability, power, independence and interdependence; - assessment processes relating to ongoing skills development; - assessments processes and protocols used by the organisation or service; - communication needs, strategies and resources; - principles of access and equity; - legal and ethical considerations for working with people with disability; - tools, equipment and other resources used in the learning process; - various teaching and learning strategies; - strategies for identifying and maximising informal learning opportunities; - services and resources available to people with special needs; - prompting, principles of prompting and fading prompting; - strategies to create

independence; - reinforcing techniques and when and how to use them; - motivators, de-motivators and blocks to learning, and; - incidental learning and the importance of recognising opportunities for learning.

CHCDIS002 Follow established person-centred behaviour supports

Locations: Industry, Footscray Nicholson, St Albans, Werribee, Sunshine, Altona Meadows Library and Learning Centre.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to implement behaviour support strategies outlined in an individualised behaviour support plan for a person with disability. This unit applies to workers in varied disability services contexts. Work performed requires some discretion and judgement and may be carried out under regular direct or indirect supervision.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - provided positive support in response to at least 3 different situations of behaviours of concern, and; - responded to at least 1 critical incident relating to adverse behaviour in accordance with individualised behaviour support plan and organisation's policies and procedures. Students will also be expected to demonstrate the following knowledge: - principles and practices of positive behaviour support which focuses on the individual person; - the social model of disability; - the impact of social devaluation on an individual's quality of life; - positive lifestyle enhancement strategies; - organisation policies and procedures relating to behaviour management; - principles of effective communication and ways to implement these to minimise behaviours of concern; - indicators that people have unmet needs; - factors that may contribute to behaviours of concern; - specialist services and referral options, and; - legal and ethical considerations for working with people with disability.

CHCDIS003 Support community participation and social inclusion

Locations: Footscray Nicholson, St Albans, Werribee, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to assist with supporting people with disability in community participation and social inclusion using a person-centred approach. This involves enabling people to make choices to maximise their participation in various community settings, functions and activities to enhance psychosocial well-being and lifestyle in accordance with the person's needs and preferences. This unit applies to workers in varied disability services contexts. Work performed requires some discretion and judgement and may be carried out under regular direct or indirect supervision.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - supported at least 1 person

with disability, by working with them to identify skills and interests and find matching options within the broader community. Students will also be expected to demonstrate the following knowledge: - rights and responsibilities of people with disability; - principles of: strengths-based practice; person-centred practice; community inclusion and best practice examples; - strategies for strengthening options, networks and services for people with disability; - local agencies and services, and resources to obtain community information about sporting, cultural and specific-interest groups; - active citizenship and what this means for people with a disability, and; - role of carers and/or families and/or relevant others.

CHCDIS004 Communicate using augmentative and alternative communication strategies

Locations: Industry, Footscray Nicholson, St Albans, Werribee, Sunshine, Altona Meadows Library and Learning Centre..

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to communicate with people who have complex communication needs through effective use of Augmentative and Alternative Communication (AAC) strategies and systems. AAC refers to methods that replace or supplement speech to address the needs of people whose oral speech skills limit their ability to meet their participation and communication needs. AAC systems comprise communication aids, symbols, strategies, and techniques and methods that may be aided or unaided. This unit applies to disability support work in a variety of contexts. Work performed requires a range of well developed, person-centred skills where some discretion and judgement is required and workers will take responsibility for their own outputs.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - developed effective AAC strategies for at least 1 person with complex communication needs. Students will also be expected to demonstrate the following knowledge: - definitions of communication and different mechanisms people use to communicate; - how people with disabilities may communicate and how to facilitate/support their communication; - principles and practices of AAC; - basic AAC strategies and their correct use for the person's level of communication; - basic steps in the process for assessing an individual's needs for the use of AAC; causes and conditions associated with communication impairment, including stroke and acquired brain injury (ABI); - cross cultural communication protocols; - roles and functions of different professionals in the development, implementation and maintenance of AAC strategies and devices; - available range of communication aids and their correct use, and; - work role boundaries - responsibilities and limitations.

CHCDIS005 Develop and provide person-centred service responses

Locations: Industry, Footscray Nicholson, St Albans, Werribee, Sunshine, Altona Meadows Library and Learning Centre..

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to develop, implement and monitor service responses with a person with disability. Work is undertaken within a legislative and ethical framework to ensure the provision of high quality, person-centred service delivery which supports the person's aspirations,

needs, rights and interests. This unit applies to workers in varied disability service contexts. Work performed requires a range of well developed, person-centred skills where some discretion and judgement is required and workers will take responsibility for their own outputs.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - followed procedures for person-centred service delivery in line with the organisation's quality system, including: - developed and implemented at least 3 different person-centred service responses to meet the aspirations, needs, rights and preferences for people with disability, 2 in a simulated environment and 1 in the workplace; - reviewed and monitored at least 3 individual service responses and made changes that are necessary to improve quality service delivery; met changing needs of the person; addressed barriers and responded to legislative changes, 2 in a simulated environment and 1 in the workplace, and; - performed the activities outlined in the performance criteria of this unit during a period of at least 120 hours of direct support work. Students will also be expected to demonstrate the following knowledge: - relevant networks and services in the broader community; - current best practice approaches for service delivery; - legal and ethical considerations for working with people with disability; - human rights, including the United Nations Convention on the Rights of Persons with Disabilities (UNCRPD); - mandatory reporting; - privacy, confidentiality and disclosure; - work health and safety, and; - principles of: empowerment; rights-based approach; person-centred practice; strengths-based approach; access and equity.

CHCDIS007 Facilitate the empowerment of people with disability

Locations: Industry, Footscray Nicholson, St Albans, Werribee, Sunshine, Altona Meadows Library and Learning Centre.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to facilitate the empowerment of people with disability to deliver rights based services using a person-centred approach. It should be carried out in conjunction with individualised plans. This unit applies to workers in varied disability contexts. The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - facilitated access to a wide variety of choices that will assist 2 people with disability to reach their personal goals, using: oral communication skills to maintain positive and respectful relationships with the person with disability; appropriate non-verbal communication strategies. Students will also be expected to demonstrate the following knowledge: -

history and recent developments in disability; - social constructs of disability and the impact of own attitudes on working with people with disabilities; - how and when to seek support from more experienced and qualified staff; - types of disability; - support practices for people; - legal and ethical considerations for working with people with disability; - principles of: empowerment; rights-based approaches; person-centred practices; self-advocacy; active support; active listening; social justice, and the importance of knowing and respecting each person as an individual; strengths-based approaches; - strategies that assist people with disabilities to exercise their rights and support independent action and thinking, including use of technology (e.g. laptops or tablets) to facilitate choice; - how to access and use advocacy services and complaint mechanisms, and; - indicators of abuse and/or neglect in relation to people with disabilities.

CHCDIS008 Facilitate community participation and social inclusion

Locations: Industry, Footscray Nicholson, St Albans, Werribee, Sunshine, Altona Meadows Library and Learning Centre..

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to develop and facilitate person-centred strategies for participation in various community settings, functions and activities to enhance the psychosocial well being and lifestyle of a person with disability. This unit applies to workers in varied disability contexts. Work performed requires a range of well developed, person-centred skills where some discretion and judgement is required and workers will take responsibility for their own outputs.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - assisted at least 3 people with disability to develop and implement community engagement plans within their individualised plan. Students will also be expected to demonstrate the following knowledge: - elements of best practice in the area of community participation and social inclusion; - the social model of disability and the impact of social devaluation on an individual's quality of life; - principles of: active support; lifespan development; strengths-based and person-centred practice; risk assessment and mitigation; - funding frameworks and their impact on community participation; - legal and ethical considerations relevant to working with people with disability; - human rights, including the United Nations convention on the rights of persons with disabilities (UNCRPD), and; - strategies for: identifying interests, abilities and requirements of people with disability; communication to assist with community participation.

CHCDIS009 Facilitate ongoing skills development using a person-centred approach

Locations: Industry, Footscray Nicholson, St Albans, Werribee, Sunshine, Altona Meadows Library and Learning Centre..

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to plan, implement and review formal and informal ongoing skills development, in collaboration with a person with disability and incorporate into the person's individualised plan. This unit applies to workers in varied disability contexts. Work performed requires a range of well developed, person-centred skills where some discretion and judgement is

required and workers will take responsibility for their own outputs.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - developed, implemented and monitored ongoing skills development, using a person-centred approach, for at least 3 people with disability. Students will also be expected to demonstrate the following knowledge: - key aspects of current practices, philosophies and theories; - local community education opportunities and their potential use in capacity building; - assessment processes relating to ongoing skills development, and; - relevant services and resources available to people with learning needs.

CHCDIS010 Provide person-centred services to people with disability with complex needs

Locations: Industry, Footscray Nicholson, St Albans, Werribee, Sunshine, Altona Meadows Library and Learning Centre..

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to provide person-centred services to people with disability with complex or special support needs under the supervision of a relevant professional. This unit applies to workers in varied disability contexts. Work performed requires a range of well developed, person-centred skills where some discretion and judgement is required and workers will take responsibility for their own outputs.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - evaluated and prioritised the needs of at least 3 people with complex support issues and developed individualised plans to meet their needs, and; - coordinated the delivery, monitoring, evaluation and review of at least 3 individualised plans. Students will also be expected to demonstrate the following knowledge: - factors that would lead to someone being classified as having complex needs rather than basic needs; - physiology and psychology as it applies to a range of disability types; - nutrition and dietetics as it applies to a range of disability types; - common issues and challenges facing people with disability; - manifestations and presentation of common health problems as well as behavioural issues associated with different disability types; - formal and informal assessment approaches for assessment of people with complex and/or special needs, and; - organisation policies and procedures related to developing and managing individualised plans including the role of family members and/or carers and/or relevant others and various types of community service providers.

CHCDIV001 Work with diverse people

Locations: Footscray Park, Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, City King St, Sunshine, Altona Meadows Library and Learning Centre. VU Learning Links - Hume Global Learning Centre Broadmeadows, St Albans, and

Sunbury Neighbourhood House..

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to work respectfully with people from diverse social and cultural groups and situations, including Aboriginal and/or Torres Strait Islander people. This unit applies to all workers.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - undertaken a structured process to reflect on own perspectives on diversity; - recognised and respected the needs of people from diverse social and cultural backgrounds in at least three (3) different situations: - selected and used appropriate verbal and non-verbal communication, and; - recognised situations where misunderstandings may arise from diversity and formed appropriate responses. Students will also be expected to demonstrate the following knowledge: - concepts of cultural awareness, cultural safety and cultural competence and how these impact different work roles; - concepts and definitions of diversity; - own culture and the community attitudes, language, policies and structures of that culture and how they impact on different people and groups; - features of diversity in Australia and how this impacts different areas of work and life; - legal and ethical considerations (international, national, state/territory, local) for working with diversity, how these impact individual workers, and the consequences of breaches; - Universal declaration of human rights; - frameworks, approaches and instruments used in the workplace; - rights and responsibilities of workers, employers and clients, including appropriate action when rights are being infringed or responsibilities not being carried out; - key areas of diversity and their characteristics; - key aspects, and the diversity, of Australia's Aboriginal and/or Torres Strait Islander cultures, including: - social, political and economic issues affecting Aboriginal and/or Torres Strait Islander people; - own culture, western systems and structures and how these impact on Aboriginal and/or Torres Strait Islander people and their engagement with services; - potential needs of marginalised groups, including: - protective factors; - physical, mental and emotional health issues/care needs; - consideration of impacts of discrimination, trauma, exclusion and negative attitudes; - resources that support individuals and organisations to embrace and respond to diversity; - influences and changing practices in Australia and their impact on the diverse communities that make up Australian society, and; - impact of diversity practices and experiences on personal behaviour, interpersonal relationships, perception and social expectations of others.

CHCDIV002 Promote Aboriginal and/or Torres Strait Islander cultural safety

Locations: Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, City King St, Sunshine, Learning Links Geelong..

Prerequisites: Nil.

Description: The unit describes the skills and knowledge required to identify Aboriginal and/or Torres Strait Islander cultural safety issues in the workplace, model cultural safety in own work practice, and develop strategies to enhance cultural safety. This unit applies to people working in a broad range of roles including those involved in direct client service, program planning, development and evaluation contexts.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic

and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - promoted Aboriginal and/or Torres Strait Islander cultural safety in the context of at least 1 workplace; - researched culture and history, the impact of European settlement, loss of land and culture and the importance of law and kinship, and; - evaluated ways to improve communication with Aboriginal and/or Torres Strait Islander peoples who may be clients or colleagues. Students will also be expected to demonstrate the following knowledge: - concept of Aboriginal and/or Torres Strait Islander cultural safety in the community services and health context, and its relationship with: cultural awareness; cultural competence; - legislative context for Aboriginal and/or Torres Strait Islander cultural safety; - the diversity of Aboriginal and/or Torres Strait Islander cultures; - historical, social, political and economic issues affecting Aboriginal and/or Torres Strait Islander people and their engagement with community services and health systems; - own culture, western systems and structures and how these impact on Aboriginal and/or Torres Strait Islander people and their engagement with services; - factors that contribute to Aboriginal and/or Torres Strait Islander ill health and common diseases experienced by these groups of people, and; - ways to involve Aboriginal and/or Torres Strait Islander people in the planning and delivery of services and programs.

CHCDIV003 Manage and promote diversity

Locations: Industry, Footscray Nicholson, Werribee, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to evaluate and promote diversity in the workplace, and to contribute to the planning of diversity policies and procedures. This may apply to internal work practices or external service delivery. This unit applies to individuals working in any type of leadership role across all industry sectors.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - researched diversity in at least 1 workplace in terms of current performance and meeting of diversity objectives; - used strategies to foster and promote diversity in work practice; - coaching and mentoring; - communication; - work planning, and; - contributed to the development of workplace diversity policies and procedures for at least 1 workplace. Students will also be expected to demonstrate the following knowledge: - concepts of cultural awareness, cultural safety and cultural competence and how these impact leadership and management practice; - concepts and definitions of diversity; - key areas of diversity and their characteristics; - the role of leaders and managers in encouraging diversity in work practices and service delivery; - impact of diversity practices and experiences on personal behaviour, interpersonal relationships, perception and social expectations of self and others; - legal and ethical considerations (international, national, state/territory, local) for diversity practices at

a management level; - benefits of workplace diversity; - types of direct and indirect discrimination; - ways to ensure effective and equitable activities to diverse clients; - barriers to inclusivity; - cross-cultural communication strategies and how these can be integrated into workplace practices, and; - principles and practices of inclusivity and the types of planning and work practice that support diversity.

CHCECE001 Develop cultural competence

Locations: Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to work towards cultural competency and to support participation of all children and families in children's services. This support includes contributing to children's understanding and acceptance of all cultures.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - reflected on own cultural identity and biases; - investigated cultural diversity in at least one service and community; - supported children's and families' cross-cultural relationships through the following activities: interacting in culturally appropriate ways with children, families and communities; consulting with appropriate persons to access local knowledge of Aboriginal and/or Torres Strait Islander culture; planning and implementing supportive environments for all children; supporting the implementation of experiences that encourage children to respect all cultures and to celebrate cultural differences; embedding examples of diversity and inclusion in daily practice, and; using effective oral communication techniques to liaise between differing cultural contexts and situations. Students will also be expected to demonstrate the following knowledge: - how to access: the National Quality Framework; the National Quality Standards; the relevant approved learning framework; - how to navigate through framework and standards documents to find areas relevant to this unit of competency; - cultural competence and diversity as outlined in the approved learning framework relevant to the workplace; - impact of colonisation, historical events and issues on Aboriginal and/or Torres Strait Islander people; - organisational policies and initiatives designed to support participation, and; - organisational standards, policies and procedures.

CHCECE002 Ensure the health and safety of children

Locations: Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge to ensure the health and safety of children. This unit applies to educators working in a variety of education and care services.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be

expected to demonstrate the following required skills: - consistently supported the health needs of the children in the service, including the following activities: contributing to the provision of a clean and safe environment; recognising and responding to signs of illness of children, including signs and symptoms of asthma and anaphylaxis; reading and interpreting authorisation forms, medication labels, medical management plans and other relevant medical information, and; developing children's awareness of safety. Students will also be expected to demonstrate the following knowledge: - the National Quality Framework; - the National Quality Standards; - the relevant approved learning framework; - how to navigate through framework and standards documents to find areas relevant to this unit of competency; - how to undertake a risk analysis of toys and equipment; - potential hazards to children, including medical conditions; - children's requirements for sleep and rest; - environments that promote rest and sleep including light, noise, temperature and ventilation requirements; - signs, symptoms and key characteristics of allergy/anaphylaxis; - signs, symptoms and key characteristics of asthma; - how to use an adrenalin auto injector for anaphylaxis; - how children's oral health impacts on their general health and well-being, including signs of tooth decay; - safety issues and risk management strategies for children's health and safety in a variety of contexts; - basic home fire safety including high-risk groups, behaviour that contributes to fire injury and fatalities, and smoke alarm placement, installation and maintenance, and; - organisational standards, policies and procedures.

CHCECE003 Provide care for children

Locations: Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to ensure children's physical and emotional wellbeing is maintained and their self-sufficiency is nurtured.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - provided care and responded appropriately to at least three children of varying ages, including: promoting physical activity and encouraging participation; engaging children in discussions around physical health and wellbeing; adapting the physical environment to ensure challenge and appropriate risk-taking; ensuring the smooth transition of new arrivals; supporting children through transition and change, and; - performed the activities outlined in the performance criteria of this unit during a period of at least 120 hours of work in at least one regulated education and care service. Students will also be expected to demonstrate the following knowledge: - the National Quality Framework; - the National Quality Standards; - the relevant approved learning framework; - how to navigate through framework and standards documents to find areas relevant to this unit of competency; - basic principles of child physical and emotional development; - United Nations Convention on the Rights of the Child; - recommendations for physical activity for birth to 5-year-olds and 5- to 12-year-olds in the National Physical Activity Guidelines for Australians; - impact of changes of routines and environments for children; - sun safety; - relevance of hand hygiene for minimising infectious diseases; - code of ethics; - routines and strategies to minimise distress at separation of parent and child, and; - organisational standards, policies and procedures.

CHCECE004 Promote and provide healthy food and drinks

Locations: Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to promote healthy eating and ensure that food and drinks provided are nutritious, appropriate for each child and prepared in a safe and hygienic manner.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - planned and provided food and drink for children on at least three occasions, including: identifying and responding to requirements related to food allergies, medical conditions and cultural and religious requirements; role-modelling healthy eating habits for children; ensuring safe handling, preparation and storage of food and drinks, and; creating a positive, relaxed environment during mealtimes; - engaged children by involving them in menu planning and assisting in meal preparation, and; - read and interpreted food labels to identify ingredients of concern and nutrition content. Students will also be expected to demonstrate the following knowledge: - the National Quality Framework; - the National Quality Standards; - the relevant approved learning framework; - how to navigate through framework and standards documents to find areas relevant to this unit of competency; - United Nations Convention on the Rights of the Child; - code of ethics; - food allergies, food intolerances, contamination and/or allergic reactions in meal preparation and possible reactions, including anaphylaxis; - infant feeding requirements and guidelines; - recommendations for healthy eating - Dietary Guidelines for Children and Adolescents in Australia and the Australian Guide to Healthy Eating, including Get Up and Grow: Healthy Eating and Physical Activity for Early Childhood resources; - implications of poor diet including tooth decay, deficiencies, poor concentration, out of character behaviour; - food-handling requirements, preventing microorganism contamination and/or allergic reactions; - importance of addressing individual dietary needs and preferences with particular reference to specific cultural, religious or health requirements, and; - organisational standards, policies and procedures.

CHCECE005 Provide care for babies and toddlers

Locations: Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required by educators working with babies and toddlers to ensure that the children's physical and emotional wellbeing is maintained.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - provided care to at least different three babies and toddlers of varying ages using safe and hygienic practices,

including: assessing and responding appropriately to babies' needs, including hunger, distress, tiredness and pain; setting up a safe environment conducive to rest; changing nappies; heating breast milk and formula, preparing bottles and preparing and heating food; cleaning equipment and utensils, and; feeding babies; - developed a nurturing and securely attached relationship with at least three different babies and toddlers of varying ages, including: settling new babies and toddlers through observing, monitoring and appropriately interacting with them and their caregivers, and; engaging in one-to-one interactions with babies and toddlers during daily routines; - support the learning of at least three different babies and toddlers of varying ages, including: respond appropriately to babies' and toddlers' cues and language; initiate and model language with babies and toddlers; modify the environment and interactions to support babies/toddlers changing requirements; encourage their attempts to gain new skills; provide opportunities to develop self-knowledge and awareness, and; contribute to their emotional and psychological well-being, and; - perform the activities outlined in the performance criteria of this unit during a period of at least 120 hours of work in at least one regulated education and care service. Students will also be expected to demonstrate the following knowledge: - the National Quality Framework; - the National Quality Standards; - the relevant approved learning framework; - how to navigate through framework and standards documents to find areas relevant to this unit of competency; - individual patterns and routines of babies and toddlers; - appropriate interactions with babies and toddlers, including: individual differences of babies' and toddlers' needs for rest, and sleep/rest patterns; signs of stress, distress or pain in babies and toddlers, and; social development of babies and toddlers; - dietary requirements and nutritional needs of babies and toddlers; - food safety guidelines; - recommendations for oral health, including restricting bottles meal times only; - guidelines for infection control; - safe and unsafe practices for working with babies; - different practices and routines used by various families and their underlying cultural or personal rationale; - emotional, physical and language development of babies and toddlers; - attachment theory; - Sudden Infant Death Syndrome; - United Nations Convention on the Rights of the Child; - brain development in babies and toddlers, and; - organisational standards, policies and procedures.

CHCECE006 Support behaviour of children and young people

Locations: Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge to apply strategies to guide responsible behaviour of children and young people in a safe and supportive environment.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communicated issues to a supervisor and negotiated solutions in a clear and appropriate manner at least twice; - guided behaviour using positive support techniques with at least two children and/or young people; - discussed behaviours of children and/or young people to plan and problem-solve in collaboration with others; - recorded observations and identified behaviours requiring support of children and/or young people using a range of methods, and; - used judgement to determine when to involve other staff for supported intervention. Students will also be expected to demonstrate the

following knowledge: - definitions of and differences between disruptive behaviour and behaviours of concern; - how learning difficulties or mental health issues may affect behaviour; - impacts of environment and culture on behaviour of children and/or young people; - communicative function of behaviour and positive support strategies to redirect behaviour and defuse situations, and; - organisational standards, policies and procedures.

CHCECE007 Develop positive and respectful relationships with children

Locations: Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required by educators working with children to ensure they can develop and maintain effective relationships and promote positive behaviour.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communicated positively and respectfully and interacted effectively with at least three children, including: active listening; consideration of a child's age, activities, interests, culture and needs; interpreting non-verbal cues of children; responding to distress in ways that meets the child's need, and; communication of care and respect through all interactions; - assessed and responded appropriately to behaviours of concern; - encouraged children to respect similarities and differences between each other; - involved and encouraged children in decision-making and planning, and; - performed the activities outlined in the performance criteria of this unit during a period of at least 120 hours of work in at least one regulated education and care service. Students will also be expected to demonstrate the following knowledge: - the National Quality Framework; - the National Quality Standards; - the relevant approved learning framework; - how to navigate through framework and standards documents to find areas relevant to this unit of competency; - effective communication techniques including verbal and non-verbal ways to show respect; - techniques to guide children's behaviour; - United Nations Convention on the Rights of the Child, and; - organisational standards, policies and procedures.

CHCECE009 Use an approved learning framework to guide practice

Locations: Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to enable educators to provide children with opportunities to maximise their potential and develop a foundation for future success.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - worked collaboratively with at least one other educator to implement an approved learning framework within an

approved education and care service, including: investigating and documenting at least two examples of how the learning framework is demonstrated in the service; researching and documenting at least one example of how each principle of the learning framework is reflected in the service; working closely with others and under supervision to help implement the framework; reflecting on and discussing practice with supervisor and others; investigated and documented their own involvement in at least three examples of pedagogical practices in the service. Students will also be expected to demonstrate the following knowledge: - how to access: Belonging, Being and Becoming: The Early Years Learning Framework for Australia; My Time, My Place: Framework for School Age Care in Australia; the relevant approved learning framework used in the service if different from those above; - how to navigate through framework documents to find areas relevant to this unit of competency; - United Nations Convention on the Rights of the Child; - key participants in the implementation of the relevant approved learning framework, and; - organisational standards, policies and procedures.

CHCECE010 Support the holistic development of children in early childhood

Locations: Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge to support and recognise the interrelationship between the physical, social, emotional, cognitive and communication development of children from birth to 6 years of age.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - supported the development of children in at least three different situations/activities (including different age groups and abilities); - interacting with children to holistically support development and learning appropriate to the child's abilities and age; - providing a variety of experiences and environments to support the different areas of children's development (including a combination of physical, creative, social, emotional, language and cognitive), and; - performed the activities outlined in the performance criteria of this unit during a period of at least 120 hours of work in at least one regulated education and care service. Students will also be expected to demonstrate the following knowledge: - code of ethics; - United Nations Convention on the Rights of the Child; - the National Quality Framework; - the National Quality Standards; - the relevant approved learning framework; - how to navigate through framework and standards documents to find areas relevant to this unit of competency; - introductory-level child development for children; - aspects of poor early childhood development; - other life experiences which interrupt appropriate childhood activities, and their potential long-term harmful impacts; - biological and environmental influences on development, and; - symbol systems including letters, numbers, time, money and musical notation.

CHCECE011 Provide experiences to support children's play and learning

Locations: Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to support children's play and learning.

Required Reading: The qualified trainer and assessor will provide teaching and

learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - set up a safe environment on at least three occasions (including at least one indoor and one outdoor), including: demonstrating effective selection and placement of equipment and resources, with consideration for safety of the children; guiding and facilitating individual children's play and learning experiences, including allowing for children to make decisions; creating an environment that allows for individual and collaborative experiences; providing a range of experiences to stimulate children and aid learning, including those that allow exploration of natural materials, environments and experiences. Students will also be expected to demonstrate the following knowledge: - the National Quality Framework; - the National Quality Standards; - the relevant approved learning framework; - how to navigate through framework and standards documents to find areas relevant to this unit of competency; - relevance of the approved framework to pedagogical practices; - play and learning experiences, associated resources and materials relevant to the interests and abilities of children; - role of play in learning; - theories that pertain to play; - reflective practice; - United Nations Convention of the Rights of the Child; - organisational standards, policies and procedures, and; - safety measures available to minimise risks for children and others.

CHCECE012 Support children to connect with their world

Locations: Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to support and encourage children's connection with their environment.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - supported practices that encourage children to connect to their environment on at least three occasions; - providing children with a wide range of natural and recycled materials; - identified and supported workplace procedures to enhance environmental sustainability; - identifying changes to cleaning and maintenance equipment and associated resources; - identifying changes to practices and systems, and; - supported children and other adults to become environmentally responsible and show respect for the environment by: facilitating sustainable practices discussions; modelling sustainable behaviours. Students will also be expected to demonstrate the following knowledge: - the National Quality Framework; - the National Quality Standards; - the relevant approved learning framework; - how to navigate through framework and standards documents to find areas relevant to this unit of competency; - context and application of sustainable development and sustainability within an education and care service children's services environment, and; - organisational standards, policies and procedures.

CHCECE013 Use information about children to inform practice

Locations: Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to gather information about children through observation and other sources as a basis to inform program-planning cycles and to share with children and their families.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - observed, documented and analysed information regarding at least three children of varying ages; - analysing observations of the children's behaviour; - writing reports that record observations accurately and respectfully to the level of detail expected in the service, and; - using information to contribute to program/planning. Students will also be expected to demonstrate the following knowledge: - the National Quality Framework; - the National Quality Standards; - the relevant approved learning framework; - how to navigate through standards and framework documents to find areas relevant to this unit of competency; - United Nations Convention on the Rights of the Child; - code of ethics; - reflective practice; - child development, in order to analyse information and plan accordingly; - observation techniques; - report-writing standards and protocols relevant to the context of observation reports, and; - organisational standards, policies and procedures.

CHCECE016 Establish and maintain a safe and healthy environment for children

Locations: Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: The unit describes the skills and knowledge to establish and maintain a safe and healthy environment for children. This unit applies to educators working in a range of education and care services.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - established and maintained an environment that is safe and healthy for children in at least once service, including: communicating hazards and safety issues to appropriate persons within the service; coordinating emergency responses including evacuation plans; planning and coordinating supervision of children; promoting and monitoring safety practices, including administration of medicines and safe handling of food; coordinating appropriate procedures for handling infections and illnesses, including communicating with families, and; enacting strategies to support children to take increasing responsibility for their own health and physical wellbeing. Students will also be expected to demonstrate the following knowledge: - how to access: the National Quality Framework; the National Quality Standards, and; the relevant approved

learning framework; - how to navigate through framework and standards documents to find areas relevant to this unit of competency; - common childhood illnesses and appropriate responses; - strategies for minimising risk; - notifiable diseases, and; - organisational standards, policies and procedures.

CHCECE017 Foster the holistic development and wellbeing of the child in early childhood

Locations: Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to foster and enhance the holistic development and wellbeing of children from birth to 6 years of age. The unit applies to educators working in a range early education and care service settings.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - planned and provided at least three opportunities for children of varying ages to develop in a range of areas, including: facilitating and supporting emotional and psychological development in children; encouraging self-help and independence of children; planning opportunities to foster children's positive self-concept and self-esteem, and; providing a positive and safe environment to encourage children to express thoughts, feelings and ideas, and; - performed the activities outlined in the performance criteria of this unit during a period of at least 240 hours of work in at least one regulated education and care service. Students will also be expected to demonstrate the following knowledge: - how to access: the National Quality Framework; the National Quality Standards, and; the relevant approved learning framework; - how to navigate through framework and standards documents to find areas relevant to this unit of competency; - relevant aspects of theories of children's emotional and psychological development as they apply to the educator's role; - links between social, physical, psychological and cognitive development; - in-depth knowledge of a range of developmental theories for children between birth and 5 years of age; - contextual factors which influence the children's emotional and psychological development; - factors which enhance the development of self-esteem and self-identity; - core principles of child development and associated developmental tasks, and; - organisational standards, policies and procedures.

CHCECE018 Nurture creativity in children

Locations: Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to nurture creativity in children. The unit applies to educators who work with children in a variety of education and care services.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of

competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - planned and provided at least three programs or active learning environments that foster creativity in for children of varying ages, including: creative experiences initiated by children; dramatic and imaginative play opportunities; creative approaches to routines, and; opportunities for each child to develop self-expression and skills, and; - facilitated the active participation of at least three children of varying ages through encouragement, appropriate interactions and communications. Students will also be expected to demonstrate the following knowledge: - how to access: the National Quality Framework; the National Quality Standards, and; the relevant approved learning framework; - how to navigate through framework and standards documents to find areas relevant to this unit of competency; - stages of children's development, in planning and delivering a range of appropriate activities to stimulate an interest and love of learning in children music, movement, construction, visual art and dramatic play sufficient to engage children and assist them to implement their ideas; - aesthetic, safe, interesting, challenging environments to encourage curiosity, experimentation, active learning, literacy and choice, and; - organisational standards, policies and procedures.

CHCECE019 Facilitate compliance in an education and care service

Locations: Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to facilitate legislative, regulatory and National Quality Framework compliance within an education and care service. This unit applies to educators working in a range of education and care services.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - checked and maintained compliance in an education and care service, including: interpreting and applying the requirements outlined in the National Quality Framework in at least one education and care service, and; facilitating a self-assessment process in at least one education and care service; - developed at least one quality improvement plan, including: documenting and checking information for accuracy and completeness, and; consulting with at least one other educator or service coordinator to review the plan, and; - performed the activities outlined in the performance criteria of this unit during a period of at least 120 hours of work in at least one regulated education and care service. Students will also be expected to demonstrate the following knowledge: - how to access: the National Quality Framework; the National Quality Standards, and; the relevant approved learning framework; - how to interpret the relevance of framework and standards documents in guiding work in this unit of competency; - other legislation, standards and regulations relevant to the children's services industry; - processes for engaging stakeholders in the planning and consultation stages of quality assurance; - support systems, including government and non-government consultants, resources and personnel, and; - best-practice principles and emerging trends in service delivery area.

CHCECE020 Establish and implement plans for developing cooperative behaviour

Locations: Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to support both individual and group plans for developing cooperative behaviour. This unit applies to educators working in a range of education and care services.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - observed and analysed children's behaviour, on at least three occasions, in a range of situations and contexts; - created, implemented and measured the effectiveness of at least one plan, including: developing long-term and short-term goals and objectives; establishing a baseline for the behaviour; clearly outlining alternative behaviours; communicating expectations with children; supporting and communicating with colleagues to implement the plan, and; revisiting the plan and reflecting on its effectiveness; - developed positive relationships with children, respected family expectations and their cultural values, and acted within the service policy, and; - interacted with children and involved them in decision-making and planning. Students will also be expected to demonstrate the following knowledge: - how to access: the National Quality Framework; the National Quality Standards and the relevant approved learning framework; - how to interpret the relevance of framework and standards documents in guiding work in this unit of competency; - stage of development/age-appropriate expectations of children's behaviour; - appropriate and inappropriate behaviours - review of own stance and reflection on own values; - different family styles of discipline and beliefs about behaviour in different cultures and social groups; - relationship-based strategies to help children learn about behaviour; - possible contributing factors to behaviours of concern, i.e. recent events, child's history, actions of others, or developmental or emotional reasons; - code of ethics; - United Nations Conventions on the Rights of the Child, and; - organisation standards, policies and procedures.

CHCECE021 Implement strategies for the inclusion of all children

Locations: Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to support the inclusion of all children and to work with relevant others to plan and implement support strategies where required. This unit applies to educators working in a range of education and care services.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - developed and implemented a plan for support and inclusion for at least one child, including: contributing to individualised, child-centred planning and service delivery; collaborating and sharing

information with family and other educators to develop and implement an inclusion plan; investigating and trialling strategies to address the needs of the child; reviewing and suggesting adaptations to service delivery to meet the needs of children with special needs; identifying and assessing the additional needs of individual children, and; gathering additional resources or sources of information to assist in developing and adapting curriculum to meet additional needs. Students will also be expected to demonstrate the following knowledge: - how to access: the National Quality Framework; the National Quality Standards, and; the relevant approved learning framework; - how to interpret the relevance of framework and standards documents in guiding work in this unit of competency; - stage of development/age-appropriate expectations of children's behaviour; - appropriate and inappropriate behaviours - review of own stance and reflection on own values; - different family styles of discipline and beliefs about behaviour in different cultures and social groups; - relationship-based strategies to help children learn about behaviour; - possible contributing factors to behaviours of concern, i.e. recent events, child's history, actions of others, or developmental or emotional reasons; - code of ethics; - United Nations Conventions on the Rights of the Child, and; - organisation standards, policies and procedures.

CHCECE022 Promote children's agency

Locations: Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to promote and encourage children's agency. This unit applies to educators working in a range of education and care services.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - planned and implemented at least two programs that promote and encourage children's agency, including: establishing environments and opportunities in response to children's interests; using a range of strategies to engage and encourage children in experiences, and; planning and implementing developmentally appropriate curriculum in consultation with other educators. Students will also be expected to demonstrate the following knowledge: - how to access: the National Quality Framework; the National Quality Standards, and; the relevant approved learning framework; - how to navigate through framework and standards documents to find areas relevant to this unit of competency; - relevant theories about childhood learning; - organisation standards, policies and procedures; - strategies for intentional teaching, and; - techniques to encourage and support children to participate.

CHCECE023 Analyse information to inform learning

Locations: Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to gather and analyse information about children's learning, in order to inform practice. This unit applies to educators working in a range of education and care services.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - collected and documented observations of at least three different children, including: children's behaviour and learning; children's play preferences, and; strengths, interests and relationships; - applied information to educational practice, including: sharing information with families, educators, children, experts and specialists; collaborating with families to plan for children's individual needs, and; using information gathered to inform planning. Students will also be expected to demonstrate the following knowledge: - how to access: the National Quality Framework; the National Quality Standards, and; the relevant approved learning framework; - how to interpret the relevance of framework and standards documents in guiding work in this unit of competency; - observation and inclusion principles; - confidentiality requirements; - code of ethics; - collaborative planning techniques; - summative assessments, and; - organisation standards, policies and procedures.

CHCECE024 Design and implement the curriculum to foster children's learning and development

Locations: Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required by educators to design, implement and evaluate the curriculum to foster children's learning and development. This unit applies to educators working in a range of education and care services.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - designed and implemented curriculum on at least one occasion, including: evaluating and modifying environments to enhance opportunities for children's learning from other educators, children and their families; gathering information to use as a basis for design to address identified needs; designing learning experiences to foster children's development, and; assessing and evaluating curriculum and learning experiences in accordance with guidelines, and; - performed the activities outlined in the performance criteria of this unit during a period of at least 240 hours of work in at least one regulated education and care service. Students will also be expected to demonstrate the following knowledge: - how to access: the National Quality Framework; the National Quality Standards, and; the relevant approved learning framework; - how to navigate through framework and standards documents to find areas relevant to this unit of competency; - how to design programs and environments that foster children's development; - evaluation strategies, and; - organisation standards, policies and procedures.

CHCECE025 Embed sustainable practices in services operations

Locations: Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to support children

to connect with and contribute to their world and embed sustainable practice into service operations. This unit applies to work across a range of education and care service services.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - supported sustainable practices within at least one education and care service, including: undertaking an analysis of the environmental sustainability of the workplace; identifying and supporting potential for workplace change to enhance environmental sustainability; supporting children to develop respect for the natural environment; designing, implementing and reviewing a program to enhance environmental sustainability in the child care workplace, and; using a variety of strategies to involve colleagues, children, families and the broader community in participating in and evaluating a program to enhance environmental sustainability. Students will also be expected to demonstrate the following knowledge: - how to access: the National Quality Framework; the National Quality Standards, and; the relevant approved learning framework; - how to navigate through framework and standards documents to find areas relevant to this unit of competency; - importance of community as a source of knowledge, skills and values, including: - barriers and drivers for behavioural change; - strategies to increase children's experiences and understanding of animals and the natural environment; - impact of key global issues, such as climate change, ozone layer effects, greenhouse effect, earth resources and biodiversity; - qualitative and quantitative evaluation processes for sustainability program; - sustainable practices and sustainable strategies; - cleaning and maintenance, and building, equipment and associated resources, and; - organisation standards, policies and procedures.

CHCECE026 Work in partnership with families to provide appropriate education and care for children

Locations: Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to work in partnership with families to provide appropriate education and care for the child. This unit applies to educators working in a variety of education and care services.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - worked collaboratively with at least three different families to support education and care, including: communicating information about children's interests and development; developing care strategies together, and; engaging in discussion relevant to the child and family; - involved families in the service/program by: encouraging participation in children's experiences, and; providing opportunities for families to give feedback on service/program. Students will also be expected to demonstrate the following

knowledge: - how to access: the National Quality Framework; the National Quality Standards, and; the relevant approved learning framework; - how to navigate through framework and standards documents to find areas relevant to this unit of competency; - strategies for involving family members in the service; - organisation standards, policies and procedures, and; - relevant theories that underpin the value of family/educator relationships.

CHCEDS001 Comply with legislative, policy and industrial requirements in the education environment

Locations: Industry, Footscray Nicholson, St Albans, Werribee, City Flinders.

Prerequisites: Nil.

Description: This unit covers the skills and knowledge required to maintain compliance with legislation, policy and industrial instruments that relate to the education support worker role.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - followed school/centre policies and procedures; - undertaken basic research of relevant legislation, awards, certified agreements, workplace policies and work procedures, and; - reported concerns in a constructive and supportive manner to relevant personnel. Students will also be expected to demonstrate the following knowledge: - own work role and responsibilities; - legislation relating to the education sector, the education support worker's role and key requirements of each; - organisational policies and procedures for responding to legislative issues, and how these are applied; - duty of care responsibilities as applies to non-teaching staff; - safe working practices; - potential hazards and risks for students resulting from breaches of relevant legislation or policy; - key requirements of industrial awards; - relevant code/s of ethics, and; - equal employment opportunity and equity and diversity principles.

CHCEDS019 Support students' mathematics learning

Locations: Footscray Park, Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required by education support workers to work with teachers to support students in pre-primary, primary and secondary to develop mathematics skills in number and algebra, measurements and geometry, and statistics and probability as included in current curriculum documents. The unit provides skills and knowledge to enable education support workers to work with the teacher to develop resources to reinforce mathematics skills for across the curriculum and to support students in their development of skills.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - collaborated with the teacher

to analyse student needs in the development of mathematical skills and determined, developed and implemented strategies and programs to support at least two students; - implementing programs that support a range of students who may be at various levels, in collaboration with the teacher; - adapting examples and activities to meet the specific needs in mathematics knowledge and understanding of individual students; - using specific strategies to scaffold student learning as directed by a teacher; - applying mathematical concepts applicable to the year levels in which they operate, i.e. early childhood, primary, secondary, and; - identifying, collating and developing resources to support development of mathematics skills and knowledge. Students will also be expected to demonstrate the following knowledge: - various assessments including formative and summative and standardised testing; - concept strands of mathematics and mathematical skills appropriate to the students being supported and the curriculum in use; - differences between the roles and responsibilities of teachers and education support workers; - language associated with mathematics and numeracy as used by supervising teacher/s; - the role of education support personnel in implementing planned mathematics activities with students, and; - questioning techniques that can be used to scaffold learning and assist students to problem-solve.

CHCEDS020 Support students' literacy learning

Locations: Footscray Park, Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required by education support workers to work with teachers to support students in pre-primary, primary and secondary to develop literacy skills, including oral language, reading and writing skills. The unit provides skills and knowledge to enable education support workers to work with the teacher to develop resources to reinforce literacy skills across the curriculum and to support students during various phases in the acquisition of literacy competence.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - used a range of strategies to support students with acquisition of literacy skills and knowledge; - adapted spoken language to meet the needs of students and learning programs; - applied knowledge of stages of development in language and literacy, and; - used specific strategies to scaffold student learning as directed by a teacher. Students will also be expected to demonstrate the following knowledge: - relationships between spoken language and literacy; - definition of 'texts' and range of texts that students need to interpret; - explicit talk to support student comprehension; - terminology of literacy as used by supervising teacher/s; - questioning techniques that scaffold learning and assist students to problem-solve; - language and literacy developmental continuum appropriate to the students being supported, and; - differences between the roles and responsibilities of teachers and education support workers.

CHCEDS021 Assist in facilitation of student learning

Locations: Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to understand and

apply a range of principles and processes to facilitate student learning, either for individuals or for small groups. This unit applies to education support workers in a range of education environments who are responsible for aligning support strategies with teacher facilitation strategies to assist student learning. This work is to be undertaken with appropriate guidance, support and supervision by a nominated teacher or other education professional.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - established a learning environment and facilitated the learning process for both a small group and an individual at least twice; - demonstrating principles of practice in the learning environment; - adjusting resources to suit individual needs; - complying with procedures relating to behaviour support; - accurately documenting written reports and records, and; - performed the activities outlined in the performance criteria of this unit during a period of at least 100 hours within at least one education provider. Students will also be expected to demonstrate the following knowledge: - interpersonal skills that influence positive student and staff interactions; - reading, writing, language and numeracy competence required to perform effectively in an education support role; - awareness of contemporary theories of learning; - appropriate principles of practice for the identified education environment; - learning process; - current curriculum documents; - institution's process and procedures for working with students and supporting behaviour; - the different responsibilities of teachers and education support workers for student learning outcomes, and; - relevant legislation, policies and standards that regulate education service delivery, occupational health and safety, behaviour support and anti-discrimination.

CHCEDS022 Work with students in need of additional support

Locations:Footscray Park, Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required for education support workers to provide support to students who have to face a range of challenges that may limit their access to, participation in or outcomes from the curriculum.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - contributed to the education team and participants in planning for students in need of additional support to achieve their full potential; - setting up and using adaptive technologies required by students; - adapting education resources to meet the needs of students with learning difficulties, and; - using professional language when working with teachers and other professionals. Students will also be expected to demonstrate the following

knowledge: - language, literacy and numeracy support strategies appropriate to the phase of learning; - appropriate support for a range of learning situations for students with various reasons for requiring additional assistance including physical, intellectual or learning disabilities, medical conditions, or emotional or psychological issues; - physical, emotional and social support that may be required by individual students, and; - individual education plans and behaviour management plans.

CHCEDS023 Supervise students outside the classroom

Locations:Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to supervise students in school grounds, community settings, and other non-classroom environments.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - used a range of supportive behaviour techniques, as described in the education organisation's supportive behaviour plan, and contributed to the development of risk-management strategies for non-classroom based activities; - valuing and responding appropriately to cultural difference; - making accurate observations and assessments of student interactions, and; - reporting information accurately and correctly according to organisational standards. Students will also be expected to demonstrate the following knowledge: - supportive behaviour techniques appropriate to the education environment and students; - risk-management procedures of the organisation; - appropriate sources of required additional information about students to be supervised; - reporting requirements for hazards/incidents; - effective use of communication equipment/procedures, and; - responsibilities of the education support worker when supervising students in non-classroom environments.

CHCEDS024 Use educational strategies to support Aboriginal and/or Torres Strait Islander education

Locations:Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to support, contribute to and coordinate education opportunities for students, including those from Aboriginal and/or Torres Strait Islander backgrounds.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - contributed to a positive education environment; - being assertive in influencing planning to include Aboriginal and/or Torres Strait Islander perspectives; - acquiring knowledge of local Aboriginal and/or Torres Strait Islander culture; - developing own skills and knowledge regarding Aboriginal and/or Torres Strait Islander culture; - used a range of

communication skills to effectively interact with and liaise between differing cultural contexts; - inviting community members to contribute to education programs; - negotiating with community members regarding approaches to pastoral care initiatives; - accessing community resources and personnel; - supported literacy and numeracy strategies in consultation with the teacher; - selecting and contextualising literacy and numeracy resources to create meaningful learning experiences; - selecting delivery and communication strategies, and; - identifying barriers to student learning and developing strategies to overcome these. Students will also be expected to demonstrate the following knowledge: - differences between cultural groups; - requirements of anti-discrimination legislation; - benefits of diversity to the school community; - principles and practices of cultural awareness and cross-cultural communication; - local Aboriginal and/or Torres Strait Islander culture; - education policies and initiatives designed to support learning outcomes for Aboriginal and/or Torres Strait Islander people; - information sources for local Aboriginal and/or Torres Strait Islander people, and; - range of teaching and learning strategies.

CHCEDS025 Facilitate learning for students with disabilities

Locations: Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required by education support workers to effectively contribute to learning experiences for students with a range of disabilities.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - demonstrated inclusive practices, and developed strategies and implemented them for at least one student with a disability, and; - worked in collaboration with the teacher and others to promote support for at least one student. Students will also be expected to demonstrate the following knowledge: - relevant legislation, policies and standards that regulate education service delivery, occupational health and safety, behaviour support, and anti-discrimination and child protection; - effects of one disability on student development and learning; - a basic level of at least four disabilities; - implications for learning of one disability; - accurate language relevant to the range of disabilities; - organisation processes for provision of support to students with disabilities; - support appropriate to a variety of learning situations for students with disabilities; - identification and description of the nature of a range of disabilities; - how to explain the effects of a range of disabilities on student development and learning, and; - ways to discuss the implications of an identified disability.

CHCEDS031 Provide support to students with autism spectrum disorder

Locations: Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge to provide support to students who have education needs associated with an autism spectrum disorder (ASD).

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge

and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - contribute to planning and support for students with ASD on at least one occasion; - provided support to one or more students with the disorder by: selecting and using suitable resources; implementing educational programs; supporting positive social interactions, and; - used professional language and demonstrated the importance of confidentiality in talking with teachers and other professionals. Students will also be expected to demonstrate the following knowledge: - ASD and its effects on development and learning; - communication techniques for engaging students with ASD in the education context; - education facility's policy related to working with people with a disability; - other professionals and their work in relation to ASD; - use of professional language; - legislation related to anti-discrimination, disability in the education environment, child safety and inclusiveness, and; - positive behaviour support techniques.

CHCEDS032 Support learning and implementation of responsible behaviour

Locations: Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to assist the individual and education organisation to implement responsible behaviour plans. The unit develops an understanding of relevant legislation and organisation policies.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - accessed and referenced documented research information using relevant standards; - adhered to education organisation's policies and procedures; - demonstrated supportive and collaborative relationships with students; - making use of a range of appropriate behaviour-management strategies; - implementing student self-management strategies; - interpreting feedback from colleagues relating to policies and procedures, and; - reflecting on personal skills in behaviour management. Students will also be expected to demonstrate the following knowledge: - assessment strategies involving learner's participation; - available professional support services and resources; - child and adolescent development theories; - effective communication skills; - factors to promote or diminish the student's intrinsic motivation; - importance of the student's self-esteem in the learning process; - origins of inappropriate behaviour and the impact on student learning; - differing philosophical approaches to behaviour support; - practices and strategies for non-violent crisis prevention and intervention; - requirements of relevant legislation and organisation policies in relation to behaviour; - typical (and atypical) behaviours encountered in the education environment; - universal precautions for risk management; - when and how to implement consequences for inappropriate behaviour, and; - whole-of-school and student approaches to behaviour support.

CHCEDU009 Provide parenting, health and well-being education

Locations: Footscray Nicholson, Werribee, City King St.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to identify client needs and provide education in a small group or one to one setting regarding effective parenting behaviour, general health and well-being issues. This unit applies to individuals working with parents or families in diverse community services or health contexts. Workers at this level will be part of a professional team and under the guidance of a supervisor. The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - provided parenting, health and well-being education to at least 2 different clients or client groups. Students will also be expected to demonstrate the following knowledge: - legal and ethical considerations for education in parenting, health and well-being, and how these are applied in organisations and individual practice; - factors that affect the capacity of families to function effectively; - key stages of child development and needs at different stages; - features of a healthy lifestyle; - different models of parenting including cultural differences; - different models of parents/families; - impact of positive parenting in regards to formation of healthy lifestyle behaviours of children, and; - support networks available to parent and families.

CHCFAM009 Facilitate family intervention strategies

Locations: Footscray Nicholson, Werribee, City King St.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to assess the needs of families at a community level, support the delivery of appropriate services and monitor their effectiveness. This unit applies to individuals working in family intervention and support roles. They contribute to the development of policies and procedure at an organisational level. The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - assessed the needs of families in at least 1 community, and; - used research and collaboration to contribute to the development, documentation and review of policies and procedures for family intervention and support in that community. Students will also be expected to demonstrate the following knowledge: - legal and ethical considerations (national and state/territory) for family intervention, and how these are applied in organisations and individual practice; - discrimination; - duty of care; - human rights; - mandatory reporting; - privacy, confidentiality and disclosure, including limitations; - records management and reporting; - specific legislation that impacts policies and

procedures for family intervention; - work health and safety, including risk management, safety planning and crisis/emergency procedures; - community factors that impact approaches to family intervention, and how these need to be recognised; - cultural and linguistic diversity, including Aboriginal and/or Torres Strait Islander perspectives; - physical environment; - socio-economic considerations; - prevalence of issues and their impact in the community; - types of research and information used to support the development of approaches to family intervention; - key features of current and emerging models of family intervention theory and practice and how they may be adapted to meet specific community needs; - evaluation processes, and; - networks and referral sources that support family intervention.

CHCGRP001 Support group activities

Locations: Industry, Footscray Nicholson, Werribee, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to participate in, and provide general support for, group work. It does not include the leadership or facilitation of groups. This unit applies to individuals involved group work in a range of community service settings. They work according to established organisation procedures. The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - participated in, and supported the activities of, at least 3 different groups, where groups comprise at least 5 members, and; - modelled the following communication skills when participating in groups. Students will also be expected to demonstrate the following knowledge: - legal and ethical considerations for group work, and how these are applied in organisations and individual practice; - policies and procedures; - nature of groups and the way they operate at an overview level; - communication techniques and how they are used within groups; - nature of resources provided to groups, and; - nature of support provided.

CHCGRP002 Plan and conduct group activities

Locations: Industry, Footscray Nicholson, Werribee, Sunshine.

Prerequisites: Nil.

Description: This unit describes the knowledge and skills required to establish, lead and participate in a groups using a collaborative, strengths-based approach. This unit applies to any individual involved in planning and leading group activities. The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be

expected to demonstrate the following required skills: - planned and conducted at least 3 different group activities for groups with diverse participant profiles, and; - facilitated at least 3 different group sessions, each with a minimum group size of 5 people, using the following communication and interpersonal skills: listening; questioning; effective non-verbal communication; empathetic responding; paraphrasing; summarising; negotiation; techniques for maintaining group cohesion; conflict resolution. Students will also be expected to demonstrate the following knowledge: - legal and ethical considerations for group work, and how these are applied in organisations and individual practice; - principles and processes of strengths-based practice; - types and purposes of groups in the community services context; - types of resources required for group activities; - dynamics of groups and group behaviour; - processes and techniques for engaging in, and managing group planning processes; - communication techniques and how these are applied in working with groups; - relevant models including stages of group development and stages of change, and; - types of additional support that may be provided to groups.

CHCHCS001 Provide home and community support services

Locations: Footscray Nicholson, St Albans, Werribee, Sunshine, VU Learning Links at Altona Meadows.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to work in a home support environment and community settings with individuals, family members, staff, visitors, suppliers and others to meet established work requirements. This unit applies to workers in a community services context. Work performed requires some discretion and judgement and is carried out under regular direct or indirect supervision. The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills - provided services to individual/s in at least 2 different home or community support settings, and; - used appropriate inter-personal skills. Students will also be expected to demonstrate the following knowledge: - legal and ethical considerations for providing home and community services; - relevant organisation policies and procedures and how to access them, including risk management practices when the work environment is a person's home; - personal and property security procedures, including personal security protocols and equipment; - relevant policy and programs; - implications for work in the sector, and; - indicators of abuse and/or neglect.

CHCLEG001 Work legally and ethically

Locations: Footscray Park, Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, City King St, Sunshine, Hume Global Learning Centre, Broadmeadows, Altona Meadows, St Albans and Sunbury..

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to identify and work within the legal and ethical frameworks that apply to an individual job role. This unit applies to community services and health workers who play a proactive role in identifying and meeting their legal and ethical responsibilities.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - completed workplace activities in accordance with legal and ethical requirements in at least three (3) different situations; - developed appropriate responses to at least three (3) different legal or ethical issues relevant to the work role, and; - identified and communicated at least two (2) potential work practice improvements designed to enhance workplace responsiveness to legal and ethical requirements. Students will also be expected to demonstrate the following knowledge: - legal and ethical considerations (international, national, state/territory, local) for people working in the community services and health context, how they are applied in organisations, how these impact individual workers, and the consequences of breaches; - interrelationships, similarities and differences that may exist between legal and ethical frameworks; - legal issues in the context of the work role; - ethical practice in the context of the work role, and; - workplace policies, procedures and protocols.

CHCLEG003 Manage legal and ethical compliance

Locations: Footscray Park, Industry, Footscray Nicholson, St Albans, Werribee, City King St, Sunshine, Online, Whitten Oval Altona Meadows Library and Learning Centre.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to research information about compliance and ethical practice responsibilities, and then develop and monitor policies and procedures to meet those responsibilities. This unit applies to people working in roles with managerial responsibility for legal and ethical compliance in small to medium sized organisations. There may or may not be a team of workers involved. The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - determined the scope of legal and ethical compliance requirements and responsibilities, and developed policies and procedures for at least 1 workplace or business, and; - developed a strategic response to at least 3 different situations where legal or ethical requirements have been breached. Students will also be expected to demonstrate the following knowledge: - legal responsibilities and liabilities of managers and others in different types of organisation; - legal and ethical frameworks (international, national state/territory, local), how these apply in the workplace, and the responsibilities of managers in the development and monitoring of policies and procedures; - sources of information and advice on compliance; - functions and operating procedures of regulatory authorities of particular relevance to the health and community service ; -

methods of receiving updated information on requirements; - use of policies and procedures in managing compliance and ethical practice in both internal work practice and external service delivery; - formats for policies and procedures and what they should include, and; - techniques for monitoring compliance. .

CHCMGT001 Develop, implement and review quality framework

Locations: Industry, Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to develop, implement and monitor a framework for ongoing quality service delivery that supports the rights and interests of clients. The unit applies to a range of leadership roles in health and community services workplaces.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - developed and implemented a quality framework for the delivery of at least 1 service or program; - conducted at least 1 review of service delivery that identified barriers to quality and provided recommendations for improvement, and; - established a continuous improvement plan for at least 1 service or program. Students will also be expected to demonstrate the following knowledge: - legal and ethical considerations and how these are applied in organisations; - service and industry guidelines and standards; - principles of holistic and person-centred support, and where to access good practice information relevant to the industry sector; - benchmarking; - best practice and good practice; - quality assurance processes relevant to service type; - existing state and national quality frameworks relevant to service; - importance of principles and practices to enhance sustainability in the workplace, including environmental, economic, workforce and social sustainability; - vision statements, philosophical statements of organisation; - needs of clients, and; - impact of own attitudes to client groups on service delivery and strategies to improve own professional practice.

CHCMGT003 Lead the work team

Locations: Industry, Footscray Nicholson.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to undertake supervisory and coordinating activities in work groups in health and community service organisations. Workers at this level are team leaders or managers responsible for coordinating and monitoring the activities and performance of work teams and other service providers. This unit applies to a range of leadership roles in health and community services workplaces.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - developed at least 1 plan for a team or group of individuals; - facilitated at least 2 group meetings or discussions; -

identified at least 1 issue causing disruption to work team activities and: - reviewed the performance of and coached at least 1 individual. Students will also be expected to demonstrate the following knowledge: - organisation mission, philosophy; - organisation structure and communication protocols; - group facilitation processes, including technique for facilitating group discussions and meetings; - leadership styles and their application in supporting the organisation's mission, objectives and values; - coaching principles and techniques; - difference between coaching and mentoring; - performance management sources of information on best practice work techniques relevant to the industry sector; - rostering and timetabling; - sources of conflict and stress and techniques to address and manage them, and; - referral networks.

CHCMGT005 Facilitate workplace debriefing and support processes

Locations: Industry, Footscray Nicholson, Werrbee, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to monitor and support workers. This includes implementing support processes to manage stress and emotional wellbeing of self or colleagues working in varied health and community service contexts. It also involves facilitating structured debriefing sessions to colleagues following incidents with the potential to impact on health and wellbeing. This unit applies to leadership or management roles where the individual provides peer to peer support to colleagues and refers to specialised support services in line with organisation guidelines as required.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - provided ongoing support to least 2 different workers to address and monitor stress and emotional wellbeing, and; - facilitated at least 1 structured debriefing following an incident involving stress and identified colleagues requiring additional support and referred in accordance with organisation guidelines. Students will also be expected to demonstrate the following knowledge: - organisation policies, procedures and resources relating to debriefing and crisis procedures; - dispute resolution policies and procedures; - legal and ethical considerations; - debriefing techniques: - indicators of significant issues being experienced by the worker and ways to respond; - impact of: excessive stress; burn out; grief and loss; violent or threatening behaviour; - stress management; - internal and external support options and employee assistance programs; - specific limitations of work role, responsibility and professional abilities, and; - professional boundaries.

CHCMHS001 Work with people with mental health issues

Locations: Industry, Footscray Nicholson, St Albans, Werrbee, Sunshine, Altona Meadows Library and Learning Centre.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to establish relationships, clarify needs, and then work collaboratively with people who are living with mental health issues. This unit applies to support workers in contexts outside the mental health sector, but who come into contact with people with mental health issues. The services and support provided are not mental health specific.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - worked with at least 3 people with mental health issues in ways that support individual empowerment and recovery through: - use of communication techniques, and; - provision and adaptation of services to meet particular needs. Students will also be expected to demonstrate the following knowledge: - legal and ethical considerations (international, national, state/territory, local) when working with people with mental health issues, and how these are applied in organisations and individual practice; - values and principles of the mental health sector; - different contexts of mental health work; - impact of own attitudes on working with people with mental health issues; - key issues facing people with mental health illnesses, including impact of prejudice and discrimination; - myths and facts about mental illness; - types of mental illness; - existing services to address a person's needs and rights; - appropriate responses to changes in mental health, mental distress and crisis, and; - circumstances in which referral to a health or other professional is appropriate. .

CHCMHS002 Establish self-directed recovery relationships

Locations: Footscray Nicholson, Werribee, City King St, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to promote the principles of recovery oriented practice, and to establish and confirm self-directed recovery relationships with people with mental illness. This unit applies to work with people living with a mental illness in a range of community services work contexts.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - established and maintained self-directed recovery relationships with at least 3 people with mental illness, and; - performed the activities outlined in the performance criteria of this unit during a period of at least 80 hours of work. Students will also be expected to demonstrate the following knowledge: - legal and ethical considerations (international, national, state/territory and local) for mental health work, and how these are applied in organisations and individual practice; - values and principles of the mental health sector; - historical, current and emerging models of understanding mental illness in Australia and internationally; - evidence base for recovery including research and personal recovery experience; - programs, services and supports available to people with mental illness; - strength based approaches; - reflective practice and its role in underpinning ongoing learning, growth and good practice, and; - techniques for communication and motivational interviewing/counselling.

CHCMHS003 Provide recovery oriented mental health services

Locations: Footscray Nicholson, Werribee, City King St, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to work collaboratively in providing services to implement a range of strategies as part of recovery oriented service provision for people with mental illness. This unit applies to

work with people living with mental illness in a range of community services work contexts.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - collaborated with at least 3 different people with mental illness to develop, implement and review a plan for recovery using recovery orientated approaches, and; - performed the activities outlined in the performance criteria of this unit during a period of at least 80 hours of work. Students will also be expected to demonstrate the following knowledge: - legal and ethical considerations (international, national, state/territory and local) for mental health work, and how these are applied in organisations and individual practice; - values and principles of the mental health sector; - evidence base for recovery including research and personal recovery experience; - types of mental illness; - local and international best-practice frameworks for: planning; assessment; implementing plan and review; - strategies to support a person in distress or crises and de-escalate incidents of risk; - historical, current and emerging models of understanding mental illness in Australia and internationally; - techniques for communication and motivational interviewing/counselling; - normalising statements, and; - reflective practice and its role in underpinning ongoing learning, growth and good practice.

CHCMHS004 Work collaboratively with the care network and other services

Locations: Footscray Nicholson, Werribee, City King St, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills knowledge required to work collaboratively with the care network and other potential services for a person with mental illness. This work provides a recovery oriented practice approach, involving a variety of health and community service professionals working collaboratively with the person and their care network. This unit applies to work with people living with mental illness in a range of community services work contexts.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - worked collaboratively with at least 3 different people with mental illness to meet recovery goals, and; - performed the activities outlined in the performance criteria of this unit during a period of at least 80 hours of work. Students will also be expected to demonstrate the following knowledge: - legal and ethical considerations (international, national, state/territory and local) for mental health work, and how these are applied in organisations and individual practice; - values and principles of the mental health sector; - roles and importance of different components of the support network; - how historical, social and policy contexts of mental health services have changed and how it impacts on current service delivery; - models of care coordination; - basic negotiation and conflict resolution techniques; - local and state services, including:

availability; appropriateness and referral protocols, and; - reflective practice and its role in underpinning ongoing learning, growth and good practice.

CHCMHS005 Provide services to people with co-existing mental health and alcohol and other drugs issues

Locations: Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to assess capacity to support people with co-existing mental health and alcohol and other drugs issues and to work collaboratively to provide support and facilitate links to other services. This unit applies to work with people with co-existing mental health and alcohol and other drugs (AOD) assessments in a range of community services work contexts.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - worked collaboratively to provide services to at least 3 people with co-existing mental illness and AOD issues. Students will also be expected to demonstrate the following knowledge: - values, philosophies and service delivery models of the AOD and mental health sectors, their similarities and differences; - legal and ethical considerations (international, national, state/territory and local) for dealing with people with co-existing issues, and how these are applied in organisations and individual practice; - safety and risk management considerations and strategies; - substances and AOD work; - interactions and risk factors between common types of mental health medications and other substances; - evidence-based mental health practice including National practice standards for the mental health workforce; - role and use of standard screening tools to identify co-existing mental health/AOD issues; - available services and support strategies appropriate to those with co-existing issues, including those beyond AOD and mental health; - techniques and processes for developing, documenting and implementing a plan of action to address co-existing issues, and; - models of change and basic principles of motivational interviewing.

CHCMHS006 Facilitate the recovery process with the person, family and carers

Locations: Industry, St Albans, Werribee.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to work collaboratively with a person with mental illness and/or AOD issues to establish a basis for participation of family and carers in their individual recovery process and to facilitate ongoing participation in line with the person's needs and wishes. This unit applies to work with people with mental illness and/or AOD issues. The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Required Reading: Lecturer will provide teaching and learning materials as required in the form of VU produced workbooks.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each competency unit's learning outcomes and performance criteria requirements, including the setting of project and work based practical application tasks designed to

provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - worked collaboratively to identify, plan, implement and monitor family and carer participation in the recovery processes for at least 3 different people; - used effective communication with both the person, their and family/carers; - reflective listening and responding; - development of empathy and rapport; - recognition of non-verbal triggers, and; - negotiation and conflict resolution techniques. Students will also be expected to demonstrate the following knowledge: - legal and ethical considerations (international, national, state/territory and local) regarding consumer and carer participation in planning and recovery, and how these are applied in organisations and individual practice: - codes of practice; - discrimination; - dignity of risk; - duty of care; - human rights; - informed consent; - mandatory reporting; - practice standards; - privacy, confidentiality and disclosure; - policy frameworks; - records management; - rights and responsibilities of workers, employers and individuals accessing the service; - specific mental health legislation and its impact on individual workers; - work role boundaries - responsibilities and limitations: - role of other workers; - roles of family and carers; - work health and safety; - values and principles of the mental health sector, including: - recovery; - recovery oriented practice; - health promotion and prevention; - holistic approach; - empowerment/disempowerment; - access and equity; - early intervention; - rights; - social justice and inclusion; - citizenship; - principles and practices underpinning consumer and carer participation in recovery and service provision, and; - available consumer and carer services and resources.

CHCMHS007 Work effectively in trauma informed care

Locations: Footscray Nicholson, Werribee, City King St, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to practice and contribute to the continuous improvement of trauma informed care within a service.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - worked from a trauma informed care perspective with at least 3 people with mental illness. Students will also be expected to demonstrate the following knowledge: - legal and ethical considerations (international, national, state/territory, local) for trauma related practice, and how these are applied in organisations and individual practice; - trauma; - gender differences in the application of trauma informed care; - common beliefs and attitudes towards people who experience interpersonal violence and how this impacts on their access to services; - values and core principles and features of trauma informed care and practice; - impacts of traumatic events that occur when accessing or receiving services (including the use of compulsory treatment, seclusion and restraint); - role of triggers and 'flashback' (re-experiencing), re-victimisation and re-traumatisation; - referral options and resources available to support self-advocacy; - links between suicidality, self-harm and interpersonal trauma, and; - self-care strategies for workers.

CHCMHS008 Promote and facilitate self advocacy

Locations: Footscray Nicholson, Werribee, City King St, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to encourage,

support and promote self-advocacy. The promotion and facilitation of self-advocacy contributes to a person's self-determination, empowerment and right to make informed choices in regard to all aspects of their life. This unit applies to work with people living with mental illness in a range of community services work contexts.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - encouraged, supported and promoted self-advocacy when working with at least 3 people with mental health issues. Students will also be expected to demonstrate the following knowledge: - legal and ethical considerations (international, national, state/territory, local) for advocacy, and how these are applied in organisations and individual practice; - history, values, central philosophies and context of advocacy and self-advocacy; - differences between negotiation, advocacy, mediation, facilitation and conciliation and the ways they are used; - self-advocacy approaches and options, including group and individual advocacy; - referral options and resources available to support self-advocacy; - barriers to self-advocacy and strategies for overcoming barriers; - social justice principles including human rights, self-determination, access and equity, and empowerment; - impacts of stigma, prejudice and discrimination, and; - organisation policy and procedures relevant to the facilitation and promotion of self-advocacy.

CHCMHS011 Assess and promote social, emotional and physical wellbeing

Locations:Footscray Nicholson, Werribee, City King St, Sunshine.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to work collaboratively with individuals to assess, promote and review all aspects of wellbeing. This unit applies to work with people living with mental illness in a range of community services work contexts.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - collaboratively delivered wellbeing support reflecting recovery oriented practice with at least 3 people. Students will also be expected to demonstrate the following knowledge: - legal and ethical considerations (international, national, state/territory, local) for client wellbeing, and how these are applied in organisations and individual practice; - principles and practices of holistic social emotional wellbeing; - impact of a lack of social and emotional wellbeing (SEWB) on mental health; - evidence based practice in relation to support for the individual domains; - iatrogenic effects of mental illness diagnosis and treatment on an individual's wellbeing; - requirements for physical wellbeing, including: nutrition; exercise; food security/insecurity; self-care style opportunities and information; oral health; comprehensive health checks; access to health services, and natural supports and resources and sexual health strategies including contraception, sexually transmitted infections (STIs) and strategies for sexual expression; - aspects of social wellbeing and types of social activity of that

contribute to wellbeing; - aspects of emotional wellbeing; - aspects of cultural/spiritual wellbeing; - cognitive aspects that affect wellbeing; - models of change, including stages of change model; - awareness of social exclusion/inclusion, disadvantage, systemic oppression and power dynamics, and; - approaches to practice motivational interviewing; solution focused approaches; strength based approaches; cognitive behavioural approaches; narrative approaches and acceptance and commitment therapy (ACT).

CHCPAL001 Deliver care services using a palliative approach

Locations:Industry, Footscray Nicholson, St Albans, Werribee, Sunshine, VU Learning Links at Altona Meadows.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to care for people with life-threatening or life-limiting illness and/or normal ageing process within a palliative approach. This unit applies to workers in a residential or community context. Work performed requires some discretion and judgement and is carried out under regular direct or indirect supervision. The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - supported, reported and documented issues and needs of 3 people in palliative care. CHCPOL002 Develop and implement policy

Locations:Industry, Footscray Nicholson.

Prerequisites:Nil.

Description:This unit describes the skills and knowledge required to research, develop and implement new policy initiatives. This unit applies to workers who are directly responsible for driving new policy directives across a business unit, team or service.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting

of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - researched, drafted, developed and implemented at least 1 policy initiative for at least 1 business unit or organisation, and; - engaged in consultation with at least 3 different stakeholders, including: individuals, and groups or organisations. Students will also be expected to demonstrate the following knowledge: - researched, drafted, developed and implemented at least 1 policy initiative for at least 1 business unit or organisation; - engaged in consultation with at least 3 different stakeholders, including: individuals; groups or organisations; - legal and ethical context (international, national, state/territory, local) for policy development in the sector of work; - current industry developments and context for policy development, including funding body requirements; - policy trends at global, national, state/territory and local levels; - organisation strategic focus and philosophy within which policies are developed; - key stakeholders at local, state/territory and national level; - principles and practices of policy development and implementation; - methodologies and appropriateness for different audiences; - types and features of documentation/information used to support consultation; - stakeholder engagement and management; - approval processes; - structures and formats for policy documents; - implementation considerations and processes; - evaluation and review, and; - report writing techniques.

CHCPOL003 Research and apply evidence to practice

Locations: Footscray Nicholson, St Albans, Werribee, City King St, Sunshine, Online.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to establish the information need, gather information and critically analyse the information for relevance to own work. This unit applies to health and community service workers who need to research existing information to support and improve their work practice. It does not cover primary research. The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - completed research activities and developed actions based on research outcomes for at least two (2) different issues within own field of practice. Students will also be expected to demonstrate the following knowledge: - different reasons for undertaking research; - sources of information, including established information sources and current research within own area of practice; - principles and models of evidence-based practice; - ways to evaluate the validity of information sources; - research processes and how to use them; - cultural and ethical considerations for research, and; - processes that support analysis of information and how to use them.

CHCPRP001 Develop and maintain networks and collaborative partnerships

Locations: Industry, Footscray Nicholson, St Albans, Werribee, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to identify networking and collaboration needs and develop formal and informal partnerships to

enhance service delivery and improve professional practice. This unit applies to work in all industry sectors, and to individuals who take pro-active responsibility for improving collaboration between workers and organisations.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - developed strategies for networking and collaboration for at least 1 organisation, and; - worked collaboratively with external individuals or groups in at least 3 different service delivery situations. Students will also be expected to demonstrate the following knowledge: - legal and ethical considerations for collaborative practice; - principles of networking and collaboration; - different types of networks and collaboration; - benefits of networking and collaboration; - values, limitations and dynamics of networks and collaborative partnerships; - industry structure and interrelationships between different organisations, both public and private, and; - established networks in relevant area of work.

CHCPRP003 Reflect on and improve own professional practice

Locations: Footscray Park, Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, City King St, Sunshine, Hume Global Learning Centre, Broadmeadows; Altona Meadows and Sunbury..

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to evaluate and enhance own practice through a process of reflection and ongoing professional development. This unit applies to workers in all industry sectors who take pro-active responsibility for their own professional development. The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each competency unit's learning outcomes and performance criteria requirements, including work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - undertaken a structured process to reflect on and improve own practice and created 1 personal development plan that includes: goals; timeframes; ways of measuring progress. Students will also be expected to demonstrate the following knowledge: - legal and ethical considerations for reviewing and improving own practice; - models and processes of professional reflection; - professional development opportunities; - principles and techniques for: creating a personal development plan; personal goal setting; setting realistic timeframes; measuring progress and performance; - types of work methods and practices which can improve performance, and; - learning styles and how they relate to different individuals.

CHCPRP005 Engage with health professionals and the health system

Locations: Footscray Park, St Albans, Werribee, City King St, Sunshine, Online, Whitten Oval.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to work within the health care system and engage effectively with other health professionals, including writing referral reports. This unit applies to individuals working in health or community services who work autonomously with clients in the provision of services. The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

HCYTH008 Support young people to take collective action

Locations: Industry, Footscray Nicholson, Werribee.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to enable young people to participate in the decision-making that affects their lives. This unit applies to youth work where the primary concern is to support groups of young people in taking action to meet their needs or responding to community issues.

Required Reading: The qualified trainer and assessor will provide teaching and

learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - enabled youth participation through discussion and networking on at least three separate occasions; - actively engaged young people using communication skills appropriate to specific youth context and culture; - supported and enabled at least two young people to: arrange group meetings; publicise group objectives to broader youth audiences; plan strategies and actions, resources, timelines, responsibilities; access support; identify, contact, inform and negotiate alliances with stakeholders, and; - evaluated strategies and reported on outcomes to stakeholders internal and external to the organisation. Students will also be expected to demonstrate the following knowledge: - power imbalances in the professional relationship; - relevant policies and procedures of the organisation, including values and ideologies and how this impacts on the collective action; - ethical responsibilities when working with young people to take collective action; - models and tools of advocacy, community development, self-help, youth participation, and peer education; - theories of interpersonal communication, dispute resolution and principles of negotiation; - principles and theories of group work and structured and unstructured groups, and; - documentation processes and evaluation methods.

HCYTH009 Support youth programs

Locations: Industry, Footscray Nicholson, Werribee.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to devise, set up, coordinate, deliver and evaluate activities and programs for individuals and groups. This unit applies to community services work in a range of contexts.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - collected, analysed and reviewed relevant evidence and a range of programs to determine the need for a specific program; - prepared at least one program plan, including: outlining activities and actions; determining operational arrangements for calculating costs, space and resources; assessing feasibility; developing implementation and evaluation strategies, and; - supported the implementation of at least one program in a variety of contexts, adapting program to the changing needs of participants and evaluating outcomes, including: using evaluation techniques and reporting outcomes to clients and stakeholders in an accessible format. Students will also be expected to demonstrate the following knowledge: - target groups relevant to the worker and the program; - a range of relevant youth activities and programs; - legal and safety requirements as they relate to activities and programs; - techniques of evaluation; - relevant funding sources; - organisational standards, policies and procedures. and; - techniques for writing complete and accurate reports.

HCYTH010 Provide services for young people appropriate to their needs and circumstances

Locations: Footscray Nicholson, Werribee, Sunshine.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to provide guidance and role models to young people and their families to maintain positive and supportive relationships, while identifying problems and establishing goals for change based on maintaining support from family and the general community. This unit applies to community services work in a range of contexts.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - identified and responded to the needs of at least two young people; - providing information to young person and families; - listening to young person's issues, concerns and feelings; - setting goals and planning actions to achieve goals with young person; - discussing, identifying and encouraging young person to access services; - referring young person to alternative services; - advocated for at least two young people; - negotiating goals, role and scope of advocacy work with young person; - accompanying young person during first stages of service access; - representing young person's interests and keeping young person informed of representation processes; - completed all relevant documentation and reports accurately and completely, and; - communicated with at young person clearly and accurately. Students will also be expected to demonstrate the following knowledge: - target groups relevant to the worker and the activity or program; - a range of youth activities and programs; - legal and safety requirements as they relate to activities and programs in youth work; - relevant funding sources; - communication strategies, including negotiation and conflict resolution, and; - organisational standards, policies and procedures.

HCYTH012 Manage service response to young people in crisis

Locations: Industry, Footscray Nicholson, Werribee.

Prerequisites: Nil.

Description: This unit describes the skills and knowledge required to develop an agency approach to young people in crisis. This unit applies to community services work in a range of contexts.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - implemented a framework to prevent and respond to crisis situations; - defining circumstances contributing to a crisis situation; - analysing the legal and statutory requirements; - identifying and obtaining resources to respond to crisis situations; - providing information to clients and staff about the organisation's policies and procedures for dealing with crisis situation; - supporting staff in responding to crises by providing training and briefings;

- followed-up on crisis situations; - maintaining documentation as required, including effective use of relevant information technology in line with WHS guidelines; - effectively communicating with staff, including implementing mediation and negotiation, and conflict resolution/management, and; - providing feedback to staff members. Students will also be expected to demonstrate the following knowledge: - legal and organisational policies relating to safety within the work environment; - relevant specialist support services and resources; - possible factors which contribute to young people entering crisis situations; - methods of crisis intervention including mediation and negotiation; - characteristics of aggressive and abusive behavior; - methods of promoting less aggressive/abusive behavior; - other support agencies and the relevant specialist resources they offer; - possible factors which contribute to young people entering crisis situations, and; - potential repercussions of inappropriate intervention of worker behaviour.

CPCBC4001A Apply building codes and standards to the construction process for low rise building projects

Locations: Industry, Sunshine, Learning Links Geelong.

Prerequisites: Nil.

Description: This unit of competency specifies the outcomes required to access, interpret and apply relevant building codes and standards applicable to the construction processes of residential and low rise commercial buildings (low rise' licensing classification with reference to Class 1 and 10 construction and Classes 2 to 9 with a gross floor area not exceeding 2000 square metres, not including Type A or Type B construction).

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - analysis and interpretation skills relating to documentation from a wide range of sources, including BCA and referenced documents; - application of design concepts and principles in accordance with BCA, namely: Class 1 and 10; Classes 2 to 9 with a gross floor area not exceeding 2000 square metres, not including Type A or Type B construction; - attention to detail in applying building codes and standards; - discuss and propose alternative solutions; - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; - read and interpret: documentation from a variety of sources, including BCA and referenced documents; drawings and specifications; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication; - written skills to complete documentation in accordance with BCA requirements, and; - numeracy skills to interpret and apply mathematical information included in building codes and standards. Students will also be expected to demonstrate the following knowledge: - basic design principles and the behaviour of structures under stress, strain, compression, bending or combined actions; - BCA performance hierarchy; - definitions and common technical terms or usage specified under general provisions of BCA; - general nature of materials and the effects of performance; - relevant Australian standards; - relevant legislative and OHS requirements, codes and practices; - types of working drawings and specifications, and; - understanding of the BCA relating to: Class 1 and 10; Classes 2 to 9 with a gross floor area not exceeding 2000 square metres, not including Type A or Type B construction.

CPCBC4002A Manage occupational health and safety in the building and construction workplace

Locations:Sunshine, Learning Links Geelong.

Prerequisites:Nil.

Description:This unit of competency specifies the outcomes required to conduct an OHS risk analysis, including the inspection of workplaces for hazards. The development and implementation of appropriate responses, including responses required by state or territory legislation and regulations, to mitigate the risks are also addressed. The unit requires candidates to have a comprehensive and appropriate understanding of the complex range of legislative and workplace requirements to manage risk in building and construction workplaces.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - application of regulatory requirements, including safe work method statements and plans such as site safety plans; - appropriate literacy and numeracy skills; - attention to detail in applying building codes and standards; - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; - seek expert advice and consult with relevant parties and workplace personnel on a variety of issues; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication; - written communication skills to complete inspection reports and maintain records; - conducting OHS legislation and documentation research; - construction site inspection techniques for OHS compliance; - interpretation and application of construction documentation; - interviewing skills; - knowledge of the technical and trade skills in building and construction processes; - maintaining records and documents; - negotiation and conflict resolution skills; - OHS auditing skills, and; - OHS compliance investigation skills. Students will also be expected to demonstrate the following knowledge: - building and construction industry contracts; - current workplace and OHS legislation and advisory standards applicable to each State and Territory, and; - other relevant state or territory building and construction codes, standards and government regulations.

CPCBC4003A Select and prepare a construction contract

Locations:Industry, Sunshine, Learning Links Geelong.

Prerequisites:Nil.

Description:This unit of competency specifies the outcomes required to select and prepare appropriate construction contracts, including the sections, clauses and conditions for low rise construction projects. The ability to interpret complex documents, communicate clearly and succinctly and negotiate are essential skills.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be

expected to demonstrate the following required skills: - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; - facilitate effective communication by phone, facsimile, email or in writing, with members of the organisation and external parties, including clients and subcontractors; - facilitate drafting detailed responses to queries relating to the finer points of contracts; - read and interpret: complex legal text; construction schedules; contracts; reports; specifications; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication; - written skills to prepare a construction contract, including completing memos, schedules and evaluative reports and communicating complex ideas and alternatives; - contractual arrangement problem solving; - negotiation with construction clients, and; - numeracy skills to apply calculations, including rise and fall amounts applicable to changed contract circumstances. Students will also be expected to demonstrate the following knowledge: - definitions and interpretations commonly applied to contracts; - legal meanings of terms and clauses in building and construction contracts; - relationships between the organisation and its clients, and; - various contract types and the circumstances they cover.

CPCBC4004A Identify and produce estimated costs for building and construction projects

Locations:Industry, Sunshine, Learning Links Geelong.

Prerequisites:Nil.

Description:This unit of competency specifies the outcomes required to establish the estimated costs associated with the acquisition of materials and labour on building and construction sites, together with the application of relevant overhead costs and margins. Knowledge of physical resource and supplier identification, assessment of the availability of and requirements for skilled labour and application of appropriate codes, regulations and approvals gaining processes is essential.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; - read and interpret drawings and specifications; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication; - contractual arrangement problem solving; - estimate labour and materials costs from written information; - numeracy skills to calculate labour hours and costs, material quantities and costs, and; - use appropriate costing software programs. Students will also be expected to demonstrate the following knowledge: - national codes, including Building Code of Australia (BCA) and the Plumbing Code of Australia; - Australian standards relevant to the industry sector; - state or territory and local government building and construction codes, standards and government regulations relevant to the form of building or construction being undertaken (e.g. WorkCover and EPA); - types of building and construction drawings and specifications; - types, scope and usage of labour through the employee and subcontractor systems, and; - operation and structure of the organisation's costing and contracting system. .

CPCBC4005A Produce labour and material schedules for ordering

Locations:Industry, Sunshine, Learning Links Geelong.

Prerequisites: Nil.

Description: This unit of competency specifies the outcomes required to produce schedules of resource requirements so that orders can be placed for materials and labour for residential and commercial projects and to record and track costs as they are incurred. Knowledge of codes, regulations and approval processes, contractor systems, physical resource and supplier identification and the ability to assess the availability of and requirements for skilled labour are essential.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; - communicate information effectively within the organisation and to external agencies and the client; - read and interpret: contracts; drawings and specifications; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication; - prepare and maintain site files; - produce schedules and orders; - identify and analyse relevant information, and; - numeracy skills to apply calculations. Students will also be expected to demonstrate the following knowledge: - operation and structure of the organisation's costing and contracting system; - state or territory building and construction codes, standards and regulations relevant to the form of building or construction being undertaken; - types of building or construction drawings and specifications commonly used in the industry, and; - types, scope and usage of labour through the employee and contractor systems. .

CPCBC4006B Select, procure and store construction materials for low rise projects

Locations: Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: Nil.

Description: This unit of competency specifies the outcomes required to supervise the systems through which materials are typically selected, acquired and stored on site for projects described by the Building Code of Australia (BCA) as low rise building or construction work (low rise' licensing classification with reference to Class 1 and 10 construction and Class 2 to 9 with a gross floor area not exceeding 2000 square metres, not including Type A or Type B construction).

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - analysis and report preparation; - application of safe work practices and materials handling; - apply numeracy skills to workplace requirements; - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; - communicate with manufacturers and suppliers of materials; - provide advice and information to regulatory authorities; - read and interpret: contracts;

drawings and specifications; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication; - development and management of standardised processes, and; - supervision of small teams. Students will also be expected to demonstrate the following knowledge: - alternative materials that can be specified in construction projects; - building and construction materials and technologies; - Building Code of Australia (Class 1 and 10 and Class 2 to 9 with a gross floor area not exceeding 2000 square metres, but not including Type A or Type B construction); - construction supply processes; - construction and contracting equipment and its use; - environmental effects on various building and construction materials; - relevant state or territory building and construction codes, standards and regulations; - testing procedures for construction materials, and; - workplace safety requirements.

CPCBC4007A Plan building or construction work

Locations: Sunshine, Learning Links Geelong.

Prerequisites: Nil.

Description: This unit of competency specifies the outcomes required to plan on-site activities, including the employment of physical and human resources and the development of documentation and advice for relevant authorities concerning residential and commercial projects. The ability to identify appropriate resources and suppliers, and assess the availability of and requirements for skilled labour are essential.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; - communicate by telephone, facsimile, email and in writing; - identify availability of subcontractors; - liaise with suppliers; - contract documentation; - organisational policies; - other relevant workplace documentation; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication; - document required resources; - prepare documentation for authorities; - prepare reports; - record site deliveries, and; - numeracy skills to apply calculations. Students will also be expected to demonstrate the following knowledge: - application of project management and critical path techniques to the organisation of materials, plant and people; - building and construction industry subcontractor system; - building, construction or civil construction practices in on-site project management; - internal documentation systems; - processes and timeframes for regulatory approvals; - relevant state or territory building and construction codes, standards and government regulations; - types of building and construction industry contracts, and; - types of plant and equipment employed in the undertaking of the organisation's projects.

CPCBC4008B Conduct on-site supervision of building and construction projects

Locations: Sunshine, Learning Links Geelong.

Prerequisites: Nil.

Description: This unit of competency specifies the outcomes required to supervise implementation of administration processes relating to residential and commercial construction projects. The ability to administer payments, supervise on-site

communications, ensure compliance with quality control and complete record keeping processes is essential.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - application of contract terms and conditions; - application of quality processes; - communicate request and requirements; - communicate with the client and regulatory authorities; - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; - facilitate on-site meetings and dispute resolution; - quality control procedures; - regulatory and organisational requirements; - other relevant workplace documentation - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication; - complete site reports; - develop and maintain site records; - interpersonal skills relevant to the supervision and monitoring of work processes, and; - numeracy skills to apply calculations. Students will also be expected to demonstrate the following knowledge: - building and construction industry contract payment system and obligations; - building and construction industry standards; - certification requirements arising from work performed under regulations or local authority requirements; - contract variation procedures and associated documentation requirements, and; - contracts employed in the building and construction industry.

CPCBC4009B Apply legal requirements to building and construction projects

Locations: Industry, Sunshine, Learning Links Geelong.

Prerequisites: Nil.

Description:This unit of competency specifies the outcomes required to apply legal requirements to building and construction projects of residential and low rise commercial buildings. ('low rise' licensing classification with reference to Class 1 and 10 construction and Classes 2 to 9 with a gross floor area not exceeding 2000 square metres, not including Type A or Type B construction).

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - ability to research, access and interpret complex documents; - communicate with local or regulatory authorities on matters relating to site conditions or approvals and to negotiate on matters concerning industrial relations by telephone, or face to face; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication; - written skills to communicate by memo, letter, facsimile or email with subcontractors, staff, clients and regulatory authorities; - interpersonal skills relevant to the supervision and monitoring of work processes, and; - numeracy skills to apply calculations. Students will also be expected to demonstrate the following knowledge: - building and construction industry contracts; - OHS frameworks and obligations under federal, state and territory legislation and regulation; - organisational policies and procedures related to discrimination and harassment; -

reasonable understanding of federal, state or territory anti-discrimination and equal employment opportunity legislation; - risk management processes and practices and the planning required to develop plans; - state or territory building and construction codes, standards and government regulations, and; - workplace safety requirements.

CPCBC4010B Apply structural principles to residential low rise constructions

Locations: Industry, Sunshine, Learning Links Geelong.

Prerequisites: Nil.

Description:This unit of competency specifies the outcomes required to apply structural principles to the erection or demolition of low rise residential structures using conventional methods. The unit addresses those structures classified by the Building Code of Australia (BCA) as Class 1 and Class 10. Knowledge of the application of structural principles in accordance with Australian standards is essential.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - apply manufacturer specifications and Australian standards and codes; - apply structural principles to a variety of structures within BCA Classes 1 and 10; - consult with industry professionals; - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; - read and interpret project documentation; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication; - identify and analyse relevant information; - select structural members based on project or specification requirements, and; - work safely to OHS regulations and site requirements. Students will also be expected to demonstrate the following knowledge: - building and construction industry contracts; - relevant state or territory building and construction codes, standards and government regulations; - underlying mathematics related to structural analysis, and; - workplace safety requirements.

CPCBC4011B Apply structural principles to commercial low rise constructions

Locations: Industry, Sunshine, Learning Links Geelong.

Prerequisites: Nil.

Description:This unit of competency specifies the outcomes required to apply structural principles to the erection or demolition of low rise projects of a more complex nature than single residential dwellings, which are typically commercial structures classified in the Building Code of Australia (BCA) as Classes 2 to 9 with a gross floor area not exceeding 2000 square metres but not including Type A or Type B construction. Knowledge of the application of structural principles in accordance with Australian standards is essential.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following skills: - analytical skills and the capacity to

foresee potential problems; - apply Australian standards, codes and manufacturer specifications; - apply structural principles to a variety of low rise structures; - construction management and planning techniques; - coordination of the work and advice of internal and external professionals; - consult with industry professionals; - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; - read and interpret project documentation; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication; - identify and analyse relevant information; - low rise construction building problem solving; - numeracy skills to apply calculations; - select structural members based on project or specification requirements, and; - work safely to OHS regulations and site requirements. Students will also be expected to demonstrate the following knowledge: - building and construction industry contracts; - new and emerging building technologies, techniques and materials; - relevant state or territory building and construction codes, standards and government regulations; - underlying principles related to structural analysis, and; - workplace safety requirements.

CPCBC4012B Read and interpret plans and specifications

Locations: Industry, Sunshine, Learning Links Geelong.

Prerequisites: Nil.

Description: This unit of competency specifies the outcomes required to read and interpret plans and specifications applicable to low rise residential and commercial projects in order to inform estimation, planning and supervisory activities.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following skills: - consult with industry professionals; - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand - interact effectively by telephone, facsimile, email and in writing with clients, organisational personnel and appropriate local authorities - read and interpret: tender documentation; other relevant workplace documentation; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication; - written communication skills to produce required documentation; - identify and analyse relevant information; - numeracy skills to calculate labour hours and costs and material quantities and costs, and; - translation of documented requirements into on-site activities and site and structural features from two-dimensional to three-dimensional formats. Students will also be expected to demonstrate the following knowledge: - building and construction practices; - internal documentation systems; - regulatory approvals processes and timeframes; - relevant state or territory building and construction codes, standards and regulations; - types of building and construction drawings and drawing perspectives, and; - types of building and construction industry contracts.

CPCBC4013A Prepare and evaluate tender documentation

Locations: Industry, Sunshine, Learning Links Geelong.

Prerequisites: Nil.

Description: This unit of competency specifies the outcomes required to evaluate contract specifications and information and to prepare tender documents associated with projects in the building and construction industries. Knowledge of tender

preparation and interpretation of project demands and requirements and the capability to bring together a body of diverse information are essential. How to find the information and present it in a manner that meets organisational needs in short timeframes is important, as is the ability to manage time effectively.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - calculate material quantities and costs; - calculate labour hours and costs; - consult with industry professionals; - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; - read and interpret: tender documentation; other relevant workplace documentation; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication; - written skills to produce required documentation to company standards; - estimate labour and materials costs from written information; - numeracy skills to calculate labour hours and costs and material quantities and costs, and; - use appropriate costing software programs. Students will also be expected to demonstrate the following knowledge: - operations and structure of the organisation's costing and contracting system; - state or territory building and construction codes, standards and government regulations relevant to the form of building or construction being undertaken; - types of building, construction or civil contracting drawings and specifications, and; - types, scope and usage of labour through the employee and subcontractor systems.

CPCBC4018A Apply site surveys and set-out procedures to building and construction projects

Locations: Industry, Sunshine.

Prerequisites: Nil.

Description: This unit of competency specifies the outcomes required to conduct basic measuring and levelling techniques as part of the set-out procedures performed on building projects. It includes the use of technical instruments, application of standard procedures and performance of calculations necessary in the set-out of construction projects.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following skills: - application of design concepts and principles relating to structural systems; - application of measurements and calculations; - attention to detail when transferring levels; - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; - read and interpret plans; - use and interpret non-verbal communication; - use language and concepts appropriate to cultural differences; - numeracy skills to apply measurements and calculations, and; - use of levelling devices for survey and site set outs. Students will also be expected to

demonstrate the following knowledge: - applications of structure in building systems and application to survey and site set-out; - BCA and Australian standards; - design principles; - level and grade checking used to perform survey control to accuracy criteria; - nature of survey and levelling devices and effect of performance on site, and; - work drawings and specifications.

CPCBC4020A Build thermally efficient and sustainable structures

Locations:Sunshine, Learning Links Geelong.

Prerequisites:Nil.

Description:This unit of competency specifies the outcomes required to apply sound principles of thermal efficiency as part of the implementation of sustainable building and construction processes. The range of legislative and council planning requirements are addressed in this unit, in addition to the need to respond to growing consumer demand for sustainable buildings and environmentally friendly developments.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - application of Australian standards and manufacturer specifications; - application of BCA Part 3.12; - communication skills to: communicate information to client; consult designers; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; identify and negotiate client requirements; read and interpret legislative and planning requirements; seek advice; use and interpret non-verbal communication; use language and concepts appropriate to cultural differences; - evaluation of the thermal efficiency of building design solutions, and; - apply numeracy skills to workplace requirements. Students will also be expected to demonstrate the following knowledge: - building and construction industry processes for building sustainability; - relevant state or territory building and construction codes, standards and government regulations; - underlying mathematics related to the calculation of thermal efficiency, and; - workplace safety requirements.

CPCBC4021A Minimise waste on the building and construction site

Locations:Sunshine.

Prerequisites:Nil.

Description:This unit of competency specifies the outcomes required to support sustainable building practices by minimising waste on the building and construction site. The range of legislative and council planning requirements are addressed in addition to industry best practice in relation to the management of by-products generated and removed from demolition, renovation and construction sites.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - application of Australian standards and manufacturer specifications; - application of the Building Code of

Australia (BCA); - communication skills to: communicate information to client; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; identify and negotiate client requirements; seek advice; - read and interpret: legislative and planning requirements, and relevant Australian standards; - use and interpret non-verbal communication; - use language and concepts appropriate to cultural differences; - written skills to produce a waste management strategy; - numeracy skills to apply calculations, and; - problem solving to determine optimum waste minimisation practices. Students will also be expected to demonstrate the following knowledge: - building and construction industry processes for building sustainability; - relevant state or territory building and construction codes, standards and government regulations, and; - workplace safety requirements.

CPCBC5001B Apply building codes and standards to the construction process for medium rise building projects

Locations:Industry, Sunshine.

Prerequisites:Nil.

Description:This unit of competency specifies the outcomes required to access, interpret and apply relevant building codes and standards applicable to the construction processes of medium rise commercial and wide span buildings (medium rise licensing classification with reference to Classes 1 and 10 construction, Classes 2 and 3 to a maximum of 3 storeys, and Classes 4 to 9 to a maximum of 3 storeys, not including Type A construction).

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - analysis and interpretation skills relating to documentation from a wide range of sources, including BCA and referenced documents; - application of design concepts and principles in accordance with BCA, namely medium rise: - Classes 1 and 10; - Classes 2 and 3 to a maximum of 3 storeys; - Classes 4 to 9 to a maximum of 3 storeys, not including Type A construction; - accurate application of building codes and standards; - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; - discuss and propose alternative solutions; read and interpret: documentation from a variety of sources, including BCA and referenced documents; specifications and drawings; - use and interpret non-verbal communication; - use language and concepts appropriate to cultural differences; - written skills to complete documentation in accordance with BCA requirements; - numeracy skills to apply mathematical information included in building codes and standards, and; - technological skills to facilitate use of the organisation's software and office equipment. Students will also be expected to demonstrate the following knowledge: - BCA performance hierarchy; - interpretation and analysis of working drawings and specifications; - relevance of Australian standards; - relevant legislative and OHS requirements, codes and practices; - relevant licensing arrangements, and; - thorough understanding of the BCA, namely medium rise: Classes 1 and 10; Classes 2 and 3 to a maximum of 3 storeys; Classes 4 to 9 to a maximum of 3 storeys, not including Type A construction.

CPCBC5002A Monitor casting systems on medium rise building and construction projects

Locations: Industry, Sunshine, Learning Links Geelong.

Prerequisites: Nil.

Description: This unit of competency specifies the outcomes required to monitor building or construction costing systems. The processes and practices involved in supervising and monitoring costing systems result in the ongoing maintenance of cost control and the production of expenditure schedules and other arrangements, which ensure contracts or projects remain on budget.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - account keeping skills to identify cost centres and monitor cash flows; - analysis and interpretation skills to undertake financial risk assessments; - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; - read and interpret documentation from a variety of sources; - supervise staff members; - use and interpret non-verbal communication; - use language and concepts appropriate to cultural differences; - written skills to prepare draft schedules of project expenditure and final cost reports; - management skills, including the ability to supervise staff; - numeracy skills to perform complex financial calculations, and; - preparation of schedules of expenditure and expenditure projections. Students will also be expected to demonstrate the following knowledge: - advanced estimating and costing systems used in the building and construction industry; - expenditure evaluation methods; - financial principles and cash flows; - project financial processes and timelines; - relevant licensing arrangements; - relevant standards, codes of practice and legislation for medium rise construction projects, and; - variations in rates occurring through rise and fall clauses and their effects.

CPCBC5003A Supervise the planning of on-site medium rise building or construction work

Locations: Industry, Sunshine.

Prerequisites: Nil.

Description: This unit of competency specifies the outcomes required to supervise the planning process and organisation of on-site building or construction work projects up to and including medium rise commercial and wide span buildings (medium rise licensing classification with reference to Class 1 and 10 construction, Class 2 and 3 to a maximum of 3 storeys, Class 4 to 9 to a maximum of 3 storeys, not including Type A construction).

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - evaluation skills to review and evaluate documentation and processes and recommend changes or improvements; - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; - discuss

problems with consultants; - manage staff; - read and interpret: contracts, project schedule and reports; documentation from a variety of sources; - use and interpret non-verbal communication; - use language and concepts appropriate to cultural differences; - document project schedule and resource requirements; - maintain records; - record relevant information; - management skills, including the ability to delegate tasks and supervise staff to achieve planning outcomes, and; - planning skills to enable the effective planning of projects, processes and strategies which maximise the efficiency and cost-effectiveness of building or construction contracts and which effectively organise and use available resources on construction sites. Students will also be expected to demonstrate the following knowledge: - building and construction industry contracts; - building and construction industry subcontracting system; - building or construction practices in on and off-site management; - construction planning process; - contract documentation, quantities establishment, rates and costs related to payments and claims; - human resource principles and practices; - relevant licensing arrangements; - relevant state or territory building and construction codes, standards and government regulations for medium rise building projects, and; - workplace safety requirements.

CPCBC5004A Supervise and apply quality standards to the selection of building and construction materials

Locations: Industry, Sunshine.

Prerequisites: Nil.

Description: This unit of competency specifies the outcomes required to supervise the systems through which materials are selected, acquired and stored on site for building or construction work up to and including medium rise projects. It ensures the delivery to the site of materials that meet contract specifications and service requirements for commercial projects.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - apply numeracy skills to workplace requirements; - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; - communicate organisational procedures and other information to relevant personnel; - read and interpret: documentation from a variety of sources; plans, specifications and drawings; - report on difficulties with either supply or standards of materials; - use and interpret non-verbal communication; - use language and concepts appropriate to cultural differences; - establish and maintain records of tests and testing procedures; - record relevant information; - materials testing skills to enable materials to be tested according to relevant Australian standards or the ability to arrange for testing to be carried out independently; - reporting skills to report on difficulties with either supply or standards of materials; - supervisory skills to ensure the correct selection and installation of materials on site and secure storage of materials on site, and; - systems development skills to ensure systems are developed to ensure correct materials that meet appropriate standards are delivered and used on site. Students will also be expected to demonstrate the following knowledge: - alternative materials; - building and construction materials and technologies; - construction and contracting equipment and its use; - construction supply processes; - environmental

effects on various building and construction materials; - relevant licensing arrangements; - testing procedures, and; - workplace safety requirements.

CPCBC5006B Apply site surveys and set-out procedures to medium rise building projects

Locations: Industry, Sunshine.

Prerequisites: Nil.

Description: This unit of competency specifies the outcomes required to apply site surveys and set-out procedures to medium rise building and construction projects. It addresses the skills and practices required to measure, record and interpret data using measuring and levelling equipment and to set out building projects. The ability to operate specific surveying equipment and apply calculations and knowledge of the Building Code of Australia (BCA) and Australian standards are essential.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: application of design concepts and principles to survey and site set-out; - application of measurements and calculations to survey and site set-out; - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; - perform survey and levelling procedures with others; - read and interpret: drawings and specifications; state regulatory authority requirement; other relevant documentation; - use and interpret non-verbal communication; - use language and concepts appropriate to cultural differences; - interpretation skills to understand documentation from a wide range of sources, including state regulatory authority requirements, and; - numeracy skills to apply measurements and calculations. Students will also be expected to demonstrate the following knowledge: - application of design principles; - BCA and Australian standards and manufacturer specifications; - building systems and application to survey and site set-out; - level and grade checking used to perform survey control to accuracy criteria; - OHS measures as identified by equipment manufacturers and Australian standards; - relevant legislative requirements, codes and practices; - survey and levelling devices and effect of performance on site, and; - work drawings and specifications.

CPCBC5007B Administer the legal obligations of a building or construction contractor

Locations: Industry, Sunshine.

Prerequisites: Nil.

Description: This unit of competency supports the needs of builders, senior managers within building and construction firms and other construction industry personnel responsible for administering the legal obligations of a building or construction contractor for medium rise projects.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of

competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - complete legal documents and records; - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; - liaise with government agencies; - provide information to employees. - read and interpret: contracts and regulations; industrial awards; legislation; - use and interpret non-verbal communication; - use language and concepts appropriate to cultural differences; - manage compliance with a variety of legal obligations and administer various awards and agreements; - management skills to effectively manage personnel, and; - numeracy skills to apply measurements and calculations. Students will also be expected to demonstrate the following knowledge: - awards and agreements applying to employees and subcontractors; - legislative requirements; - environmental legislation; - fair trading legislation; - taxation and insurance requirements; - licensing and builders' registration requirements; - local authority regulations; - OHS and rehabilitation requirements, and; - relevant licensing arrangements.

CPCBC5010B Manage construction work

Locations: Industry, Sunshine.

Prerequisites: Nil.

Description: This unit of competency specifies the outcomes required to manage construction work and/or projects, which may involve fulfilling single or multi-site commercial contractual obligations. To successfully manage construction projects requires knowledge of relevant industry legislation, codes, standards, methods, procedures and practices as well as the ability to communicate effectively with others.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; - liaise with subcontractors, staff and clients, as well as with local or regulatory authorities on matters relating to site conditions or approvals; - notify personnel of meetings; - read and interpret: documentation from a variety of sources; plans, specifications and drawings; - use and interpret non-verbal communication; - use language and concepts appropriate to cultural differences; - complete site communication requirements; - record and report relevant information; - establishing, implementing and maintaining a safe working environment; - financial management skills to ensure that progress payments are made on time and on the basis of work successfully completed; - management skills in order to manage personnel and resources to effectively achieve contract or project objectives; - negotiation skills to enable effective negotiation on industrial relations issues; - numeracy skills to apply calculations, and; - problem solving skills to effectively resolve problems relating to construction methodologies or practices. Students will also be expected to demonstrate the following knowledge: - environmental management procedures to ensure compliance with regulatory requirements; - hazard management processes; - nature and style of building and construction industry contracts; - OHS frameworks and obligations under federal, state or territory legislation and regulations; - quality management processes and procedures as they apply to the building and construction industry; - relevant licensing arrangements; -

relevant state or territory building and construction codes, standards and regulations;
- risk management processes and practices, and; - workplace safety requirements.

CPCBC5011A Manage environmental management practices and processes in building and construction

Locations: Industry, Sunshine.

Prerequisites: Nil.

Description: This unit of competency specifies the outcomes required to manage environmental management practices and processes in building and construction, as part of the organisation's overall management system. To successfully manage practices and processes requires knowledge of current trends in environmental practices and methodologies, statistical analysis and legislative requirements.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - analytical skills, including the ability to assess variations in environmental management performance and identify reasons for those variations; - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; - liaise with subcontractors, staff and clients, as well as with local or regulatory authorities on matters relating to site conditions or approvals; - notify personnel of meetings; - read and interpret documentation from a variety of sources; plans, specifications and drawings; - use and interpret non-verbal communication; - use language and concepts appropriate to cultural differences; - complete site communication requirements; - record and report relevant information; - numeracy skills to apply calculations; - evaluation skills to evaluate previous environmental management performance and identify strengths and weaknesses of the process; - management skills, including the ability to develop and implement environmental management plans that improve organisational compliance with environmental obligations and responsibilities; - problem solving skills, including the ability to identify environmental management issues and address these before they become contentious or dangerous, and; - staff management skills to effectively manage personnel in the administration of organisational environmental management systems. Students will also be expected to demonstrate the following knowledge: - benchmarking and the establishment of environmental goals; - current trends in environmental management and controls; - environmental management practices and methodologies; - legal and regulatory obligations implicit in environmental requirements; - penalties for various breaches of environmental obligations and conformance requirements; - relevant licensing arrangements, and; - statistical analysis methodologies.

CPCBC5018A Apply structural principles to the construction of medium rise buildings

Locations: Industry, Sunshine.

Prerequisites: CPCBC5001B - Apply building codes and standards to the construction process for medium rise building projects

Description: This unit of competency specifies the outcomes required to apply structural principles to the building of medium rise buildings. The design and construction of medium rise buildings require the input of a range of skilled

professionals, including architects and engineers. The building and construction professional plays a significant role within this project team and requires the ability to communicate effectively with building design professionals, and develop sound and safe practices in relation to structural procedures on site.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - application of design concepts and principles; - consult with industry professionals; - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; - read and interpret: codes and standards; legislative and planning requirements; plans, specifications and drawings; other relevant documentation from a wide range of sources; - use and interpret non-verbal communication; - use language and concepts appropriate to cultural differences, and; - numeracy skills to apply measurements and calculations. Students will also be expected to demonstrate the following knowledge: - applications of structural principles in buildings; - Building Code of Australia (BCA) and Australian standards; - design principles and behaviour of structural members undergoing stress, strain, compression, bending or combined actions; - interpretation and analysis of work drawings and specifications; - nature of materials and the effect on performance, and; - OHS and organisational quality procedures and processes.

CPCBL2001A Handle and prepare bricklaying and blocklaying materials

Locations: Industry, Werribee, Sunshine.

Prerequisites: CPCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to safely handle bricklaying and blocklaying materials manually and mechanically, including their storage requirements. It also includes preparatory mixing requirements and environmental requirements for the disposal of waste.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; drawings and specifications; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - technological skills to: use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be

expected to demonstrate the following knowledge: - bricklaying and blocklaying materials; - calculation of and techniques for preparing mixes; - construction terminology; - hazards associated with the use of bricklaying and blocklaying tools, plant and equipment; - job safety analysis (JSA) and safe work method statements; - manual handling techniques; - materials storage and environmentally friendly waste management; - MSDS; - plans, specifications and drawings; - processes for the calculation of material requirements; - quality requirements; - techniques for bricklaying and blocklaying tasks; - types, characteristics, uses and limitations of plant, tools and equipment, and; - workplace and equipment safety requirements.

CPCCB2002A Use bricklaying and blocklaying tools and equipment

Locations: Industry, Werribee, Sunshine.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to use tools and equipment used in bricklaying and blocklaying safely and effectively. It includes the identification, selection and use of hand and power tools, plant and equipment used in masonry work.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: drawings and specifications; manufacturers' instructions; other relevant documentation; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - applications, limitations and method of operation and maintenance of hand and power tools, plant and equipment applicable to bricklaying and blocklaying tasks; - construction terminology; - hazards associated with the use of bricklaying and blocklaying tools, plant and equipment; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - processes for the calculation of material requirements; - quality requirements, and; - workplace and equipment safety requirements.

CPCCB3001A Lay paving

Locations: Industry, Werribee, Sunshine.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to lay pavers on level and inclined surfaces. It includes preparing, setting out and laying of the paving.

Required Reading: The qualified trainer and assessor will provide teaching and

learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements; share information; listen and understand; follow instructions; - read and interpret: documentation from a variety of sources and drawings and specifications; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - characteristics and applications of materials for laying pavers; - construction terminology; - corner geometry; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - paving bonds and patterns, joints and finishing; - plans, specifications and drawings; - processes for the calculation of material requirements; - quality requirements; - techniques for laying pavers; - types, characteristics, uses and limitations of plant, tools and equipment, and; - workplace and equipment safety requirements.

CPCCB3002A Carry out masonry veneer construction

Locations: Industry, Werribee, Sunshine.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to construct masonry veneer buildings and structures. It includes planning, preparation, set out and installation of the masonry.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; plans, specifications and drawings; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work, and; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities. Students will also be expected to demonstrate the following knowledge: - brick and

block expansion and growth, control and articulation joints; - brick bond patterns; - characteristics and applications of materials for masonry veneer construction, including fire control and separation required by the Building Code of Australia (BCA) and other legislation; - construction terminology; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - processes for the calculation of material requirements; - quality requirements; - techniques of masonry veneer construction, including gable and eaves construction, damp proofing, flashings and ventilation, vermin control, anti-termite measures, floor, wall and roof members, tying components, timber shrinkage, sub-floor construction, lintels and load bearing components; - types, characteristics, uses and limitations of plant, tools and equipment, and; - workplace and equipment safety requirements.

CPCCB3003A Carry out cavity brick construction

Locations: Industry, Werribee, Sunshine.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to construct cavity brick/block buildings and structures. It includes planning, preparation, set out and installation of the masonry.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; plans, specifications and drawings; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work, and; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities. Students will also be expected to demonstrate the following knowledge: - brick and block expansion and growth, control and articulation joints; - brick bond patterns; - characteristics and applications of materials for cavity brick construction, including fire control and separation required by the Building Code of Australia (BCA) and other legislation; - construction terminology; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - processes for the calculation of material requirements; - quality requirements; - techniques of cavity brick construction, including: anti-termite measures; closing of cavities and capping systems; damp proofing; floor, wall and roof members; gable and eaves construction; lintels and load bearing components; stepped and level flashing for parapets and gables; sub-floor construction; tying components; ventilation; vermin control; - types, characteristics, uses and limitations of plant, tools and equipment, and; - workplace and equipment safety requirements.

CPCCB3004A Construct masonry steps and stairs

Locations: Industry, Werribee, Sunshine.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to construct masonry steps, stairs and wing walls for different types and styles of buildings. It includes planning, preparation, set out and installation of the masonry.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; plans, specifications and drawings; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - brick and block expansion and growth, control and articulation joints; - brick bond patterns; - characteristics and applications of materials for masonry steps and stairs construction; - construction terminology; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - processes for the calculation of material requirements; - quality requirements; - techniques of masonry steps and stairs construction; - types, characteristics, uses and limitations of plant, tools and equipment, and; - workplace and equipment safety requirements.

CPCCB3005A Lay masonry walls and corners

Locations: Industry, Werribee, Sunshine.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to construct masonry walls and corners to different types and styles of buildings. It includes planning, preparation, set out and installation of the masonry.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to

identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; plans, specifications and drawings; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - brick and block expansion and growth, control and articulation joints; - brick bond patterns, types of joints and finishing; - characteristics and applications of materials for brick/block wall and corner construction; - construction terminology; - corner geometry; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - processes for the calculation of material requirements; - quality requirements; - techniques of brick/block wall and corner construction; - types, characteristics, uses and limitations of plant, tools and equipment, and; - workplace and equipment safety requirements.

CPCCB3006A Lay multi-thickness walls and piers

Locations: Industry, Werribee, Sunshine.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to construct multi-thickness walls and piers for different types and styles of buildings. It includes planning, preparation, set out and construction of walls and piers.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; plans, specifications and drawings; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - brick and block expansion and growth, control and articulation joints; - brick bond patterns (including corners, piers and junctions), types of joints and finishing; - characteristics and applications of materials for multi-thickness walls and piers construction; - construction terminology; - corner geometry; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - processes for the

calculation of material requirements; - quality requirements; - techniques of multi-thickness walls and piers construction; - types, characteristics, uses and limitations of plant, tools and equipment, and; - workplace and equipment safety requirements.

CPCCB3007A Install glass blockwork

Locations: Industry, Werribee, Sunshine.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to install glass blockwork to buildings. It includes preparation, set out and installation of the blocks.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements; share information; listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; plans and specifications; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - characteristics, applications and limitations of materials for the installation of glass blockwork; - construction terminology; - hazards associated with the installation of glass blockwork; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - processes for the calculation of material requirements; - quality requirements; - techniques for installing glass blockwork; - types, characteristics, uses and limitations of plant, tools and equipment, and; - workplace and equipment safety requirements.

CPCCB3009A Install flashings and damp proof course

Locations: Industry, Werribee, Sunshine.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to install flashings and damp proofing products to different types and styles of buildings. It includes planning, preparation, set out, installation and application requirements of the work.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of

competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; plans, specifications and drawings; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - characteristics and applications of materials for the installation of flashings and DPC; - construction terminology; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - processes for the calculation of material requirements; - quality requirements; - techniques for installing flashings and DPC; - waterproofing methods; - types, characteristics, uses and limitations of plant, tools and equipment, and; - workplace and equipment safety requirements.

CPCCL3010A Construct masonry arches

Locations: Industry, Werribee, Sunshine.

Prerequisites: CPCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to construct masonry arches within walls and above columns or attached piers. It includes the preparation, set out and construction of masonry walls and arches.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; plans, specifications and drawings; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - technological skills to: use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - brick and block expansion and growth, control and articulation joints; - brick bond patterns, types of joints and finishing; - characteristics and applications of materials for masonry arch construction; - construction and arch terminology; - geometric calculations and drawing; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and

environmentally friendly waste management; - plans, specifications and drawings; - processes for the calculation of material requirements; - quality requirements; - types of masonry arches and techniques of construction; - types, characteristics, uses and limitations of plant, tools and equipment, and; - workplace and equipment safety requirements.

CPCCL3011A Construct curved walls

Locations: Industry, Werribee, Sunshine.

Prerequisites: CPCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to construct a specified masonry curved wall. It includes the preparation, set out and construction of curved walls.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - determine requirements; - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; - follow instructions; - read and interpret: documentation from a variety of sources; plans, specifications and drawings; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities; - use a range of mobile technology, such as two-way radio and mobile phones, and; - voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - brick and block expansion and growth, control and articulation joints; - brick bond patterns, applications to arcs and finishing; - characteristics and applications of materials for masonry curved wall construction; - circle geometric calculations - tangents, normal and arcs; - construction terminology; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - processes for the calculation of material requirements; - quality requirements; - techniques of masonry curved wall construction, including radius set out; - types, characteristics, uses and limitations of plant, tools and equipment, and; - workplace and equipment safety requirements.

CPCCL3012A Construct fireplaces and chimneys

Locations: Industry, Werribee, Sunshine.

Prerequisites: CPCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to construct brick fireplaces and chimneys in various types and styles of buildings. It includes planning, preparation, set out and construction requirements of the work.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge

and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements; share information; listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; plans, specifications and drawings; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - brick expansion and growth, control and articulation joints; - characteristics and applications of materials for constructing fireplaces and chimneys; - construction terminology; - flashing; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - principles of heat, fire and drawing of smoke; - processes for the calculation of material requirements; - quality requirements; - techniques for constructing fireplaces and chimneys; - types, characteristics, uses and limitations of plant, tools and equipment, and; - workplace and equipment safety requirements.

CPCCB13013A Construct masonry structural systems

Locations: Industry, Werribee, Sunshine.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to construct masonry load bearing walls and engaged and isolated piers. It includes planning, preparation set out and construction requirements of the work.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements; share information; listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; drawings and specifications; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - articulated and pier construction; - bonding

patterns and block bonding techniques; - brick expansion and growth; - characteristics and applications of materials for constructing masonry structural systems; - construction terminology; - control joints; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - processes for the calculation of material requirements; - quality requirements for masonry structural systems; - reinforcing of structures and core filling of blockwork; - techniques for constructing masonry structural systems; - types, characteristics, uses and limitations of plant, tools and equipment, and; - workplace and equipment safety requirements.

CPCCB13014A Install fire-rated masonry construction

Locations: Industry, Werribee, Sunshine.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to construct fire-rated masonry construction systems for fire-resistant construction. It includes planning, set out and installation requirements of the work.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements; share information; listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; drawings and specifications; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - brick expansion and growth, control and articulation joints; - characteristics and applications of materials for installing fire-rated masonry; - construction terminology; - fire rating of buildings; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - principles of heat and effects on materials; - processes for the calculation of material requirements; - quality requirements for fire-rated masonry construction; - techniques for installing fire-rated masonry; - types, characteristics, uses and limitations of plant, tools and equipment, and; - workplace and equipment safety requirements.

CPCCB13015A Construct decorative brickwork

Locations: Industry, Werribee, Sunshine.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to construct decorative brickwork to buildings. It includes planning, set out and laying of bricks to

form a decorative finish.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements; share information; listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; drawings and specifications; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - construction terminology; - decorative brickwork materials; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - processes for the calculation of material requirements; - quality requirements for decorative brickwork; - techniques for constructing decorative brickwork; - types, characteristics, uses and limitations of plant, tools and equipment, and; - workplace and equipment safety requirements.

CPCBL3016A Construct battered masonry walls and piers

Locations:Industry, Werribee, Sunshine.

Prerequisites:CPCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description:This unit of competency specifies the outcomes required to construct battered and pired masonry walls. It includes the preparation of the base and the laying of masonry or stone to form the wall.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements; share information; listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; drawings and specifications; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile

technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - characteristics and applications of materials for constructing battered walls and piers; - construction terminology; - control and articulation joints; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - processes for the calculation of material requirements; - quality requirements for battered masonry walls and piers; - techniques for constructing battered walls; - types, characteristics, uses and limitations of plant, tools and equipment, and; - workplace and equipment safety requirements.

CPCBS6001 Research and evaluate construction methods and materials for residential buildings to three storeys

Locations:Sunshine, Geelong Learning Links.

Prerequisites:Nil.

Description:This unit of competency specifies the outcomes required to develop an understanding of traditional, new and emerging construction methods and materials, including systems and components for services, for class 1 and 10 buildings as defined in the Building Code of Australia (BCA) and up to three storeys and not more than 2000 square metres in floor area. It involves researching and analysing construction industry information, including research papers, engineering reports, material specifications and performance data; and following information management procedures to ensure that construction methods and materials are evaluated using current and accurate information. This unit supports the work of building surveyors who provide advisory code-consulting services or authorised statutory services relating to planning or building permit application assessment or building audit and inspection services for class 1 and 10 residential buildings. Licensing, legislative, regulatory or certification requirements apply to this unit in some States. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. The person must develop and maintain current research findings to support building surveying services for three different buildings or structures not more than 2000 square metres in floor area in classes 1 and 10 as defined in the Building Code of Australia (BCA), where: - two of the buildings must be in class 1 and three storeys; - one building must be in class 1 and less than three storeys, or in class 10, and; - each building must be in a different climatic, geographic or planning zone. In doing the above, the person must also produce a research report containing research findings, recommendations and supporting evidence for each of the above building projects, based on an evaluation of: - characteristics and applications of a range of materials suitable for the structural elements and building envelope; - different construction methods and systems applicable to the structural elements and building envelope, and; - components and systems for services that consider: relevant compliance requirements; installation methods. The person must also be able to demonstrate a process for: - seeking

feedback on and distributing findings from each of the three research reports, and; - maintaining the currency of research findings in each report. Students will also be expected to demonstrate the following knowledge: - characteristics and applications of materials suitable for structural elements and building envelope; - compliance requirements relating to construction materials and methods for class 1 and 10 buildings and structures; - Australian standards; - National Construction Code (NCC) requirements; - construction methods and systems; - site preparation; - structural elements; - building envelope; - components and systems for services; - compliance requirements; - installation methods; - sources of reliable information on traditional, new and emerging uses of construction materials and methods, and; - structural engineering principles sufficient to interpret and apply the requirements of the BCA.

CPCCBS6002 Research and evaluate construction methods and materials for commercial buildings to three storeys

Locations:Sunshine, Geelong Learning Links.

Prerequisites:Nil.

Description:This unit of competency specifies the outcomes required to develop an understanding of traditional, new and emerging construction methods and materials, including systems and components for services, for those buildings included in classes 2 to 9 as defined in the Building Code of Australia (BCA) and up to three storeys. It applies to researching and analysing construction industry information, including research papers, engineering reports, material specifications and performance data, including fire performance of construction materials; and following information management procedures to ensure that construction methods and materials are evaluated using current and accurate information. This unit supports the work of building surveyors who provide advisory code-consulting services or authorised statutory services relating to planning or building permit application assessment or building audit and inspection services for class 2 to 9 commercial buildings. Licensing, legislative, regulatory or certification requirements apply to this unit in some States. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. The person must develop and maintain current research findings to support building surveying services for three different projects, each involving a different class of commercial building (classes 2 to 9 as defined in the Building Code of Australia [BCA]), where: - one project must incorporate classes 2, 5, 6 and 7a; - one project must incorporate classes 3 and 9c, and; - one project must incorporate classes 7b and 8. In doing the above, the person must produce a research report containing research findings, recommendations and supporting evidence for each of the above building projects, based on an evaluation of: - characteristics and applications of a range of materials suitable for the structural elements and building envelope, including the fire resistance of materials appropriate to the class of building; - different construction methods and systems applicable to structural elements and building envelope, and; - components and systems for services that consider: relevant compliance requirements; installation methods. The person must also be able to demonstrate a process for: - seeking feedback on and

distributing findings from each of the three research reports, and; - maintaining the currency of research findings in each report. Students will also be expected to demonstrate the following knowledge: - characteristics, including fire resistance and applications of materials suitable for structural elements and building envelope; - compliance requirements relating to construction materials and methods for buildings included in classes 2 to 9 of the BCA; - Australian standards; - National Construction Code (NCC) requirements; - construction methods and systems; - site preparation; - structural elements; - building envelope; - components and systems for services, including: compliance requirements; installation methods; - sources of reliable information on traditional, new and emerging uses of construction materials and methods, and; - structural engineering principles sufficient to interpret and apply the requirements of the BCA.

CPCCBS6003 Apply legal and ethical requirements to building surveying functions

Locations:Sunshine, Geelong Learning Links.

Prerequisites:Nil.

Description:This unit of competency specifies the outcomes required to access, interpret and apply building control legislation, as well as industry and organisational codes of practice, to building surveying activities and communications. The unit supports identifying and applying the requirements of particular geographic and climatic areas, local planning schemes and codes. It also involves carrying out the building surveying function with consideration for the legal and ethical responsibilities of the role. The unit supports the work of municipal and private building surveyors who operate in a highly regulated environment. Licensing, legislative, regulatory or certification requirements apply to this unit in some States. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. The person must perform building surveying tasks according to relevant legal requirements and ethical standards on three different building surveying projects. Projects must involve buildings up to three storeys and include the following class buildings as defined in the Building Code of Australia (BCA): - one building must be from class 1, and; - two buildings must be from classes 2 to 9. For each building surveying project, the person must: - identify and access relevant codes, regulations and legislation applicable to each building project, documenting the applicable sections of each and providing written evidence of how the principles of the organisational or industry code of practice were applied to each project; - research and document the administrative procedures required to ensure completion of each project, and; - provide evidence of having handled a minimum of three disputes or complaints from different clients, using relevant dispute-handling procedures and according to organisational or industry code of conduct. Students will also be expected to demonstrate the following knowledge: - dispute-resolution procedures available to property owners and community members in relevant jurisdictions; - nature of admissible evidence that may be presented in arbitration hearings or court proceedings relating to building disputes; - principles of contract law that apply to building surveying contractual agreements with clients or

applicants; - principles of negotiation and conflict resolution applicable to professional relationships; - processes for representing clients in arbitration hearings and court proceedings relating to building disputes; - relevant compliance requirements for buildings in different climatic, geographic and planning zones; - building control legislation and regulations; - National Construction Code (NCC); - Australian standards referenced by building control legislation and regulations and the NCC; - state, territory or local authority planning policies; - scope and limitations of the statutory enforcement authority regulating building surveyors in relevant states or territories, and; - legislative and regulatory requirements for professional conduct in communications with building contractors.

CPCBS6004 Assess and advise on compliance of design documentation for residential buildings to three storeys

Locations:Sunshine, Geelong Learning Links.

Prerequisites:Nil.

Description:This unit of competency specifies the outcomes required to review proposed building design documentation during the design process for buildings and structures included in Building Code of Australia (BCA) definitions for class 1 and 10 up to three storeys and not more than 2000 square metres in floor area. It applies to providing advice on the preparation of planning and building approval applications and on the compliance of proposed design documentation with the requirements of building and planning legislation, regulations, codes and standards that apply to the nature and location of each project. The unit supports the work of building surveyors providing advisory code-consulting services to building and construction professionals involved in developing building design documentation up to the building approval application stage. The building surveyor may provide advice concurrently on a range of building design projects in different locations. Building surveyors must operate within the regulatory constraints that govern the relationship between their advisory and statutory roles and ensure that no conflict of interest arises. Licensing, legislative, regulatory or certification requirements apply to this unit in some States. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - determine and confirm service level agreements with clients for four different projects involving the following class 1 and 10 buildings and structures as defined in the Building Code of Australia (BCA): - two types of class 1a buildings in different locations; - one class 1b building; - one class 10 building or structure: one bushfire shelter, swimming pool or retaining wall; - liaise with specialist experts to ensure timely provision of advice within terms of service level agreement; - determine compliance requirements for the four different projects and provide advice to clients on how compliance requirements apply to each project; - advise clients of the documentation required for planning and building permit applications for the four projects; - analyse complete sets of building design documentation for two planning and two building approval applications relating to the four projects and: - provide advice on two cost-effective and efficient design alternatives that meet compliance requirements; - provide written advice on the compliance of design documentation with the requirements of building and

planning legislation, regulations, codes and standards applicable to the project location, including possible solutions to compliance issues; - invite questions from clients regarding compliance advice and explain requirements in detail, and; - provide responses to six different requests from clients for specific information regarding different types of compliance issues. Students will also be expected to demonstrate the following knowledge: - BCA classification and definitions for class 1 and 10 buildings and structures; - construction methods and materials suitable for class 1 and 10 buildings and structures; - regulatory constraints that govern the relationship between the advisory and statutory roles of building surveyors; - drawing symbols, notations, acronyms and construction terminology used in the National Construction Code (NCC), Australian standards, working drawings, building design specifications, and building permit documentation; - project management strategies that ensure thorough and timely advice is delivered according to service level agreement; - range of, and variations in, compliance requirements for class 1 and 10 buildings and structures in different climatic, geographic and planning zones, including: - building control legislation and regulations; - NCC; - Australian standards referenced by building control legislation and regulations and the NCC, and; - state, territory or local authority planning policies.

CPCBS6005 Assess and advise on compliance of design documentation for commercial buildings to three storeys

Locations:Sunshine, Geelong Learning Links.

Prerequisites:Nil.

Description:This unit of competency specifies the outcomes required to review proposed building design documentation for buildings included in Building Code of Australia (BCA) definitions for classes 2 to 9 (up to three storeys), during the design process. It applies to providing advice on the preparation of planning and building approval applications and on the compliance of proposed design documentation with the requirements of the building and planning legislation, regulations, codes and standards that apply to the nature and location of each project. The unit supports the work of building surveyors providing advisory code-consulting services to building and construction professionals involved in developing building design documentation up to the building approval application stage. The building surveyor may provide advice concurrently on a range of building design projects in different locations. Building surveyors must operate within the regulatory constraints that govern the relationship between their advisory and statutory roles and ensure that no conflict of interest arises. Licensing, legislative, regulatory or certification requirements apply to this unit in some States. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - determine and confirm service level agreements with clients for three different projects involving the following class buildings as defined in the Building Code of Australia (BCA) where: one project must incorporate classes 2, 5, 6 and 7a; one project must incorporate classes 3 and 9c; one project must incorporate classes 7b and 8; - liaise with specialist experts to ensure timely provision of advice within terms of service level agreement; - determine compliance requirements for the three different projects and

provide advice to clients on how compliance requirements apply to each project; - advise clients of the documentation required for planning and building permit applications for each project; - analyse complete sets of building design documentation for two planning applications and one building approval application relating to the projects listed above; - provide advice on two cost-effective and efficient design alternatives that meet compliance requirements; - provide written advice on the compliance of design documentation with the requirements of building and planning legislation, regulations, codes and standards applicable to the project location, including possible solutions to compliance issues; - invite questions from clients regarding compliance advice and explain requirements in detail, and; - provide responses to six different requests from clients for specific information regarding different types of compliance issues. Students will also be expected to demonstrate the following knowledge: - BCA classification and definitions for buildings included in classes 2 to 9; - construction methods and materials suitable for buildings included in classes 2 to 9; - regulatory constraints that govern the relationship between the advisory and statutory roles of building surveyors; - drawing symbols, notations, acronyms and construction terminology used in the National Construction Code (NCC), Australian standards, working drawings, building design specifications, and building permit documentation; - project management strategies that ensure thorough and timely advice is delivered according to service level agreement, and; - range of, and variations in, compliance requirements for buildings included in classes 2 to 9 in different climatic, geographic and planning zones.

CPCCBS6006 Process planning applications for residential buildings up to three storeys

Locations:Sunshine, Geelong Learning Links.

Prerequisites:Nil.

Description:This unit of competency specifies the outcomes required to process planning applications for residential buildings in classes 1 and 10 as defined in the Building Code of Australia (BCA) and up to three storeys and not more than 2000 square metres in floor area. The unit covers gathering and assessing documentation that supports the planning application process required to obtain planning permission. The unit supports the work of private and municipal building surveyors carrying out the statutory role of ensuring that proposed residential building projects meet relevant compliance requirements prior to issuing planning permits. Licensing, legislative, regulatory or certification requirements apply to this unit in some States. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. The person must process planning applications for four different projects, involving the following class 1 and 10 buildings or structures as defined in the Building Code of Australia (BCA), where: - two projects must be for class 1a buildings in different locations; - one project must be for a class 1b building, and; - one project must be for a class 10 building or structure: bushfire shelter, swimming pool or retaining wall. At least two of the buildings must be three storeys. In doing the above, the person must also provide

evidence of the ability to: - identify relevant approving authority requirements for assessing and issuing planning permissions and ensure adherence to relevant administrative processes; - gather relevant planning application documentation, including drawings, for each building project and assess each application for compliance with relevant legislation, codes, regulations and local planning authority requirements; - analyse documentation supplied by at least one external consultant for each planning application, to ensure information is accurate and complete and to determine compliance of the planning application; - identify and note areas of non-compliance and produce a range of alternative solutions for client consideration; - document final planning permission for each building project, noting specific conditions and validity of each permit, and; - lodge final planning approval. Students will also be expected to demonstrate the following knowledge: - BCA classification and definitions for buildings included in classes 1 and 10; - construction methods and materials suitable for buildings in classes 1 and 10; - drawing symbols, notations, acronyms and construction terminology used in the National Construction Code (NCC), Australian standards, working drawings, and building design specifications; - legislative and local planning and building requirements governing the issuing of planning approval permits in the jurisdictions relevant to each building specified in the performance evidence, and; - legislative roles and responsibilities of those issuing planning permits in the relevant jurisdiction.

CPCCBS6008 Process building applications for residential buildings up to three storeys

Locations:Sunshine, Geelong Learning Links.

Prerequisites:Nil.

Description:This unit of competency specifies the outcomes required to process building applications for residential buildings in classes 1 and 10 as defined in the Building Code of Australia (BCA) and up to three storeys and not more than 2000 square metres in floor area. The unit covers gathering and assessing documentation that supports the building application process which, if successful, results in the issuing of a building permit. It supports the work of private and municipal building surveyors carrying out the statutory role of ensuring that proposed residential building projects meet relevant compliance requirements prior to commencement of construction. Licensing, legislative, regulatory or certification requirements apply to this unit in some States. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. The person must process building applications for four different projects involving the following class 1 and 10 buildings or structures as defined in the Building Code of Australia (BCA): - two types of class 1a buildings in different locations; - one class 1b building, and; - one class 10 building or structure: bushfire shelter, swimming pool or retaining wall. In doing the above, the person must: - identify relevant approving authority requirements for assessing and issuing building permissions and ensure adherence to relevant administrative processes; - identify all codes, legislation and planning provisions applicable to the building application; - gather relevant building application

documentation, including drawings, for each building project and assess each application for compliance with relevant legislation, codes, regulations and local building authority requirements; - analyse documentation supplied by at least one external consultant for each building application to ensure information is accurate and complete and to determine compliance of the building application; - seek and obtain approval or consent from at least one service authority for each building approval application; - identify and note areas of non-compliance and produce a range of alternative solutions for client consideration; - document final building permission for each building approval, and; - lodge final building approval. Students will also be expected to demonstrate the following knowledge: - BCA classification and definitions for buildings included in classes 1 and 10; - construction methods and materials suitable for buildings in classes 1 and 10; - drawing symbols, notations, acronyms and construction terminology used in the National Construction Code (NCC), Australian standards, working drawings, and building design specifications; - legislative and local planning and building requirements governing the issuing of building approval permits in the jurisdictions relevant to each building specified in the performance evidence, and; - legislative roles and responsibilities of those issuing building permits in the relevant jurisdiction.

CPCCBS6009 Process building applications for commercial buildings up to three storeys

Locations:Sunshine, Geelong Learning Links.

Prerequisites:Nil.

Description:This unit of competency specifies the outcomes required to process building applications for buildings included in Building Code of Australia (BCA) definitions for: - classes 2 to 9 (up to three storeys), and - three-storey class 1 buildings. The unit covers gathering and assessing documentation that supports the building application process, which if successful, results in the issuing of a building permit. The unit supports the work of private and municipal building surveyors carrying out the statutory role of ensuring that proposed commercial building projects meet relevant compliance requirements prior to commencement of construction. Licensing, legislative, regulatory or certification requirements apply to this unit in some States. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. The person must process building applications for three different projects involving the following class buildings as defined in the Building Code of Australia (BCA), where: - one project must incorporate classes 2, 5, 6 and 7a; - one project must incorporate classes 3 and 9c, and; - one project must incorporate classes 7b and 8. Each of the above buildings must be no more than three storeys. In doing the above, the person must: - identify relevant approving authority administrative requirements for assessing and issuing building permissions and ensure adherence to relevant administrative processes; - identify all codes, legislation and planning provisions applicable to the proposed building application; - gather relevant building application documentation, including drawings, for each building project and assess each application for compliance with

relevant legislation, codes, regulations and local building authority requirements; - analyse documentation supplied by at least one external consultant for each building application to ensure information is accurate and complete and to determine compliance of the building application; - seek and obtain approval or consent from at least one service authority; - identify and note areas of non-compliance and produce a range of alternative solutions for client consideration; - document final building permission, and; - lodge final building approval. Students will also be expected to demonstrate the following knowledge: - BCA classification and definitions for buildings included in classes 2 to 9; - construction methods and materials suitable for buildings in classes 2 to 9; - drawing symbols, notations, acronyms and construction terminology used in the National Construction Code (NCC), Australian standards, working drawings, and building design specifications; - legislative and local planning and building requirements governing the issuing of building approval permits in the jurisdictions relevant to each building specified in the performance evidence, and; - legislative roles and responsibilities of those issuing building permits in the relevant jurisdiction.

CPCCBS6010 Conduct and report on building surveying audits of residential buildings up to three storeys

Locations:Sunshine, Geelong Learning Links.

Prerequisites:Nil.

Description:This unit of competency specifies the outcomes required to audit residential class 1 and 10 buildings and structures against current requirements of the Building Code of Australia (BCA) and local planning policies. These class 1 and 10 buildings and structures are as defined in the BCA and up to three storeys and not more than 2000 square metres in floor area. The unit supports the work of private and municipal building surveyors providing advisory code-consulting services, who carry out building surveying audits and advise on building compliance. The unit supports the conduct of residential building surveying audits required as part of a sales process to inform planned works, including demolishing existing structures, or to inform planned upgrades to existing buildings. Licensing, legislative, regulatory or certification requirements apply to this unit in some States. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. The person must plan for, conduct and report on building surveying audits for four different projects involving the following class 1 and 10 buildings or structures as defined in the Building Code of Australia (BCA): - two types of class 1a buildings in different locations; - one class 1b building, and; - one class 10 building or structure: bushfire shelter, swimming pool or retaining wall. Each of the building surveying audits must include: - a documented plan outlining the schedule of the building surveying audit, its scope and limitations, and the compliance criteria to be audited; - evidence of research undertaken to identify the relevant compliance requirements of the building to be audited, including additional local planning policies that are to be included in the audit; - liaison with relevant specialist consultants to obtain expert advice and recommendations on aspects of the building systems and materials, construction materials or methods or

other relevant components of the building; - a written report on the completed building surveying audit specifying: - inclusions and exclusions of the building surveying audit conducted; - items of the building which were compliant or which met deemed-to-satisfy provisions of the BCA; - items of the building that did not meet compliance requirements; - findings and recommendations of specialist consultants, and; - strategies for achieving compliance. Students will also be expected to demonstrate the following knowledge: - audit methodology; - audit report inclusions; - BCA classification and definitions for class 1 and 10 buildings and structures; - construction methods and materials suitable for class 1 and 10 buildings and structures; - drawing symbols, notations, acronyms and construction terminology used in the National Construction Code (NCC), Australian standards, working drawings, building design specifications, and building permit documentation; - roles and responsibilities of specialist consultants, and; - processes for writing building surveying audit reports, including use of assumptions.

CPCCBS6011 Conduct and report on building surveying audits of commercial buildings up to three storeys

Locations:Sunshine, Geelong Learning Links.

Prerequisites:Nil.

Description:This unit of competency specifies the outcomes required to audit commercial buildings in classes 2 to 9, up to three storeys, as defined in the Building Code of Australia (BCA), against current requirements of the BCA and local planning policies. The unit supports the work of private and municipal building surveyors providing advisory code-consulting services, who carry out building surveying audits and advise on building compliance. The unit supports the conduct of commercial building surveying audits required as part of a sales process to inform planned works or upgrades to existing commercial buildings, where advice on compliance requirements related to the proposed change of use of a commercial building or as part of an insurance assessment is required. The audit is primarily concerned with the compliance implications of the building. Licensing, legislative, regulatory or certification requirements apply to this unit in some States. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. The person must plan for, conduct and report on building surveying audits for three different projects involving the following class buildings as defined in the Building Code of Australia (BCA), each building up to three storeys, where: - one project must incorporate classes 2, 5, 6 and 7a; - one project must incorporate classes 3 and 9c, and; - one project must incorporate classes 7b and 8. Each of the building surveying audits must include: - a documented plan outlining the schedule of the building surveying audit, its scope and limitations, and the compliance criteria to be audited; - evidence of research undertaken to identify the relevant compliance requirements of the building to be audited, including additional local planning policies that are to be included in the audit; - liaison with relevant specialist consultants to obtain expert advice and recommendations on aspects of the building systems and materials, construction materials or methods or other relevant components of the building; - a written report on the completed

building surveying audit specifying: - inclusions and exclusions of the building surveying audit conducted; - items of the building which were compliant or which met deemed-to-satisfy provisions of the BCA; - items of the building that did not meet compliance requirements; - findings and recommendations of specialist consultants, and; - strategies for achieving compliance. Students will also be expected to demonstrate the following knowledge: - audit methodology; - audit report inclusions; - BCA classification and definitions for buildings included in classes 2 to 9; - construction methods and materials suitable for buildings in classes 2 to 9; - drawing symbols, notations, acronyms and construction terminology used in the National Construction Code (NCC), Australian standards, working drawings, building design specifications and building permit documentation; - roles and responsibilities of specialist consultants, and; - processes for writing building surveying audit reports, including use of assumptions.

CPCCBS6012 Conduct and report on initial construction inspections of residential buildings up to three storeys

Locations:Sunshine, Geelong Learning Links.

Prerequisites:Nil.

Description:This unit of competency specifies the outcomes required to inspect for compliance the site preparation, foundations, footings and framing of class 1 and 10 buildings and structures, as defined in the Building Code of Australia (BCA) and up to three storeys and not more than 2000 square metres in floor area. The unit supports the work of private or municipal building surveyors or certifiers who conduct mandated inspections of class 1 and 10 buildings and structures at the following initial stages of construction: - site preparation, foundations and footings; - framing. It applies to planning and conducting inspections, reporting on issues of non-compliance, and preparing certificates of compliance according to legislative and regulatory requirements. The certificate of compliance for each stage must be completed and processed before the next stage of construction may commence. The building surveyor or certifier must be satisfied that remedial work required in cases of non-compliance is understood by the building contractor and completed within required timeframes. This involves developing and maintaining professional and cooperative relationships with building contractors throughout a highly regulated process. Licensing, legislative, regulatory or certification requirements apply to this unit in some States. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - foundations and footings for the following class 1 and 10 buildings or structures as defined in the Building Code of Australia (BCA): - two types of class 1a buildings in different climatic, geographic or planning zones; - one class 1b building; - one swimming pool or other class 10 structure, and; - framing and wet areas for: two types of class 1a buildings in different climatic, geographic or planning zones; two types of class 1b buildings in different climatic, geographic or planning zones. In doing the above, the person must: - identify and interpret relevant compliance requirements, including differences in requirements for: - types of building or structure; - particular geographic, climatic or planning zones; - interpret working drawings, specifications and building permit

conditions for each inspection; - identify and apply work health and safety (WHS) requirements for site visits; - develop and maintain professional and cooperative relationships with building contractors throughout a highly regulated process; - observe and document all non-compliant features of: site preparation, foundations and footings; framing; wet areas, and; - prepare and process compliance documentation according to scope of personal responsibilities and legislative and regulatory requirements. Students will also be expected to demonstrate the following knowledge: - BCA classification and definitions for class 1 and 10 buildings and structures; - legislative and regulatory requirements for inspecting class 1 and 10 buildings and structures at initial construction stages; - foundations and footings; - framing; - wet areas; - legislative and regulatory requirements for professional conduct in communications with building contractors in highly regulated building inspection and reporting processes; - principles and purpose of report in the context of conducting and reporting on initial construction inspections; - principles of negotiation and conflict resolution applicable to professional relationships in highly regulated building inspection and reporting processes; - drawing symbols, notations, acronyms and construction terminology used in the National Construction Code (NCC), Australian standards, working drawings, building design specifications, and building permit documentation; - construction methods and materials used in class 1 and 10 buildings and structures, and; - range of, and variations in, compliance requirements for class 1 and 10 buildings and structures in different climatic, geographic and planning zones.

CPCCBS6013 Conduct and report on initial construction inspections of commercial buildings up to three storeys

Locations:Sunshine, Geelong Learning Links.

Prerequisites:Nil.

Description:This unit of competency specifies the outcomes required to inspect for compliance the site preparation, foundations, footings and structural provisions of buildings included in classes 2 to 9, as defined in the Building Code of Australia (BCA), up to three storeys. The unit supports the work of private or municipal building surveyors or certifiers who conduct mandated inspections of commercial buildings up to three storeys at the initial stages of construction. It applies to planning and conducting inspections, reporting on issues of non-compliance, and preparing certificates of compliance according to legislative and regulatory requirements. The certificate of compliance for each stage must be completed and processed before the next stage of construction may commence. The building surveyor or certifier must be satisfied that remedial work required in cases of non-compliance is understood by the building contractor and completed within required timeframes. This involves developing and maintaining professional and cooperative relationships with building contractors throughout a highly regulated process. Licensing, legislative, regulatory or certification requirements apply to this unit in some States. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. The person must prepare for, conduct and

complete relevant documentation for inspections of 1) site preparation, foundations and footings, 2) structural provisions, and 3) wet areas for the following class buildings as defined in the Building Code of Australia (BCA): - one project incorporating classes 2, 5, 6 and 7a; - one project incorporating classes 3 and 9c, and; - one project incorporating classes 7b and 8. In doing the above, the person must: - interpret working drawings, specifications and building permit conditions for each inspection; - identify and interpret relevant compliance requirements; - inspect site preparation, foundations and footings and structural provisions for the projects outlined above; - observe and document all non-compliant features of site preparation, foundations and footings, structural provisions and wet areas; - discuss non-compliance with relevant contractors and negotiate remedial work required; - reschedule inspections as required; - prepare and process required documentation; - details of non-compliance and remedial work recommended; - contractor's failure to comply with recommended remedial work, if required; - missed inspection, if required, and; - certificate of compliance, as authorised. Students will also be expected to demonstrate the following knowledge: - BCA classification and definitions for buildings included in classes 2 to 9; - construction methods and materials suitable for buildings included in classes 2 to 9 at the following stages: site preparation; foundations and footings; structural provisions; wet areas; - drawing symbols, notations, acronyms and construction terminology used in the National Construction Code (NCC), Australian standards, working drawings, building design specifications, and building permit documentation; - principles and purpose of report in the context of conducting and reporting on initial construction inspections; - range of, and variations in, compliance requirements for buildings included in classes 2 to 9 in different climatic, geographic and planning zones, including: building control legislation and regulations; NCC; - Australian standards referenced by building control legislation and regulations and the NCC; - state, territory or local authority development policies, and; - legislative and regulatory requirements for critical stage inspections relating to buildings included in classes 2 to 9 at the following stages of construction: bounding construction of class 2 and 3 buildings; site preparation; foundations and footings; structural provisions.

CPCCBS6014 Conduct and report on advanced and final inspections of residential buildings up to three storeys

Locations:Sunshine, Geelong Learning Links.

Prerequisites:Nil.

Description:This unit of competency specifies the outcomes required to conduct advanced and final inspections that occur after constructing the structural elements of class 1 and 10 buildings and structures. These class 1 and 10 buildings and structures are as defined in the Building Code of Australia (BCA) and are up to three storeys and not more than 2000 square metres in floor area. The unit supports the work of private or municipal building surveyors or certifiers who conduct mandated inspections of class 1 and 10 buildings and structures at the advanced and final stages of construction. Inspections include those specified in the building approval documentation for the project, including the final inspection required prior to the issuing of occupancy permission. It applies to planning and conducting inspections, reporting on issues of non-compliance, preparing certificates of compliance, and issuing occupancy permissions according to legislative and regulatory requirements. The building surveyor or certifier must be satisfied that remedial work required in cases of non-compliance is understood by the building contractor and is completed within required timeframes. This involves developing and maintaining professional and cooperative relationships with building contractors throughout a highly regulated process. Licensing, legislative, regulatory or certification requirements apply to this unit in some States. Relevant state and territory regulatory authorities should be

consulted to confirm those requirements.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. The person must conduct advanced and final inspections of the following class 1 and 10 buildings or structures as defined in the Building Code of Australia (BCA): - two types of class 1a buildings in different climatic, geographic or planning zones; - one class 1b building, and; - one class 10 building or structure: bushfire shelter, swimming pool or retaining wall. In doing the above, the person must: - identify and interpret relevant compliance requirements; - types of building or structure; - particular geographic, climatic or planning zones; - interpret working drawings, specifications and building permit conditions for each inspection; - identify and apply WHS requirements for site visits; - develop and maintain professional and cooperative relationships with building contractors throughout a highly regulated process; - observe and document non-compliant features of: roof and wall cladding; glazing; fire safety; health and amenity; safe movement and access; energy efficiency, and; - prepare and process compliance documentation according to scope of personal responsibilities and legislative and regulatory requirements. Students will also be expected to demonstrate the following knowledge: - BCA classification and definitions for class 1 and 10 buildings and structures; - legislative and regulatory requirements for inspecting class 1 and 10 buildings and structures at the advanced and final stages of construction; - legislative and regulatory requirements for professional conduct in communications with building contractors in highly regulated building inspection and reporting processes; - principles of negotiation and conflict resolution applicable to professional relationships in highly regulated building inspection and reporting processes; - drawing symbols, notations, acronyms and construction terminology used in the National Construction Code (NCC), Australian standards, working drawings, building design specifications, and building permit documentation; - construction methods and materials used in class 1 and 10 buildings and structures, and; - range of, and variations in, compliance requirements for class 1 and 10 buildings and structures in different climatic, geographic and planning zones.

CPCBS6015 Conduct and report on advanced and final inspections of commercial buildings up to three storeys

Locations:Sunshine, Geelong Learning Links.

Prerequisites:Nil.

Description:This unit of competency specifies the outcomes required to conduct inspections that occur after constructing the structural elements of buildings included in classes 2 to 9, as defined in the Building Code of Australia (BCA), limited to buildings up to three storeys. The unit supports the work of private or municipal building surveyors or certifiers who conduct mandated inspections of buildings included in classes 2 to 9 at the advanced and final stages of construction. Inspections include those specified in the building approval documentation for the project, including the final inspection required prior to the issuing of occupancy permission. It applies to planning and conducting inspections, reporting on issues of non-compliance, preparing certificates of compliance, and issuing occupancy

permissions according to legislative and regulatory requirements. The building surveyor or certifier must be satisfied that remedial work required in cases of non-compliance is understood by the building contractor and is completed within required timeframes. This involves developing and maintaining professional and cooperative relationships with building contractors throughout a highly regulated process.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. The person must prepare for, conduct and complete relevant documentation for inspections for the following three different projects at the later stages of construction, including those specified in the building approval documentation for the project and the final inspection required prior to the issuing of occupancy permission. The projects must involve the following class buildings as defined in the Building Code of Australia (BCA), where: - one project must incorporate classes 2, 5, 6 and 7a; - one project must incorporate classes 3 and 9c, and; - one project must incorporate classes 7b and 8. In doing the above, the person must: - identify and interpret relevant compliance requirements; - conduct at least two interim inspections and three final inspections for each of the projects outlined above; - observe and document non-compliant features of site preparation, foundations and footings, and structural elements; - discuss non-compliance with relevant contractors and negotiate remedial work required; - reschedule inspections as required; - prepare and process required documentation; - details of non-compliance and remedial work recommended; - contractor's failure to comply with recommended remedial work, if required; - missed inspection, if required, and; - certificate of compliance, as authorised. Students will also be expected to demonstrate the following knowledge: - BCA classification and definitions for buildings included in classes 2 to 9; - construction methods and materials suitable for buildings included in classes 2 to 9; - drawing symbols, notations, acronyms and construction terminology used in the National Construction Code (NCC), Australian standards, working drawings, building design specifications, and building permit documentation; - range of, and variations in, compliance requirements for buildings included in classes 2 to 9 in different climatic, geographic and planning zones, including: building control legislation and regulations; NCC; - Australian standards referenced by building control legislation and regulations and the NCC; - state, territory or local authority development policies, and; - legislative and regulatory requirements for critical stage inspections relating to buildings included in classes 2 to 9.

CPCBS6016 Assess and advise on performance-based solutions for buildings up to three storeys

Locations:Sunshine, Geelong Learning Links.

Prerequisites:Nil.

Description:This unit of competency specifies the outcomes required to advise on the application of National Construction Code (NCC) performance requirements for performance-based solutions for buildings up to three storeys, and to apply approved

assessment methods to determine whether a proposed solution is compliant. The unit applies to assessing architectural drawings and specifications for performance-based solutions and analysing them in relation to the relevant sections of the Building Code of Australia (BCA) and the Plumbing Code of Australia (PCA). The unit supports the work of building surveyors who: - provide advice to architects and building designers on compliance requirements and options for performance-based solutions, or - act in the statutory role with responsibility for assessing the compliance of performance-based solutions and certifying those that are compliant. Under legislation the building surveyor is responsible for ensuring that there is no conflict of interest between the two roles. The building surveyor cannot advise on, and then certify, the same performance-based solution. Licensing, legislative, regulatory or certification requirements apply to this unit in some States. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - one performance-based fire safety solution, and; - two performance-based solutions for structural safety, health, amenity and sustainability. In doing the above, the person must: - determine service levels required by the client or clarify assessment processes with the applicant; - determine the performance requirements applicable to the solutions; - analyse performance-based solutions against performance requirements; - advise on compliance of performance-based solutions, including optional solutions; - advise clients on the documentation required to verify solutions, and; - assess performance-based solutions and certify those that are compliant. Students will also be expected to demonstrate the following knowledge: - construction methods and materials applicable to performance-based solutions; - drawing symbols, notations, acronyms and construction terminology used in the National Construction Code (NCC), Australian standards, working drawings, building design specifications, and building permit documentation; - international standards and guidelines relevant to performance-based solutions; - performance requirements for performance-based solutions specified in the NCC; - principles of fire safety engineering: - International Fire Engineering Guidelines, Part 1; - characteristics of building materials in relation to fire; - fire-modelling; - fire science: - fire behaviour and dynamics; - impact of fire on structures and materials; - products of combustion; - fire control strategies; - fire retardants; - fire detection technologies; - fire suppression technologies; - fire containment; - human response to fire; - interconnection of fire systems, including cause and effect matrix; - interaction with other services; - project management strategies that ensure thorough and timely advice is delivered according to service level agreement, and; - regulatory intent of performance-based solutions.

CPCBS8004 Advise on compliance of building design documentation

Locations:Sunshine, Geelong Learning Links.

Prerequisites:Nil.

Description:This unit of competency specifies the outcomes required by senior building surveyors to review building design documentation during the design process for all Building Code of Australia (BCA) defined classes and types of buildings, including all Type A buildings in classes 2, 3, 5, 6, 7, 8 and 9. The unit includes the preparation of planning and building approval applications, and providing advice on

compliance with the requirements of building and planning legislation, regulations, codes and standards that apply to the nature and location of each project. The unit supports the work of private building surveyors providing advisory code-consulting services to building and construction professionals involved in developing building design documentation up to the building approval application stage. The building surveyor may provide advice concurrently on a range of building design projects in different locations. Building surveyors must operate within the regulatory constraints that govern the relationship between their advisory and statutory roles and ensure that no conflict of interest arises. Licensing, legislative, regulatory or certification requirements apply to this unit in some States. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. The person must analyse complete sets of building design documentation for two planning and two building approval applications relating to four different classes of buildings, including at least one Type A building as defined in the Building Code of Australia (BCA). In doing the above, the person must: - determine and confirm service level agreements with clients; - manage staff and liaise with specialist experts to ensure timely provision of advice with terms of service level agreement; - determine compliance requirements; - advise clients of the documentation required for planning and building permit applications for different classes and types of buildings; regulatory jurisdictions; climatic and geographic conditions at specific project locations; - provide advice on cost-effective and efficient design alternatives that meet compliance requirements; - determine the limits of personal and in-house expertise, and assess authenticity of specialist experts and their expertise and engage their services to provide specific types of advice outside the scope of the organisation; - provide written advice on the compliance of all aspects of the designs and documentation with the requirements of building and planning legislation; - invite questions from clients regarding compliance, and; - provide responses to six different requests from clients for specific information regarding compliance issues. Students will also be expected to demonstrate the following knowledge: - architectural drawing conventions and symbols and notations; - building surveyors' duty of care and code of conduct requirements; - BCA definitions of classes and types of buildings; - compliance requirements of building control legislation and regulations; National Construction Code (NCC); Australian standards referenced by building control legislation and regulations and the NCC; state, territory or local authority planning policies; - construction methods and materials suitable for different classifications of buildings; - regulatory constraints that govern the relationship between the advisory and statutory roles of building surveyors, and; - project management strategies that ensure thorough and timely advice is delivered according to service level agreement.

CPCBS8009 Lead a building surveying team

Locations:Sunshine, Geelong Learning Links.

Prerequisites:Nil.

Description:This unit of competency specifies the outcomes required by senior building surveyors to lead a team of building surveyors in the performance of a range

of advisory and statutory responsibilities. The unit supports taking steps to ensure adequate resources are available to complete specified work, developing and implementing operational and performance objectives, providing strategies that assist staff to carry out their duties professionally and ethically, and developing a culture that services clients in a regulated environment. The unit supports the work of senior private and municipal building surveyors who oversee and manage the performance of others, whilst ensuring the work of the team complies with regulatory constraints. Licensing, legislative, regulatory or certification requirements apply to this unit in some States. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - identifying the staff resourcing needs for three building surveying projects of varying complexity: - range of skills and expertise required to complete the projects; - approximate number of staff required to complete the projects; - report that identifies and explains two strategies that could be employed to address any identified gaps in skill and knowledge requirements and the expected timeframe to implement one preferred strategy in order to meet staffing requirements; - developing the following professional standards and related policies and processes that address building surveying practice requirements and are consistent with relevant legislative and regulatory requirements set out in building control legislation: - privacy and confidentiality policy and procedure for managing project-related documentation; - minimum service standards for assessing and issuing planning or building approval permits, as appropriate to the scope of work undertaken by the building surveying team; - complaints-handling procedure for receiving, investigating and responding to complaints; - code of conduct that covers the ethical and professional standards to be demonstrated by the team of building surveyors, and; - participating in the implementation of performance reviews for at least three building surveyors with a mix of licensing authorities, including: establishing and implementing a methodology for monitoring and recording feedback on staff performance; - formulating individual development plans that respond to the professional development needs of the staff and which outline: - a method for identifying their skill and knowledge needs; - a range of measures that may be used to redress skill and knowledge gaps, and; - a plan for monitoring the effectiveness of the identified performance improvement measures over an agreed timeframe. Students will also be expected to demonstrate the following knowledge: - building control legislation, codes and regulations relevant to the scope of work undertaken by the building surveying practice or team; - leadership styles and practices appropriate to leading a team of building surveyors; - methods for providing feedback to individuals and managing team performance; - methods used to identify and address skill and knowledge gaps across individuals and teams; - policy formulation required for the effective operation of a team of building surveyors; - methods of performance review practices applicable to leading a team of building surveyors, and; - communication techniques that facilitate the provision of evidence-based feedback to individuals in a professional services context.

CPCCCA2002B Use carpentry tools and equipment

Locations:Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites:CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description:This unit of competency specifies the outcomes required to safely select and use carpentry tools and equipment. It includes hand tools, power tools, pneumatic tools, plant and equipment.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; plans, specifications and drawings; - report faults; use language and concepts appropriate to cultural differences; use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - planning and organising skills to prepare for work tasks; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - carpentry materials; - carpentry tool use techniques; - construction terminology; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - processes for the calculation of material requirements; - quality requirements of carpentry tools and equipment; - relevant Acts, regulations and codes of practice; - tools and equipment safety manuals and instructions; - types, characteristics, uses and limitations of plant, tools and equipment, and; - workplace and equipment safety requirements.

CPCCCA2003A Erect and dismantle formwork for footings and slabs on ground

Locations:Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites:CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description:This unit of competency specifies the outcomes required to erect and dismantle formwork to footings and slabs on ground, to establish levels and contain finished concrete. It includes forming basic slabs and forming rebates to slabs on ground and steps to strip footings.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to:

determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; plans, specifications and drawings; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - construction terminology; - formwork materials; - formwork techniques; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - plant, tools and equipment types, characteristics, uses and limitation; - processes for setting out and measuring; - processes for calculating material requirements; - quality requirements for formwork; - requirements of application and requirements for line, level and plumb in construction projects; - termite barriers, and; - workplace and equipment safety requirements.

CPCCCA2011A Handle carpentry materials

Locations: Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: Nil.

Description: This unit of competency specifies the outcomes required to safely manually handle, store and apply environmental management principles associated with carpentry materials and components. It includes preparing material for mechanical handling.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; plans, specifications and drawings; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - asbestos characteristics and reporting requirements; - carpentry material handling techniques; - construction terminology; - hazardous materials found in construction work sites; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - material sizes; - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - processes for the calculation of material requirements; - quality requirements and types of carpentry materials; -

types, characteristics, uses and limitations of tools and equipment, and; - workplace and equipment safety requirements.

CPCCCA3001A Carry out general demolition of minor building structures

Locations: Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to carry out general demolition work of minor building structures to facilitate alterations, extensions and additions to a building. It includes work being completed to a work schedule, plans and specifications.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; plans, specifications and drawings; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - construction terminology; - demolition and building materials; - demolition operations and techniques; - framing and roofing; - hazardous substances, including lead, fibreglass and asbestos; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - plant, tools and equipment types, characteristics, uses and limitation; - processes for the calculation of material removal; - safe use of scaffolding, and; - workplace and equipment safety requirements.

CPCCCA3002A Carry out setting out

Locations: Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to identify site boundaries and survey indicators, and establishing, measuring and setting up profiled set outs for buildings and structural components of building work.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of

competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; plans, specifications and drawings; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - application and requirements for line, level and plumb in construction projects; - basic construction processes; - basic mathematical techniques associated with setting out; - construction plan, symbols and construction terminology; - construction terminology; - job safety analysis (JSA) and safe work method statements; - processes for interpreting engineering drawings and sketches; - processes for setting out; - project quality requirements; - setting out techniques; - site and equipment safety (OHS) requirements; - site isolation and traffic control responsibilities and authorities, and; - types, characteristics, technical capabilities and limitations of setting out devices.

CPCCA3003A Install flooring systems

Locations: Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: CPCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to plan, prepare, set out and install timber flooring systems to support imposed loads. It includes application in brick veneer, full masonry and timber frame construction.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; plans, specifications and drawings; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - construction terminology; - damp proof systems; - floor construction techniques; - flooring system installation techniques; - flooring system materials, including fire control and separation materials required by the Building Code of Australia (BCA) and other legislation; - flooring system types, characteristics, materials, uses and limitations; - imposed loads;

insulation products; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - plant, tools and equipment types, characteristics, uses and limitation; - processes for the calculation of material requirements; - quality requirements; - regulations applicable to floor framing and flooring; - setting out and levelling techniques; - termite barriers, and; - workplace and equipment safety requirements.

CPCCA3004A Construct wall frames

Locations: Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: CPCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to plan, prepare, set out, construct and erect load bearing and non-load bearing wall frames for the different types of loadings determined by the roof top and bracing configuration. It includes set out, cutting and fabrication of both timber and metal wall frames, and the erection, connection and bracing of wall frames to specifications.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; plans, specifications and drawings; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - construction terminology; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - plant, tools and equipment types, characteristics, uses and limitation; - processes for setting out and measuring; - processes for calculating material requirements; - quality requirements for wall frames; - timber types, structural properties and uses including engineered timber products; - wall frame construction techniques; - wall framing materials, including fire control and separation materials required by the Building Code of Australia (BCA) and other legislation, and; - workplace and equipment safety requirements.

CPCCA3005B Construct ceiling frames

Locations: Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: CPCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to plan, prepare, set out, construct and erect ceiling frames to accommodate ceiling joists, hanging beams, strutting beams and composite beams. It includes selection of members and

setting out of the ceiling frame in conjunction with the roof members.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: documentation from a variety of sources and plans, specifications and drawings; - report faults; - use language and concepts appropriate to cultural differences; use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - ceiling frame construction techniques; - ceiling framing materials, including steel and their rated fire resistance; - wall framing and roof construction, ceiling lining materials, including fire control and separation required by the National Construction Code (NCC) and other legislation; - construction terminology; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - plant, tools and equipment types, characteristics, uses and limitation; - processes for the calculation of material requirements; - quality requirements for ceiling frames; - roofing set out; - timber types, structural properties and uses, including engineered timber products, and; - workplace and equipment safety requirements.

CPCCCA3006B Erect roof trusses

Locations:Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites:CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description:This unit of competency specifies the outcomes required to select, set out, erect and brace roof trusses to accommodate roof coverings for waterproofing purposes. It includes gable, hip and valley, and hip roofing types.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: documentation from a variety of sources, and plans, specifications and drawings; - report faults; - use language and concepts appropriate to cultural differences; use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; -

organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - construction terminology; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - plant, tools and equipment types, characteristics, uses and limitation; - processes for the calculation of material requirements; - quality requirements for roof trusses; - roof bevels; - roof calculations for lengths, quantities and pitch; - roof load transfer; - roof shape and geometry; - roof truss erection and construction technique; - roof truss materials and installation, including fire control and separation materials required by the National Construction Code (NCC) and other legislation; - roof types and truss components; - roofing regulations; - techniques for lifting and positioning of trusses; - temporary and permanent bracing; - timber types, structural properties and uses, including engineered timber products; - truss set out, and; - workplace and equipment safety requirements.

CPCCCA3007C Construct pitched roofs

Locations:Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites:CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description:This unit of competency specifies the outcomes required to select, set out, construct and erect pitched roofs to accommodate roof coverings for waterproofing purposes. It includes scotch valley gable, hip and valley, broken hip and valley and combinations thereof.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; - follow instructions; - read and interpret: documentation from a variety of sources; plans, specifications and drawings; - report faults; - use language and concepts appropriate to cultural differences; use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - ceiling framing; - construction terminology; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - pitched roof construction techniques; - plans, specifications and drawings; - plant, tools and equipment types, characteristics, uses and limitation; - processes for the calculation of material requirements; - quality requirements for pitched roofs; - roof calculations for lengths, quantities and pitch; - roof construction

and ceiling lining materials, including fire control and separation material required by the Building Code of Australia (BCA) and other legislation; - roof geometry; - roof set out; - roof types; - roofing materials; - roofing regulations; - timber types, structural properties and uses including engineered timber products, and; - workplace and equipment safety requirements.

CPCCCA3008B Construct eaves

Locations: Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to prepare, set out and construct eaves, including the cutting and fixing of fascias and barge to provide a finish between the wall and the roof. It includes boxed eaves and the finish to gable ends.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; plans, specifications and drawings; - report faults; - use language and concepts appropriate to cultural differences; use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - construction terminology; - eaves construction techniques, including fire control and separation required by the National Construction Code (NCC) and other legislation; - eaves materials, including their rated fire resistance; - job safety analysis (JSA) and safe work method statements; - levelling techniques; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - plant, tools and equipment types, characteristics, uses and limitation; - processes for the calculation of material requirements; - quality requirements for eaves construction; - roof geometry and construction; - safe use of scaffolding; - timber types, structural properties and uses, including engineered timber products; - wall framing construction, and; - workplace and equipment safety requirements.

CPCCCA3009B Construct advanced roofs

Locations: Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry CPCCCA3007C - Construct pitched roofs

Description: This unit of competency specifies the outcomes required to plan, prepare, set out and construct pitched roofs on irregular plan building shapes which may have skewed, splayed or hexagonal ends. It includes such roofs that include dormer windows and may be of gable, hip, hip and valley, or combinations of these that are applied to different types and styles of buildings.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; plans, specifications and drawings; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities; - use a range of mobile technology, such as two-way radio and mobile phones, and; - voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - ceiling framing; - construction terminology; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - pitched roof construction techniques, including fire control and separation required by the Building Code of Australia (BCA) and other legislation; - plans, specifications and drawings; - plant, tools and equipment types, characteristics, uses and limitation; - processes for the calculation of material requirements; - quality requirements for advanced roofs; - roof calculations for lengths, quantities and pitch; - roof geometry; - roof set out; - roof types and design; - roofing materials, including their rated fire resistance; - roofing regulations; - timber types, structural properties and uses, including engineered timber products, and; - workplace and equipment safety requirements.

CPCCCA3010A Install and replace windows and doors

Locations: Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to plan, prepare, set out and install window and door units, and to replace window and door units to different types and styles of buildings for access, security, weather proofing and replacement of defective windows and doors. It includes timber and metal window and door units.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; plans, specifications and drawings; - report faults; - use language and concepts appropriate

to cultural differences; - use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - construction terminology; - flashing requirements and installation techniques; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - plant, tools and equipment types, characteristics, uses and limitation; - processes for setting out; - processes for the calculation of material requirements; - quality requirements for windows and doors; - window and door installation and replacement techniques; - window and door materials, and; - workplace and equipment safety requirements.

CPCCA301 1A Refurbish timber sashes to window frames

Locations: Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: CPCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to refurbish timber sashes to window frames to rectify operation of external windows for ongoing use. It includes timber casement windows and double hung windows, and the refitting of timber sashes.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; plans, specifications and drawings; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - construction terminology; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - processes for the calculation of material requirements; - quality requirements for timber sashes and window frames; - timber sash refurbishment techniques; - tools and equipment types, characteristics, uses and limitation; - window frame and sash construction; - window materials; - window measurements and calculations; - window set outs, and; - workplace and equipment safety requirements.

CPCCA301 2A Frame and fit wet area fixtures

Locations: Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: CPCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to install supporting framework for fixtures and flashings associated with the wet area construction for a bath, shower base and sink or basin unit, and preparation for wet area linings. It includes bathroom, laundry, shower, toilet and en suite wet areas.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; plans, specifications and drawings; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - capillary action; - construction terminology; - electrolysis and corrosion of dissimilar metals; - framing and fitting wet area fixture techniques; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - plant, tools and equipment types, characteristics, uses and limitation; - processes for setting out and measuring; - processes for the calculation of material requirements; - wall framing; - waterproofing and flashing; - wet area preparation materials; - workplace and equipment safety requirements, and; - job safety analysis (JSA) and safe work method statements.

CPCCA301 3A Install lining, panelling and moulding

Locations: Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: CPCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to prepare, set out and install lining and panelling to either masonry or timber/metal framed walls. It includes the installation of mouldings to provide decorative finishes.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to:

determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; plans, specifications and drawings; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - commonly used timber profiles; - construction terminology; - geometry for raking mouldings, stairs and roofing; - job safety analysis (JSA) and safe work method statements; - lining, panelling and moulding materials; - lining, panelling and moulding techniques; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - plant, tools and equipment types, characteristics, uses and limitation; - processes for the calculation of material requirements; - quality requirements of lining, panelling and moulding, and; - workplace and equipment safety requirements.

CPCCA3014A Construct bulkheads

Locations: Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: CPCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to construct bulkheads to conceal services or for decorative purposes. It includes straight, curved and geometric shaped bulkheads, generally constructed in situ and includes prefabricated fitments.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; plans, specifications and drawings; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - bulkhead construction techniques; - bulkhead materials; - construction terminology; - curved geometry; - framing techniques; - job safety analysis (JSA) and safe work method statements; - load and anchor capacities for bulkheads; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - plant, tools and equipment types, characteristics, uses

and limitation; - processes for setting out and measuring; - processes for the calculation of material requirements; - quality requirements for bulkheads, and; - workplace and equipment safety requirements.

CPCCA3015A Assemble partitions

Locations: Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: CPCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to set out and assemble partitions for the purpose of dividing areas into useable spaces. It includes prefabricated and demountable partitions constructed of timber or metal.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; plans, specifications and drawings; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - application and requirements for line, level and plumb in construction projects; - construction terminology; - fixing and fasteners; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - partition assembly techniques; - partitioning materials; - plans, specifications and drawings; - processes for setting out; - processes for the calculation of material requirements; - quality requirements of partitions; - types, characteristics, uses and limitations of plant, tools and equipment, and; - workplace and equipment safety requirements.

CPCCA3016A Construct timber external stairs

Locations: Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: CPCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to construct and install timber external stairs, that may involve one or more flights, to provide access into a structure. It includes timber treads and stringers.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of

competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; plans, specifications and drawings; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - application and requirements for line, level and plumb in construction projects; - construction terminology; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - plant, tools and equipment types, characteristics, uses and limitation; - processes for setting out and measuring; - processes for calculating material requirements; - quality requirements of timber stairs; - stair building materials; - stair construction techniques; - stair types; - stair regulations, and; - workplace and equipment safety requirements.

CPCCA3017B Install exterior cladding

Locations: Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to install material finishes applied to an external framed wall surface for the purpose of weatherproofing and securing the building. It includes sheet material, weatherboarding of timber, plastic, metal and fibre cement sheet.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; plans, specifications and drawings; - report faults; - use language and concepts appropriate to cultural differences; use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - construction terminology; - exterior cladding materials and techniques; - flashing and sarking; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; -

plans, specifications and drawings; - plant, tools and equipment types, characteristics, uses and limitation; - processes for the calculation of material requirements; - quality requirements of exterior cladding; - safe use of scaffolding; - wall frame construction, and; - workplace and equipment safety requirements.

CPCCA3018A Construct, erect and dismantle formwork for stairs and ramps

Locations: Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to construct, erect and dismantle formwork for stairs and ramps to form up the concrete that may involve one or more flights in order to provide access between floors and/or landings. It includes timber, metal or prefabricated formwork.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; plans, specifications and drawings; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - application and requirements for line, level and plumb in construction projects; - construction terminology; - formwork materials and techniques; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - plant, tools and equipment types, characteristics, uses and limitation; - processes for setting out and measuring; - processes for calculating material requirements; - quality requirements for formwork for stairs and ramps; - regulations on stair construction for safe use, including disability access; - stair and ramp construction, and; - workplace and equipment safety requirements.

CPCCA3019A Erect and dismantle formwork to suspended slabs, columns, beams and walls

Locations: Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to erect and dismantle formwork to suspended slabs, columns, beams and walls to contain concrete in above ground construction. It includes timber, metal or prefabricated formwork of modular or in situ design.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic

and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; plans, specifications and drawings; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - application and requirements for line, level and plumb in construction projects; - concrete properties; - construction terminology; - formwork materials and techniques; - hydraulic pressures applied to formwork; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - plant, tools and equipment types, characteristics, uses and limitation; - processes for setting out and measuring; - processes for calculating material requirements; - purpose, application and properties of commonly used release agents; - quality requirements of formwork to suspended slabs, columns, beams and walls, and; - workplace and equipment safety requirements.

CPCCA3020A Erect and dismantle jump form formwork

Locations: Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: CPCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to erect and dismantle jump form formwork to form wall structures where the formwork process is continuous. It includes curved or straight jump form formwork.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; plans, specifications and drawings; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range

of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - common formwork faults, problems and suitable rectifications; - concrete characteristics and properties in formwork; - construction terminology; - electrical/hydraulic jacking systems; - formwork materials and techniques; - hydraulic pressures applied to formwork; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - plant, tools and equipment types, characteristics, uses and limitation; - processes for the calculation of material requirements; - quality requirements for jump form formwork, and; - workplace and equipment safety requirements. .

CPCCA3021A Erect and dismantle slip form formwork

Locations: Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: CPCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to erect and dismantle slip form formwork to form wall structures where the formwork process is continuous. It includes curved or straight slip form formwork.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; plans, specifications and drawings; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - common formwork faults, problems and suitable rectifications; - concrete properties; - construction terminology; - electrical/hydraulic jacking systems; - formwork materials and techniques; - hydraulic pressures applied to formwork; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - plant, tools and equipment types, characteristics, uses and limitation; - processes for the calculation of material requirements; - quality requirements for slip form formwork, and; - workplace and equipment safety requirements.

CPCCA3022A Install curtain walling

Locations: Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: CPCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to fit and fix

curtain walling facades to multi-storey structures to provide external cladding of structural steel or reinforced concrete. It includes fabricated frameworks with metal cladding, fabricated framework with glass panels, pre-cast concrete panels, and manufactured and natural stone products in or on the structure.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; plans, specifications and drawings; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - construction terminology; - curtain walling materials, systems and techniques; - fall arrest system; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - processes for the calculation of material requirements; - purpose and safe use of swing scaffolding; - quality requirements for curtain walling; - slings, clutches and other applicable lifting equipment; - tools and equipment types, characteristics, uses and limitation, and; - workplace and equipment safety requirements.

CPCCA3023A Carry out levelling operations

Locations:Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites:CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description:This unit of competency specifies the outcomes required to conduct levelling procedures using the rise and fall method and the height of instrument method for the purpose of establishing correct and accurate set out of buildings, their components and preparation. It includes the set up, testing and use of levelling devices and undertaking closed traverses using a range of levelling equipment.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; plans, specifications and drawings; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - construction terminology; - curtain walling materials, systems and techniques; - fall arrest system; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - processes for the calculation of material requirements; - purpose and safe use of swing scaffolding; - quality requirements for curtain walling; - slings, clutches and other applicable lifting equipment; - tools and equipment types, characteristics, uses and limitation, and; - workplace and equipment safety requirements.

specifications and drawings; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - application and requirements for line, level and plumb in construction projects; - basic construction and levelling processes; - construction plan, symbols and construction terminology; - construction terminology; - job safety analysis (JSA) and safe work method statements; - levelling device types, characteristics, technical capabilities and limitations; - levelling techniques commonly used in construction work; - processes for interpreting engineering drawings and sketches; - processes for setting out; - project quality requirements; - site and equipment safety (OHS) requirements, and; - site isolation and traffic control responsibilities and authorities.

CPCCCM1012A Work effectively and sustainably in the construction industry

Locations:Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites:Nil.

Description:This unit of competency specifies the outcomes required to prepare for and sustain effective work within the construction industry. It covers the identification and clarification of the construction industry work context, scope and employment conditions, responsibility required to be accepted by the individual, working in a team, individual career path improvement activities and sustainable work practices and techniques. This unit of competency supports the attainment of basic understanding of the structure, culture and role expectations of workers within the construction industry and sustainable use of materials and resources.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills; - identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - technological skills. Students will also be expected to demonstrate the following knowledge: - basic understanding of sustainability on a construction work site; - common construction industry terminology and interpersonal communication requirements; - construction industry quality requirements; - construction industry size, scope of work and national economic importance; - environmental and resource hazards/risks, including compliance with relevant legislation associated with the environment, job specifications and procedures; - federal, state, and territory environmental or sustainability legislation, regulations and codes of practice relevant to this sector and applicable to own work role, e.g. Building Code of Australia (BCA); - job safety analysis (JSA) and safe work method statements; - relevant environmental and resource efficiency systems and practices; - relevant industrial awards and enterprise agreements; - relevant legislation,

regulations and workplace requirements relating to provisions covering discrimination and equal employment opportunity; - site meeting procedures, and; - typical site/team work structure, methods and communication processes.

CPCCCM1013A Plan and organise work

Locations: Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: Nil.

Description: This unit of competency specifies the outcomes required to plan and organise individual and group work activities on a construction site. The unit includes identifying task requirements, planning steps and organising work.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine or confirm and clarify task requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; - plan steps and organise work activities with others; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - written skills to complete workplace documentation; - evaluating own actions and make judgements about performance and necessary improvements; - identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials; - interpret information relevant to the work activity including plans, specifications and drawings and documentation from a variety of sources; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions; - using time management techniques to organise and prioritise work. Students will also be expected to demonstrate the following knowledge: - work activity that needs to be planned and organised; - work safety, environmental and quality requirements; - workplace personnel that are to be involved in planning and organising tasks, and; - workplace reporting requirements.

CPCCCM1014A Conduct workplace communication

Locations: Industry, Footscray Nicholson, St Albans, Werribee, City Flinders, Sunshine, Learning Links Geelong.

Prerequisites: Nil.

Description: This unit of competency specifies the outcomes required to communicate effectively with other workers in a construction workplace environment. It includes gathering, conveying and receiving information through verbal and written forms of communication. This unit of competency supports achievement of communication skills carried out as an integral part of routine work.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be

expected to demonstrate the following required skills: - communication skills to communicate with others; - identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - participating in meetings; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - technological skills. Students will also be expected to demonstrate the following knowledge: - bulletins; - checklists; - communication devices; - company procedures; - construction terminology; - emergency procedures; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS) and materials handling methods; - memos; - OHS requirements; - project quality requirements; - signage; - work instructions, and; - workplace policies.

CPCCCM1015A Carry out measurements and calculations

Locations: Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: Nil.

Description: This unit of competency specifies the outcomes required to carry out measurements and perform simple calculations to determine task and material requirements for a job in a construction work environment. This unit of competency supports achievement of skills to take measurements and use these to calculate material quantities and calculations for related tasks commonly used and applied in construction work.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills; - identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials; - numeracy skills to apply measurements, calculations and geometry; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - technological skills. Students will also be expected to demonstrate the following knowledge: - basic calculators; - communication devices; - company procedures; - construction terminology; - job safety analysis (JSA) and safe work method statements; - measuring, calculating, geometry and determination of quantities; - processes for care of measuring equipment; - project quality requirements; - site and equipment safety (OHS) requirements, and; - tolerances.

CPCCCM2001A Read and interpret plans and specifications

Locations: Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: Nil.

Description: This unit of competency specifies the outcomes required to read and interpret plans and specifications relevant to construction operations. It includes the identification of types of plans and drawings and their functions, the recognition of commonly used symbols and abbreviations, the identification of key features and specifications on a site plan, the comprehension of written job specifications and the recognition of document status and amendment detail.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic

and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: communication skills to: enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; - read and interpret: documentation from a variety of sources; drawings and specifications; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials; - numeracy skills to apply measurements and make calculations, including heights, areas, volumes and grades; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities; - use a range of mobile technology, such as two-way radio and mobile phones, and; - voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - basic calculations of heights, areas, volumes and grades; - commonly used construction symbols and abbreviations; - construction terminology; - drawing conventions; - features of plans and elevations, including direction, scale, key, contours, symbols and abbreviations; - job safety analysis (JSA) and safe work method statements; - key features of formal job specifications; - processes for application of scales in plan preparation and interpretation; - project quality requirements; - site and equipment safety (OHS) requirements, and; - techniques for orienting/confirming the orientation of a plan.

CPCCCM2002A Carry out excavation

Locations: Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to undertake hand excavation tasks and excavations requiring the assistance of plant machinery to form excavations for footings, and the provision of services. It includes excavation to new and existing sites, and new services or the diversion of existing services.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: assist machine operator; determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; drawings and specifications; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others

to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - commonly used in-ground services and identification by relevant markers; - construction terminology; - excavation materials; - excavation techniques; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - processes for the calculation of material requirements; - quality requirements; - regulatory requirements for excavation support for safe access; - safe work with common plant used on construction industry sites; - types, characteristics, uses and limitations of tools and equipment, and; - workplace and equipment safety requirements.

CPCCCM2006 Apply basic levelling procedures

Locations: Industry, Footscray Nicholson, Werribee, Sunshine.

Prerequisites: Nil.

Description: This unit of competency specifies the outcomes required to carry out levelling in a single plane for the purpose of establishing correct and accurate set-out of building components. It includes the set-up, testing and use of levelling devices, and establishing and transferring heights using a range of levelling equipment. The unit supports workers in the construction industry who use a variety of common methods and equipment when working with others and as a member of a team. It applies to levelling work on residential and commercial work sites.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - transfer levels and record differences in height for three different projects as required by job specifications, using at least three of the following levelling devices: a spirit level and straight edge; automatic/optical levelling device; levelling with water technique, and; laser levelling device. In doing the above work, the person must: - conduct a two peg test with an automatic/optical level to confirm that the instrument meets manufacturer tolerances; - locate, interpret and apply relevant information in job specifications to the levelling task; - comply with site safety plan, and health and safety regulations applicable to workplace operations; - comply with organisational policies and procedures, including quality requirements; - safely and effectively use tools and equipment; - communicate and work effectively and safely with others, including using agreed communication signals; - confirm accuracy of the readings taken, including set-up and movement of device in two locations, and; - accurately record results of each levelling procedure according to organisational requirements. Students will also be expected to demonstrate the following knowledge: - characteristics, technical capabilities and limitations of different types of levelling devices; - methods of performing calculations associated with levelling; - processes for setting out levelling tasks; - requirements for line, level and plumb in construction projects; - site and equipment safety requirements relevant to basic levelling procedures; - symbols and construction terminology used when interpreting construction plans; - techniques used when applying basic levelling procedures, and; - contents of and terms used in

job safety analyses (JSA) and safe work method statements (SWMS) and the use of this documentation when levelling.

CPCCCM2006B Apply basic levelling procedures

Locations: Industry, Werribee, Sunshine.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to carry out levelling in a single plane for the purpose of establishing correct and accurate set-out of building components. It includes the set-up, testing and use of levelling devices, and establishing and transferring heights using a range of levelling equipment.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand, and; follow instructions; - read and interpret: documentation from a variety of sources, and; drawings and specifications; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - technological skills to: use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - application and requirements for line, level and plumb in construction projects; - basic construction processes; - basic mathematical techniques associated with levelling; - construction terminology; - job safety analysis (JSA) and safe work method statements; - levelling device types, characteristics, technical capabilities and limitations; - levelling techniques related to essential tasks; - processes for interpreting engineering drawings and sketches; - processes for setting out; - project quality requirements; - site and equipment safety (OHS) requirements; - site isolation and traffic control responsibilities and authorities, and; - symbols and construction terminology of construction plans.

CPCCCM2007B Use explosive power tools

Locations: Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to apply safe and effective operation of explosive power tools (EPT), used to fasten materials or fix fasteners to bases. It includes both direct action and indirect action explosive powered fastening tools.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge

and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; read and interpret: documentation from a variety of sources, and drawings and specifications; report faults; use language and concepts appropriate to cultural differences; use and interpret non-verbal communication, such as hand signals; written skills to record maintenance in logbook; - identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - technological skills to: use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - construction terminology; - EPT materials; - EPT charges and fasteners; - equipment safety manuals and instructions; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - processes for the calculation of material requirements; - quality requirements; - relevant Acts, regulations and codes of practice; - security and storage procedures for equipment and charges; - types, characteristics, uses and limitations of plant, tools and equipment, and; - workplace and equipment safety requirements.

CPCCCM2008B Erect and dismantle restricted height scaffolding

Locations: Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to erect and dismantle restricted height scaffolding to provide work platforms for various occupational applications. It includes placement of safety barriers and only involves modular scaffolding restricted to a height of 4 metres.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; read and interpret: documentation from a variety of sources and drawings and specifications; report faults; use language and concepts appropriate to cultural differences; use and interpret non-verbal communication, such as hand signals; written skills to record maintenance in logbook; - identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds

and with varying physical and mental abilities, and; - technological skills to: use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - general construction terminology; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - processes for the calculation of material requirements; - quality requirements; - relevant Acts, regulations and codes of practice; - scaffolding equipment; - scaffolding techniques; - shifting devices; - types, characteristics, uses and limitations of plant, tools and equipment, and; - workplace and equipment safety requirements.

CPCCCM2009A Carry out basic demolition

Locations: Industry, Werribee, Sunshine.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to remove components from single storey buildings and structures using basic demolition techniques. It includes the preparation of the site for the demolition process and the removal of components.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; drawings and specifications; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials; - numeracy skills to apply measurements and make calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - basic demolition processes and techniques; - construction terminology; - hazards associated with the conduct of manual demolition tasks; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - quality requirements; - types, characteristics, uses and limitations of tools and equipment involved in the conduct of manual demolition processes, and; - workplace and equipment safety requirements.

CPCCCM2010B Work safely at heights

Locations: Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to work safely

on construction sites where the work activity involves working above 1.5 metres from ground level and where fall protection measures are required.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; - use language and concepts appropriate to cultural differences; use and interpret non-verbal communication, such as hand signals; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - construction terminology; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - quality requirements; - types, characteristics, uses and limitation of plant, tools and equipment, and; - workplace and equipment safety requirements.

CPCCCM3001 Operate elevated work platforms up to 11 metres

Locations: Sunshine.

Prerequisites: Nil.

Description: This unit of competency specifies the outcomes required to operate specific types of elevated work platforms (EWPs) safely and effectively in different locations, including on uneven terrain. The unit includes locating, setting up, operating and shutting down scissor lifts and self-propelled boom lifts with a boom length under 11 metres. The unit supports construction workers in the safe and effective operation of electrical, hydraulic and mechanical EWPs. The unit does not cover truck-mounted EWPs, powered telescoping devices, hinged devices or articulated devices, or any combination of these used to support a platform on which personnel, equipment and materials may be elevated to perform work and which has a boom length of 11 metres or more. It applies to construction work on residential and commercial work sites in new construction, renovation or refurbishment, and maintenance projects. Licensing, legislative, regulatory or certification requirements apply to this unit in some States. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate they can set up and operate a self-propelled boom lift (BL) and a scissor lift (SL), both elevated work platforms (EWPs), at two different locations on the site, including moving the plant around the work site safely: The following functions and controls must be performed while operating both BL and SL: - boom up/down; - operate attachments, and; - operate outriggers, where fitted. The following functions and controls must be performed while operating the BL: - slew

left/right, and; - telescope in/out. At least one EWP must be set up and operated on uneven terrain, using outriggers as required. In doing so, when working above six metres, the person must fit harnesses and attach lanyards. In doing the above, the person must also: - establish and apply a rescue plan; - apply safe operating procedures, including conducting operational risk assessment and treatments; - locate, interpret and apply information relating to job requirements; - comply with site safety plan and health and safety legislation, regulations and codes of practice applicable to workplace operations; - safely and effectively use tools, plant and equipment relevant to EWP work; - ensure safe working load of EWP is not exceeded; - communicate with others on the work site using verbal and non-verbal communication and communication technology, and; - work effectively and safely with others on the work site. Students will also be expected to demonstrate the following knowledge: - functions and operational limitations of EWP equipment; - types of EWP equipment and health and safety authority certification of competency requirements; - controls and techniques for using EWP; - health and safety requirements for construction work sites; - processes for identifying equipment faults; - general construction terminology relevant to operating EWPs; - safe operating procedures for operating EWPs, including contents of and terms used in job safety analyses (JSA), safe work method statements (SWMS), and safety data sheets (SDS); - processes for calculating load mass requirements; - quality requirements relevant to operating EWPs; - regulatory and legislative requirements relevant to operating EWPs; - AS 2550 Set: Cranes, hoists and winches - Safe use; - relevant Acts, regulations and codes of practice relevant to working safely at heights on construction sites; - procedures for working safely at heights; - signalling methods and communications relevant to operating EWPs; - types, characteristics, use and limitations of plant, tools and equipment relevant to operating EWPs, and; - use and limitations of fall rescue systems.

CPCCCM3001C Operate elevated work platforms

Locations: Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: CPCCCM201 0B - Work safely at heights CPCCOHS200 1A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to safely and effectively operate some types of elevated work platforms (EWPs) in a variety of different terrains and situations to access isolated work areas. The unit includes locating, setting up, operating and shutting down EWPs. In addition to achievement of this competency, an EWP operator may need to obtain additional certification of training and experience before being allowed to operate the equipment.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: documentation from a variety of sources and drawings and specifications; - report faults; - use language and concepts appropriate to cultural differences; use and interpret non-verbal communication, such as hand signals; - written skills to complete inspection log and handover; - identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials; - numeracy skills to apply measurements and make calculations; -

organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - designs, functions and operational limitations of EWP equipment; - EWP equipment types and OHS authority certification of competency requirements; - EWP techniques; - fault finding and identification; - general construction terminology; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, specifications and drawings; - processes for the calculation of load mass requirements; - quality requirements; - relevant Acts, regulations and codes of practice; - safe working at heights; - signalling methods and communications; - types, characteristics, uses and limitations of plant, tools and equipment, and; - workplace and equipment safety requirements.

CPCCCM3003 Work safely around electrical sources, services and assets

Locations: Sunshine.

Prerequisites: Nil.

Description: This unit of competency specifies the outcomes required to ensure the safety of personnel and equipment when working with or operating plant while in close proximity to electrical sources, underground and overhead services, and assets. The unit supports construction workers working on powered construction sites who must check and confirm the location of electrical sources, underground and overhead services, and assets before commencing work. It applies to residential and commercial work sites.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills on two different sites: - locate electrical sources, underground and overhead services, and assets; - undertake work according to the safe work method statement (SWMS), and; - retreat from powered area on completion of work. The above work must involve: - locating, interpreting and applying information, standards and specifications relating to working safely around electrical sources, services and assets; - complying with site safety plan and work health and safety (WHS) legislation, regulations and codes of practice applicable to workplace operations; - locating on-site electrical sources, underground and overhead services, and assets and identifying associated required safe work practices; - installing safety signage and barricades before commencing work, and; - safely positioning plant and equipment on site, giving consideration to location of electrical sources, underground and overhead services, and assets. Students will also be expected to demonstrate the following knowledge: - environmental requirements relevant to the work site and job task; - equipment safety requirements, including procedures for accessing and interpreting; - procedures for materials storage and environmentally friendly waste management; - techniques to read and interpret plans, specifications and drawings; - safe work practices required on construction sites, and; - types, characteristics, uses and limitations of plant, tools and equipment used in the work specified in performance evidence.

CPCCCO2013A Carry out concreting to simple forms

Locations: Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to safely install formwork, reinforcement and place and finish concrete for the construction of minor slabs, pathways and other minor works to a specified design finish. The unit includes positioning the truck, placing concrete from truck to work area, spreading concrete and cleaning up site.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: documentation from a variety of sources; drawings and specifications; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - evaluating own actions and making judgments about performance and necessary improvements; - identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials; - organisational skills, including the ability to plan and set out work; - recognising procedures, following instructions, responding to change and contributing to workplace responsibilities, such as current work site environmental and sustainability frameworks or management systems; - teamwork skills to coordinate own work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - concrete materials; - concreting techniques; - general construction terminology; - job safety analysis (JSA) and safe work method statements; - levelling techniques; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, drawings and specifications; - processes for the calculation of material requirements; - quality requirements; - simple formwork and reinforcing componentry; - types, characteristics, uses and limitations of plant, tools and equipment, and; - workplace and equipment safety requirements.

CPCCJN2001A Assemble components

Locations: Industry, Sunshine.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit specifies the outcomes required to assemble manufactured components to form a completed constructed unit.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting

of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - ability to recognise procedures, respond to change and contribute to workplace responsibilities, such as current work site environmental or sustainability frameworks or management systems; - communication skills to: enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; read and interpret drawings and specifications; use and interpret non-verbal communication, and; use language and concepts appropriate to cultural differences; - innovation skills to select appropriate tools and equipment, respond to workplace challenges and put ideas into action; - numeracy skills to apply measurements; - planning and organisational skills to identify requirements, apply relevant resources and sequence tasks; - problem solving skills to recognise and take action to rectify minor faults and problems, and; - teamwork skills to be able to work with others to action tasks and relate to people from a range of cultural, social, ethnic backgrounds and with varying physical and mental abilities. Students will also be expected to demonstrate the following knowledge: - interpretation of drawings and specifications; - job safety analysis (JSA) and safe work method statements; - manufacturing and assembly processes in constructing componentry units; - measuring and marking processes and techniques related to assembling units; - temporary bracing techniques, and; - workplace and equipment safety requirements.

CPCCJN2002B Prepare for off-site manufacturing process

Locations: Industry, Sunshine.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit specifies the outcomes required to prepare material for the manufacturing process and assemble components to form manufactured units.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - ability to recognise procedures, respond to change and contribute to workplace responsibilities, such as current work site environmental or sustainability frameworks or management systems; - communication skills to: enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; read and interpret drawings; use and interpret non-verbal communication, and; use language and concepts appropriate to cultural differences; - innovation skills to select appropriate tools and equipment, respond to workplace challenges and put ideas into action; - numeracy skills to apply measurements; - planning and organisational skills to identify requirements, apply relevant resources and sequence tasks; - problem solving skills to recognise and take action to rectify minor faults and problems, and; - teamwork skills to be able to work with others to action tasks and relate to people from a range of cultural, social, ethnic backgrounds and with varying physical and mental abilities. Students will also be expected to demonstrate the following knowledge: - National Construction Code (NCC) and relevant Australian standards; - construction materials and their characteristics; - fasteners and fixings relevant to unit assembly processes; - interpretation of workshop drawings and specifications; - job safety analysis (JSA) and safe work method statements; - measurement and calculation processes relevant

to manufacturing work; - types and uses of static machines; - types of adhesives relevant to unit assembly processes; - types of construction material and component manufacturing processes, and; - workplace and safety requirements.

CPCCN2003A Package manufactured products for transport

Locations: Industry, Sunshine.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit specifies the outcomes required to use appropriate types of packaging systems to protect finished products from damage during transportation.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - ability to recognise procedures, respond to change and contribute to workplace responsibilities, such as current work site environmental or sustainability frameworks or management systems; - communication skills to: enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; use and interpret non-verbal communication, and; use language and concepts appropriate to cultural differences; - innovation skills to select appropriate tools and equipment, respond to workplace challenges and put ideas into action; - numeracy skills to apply measurements and calculations; - planning and organisational skills to identify requirements, apply relevant resources and sequence tasks; - problem solving skills to recognise and take action to rectify minor faults and problems, and; - teamwork skills to be able to work with others to action tasks and relate to people from a range of cultural, social, ethnic backgrounds and with varying physical and mental abilities. Students will also be expected to demonstrate the following knowledge: - basic packaging techniques; - construction products and their protection requirements; - materials handling related to work orientation; - measurement and calculations related to packaging products; - organisation's quality assurance requirements; - transporting techniques; - types of packaging materials and packaging systems, and; - workplace safety requirements.

CPCCN3001A Use static machines

Locations: Industry, Sunshine.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit specifies the outcomes required to use static machines, which are those fixed to a set location for their operation, as applies with off-site manufacturing processes.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - ability to recognise procedures, respond to change and contribute to workplace responsibilities, such as

current work site environmental or sustainability frameworks or management systems; - communication skills to: enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - use and interpret non-verbal communication; - use language and concepts appropriate to cultural differences; - innovation skills to select appropriate tools and equipment, respond to workplace challenges and put ideas into action; - numeracy skills to workplace requirements; - problem solving skills to recognise and take action to rectify minor faults and problems, and; - teamwork skills to be able to work with others to action tasks and relate to people from a range of cultural, social, ethnic backgrounds and with varying physical and mental abilities. Students will also be expected to demonstrate the following knowledge: - basic maintenance of static machines; - job safety analysis (JSA) and safe work method statements; - materials handling related to working with static machines; - types of static machines and their operation, and; - workplace and equipment safety requirements.

CPCCN3002A Use computer-controlled machinery

Locations: Industry, Sunshine.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit specifies the outcomes required to program, load and operate computer-controlled machinery for the production of components.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - ability to recognise procedures, respond to change and contribute to workplace responsibilities, such as current work site environmental or sustainability frameworks or management systems; - communication skills to: enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret drawings, specifications and job designs; - use and interpret non-verbal communication; use language and concepts appropriate to cultural differences; - basic keyboarding skills; - basic problem and fault-finding skills with software applications; - innovation skills to select appropriate tools and equipment, respond to workplace challenges and put ideas into action; - numeracy skills to apply workplace requirements; - planning and organisational skills to identify requirements, apply relevant resources and sequence tasks; - problem solving skills to recognise and take action to rectify minor faults and problems, and; - teamwork skills to be able to work with others to action tasks and relate to people from a range of cultural, social, ethnic backgrounds and with varying physical and mental abilities. Students will also be expected to demonstrate the following knowledge: - construction materials and their characteristics; - hardware requirements for relevant software; - job safety analysis (JSA) and safe work method statements; - measuring techniques relevant to dimensions and shape; - range of software applications appropriate to computer numerically-controlled (CNC) equipment; - types and uses of computer-controlled machinery; - types of static machines and machining processes, and; - workplace and equipment safety requirements.

CPCCN3003A Manufacture components for door and window frames and doors

Locations: Industry, Sunshine.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit specifies the outcomes required to carry out machining and manufacturing processes to set out component material in preparation for the assembly of window frames, sashes, doors and door frames.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - ability to recognise procedures, respond to change and contribute to workplace responsibilities, such as current work site environmental or sustainability frameworks or management systems; - communication skills to: enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: drawings and specifications; relevant building codes and standards; - use and interpret non-verbal communication; - use language and concepts appropriate to cultural differences; - innovation skills to select appropriate tools and equipment, respond to workplace challenges and put ideas into action; - numeracy skills to measure and calculate dimensions; - planning and organisational skills to identify requirements, apply relevant resources and sequence tasks; - problem solving skills to recognise and take action to rectify minor faults and problems, and; - teamwork skills to be able to work with others to action tasks and relate to people from a range of cultural, social, ethnic backgrounds and with varying physical and mental abilities. Students will also be expected to demonstrate the following knowledge: - AS1473 Guarding and safe use of woodworking machinery; - common material identification marking systems; - component setting out techniques; - job safety analysis (JSA) and safe work method statements; - manufacturing processes for door and window construction; - materials and their characteristics relevant to window and door construction; - measuring techniques relevant to setting up static machines; - setting up processes for static machines; - types and uses of static machines, and; - workplace and equipment safety requirements.

CPCCJN3004A Manufacture joinery components

Locations: Industry, Sunshine.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit specifies the outcomes required to carry out machining and manufacturing processes for component material in preparation for assembling joinery components.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - ability to recognise procedures, respond to change and contribute to workplace responsibilities, such as

current work site environmental or sustainability frameworks or management systems; - communication skills to: enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret: drawings and specifications; MSDS data; standards; - use and interpret non-verbal communication; - use language and concepts appropriate to cultural differences; - innovation skills to select appropriate tools and equipment, respond to workplace challenges and put ideas into action; - numeracy skills to apply measurements and calculations and to identify data; - planning and organisational skills to identify requirements, apply relevant resources and sequence tasks; - problem solving skills to recognise and take action to rectify minor faults and problems, and; - teamwork skills to be able to work with others to action tasks and relate to people from a range of cultural, social, ethnic backgrounds and with varying physical and mental abilities. Students will also be expected to demonstrate the following knowledge: - AS1473 Guarding and safe use of woodworking machinery; - interpretation of working drawings and specifications; - job safety analysis (JSA) and safe work method statements; - machining processes relevant to joining of joinery components; - materials and their characteristics relevant to joinery unit construction; - materials identification marking systems; - measuring and setting out processes relevant to joinery unit components; - types and characteristics of adhesives relevant to manufacture of joinery units and components; - types and characteristics of fixings and fasteners relevant to joinery unit construction; - types and uses of static machines; - types of firmments and their construction; - types of framework and their construction, and; - workplace and equipment safety requirements.

CPCCJN3005A Cut and install glass

Locations: Industry, Sunshine.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit specifies the outcomes required to manually cut glass to simple shapes for installation purposes.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - ability to recognise procedures, respond to change and contribute to workplace responsibilities, such as current work site environmental or sustainability frameworks or management systems; - communication skills to: enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand and follow instructions; - read and interpret: drawings and specifications and glazing schedules; - use and interpret non-verbal communication; - use language and concepts appropriate to cultural differences; - innovation skills to select appropriate tools and equipment, respond to workplace challenges and put ideas into action; - numeracy skills to apply measurements; - planning and organisational skills to identify requirements, apply relevant resources and sequence tasks; - problem solving skills to recognise and take action to rectify minor faults and problems, and; - teamwork skills to be able to work with others to action tasks and relate to people from a range of cultural, social, ethnic backgrounds and with varying physical and mental abilities. Students will also be expected to demonstrate the following knowledge: - AS1288 Glass in buildings - Selection and installation; - job safety

analysis (JSA) and safe work method statements; - material handling processes related to glass; - measuring and setting out processes relevant to glass cutting; - safe procedures for glass cutting; - types of glass and their characteristics, and; - workplace and equipment safety requirements.

CPCCS3002A Manufacture stair components for straight flighted stairs

Locations: Industry, Sunshine.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit specifies the outcomes required to undertake the manufacturing processes required to prepare and manufacture components for the assembly of straight flighted stairs.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - ability to recognise procedures, respond to change and contribute to workplace responsibilities, such as current work site environmental or sustainability frameworks or management systems; - communication skills to: enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret drawings and specifications; - use and interpret non-verbal communication; - use language and concepts appropriate to cultural differences; - innovation skills to select appropriate tools and equipment, respond to workplace challenges and put ideas into action; - numeracy skills to apply measurements and calculations; - planning and organisational skills to identify requirements, apply relevant resources and sequence tasks; - problem solving skills to recognise and take action to rectify minor faults and problems, and; - teamwork skills to be able to work with others to action tasks and relate to people from a range of cultural, social, ethnic backgrounds and with varying physical and mental abilities. Students will also be expected to demonstrate the following knowledge: - basic stair design; - Building Code of Australia (BCA) requirements relevant to stair building and installation; - commonly used stair construction and joining methods; - interpretation of drawings and specifications; - job safety analysis (JSA) and safe work method statements; - materials identification marking systems; - measuring and setting out processes relevant to stair construction; - organisation's quality assurance requirements; - types and characteristics of adhesives, fixings and fasteners related to stair construction; - types and characteristics of stairs; - types and uses of static machines; - types of materials and their characteristics related to stair construction, and; - workplace and equipment safety requirements.

CPCCS3003A Assemble and install stairs

Locations: Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit specifies the outcomes required to assemble prepared components required for the assembly and installation of a timber stair to location.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge

and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - ability to recognise procedures, respond to change and contribute to workplace responsibilities, such as current work site environmental or sustainability frameworks or management systems; - communication skills to: enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret drawings and specifications; - use and interpret non-verbal communication; - use language and concepts appropriate to cultural differences; - innovation skills to select appropriate tools and equipment, respond to workplace challenges and put ideas into action; - numeracy skills to apply calculations; - planning and organisational skills to identify requirements, apply relevant resources and sequence tasks; - problem solving skills to recognise and take action to rectify minor faults and problems, and; - teamwork skills to be able to work with others to action tasks and relate to people from a range of cultural, social, ethnic backgrounds and with varying physical and mental abilities. Students will also be expected to demonstrate the following knowledge: - adhesives, fixings and fasteners related to stair construction; - assembling procedures for stairs; - interpretation of drawings and specifications; - job safety analysis (JSA) and safe work method statements; - levelling techniques; - materials and their characteristics, relevant to stair construction; - making of components; - materials identification; - measuring and setting out related to assembling and installing stairs; - organisation's quality assurance requirements; - stair construction and joining methods; - types of stairs, and; - workplace and equipment safety requirements.

CPCCS3004A Manufacture and install continuous handrailing and special stair components

Locations: Industry, Sunshine.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit specifies the outcomes required to prepare, join and install continuous handrailing and special stair components. Special stair components include wreaths, scrolls, bullnosed steps and decorative features.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: ability to recognise procedures, respond to change and contribute to workplace responsibilities, such as current work site environmental or sustainability frameworks or management systems; - communication skills to: enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret drawings and specifications; - use and interpret non-verbal communication; - use language and concepts appropriate to cultural differences; - innovation skills to select appropriate tools and equipment, respond to workplace challenges and put ideas into action; - interpret drawings and documentation; - numeracy skills to apply measurements and calculations; - planning and organisational skills to identify requirements, apply relevant resources and

sequence tasks; - problem solving skills to recognise and take action to rectify minor faults and problems, and; - teamwork skills to be able to work with others to action tasks and relate to people from a range of cultural, social, ethnic backgrounds and with varying physical and mental abilities. Students will also be expected to demonstrate the following knowledge: - commonly used stair construction and joining methods; - identification marking of materials systems; - interpretation of drawings and specifications; - job safety analysis (JSA) and safe work method statements; - measuring and setting out processes relevant to manufacturing and installing stair components; - methods of forming and constructing handrails; - organisation's quality assurance requirements; - special feature components of stair construction; - timber carving and moulding techniques; - types and characteristics of stairs; - types and use of adhesives, fixings and fasteners relevant to stair construction; - types and uses of static machines; - types of materials and their characteristics relevant to stair construction, and; - workplace and equipment safety requirements.

CPCCJS3006A Construct fabricated stairs

Locations: Industry, Sunshine.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit specifies the outcomes required to construct fabricated stairs, which may involve one or more flights in their structure and could incorporate fabricated components that are alternatives to timber components.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - ability to recognise procedures, respond to change and contribute to workplace responsibilities, such as current work site environmental or sustainability frameworks or management systems; - communication skills to: enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret drawings and specifications; - use and interpret non-verbal communication; - use language and concepts appropriate to cultural differences; - innovation skills to select appropriate tools and equipment, respond to workplace challenges and put ideas into action; - numeracy skills to apply measurements and calculations; - planning and organisational skills to identify requirements, apply relevant resources and sequence tasks; - problem solving skills to recognise and take action to rectify minor faults and problems, and; - teamwork skills to be able to work with others to action tasks and relate to people from a range of cultural, social, ethnic backgrounds and with varying physical and mental abilities. Students will also be expected to demonstrate the following knowledge: - BCA requirements relevant to stairs; - factors governing design of stairs; - interpretation of drawings and specifications; - job safety analysis (JSA) and safe work method statements; - measurement and calculation processes related to lineal measurements in stair design; - stair construction techniques; - terminology of stair components and dimensional relationships; - types and characteristics of stairs, and; - types and uses of materials used in stair construction.

CPCCJS3011A Design and set out stairs

Locations: Industry, Sunshine.

314

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit specifies the outcomes required to design and set out dressed material to prepare for manufacturing processes in preparation for the assembly of components to construct a stair.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - ability to recognise procedures, respond to change and contribute to workplace responsibilities, such as current work site environmental or sustainability frameworks or management systems; - communication skills to: enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret drawings and specifications; - use and interpret non-verbal communication; - use language and concepts appropriate to cultural differences; - innovation skills to select appropriate tools and equipment, respond to workplace challenges and put ideas into action; - numeracy skills to apply measurements and calculations; - planning and organisational skills to identify requirements, apply relevant resources and sequence tasks; - problem solving skills to recognise and take action to rectify minor faults and problems, and; - teamwork skills to be able to work with others to action tasks and relate to people from a range of cultural, social, ethnic backgrounds and with varying physical and mental abilities. Students will also be expected to demonstrate the following knowledge: - Building Code of Australia (BCA); - calculations related to lineal measurements in stair design; - component parts of balustrades, landings and stairs; - drawings and specifications; - handling of materials relevant to stair construction; - job safety analysis (JSA) and safe work method statements; - materials relevant to stair construction; - measuring and setting out related to stair construction; - organisation's quality assurance requirements; - stair construction and joining methods; - terminology of components and dimensional relationships; - tools and equipment related to stair setting out; - types of stairs, and; - workplace and equipment safety requirements.

CPCCLDG3001A License to perform dogging

Locations: Industry, Werribee, Sunshine.

Prerequisites: Nil.

Description: This unit specifies the outcomes required to perform slinging techniques, including the selection and inspection of lifting gear and/or the directing of the crane operator in the movement of the load when the load is out of view of the crane/operator for licensing purposes.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication techniques in the workplace including whistles, hand signals and use of fixed channel two-way radios; - communication skills at a level sufficient to communicate with other site

personnel; - calculate rated capacity of lifting equipment; - apply different methods for making temporary connections to loads using fibre and synthetic ropes; - ability to interpret rated capacity and working load limit tags; - hazard identification and control; - slinging techniques; - selection and inspection of lifting equipment; - directing crane operators in the moving of loads in a safe manner, using a slewing crane, and; - inspection and care of a wide range of lifting equipment to appropriate Australian Standards and/or manufacturer's specifications. Students will also be expected to demonstrate the following knowledge: - appropriate mathematical procedures for estimation and measurement of loads; - basic knowledge of types of cranes and their functions; - Commonwealth, state or territory OHS legislation, standards and codes of practice relevant to the full range of techniques for undertaking dogging activities; - load stability and safety factors in line with manufacturer's specifications; - types of lifting equipment and slinging techniques for use, and their limitations and performance in a wide range of conditions (including but not limited to slings, beams, accessories, clamps, work-boxes, bins and pallets), and; understanding of the hierarchy of control.

CPCLRG3001A License to perform rigging - Basic level

Locations: Industry, Werribee, Sunshine.

Prerequisites: Nil.

Description: This unit specifies the outcomes required to perform basic rigging work associated with movement of plant and equipment, steel erections, hoists (including mast climbing hoists), placement of pre-cast concrete, safety nets and static lines, perimeter safety screens and shutters; and cantilever crane loading platforms for licensing purposes.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - ability to calculate Safe Working Load (SWL) and Working Load Limit (WLL); - ability to erect and dismantle, level, plumb and stabilise associated plant and structures; - ability to work safely at heights including the correct application of safety equipment; - accurate interpretation of basic structural charts and structural plans (site information); - applying methods for making temporary connections of ropes using fibre and synthetic types; - apply methods of splicing and whipping fibre and synthetic ropes; - correct application and use of all rigging and associated equipment; - risk assessment and hazard control strategies; - interpersonal and communication skills at a level sufficient to site/workplace requirements. This includes the relevant communication methods and equipment, and; - verify problems and equipment faults and demonstrate appropriate response. Students will also be expected to demonstrate the following knowledge: - appropriate mathematical procedures for estimation and measurement of loads; - ability to interpret manufacturer's specifications for all plant and equipment use in rigging operations; - knowledge of principles relating to all plant, equipment and structural stability; - knowledge of the types and functions of rigging, safety and associated equipment including an understanding of their limitations; - organisational and workplace standards, requirements, policies and procedures for rigging; - understanding of the hierarchy of hazard identification and control; - relevant Commonwealth, state or territory and local government OHS legislation, standards and codes of practice for undertaking rigging activities; - understanding of inspection and maintenance requirements of a wide range of appropriate plant and equipment

in line with Australian Standards or manufacturer's specifications, and; - estimation of ground bearing pressures of the full range of soil types and associated ground conditions for setting up plant and equipment.

CPCLSF2001A Licence to erect, alter and dismantle scaffolding basic level

Locations: Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: Nil.

Description: This unit specifies the outcomes required to erect, alter and dismantle scaffolding at the basic level, consisting of scaffolding work connected with the operation or use of modular or pre-fabricated scaffolds, cantilevered materials hoists with a maximum working load of 500kg, ropes and gin wheels, safety nets and static lines, and bracket scaffolds (tank and formwork) for licensing purposes.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - ability to calculate Safe Working Load (SWL) and Working Load Limit (WLL); - ability to erect scaffold within the scope of the basic scaffolder; - ability to erect, level, plumb and stabilise cantilever hoists and scaffolds; - ability to interpret manufacturer's specifications for plant and equipment; - ability to work safely at heights; - ability to set up fall arrest systems, including safety nets; - ability to work safely in confined spaces; - accurate interpretation of basic structural charts and structural plans; - applying methods for making temporary connection using fibre ropes; - correct application of all scaffolding equipment; - methods for making temporary connection of guy ropes and static lines using Flexible Steel Wire Rope (FSWR), and; - verify problems and equipment faults and demonstrate appropriate response. Students will also be expected to demonstrate the following knowledge: - use of appropriate mathematical procedures for estimation and measurement of loads Commonwealth, state or territory OHS legislation and local government regulations, including standards and codes of practice relevant to the full range of techniques for undertaking basic scaffolding activities; - knowledge of principles relating to plant and equipment stability; - knowledge of types of scaffolding and their application; - knowledge of scaffolding erection and dismantling techniques; - knowledge of types of hoists, plant and equipment associated with basic scaffolding and their use/s; - risk assessment and control, including understanding of the hierarchy of control; - estimation of bearing pressures of the full range of soil types and associated ground conditions for setting up plant and equipment; - load capabilities of different types of scaffolding constructions; - understanding and application of organisational and workplace standards, requirements, policies and procedures for scaffolding; - safety equipment applicable to scaffolding; - understanding and application of the inspection and maintenance requirements for basic scaffold, associated equipment and scaffold equipment, and; - uses and limitations of tools and equipment, appropriate to scaffolding tasks and activities.

CPCCOHS1001A Work safely in the construction industry

Locations: Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: Nil.

Description: This unit of competency specifies the outcomes required to undertake Occupational Health and Safety (OHS) induction training within the construction industry. It requires the ability to demonstrate personal awareness of OHS legislative

requirements, and the basic principles of risk management and prevention of injury and illness in the construction industry. Licensing requirements will apply to this unit of competency depending on the regulatory requirements of each jurisdiction.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - clarify OHS legislative requirements; - verbally report construction hazards and risks; - ask effective questions; - relay information to others; - discuss OHS issues and information; - explain the basic OHS legislative requirements which will be applicable to own work; - explain the meaning of safety signs and symbols; - identify common construction hazards, and; - discuss the basic principles of risk management. Students will also be expected to demonstrate the following knowledge: - applicable Commonwealth, State or Territory OHS legislation, regulations, standards, codes of practice and industry standards/guidance notes relevant to own work, role and responsibilities; - basic principles of risk management and assessment for construction work; - common construction hazards; - common construction safety signage and its meanings; - general construction emergency response and evacuation procedures; - general construction work activities that require licenses, tickets or certificates of competency; - general first aid response requirements; - general procedures for raising OHS issues; - general procedures for reporting OHS hazards, accidents, incidents, emergencies, injuries, near misses and dangerous occurrences; - general procedures for responding to hazards, incidents and injuries; - general workers' compensation and injury management requirements; - OHS hierarchy of controls; - OHS responsibilities and rights of duty holders; - own responsibilities to comply with safe work practices; - role of OHS committees and representatives; - types of common personal protective equipment and fire safety equipment, and; - types of OHS information and documentation.

CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry

Locations: Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites:Nil.

Description:This unit of competency specifies the outcomes required to carry out OHS requirements through safe work practices at any on or off-site construction workplace. It requires the performance of work in a safe manner through awareness of risks and work requirements, and the planning and performance of safe work practices with concern for personal safety and the safety of others. This unit of competency covers fundamental OHS necessary to undertake work tasks within any sector in the construction industry. It includes the identification of hazardous materials, including asbestos, and compliance with legislated work safety practices. It does not cover removal of asbestos, which is a licensed activity.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of

competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - ability to accurately recognise OHS hazards, including asbestos and take all opportunities to alleviate safety problems in a variety of construction work sites and environments; - capacity to deal calmly and effectively with any potential safety problems and work closely with other team members and supervisors to ensure safe working conditions are maintained; - communication skills; - identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - technological skills. Students will also be expected to demonstrate the following knowledge: - asbestos management code prevention of exposure; - basic first aid procedures; - common construction industry terminology; - common workplace safety hazards and risks and procedures for reporting these to designated personnel; - construction industry communications equipment and use; - construction industry health and safety signage; - emergency response and evacuation procedures; - JSA and safe work method statements; - MSDS; - OHS hierarchy of control and role of OHS committees and representatives; - relevant legislation, regulations and workplace requirements relating to OHS, including hazard reduction and personal safety, including duty of care responsibilities, workers' compensation and injury management requirements; - safe manual handling techniques; - safe work practices in normal working environment; - safety equipment, policies and requirements for working in confined spaces and at height, including on rooves; - tools and equipment prohibited for use near identified asbestos-containing materials (ACM); - types of fires and basic firefighting equipment; - types, possible location and risks of ACM, including serpentine and amphibole groups, and their use in common building materials; - types, purpose and use of construction industry personal protective equipment and clothing, and; - workplace and equipment safety requirements.

CPCCPD3021A Prepare surfaces for painting

Locations: Industry, Sunshine.

Prerequisites:CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description:This unit of competency specifies the outcomes required to restore, repair and prepare different material surfaces for the application of paint. The unit includes planning and preparation for the work, preparation of new or uncoated surfaces, preparation of previously coated surfaces, preparation of previously wallpapered surfaces for painting and completion of clean-up activities.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand and follow instructions; - read and interpret: documentation from a variety of sources and drawings and specifications; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - evaluating own actions and making judgments about performance and

necessary improvements; - identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials; - organisational skills, including the ability to plan and set out work; - recognising procedures, following instructions, responding to change and contributing to workplace responsibilities, such as current work site environmental and sustainability frameworks or management systems; - teamwork skills to coordinate own work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - technological skills to: use a range of mobile technology, such as two-way radio and mobile phones, and; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - corrosion processes and techniques for the protection of metals; - hazards associated with lead, asbestos, solvents, chemicals and dust; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - paint application testing procedures; - painting and decorating terminology; - plans, drawings and specifications; - prevention and/or rectification procedures for surface coating defects; - procedures, products and techniques associated with preparation of surfaces; - procedures, products and techniques associated with removal of wallpaper; - processes for the calculation of material requirements; - properties and surface preparation requirements of new substrates; - quality requirements; - required protection for application of clear or stained finishes; - surface coating technology, and; - workplace and equipment safety requirements.

CPCSC2002A Erect and dismantle basic scaffolding

Locations: Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: CPCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to erect and dismantle a range of modular scaffolding systems to provide work platforms for construction purposes. It includes edge protection, access ways and falsework (scaffold support systems for formwork).

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; follow instructions; - read and interpret: documentation from a variety of sources; drawings and specifications; - report faults; - use language and concepts appropriate to cultural differences; use and interpret non-verbal communication, such as hand signals; - written skills to complete inspection log and handover; - identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials; - numeracy skills to apply measurements and calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - general construction terminology; - job safety analysis (JSA) and safe work method statements; - lifting devices; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, drawings and

specifications; - plant, tools and equipment types, characteristics, uses and limitations; - processes for the calculation of material requirements; - quality requirements; - relevant Acts, regulations and codes of practice; - scaffolding equipment and techniques, and; - workplace and equipment safety requirements.

CPCCSF2003A Cut and bend materials using oxy-LPG equipment

Locations: Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: CPCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to heat, cut and bend construction materials using oxy-LPG equipment. It includes planning and preparation for the work, setting up and testing the equipment, cutting materials, heating and bending materials, shutdown of equipment and completion of clean-up activities.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; follow instructions; - read and interpret: documentation from a variety of sources; drawings and specifications; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials; - mathematical and numeracy skills to apply measurements and calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - construction and steel fixing terminology; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - oxy acetylene and LPG heating and cutting equipment set-up and operating techniques; - oxy acetylene and LPG heating and cutting equipment types, characteristics, uses and limitations; - plans, drawings and specifications; - processes for the calculation of material requirements; - quality requirements; - types and properties of steel fixing materials, and; - workplace and equipment safety requirements.

CPCCSF2004A Place and fix reinforcement materials

Locations: Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: CPCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to place and fix reinforcement for concrete work as part of construction processes. It includes planning and preparation for the work, final preparation for placement, placing and fixing reinforcement, checking the reinforcement and completing clean-up activities.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: determine requirements; follow instructions; - read and interpret: documentation from a variety of sources; drawings and specifications; - report faults; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials; - numeracy skills to apply calculations; - organisational skills, including the ability to plan and set out work; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - construction and steel fixing terminology; - job safety analysis (JSA) and safe work method statements; - job specifications related to the layout of reinforcement materials; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, drawings and specifications; - processes for the calculation of material requirements; - quality requirements; - reinforcement materials placement and fixing techniques; - types, properties, uses and limitations of reinforcement materials, and; - workplace and equipment safety requirements. .

CPCCSG3001 Design and lay out digital signs for production

Locations: Sunshine.

Prerequisites: Nil.

Description: This unit of competency specifies the outcomes required to design and lay out signs using industry-recognised design software and to prepare files to be print ready. The unit supports sign manufacturers who design and modify signs according to client requirements and prepare artwork for a range of diverse outputs, which can include vehicles, posters, billboards and panels. Sign designs can be simple or complex in nature according to the range of software functionality used and the nature and volume of elements used to design the sign.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. A person who demonstrates competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit, and must design and lay out three different signs each consisting of letters and graphics and a minimum of three different colours, according to the following specifications: - one sign must be for a standard vehicle door, and use a logo, at least three lines of text, and a standard font; - one sign must manipulate the logo and lettering designed for the standard vehicle door, and lay out the design for a light box panel in landscape measuring minimum 1200 x 2400 mm, and; - one sign must be for a minimum 1200 x 2400 mm panel in portrait, and use three text blocks each containing at least three lines of text and at least two different images sourced from an image database. In doing the above

work, the person must: - apply design theory to each sign, using colour effectively to create signs with visual impact; - apply design and layout principles suited to the specified output giving consideration to how each sign will be displayed and the conditions under which each sign will be viewed, and; - use industry-recognised software to produce the sign design and lay out a print ready file. Students will also be expected to demonstrate the following knowledge: - principles and application of design and layout theory relevant to sign manufacture, including: balance; colour and colour harmony; contrast; - principles and application of letter legibility relevant to sign manufacture, including: format of text; letter spacing; letter styles, and; type of font used; - techniques for conveying image concept and meaning of the design through the choice and features of typography; - use of dimensions, symbols, abbreviations and key features of designs for signs; - uses and functionality of industry-recognised software for designing and laying out signs; - types, characteristics, uses and limitations of vector and raster files when designing signs; - Australian and international standards relevant to the design of signs used in public spaces, including: AS 1319 Safety signs for the occupational environment, and; - terminology used in the design and layout of signs.

CPCCSG3002 Produce and apply vinyl signs

Locations: Sunshine.

Prerequisites: Nil.

Description: This unit of competency specifies the outcomes required to produce simple and complex vinyl signs using relevant software, vinyl plotters and weeding tools. The unit supports sign manufacturers who produce vinyl signs according to client requirements, for attachment to a range of surfaces, including vehicles, metals and glass. Vinyl signs can be used for advertising, promotional, branding or directional purposes.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit, and must produce three vinyl signs using a vinyl plotter according to the following specifications: - one sign containing only lettering in a single colour, and; - one sign containing lettering and a simple graphic, consisting of at least three different colours. Each sign must be applied to a different surface selected from the following: glass; metal; plastic, and; vehicle body. In producing each sign, the person must ensure no damage to the vinyl during the weeding or cutting processes. In the event of damage caused, the person must demonstrate correct procedures to rectify or reproduce the vinyl sign. In applying the sign to each surface, the person must: correctly use materials to prepare the surface; apply the signs at the specified heights and levels, and; check for damage to the vinyl or surface that could have occurred during the application process and rectify damage. Students will also be expected to demonstrate the following knowledge: - attributes, characteristics and composition of different vinyl types used to produce signs; - functionality and operation of vinyl plotters used to produce vinyl signs, including: blade offset setting; blade types; cleaning and maintenance requirements; cutting pressure and speeds appropriate to the task; test cut requirements, and; vinyl tracking characteristics; - functions and limitations of relevant graphic design software used in producing vinyl signs; - impact of different temperatures on vinyl application;

- legislation, codes and standards relevant to the specific production work in performance evidence; - principles of vinyl cutting, and; - terminology used in signs.

CPCCSG3003 Colour manage signs

Locations:Sunshine.

Prerequisites:Nil.

Description:This unit of competency specifies the outcomes required to assess and apply colour consistently across a range of visual media used to produce signs. It requires the application of colour theory and an ability to use industry-recognised software, hardware and colour matching systems for a range of output devices. The unit supports sign manufacturers working with different media where the accuracy and consistency of colour are critical to the quality of the final product.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. A person who demonstrates competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit, and must accurately colour match three different digital signs using each of the following devices in the process: computer monitor; digital press; printer; proofer; scanner. A different colour matching system should be used on each of the three signs, selected from: cyan, magenta, yellow and black (CMYK); pantone matching system (PMS), red, green and blue (RGB). In doing the above work, the person must: - accurately calibrate devices to be used in sign production workflow; - apply a colour matching system according to job requirements; - adjust colour and contrast to ensure legibility as appropriate to the task, and; - check and confirm colour consistency is achieved across each output device and rectify any fault in colour matching. The person must then select three different colours from one of the digital signs and produce a colour match in paint for each colour. Students will also be expected to demonstrate the following knowledge: - uses, applications and limitations of a range of colour matching systems used in the manufacture of signs, including: black and white; CMYK; grey scale; PMS; RGB; - functionality and limitations of software used to apply and manage colour in the manufacture of signs; - principles of colour legibility and the use of contrast; - principles and application of colour harmony, including: analogous; complementary; monochromatic; split complementary, and; - uses, principles and applications of colour theory in sign manufacture.

CPCCSG3004 Print digital signs

Locations:Sunshine.

Prerequisites:Nil.

Description:This unit of competency specifies the outcomes required to produce finished signs from print ready digital files, using printers and their associated software. Signs can be printed on to a range of substrates, including paper, vinyl, glass, fabric and aluminium composite, using a range of printing technology and equipment. They may also be laminated for protection. The unit supports sign manufacturers using industry-recognised software and printing equipment to produce signs that are displayed for commercial, advertising, informative and promotional purposes. Digitally printed signs can be used to produce banners, illuminated signs, billboards, panels and vehicle graphics.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic

and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit, and must print three different signs from digital files on each of the following media: aluminium composite; paper; vinyl. At least one sign must be produced using a flatbed printer and one sign using a roll to roll digital printer. Laminate one of the finished signs, selecting laminate for the printed substrate according to type of printed media and job requirements and safely and effectively undertaking laminating processes. In doing the above work, the person must: - handle and use uncompressed file formats correctly in the digital printing process; - apply digital colour management principles when using software and output media; - correctly handle media used in the digital printing process; - select and set up appropriate printers for the task and conduct routine maintenance appropriate to the printer; - identify printing and laminating defects and rectify faults to ensure job requirements are met, and; - operate raster image processor (RIP) software in the printing process. Students will also be expected to demonstrate the following knowledge: - characteristics of different types of digital printing output devices, including: flatbed printers; roll to roll printers; ultraviolet (UV) printers; - types and characteristics of various digital printing products; - principles of colour theory and their application in printing digital signs; - range and application of different laminates; - techniques and process for laminating signs; - safety data sheets (SDS) relevant to the use of printing tools and equipment; - procedures for routine maintenance and cleaning of printers; - statutory and regulatory authority requirements, particularly those relating to: removal of waste products; storage of chemicals; - terminology and use of abbreviations in the signs and graphics industry, and; - use and application of uncompressed file formats, including: encapsulated post script (EPS); portable document format (PDF); RAW file, and; tagged image file format (TIFF).

CPCCSG3005 Engrave signs

Locations:Sunshine.

Prerequisites:Nil.

Description:This unit of competency specifies the outcomes required to engrave signs using specialist rotary engravers. It covers setting up and initialising computer software to interact with the engraving system, preparing tools and materials for engraving, and operating high speed equipment to produce detailed sign artwork that meets client requirements. The unit supports sign manufacturers who produce fine, detailed markings on various materials, including metal and non-metal.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit, and must engrave three signs each containing four lines of text, with a border and a centred graphic or logo as follows: - at least one sign must be engraved on one of the following metal surfaces:

aluminium; brass; stainless steel, and; - at least one sign must be engraved on one of the following non-metal surfaces: acrylic; engraving laminate. In doing the above work, the person must: - select and prepare cutter tools and equipment for the task; - set up engraving software with accurate parameters for the task, including speed, depth and number of passes appropriate to the task, and; - engrave and finish the sign to client requirements using cleaning and polishing materials. Students will also be expected to demonstrate the following knowledge: - application of the following typography elements in sign-writing and engraving; - engraving processes; - manufacturer specifications for the safe use and maintenance of engravers and cutters; - processes to check and ensure correct grammar, spelling and punctuation and their application in engraving signs; - safe operating procedures for the use of high speed cutting tools and equipment used in engraving, and; - safety data sheets (SDS) relevant to the use of engraving tools.

CPCCSG3006 Apply gilding to signs

Locations:Sunshine.

Prerequisites:Nil.

Description:This unit of competency specifies the outcomes required to prepare background surfaces, and mask, draft and apply gilding to lettering, shapes, heraldic and other decorative forms of signs. The unit supports sign manufacturers who apply traditional sign-writing techniques and materials to apply gilding to signs.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - must produce one word of gilded lettering on two different sign surfaces selected from the following: glass; metal; stained timber. In doing the above work, the person must: - prepare the sign surface using selected materials and processes; - lay out sign design accurately to scale on sign surface and apply a decorative technique to the lettering, and; - clean finished sign and surface area. Students will also be expected to demonstrate the following knowledge: - theory of letter spacing when laying out signs; - methods and application of design transfer; - range and use of gilding materials and their characteristics; - techniques for gilding and producing gilded surfaces; - methods for identifying dimensions, symbols, abbreviations and key features of signs from sign designs and drawings; - purpose and application of the following when applying gilding to signs: safety data sheets (SDS); safe work method statements (SWMS); - techniques for measuring and setting out layout of signs to be gilded; - preparation techniques for surfaces used in gilding signs; - workplace, statutory and regulatory authority requirements relevant to handling materials used in gilding sign; - terminology and use of abbreviations in the signs and graphics industry; - traditional and contemporary font styles, and; - types and characteristics of tools and equipment used to apply water gilding.

CPCCSG3009 Screen-print signs

Locations:Sunshine.

Prerequisites:Nil.

Description:This unit of competency specifies the outcomes required to screen-print signs. The unit supports sign-writers who print directly on to materials, including fabric and paper, using screen-printing tools and techniques.

Required Reading:The qualified trainer and assessor will provide teaching and

learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - must screen-print three signs each consisting of letters and at least one graphic as follows: - one sign must be screen-printed to one of the following metals: aluminium; stainless steel; - one sign must be screen-printed to one of the following fabrics: cotton; gauze; polyester; silk, and; - one sign must be screen-printed to at least one of the following substrates: glass; paper; plastic; wood. At least two of the above signs must measure at least 1 square metre. In doing the above work, the person must: - reproduce a design and transfer design to material for screen-printing; - cut screen design to shape, and; - construct screen ready for printing as appropriate to the task. Students will also be expected to demonstrate the following knowledge: - colour selection techniques and principles and their application in screen-printed signs; - methods for identifying dimensions, symbols, abbreviations and key features of signs from sign designs and drawings; - purpose and application of the following when screen-printing signs: safety data sheets (SDS); safe work method statements (SWMS); - principles and techniques for the layout of signs; - relevant Australian standards; - statutory and regulatory authority requirements relating to the use of materials used in screen-printing signs; - techniques for cutting designs for screens and screen-printing; - range of traditional and contemporary font styles for use in screen-printing signs, and; - terminology and use of abbreviations in screen-printing.

CPCCSG3011 Install LED technology into signs

Locations:Sunshine.

Prerequisites:Nil.

Description:This unit of competency specifies the outcomes required to select and install light emitting diode (LED) systems into signs. It covers identifying the appropriate LED system to achieve job requirements, laying out and installing the system into position, and connecting and circuit testing the system to ensure consistent distribution of light. The unit supports sign manufacturers producing illuminated signs. It applies to signs illuminated using LED technology, including light boxes and fabricated letters which, depending on how the modules are positioned inside the letter, will produce either face-illuminated or halo-lit signs. Where LED lighting is less than 240 volts, no licensing, legislative, regulatory or certification requirements apply to this unit of competency at the time of endorsement. Should lighting be above 240 volts, relevant state and territory regulatory authorities should be consulted to confirm licensing, legislative, regulatory or certification requirements that apply to this unit of competency.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit, and must select and install light emitting diode (LED) systems into three signs as follows: - two fabricated lower case 'b' in

Helvetica font, measuring at least 600 mm high x 75 mm wide, and 100 mm deep and mounted to a white surface: one must be face illuminated, with the face of the letter formed of opal acrylic and the back of the letter with a PVC foam backing; one must be halo lit, with the sides and face of the letter formed of non-illuminating cast acrylic and the back of the letter formed of clear acrylic, and; - one freestanding back lit light box measuring up to 1800 mm x 300 mm x 100 mm, with an opal acrylic face. In doing the above work, the person must: - identify and confirm client requirements for the finished job, including: colour and brightness requirements; location for finished sign; quality and performance requirements of finished sign; - lay out, install and secure the LED modules to each sign to ensure even and consistent lighting, and; - test lights and correct any faults in light distribution. Students will also be expected to demonstrate the following knowledge: - application and use of: safety data sheets (SDS) when working with LED components; safe work method statements (SWMS) when installing LED systems into signs; - capacity of different surface types to absorb or reflect LED light; - electrical theory relevant to selecting and using LED technology for signs, including: processes to calculate maximum driver loading for LED modules; regulation of electrical current in LED systems; - principles and application of design and layout theory relevant to sign manufacture, including: balance; colour and colour harmony; contrast; - use, application and limitations of red, green and blue (RGB) colour system in LED signs; - limitations of sign manufacturer's role when working with electrical components, including licensing and regulatory requirements applicable to working with electricity; - pitch as it relates to positioning LED modules in fabricated letters and light boxes; - requirements for working safely around power sources, services and assets; - techniques for evaluating and using: LED systems and packages; LED components; - uses, applications and limitations of LED technology for illuminating signs, including: colour types and limitations; components; durability; semi-conductor chip technology characteristics; systems and system packages; - processes to manage heat generated by LED, and; - terminology used in manufacture of signs.

CPCCSG3012 Fabricate signs

Locations:Sunshine.

Prerequisites:Nil.

Description:This unit of competency specifies the outcomes required to fabricate signs using acrylic sheets and metal framing. Fabricated signs are used for a range of purposes, including light boxes, point of sale product trays, monoliths, pylons and individual letters. The unit supports sign manufacturers who fabricate custom-made signs in response to client design requirements.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit, and must fabricate three different signs as follows: - a lower case letter 'b' in Clarendon font, using acrylic sheeting, with a minimum 50 mm return and 300 mm height; - a letter 'D' in Helvetica font, using stainless steel or aluminium, with a minimum 50 mm return and 300 mm height, and; - an aluminium light box with a minimum 300 mm acrylic front and back panel with a 100 mm edge; with the front and back of the light box being acrylic with a minimum of 4.5 mm thickness. In doing the above work, the person must use at

least three of the following tools and equipment: - acrylic glues and heating equipment; - battery drill; - CAD/CAM routing equipment; - glass marking pencil; - guillotine; - metal ruler or tape measure; - welding tools and equipment; - scribe; - square, and; - surface cutting equipment. For each sign to be fabricated, the person must: - identify the job requirements for the sign; - select and prepare tools, equipment and materials to fabricate the sign; - select, correctly fit, and use personal protective equipment (PPE) relevant to the task; - accurately calculate required material quantities; - safely and accurately measure and cut materials to size; - fabricate and assemble the sign; - trim and clean the sign, rectify any faults; - store sign safely, and; - clean the work area and dispose of any waste materials. Students will also be expected to demonstrate the following knowledge: - fabrication techniques used when working with acrylic; - folds and tolerances of light weight metals used in fabricating signs; - techniques for using rotary routers and other tools when cutting materials used in fabricating signs; - types, characteristics and applications of high and medium impact acrylic; - statutory and regulatory authority requirements, particularly those relating to: removal of waste products; storage of chemicals and materials; work health and safety relevant to fabricating signs; - techniques used to weld aluminium and galvanised steel up to 3 mm in thickness; - types, uses and limitations of: different extrusion systems used in sign manufacture; modular directory systems used in sign manufacture; - purpose and application of the following when using tools, equipment and materials to fabricate signs: safety data sheets (SDS); safe work method statements (SWMS), and; - use of manufacturer specifications when using tools, equipment and materials to fabricate signs. .

CPCCSG3013 Paint letters and decorative effects for signs

Locations:Sunshine.

Prerequisites:Nil.

Description:This unit of competency specifies the outcomes required to manually paint signs on surfaces, comprised of various letter types and graphics. It covers setting out the sign to scale from a smaller design template using different layout methods; selecting and using tools and equipment to paint letters and graphics; and using brush strokes, techniques and decorative effects to achieve the desired result. The unit supports sign manufacturers who produce customised signs that are painted directly on to surfaces for a range of purposes, including advertising boards and retail signs.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - must produce four hand-painted signs using both simple and decorative lettering, and; - signs must be produced to scale and measure a minimum of 1 square metre for at least two of the following surfaces: glass; masonry; metals; plastics; wood. One of the above hand-painted signs must include a small graphic logo with at least four different colours. A different layout method must be used for each of the above signs, ensuring that the following four methods are used in total: computer-generated; direct on to substrate; overhead projection; pounce method. In doing the above work, the person must demonstrate: - correct use of techniques to measure, and calculate and apply scale and dimension when producing the final sign; - correct selection and use of brushes, paints and brush techniques to produce job requirements; - correct preparation of

paints and other tools and equipment; - application of health and safety requirements, and; - assessment of own work throughout the process, and identification and rectification of faults in painting letters and decorative effects. Students will also be expected to demonstrate the following knowledge: - characteristics, style and sign-writing techniques for simple alphabets; - characteristics, style and sign-writing techniques for decorative alphabets; - methods for calculating and applying dimensions and scale when laying out signs; - contents of and terms used in safe work method statements (SWMS) applicable to sign-writing to decorative forms; - principles of design applicable to lettering; - relevant Australian standards; - purpose and application of manufacturer specifications when working with paints and chemicals used to sign write decorative forms; - statutory and regulatory authority requirements relating to painting letters and decorative effects for signs; - techniques to produce layout accurately to balanced design, and; - terminology and use of abbreviations in the signs and graphics industry.

CPCCSG3016 Prepare surfaces for signs

Locations:Sunshine.

Prerequisites:Nil.

Description:This unit of competency specifies the outcomes required to ensure surfaces are prepared and ready for fixing signs. The unit covers assessing surfaces, which can include metals, plastics, brick and plasterboard walls; identifying the extent of preparation required; selecting and preparing equipment; and applying materials to the surface safely and effectively, minimising damage to surrounding areas. The unit supports sign manufacturers who install signs in a range of indoor and outdoor settings.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - must safely prepare the following surfaces each measuring at least one square metre, in readiness for application of signs: brick wall; gyprock wall; metal; plastic. In doing the above work, the person must: - use appropriate sanding and cleaning techniques for each surface; - select, prepare and apply correct undercoat and primer for a painted surface; - apply paint using each of following application methods: brush paint; roll paint; spray paint, and; - identify and rectify defects in paint application. Students will also be expected to demonstrate the following knowledge: - range of coating types and their characteristics; - range of undercoats and primers and their application to different surfaces; - purpose and application of the following when preparing surfaces for signs: manufacturer specifications relating to paint and other products used in surface preparation; safety data sheets (SDS); safe work method statements (SWMS); - safety and environmental legislation, regulations and codes of practice applicable to working with paint and other products used in surface preparation, and; - statutory and regulatory authority requirements.

CPCCSG3017 Erect and install signs

Locations:Sunshine.

Prerequisites:Nil.

Description:This unit of competency specifies the outcomes required to erect and install signs to surfaces and structures, safely and according to client requirements. The unit supports installers of signs working in a range of settings who must ensure

appropriate permits are in place prior to erecting a sign, that the surface is suitable for installing the sign, and that appropriate fasteners and fixings have been selected for the task.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - must erect and install two signs as follows: - one sign must measure at least 1200 x 2400 mm, be constructed of aluminium no more than 5 mm thick, and be fixed using appropriate fixings and fastenings to one of the following surfaces: acrylic; glass; masonry; metal; plasterboard; plastic; timber, and; - one sign must measure at least 1200 x 2400 mm, be constructed of aluminium no more than 5 mm thick, and be positioned as a freestanding sign to two aluminium posts or poles measuring no less than 90 x 90 mm. In doing the above work, the person must: - check and confirm the need for planning permissions to install the signs in specified location; - check and confirm the site for services and assets below ground; - assess the sign installation requirements relevant to the work site, identifying potential risks and hazards and demonstrating measures to mitigate potential work site risks and hazards; - ensure the structural integrity of the supporting background, including taking steps to ensure reinforcement is arranged if required; - follow safety procedures when erecting and installing above signs; - identify and select methods for erecting and installing above signs, including selecting tools, fasteners and fixings giving consideration to the characteristics of the signs, and; - prepare the work site for installation and install the signs according to job requirements. Students will also be expected to demonstrate the following knowledge: - purpose and application of the following when erecting and installing signs: safety data sheets (SDS); safe work method statements (SWMS); - effect of mechanical and chemical fixings and fastenings used to install signs on different surfaces; - load bearing specifications for a range of fastener and fixing measurements and calculations relating to material quantities; - relevant Australian and New Zealand standards in relation to the installation of signs; - statutory and regulatory authority requirements; - types and uses of tools and equipment used for installing signs, and; - processes and practices for working safely around power sources, services and assets.

CPCCSH2003A Apply and install sealant and sealant devices

Locations:Sunshine.

Prerequisites:CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description:This unit specifies the outcomes required to apply sealants and sealant devices to structures.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - ability to recognise procedures, respond to change and contribute to workplace responsibilities, such as

current work site environmental sustainability frameworks or management systems; - communication skills to: enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand and follow instructions; - use and interpret non-verbal communication; - use language and concepts appropriate to cultural differences; - innovation skills to select appropriate tools and equipment, respond to workplace challenges and put ideas into action; - numeracy skills to apply measurements and calculations relevant to surface areas; - problem solving skills to recognise and take action to rectify minor faults and problems, and; - teamwork skills to be able to work with others to action tasks and relate to people from a range of cultural, social, ethnic backgrounds and with varying physical and mental abilities. Students will also be expected to demonstrate the following knowledge: - AS1940 The storage and handling of flammable combustible liquids; - behaviour of sealant materials used in structures; - job safety analysis (JSA) and safe work method statements; - measurement and calculation techniques relevant to surface areas; - safe materials handling techniques and requirements, including hazardous materials relevant to sealant application work; - safe use of scaffolding and working platforms; - types and performance of sealants used in buildings; - types and use of hand tools and equipment relevant to sealant application and installation work, and; - workplace and equipment safety requirements.

CPCSSH3001A Set out and assemble cabinets, showcases, wall units, counters and workstations

Locations: Industry, Sunshine.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit specifies the outcomes required to set out component parts and assemble and fit them to complete the construction of a fitment.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - ability to recognise procedures, respond to change and contribute to workplace responsibilities, such as current work site environmental or sustainability frameworks or management systems; - communication skills to: enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; follow instructions; - read and interpret drawings and specifications; - use and interpret non-verbal communication; - use language and concepts appropriate to cultural differences; - innovation skills to select appropriate tools and equipment, respond to workplace challenges and put ideas into action; - numeracy skills to apply measurements and calculations; - planning and organisational skills to identify requirements, apply relevant resources and sequence tasks; - problem solving skills to recognise and take action to rectify minor faults and problems, and; - teamwork skills to be able to work with others to action tasks and relate to people from a range of cultural, social, ethnic backgrounds and with varying physical and mental abilities. Students will also be expected to demonstrate the following knowledge: - types of fitments; - adhesives, fixings and fasteners relevant to fitment construction; - clearances associated with types of finishes to surfaces; - organisation's quality assurance requirements; - drawings and specifications; - handling of materials

relevant to fitment construction; - manufacturing processes for fitment components; - materials and their characteristics relevant to fitment construction; - measurement and marking related to making set-out for fitments; - methods of constructing fitments; - setting out, assembling and fixing procedures for fitment construction; - use of tools and equipment relevant to setting out materials, manufacturing and assembling processes for fitments, and; - workplace and safety requirements.

CPCSSH3005A Apply and trim decorative finishes

Locations: Sunshine.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit specifies the outcomes required to prepare and apply decorative and ornamental edgings and add-ons as finishes to specified designs.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - ability to recognise procedures, respond to change and contribute to workplace responsibilities, such as current work site environmental or sustainability frameworks or management systems; - communication skills to: enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand and follow instructions; - read and interpret drawings and specifications; - use and interpret non-verbal communication; - use language and concepts appropriate to cultural differences; - innovation skills to select appropriate tools and equipment, respond to workplace challenges and put ideas into action; - numeracy skills to apply measurements and calculations; - problem solving skills to recognise and take action to rectify minor faults and problems, and; - teamwork skills to be able to work with others to action tasks and relate to people from a range of cultural, social, ethnic backgrounds and with varying physical and mental abilities. Students will also be expected to demonstrate the following knowledge: - commonly used decorative and ornamental finishes; - fixings and fasteners relevant to affixing decorative edgings and add-ons; - interpretation of drawings and specifications; - job safety analysis (JSA) and safe work method statements; - materials and their characteristics relevant to decorative edgings and add-ons; - measuring and setting out related to decorative finishes; - organisation's quality assurance requirements, and; - workplace and environment safety requirements.

CPCSSH3006A Apply finishes

Locations: Industry, Sunshine.

Prerequisites: Nil.

Description: This unit specifies the outcomes required to prepare and apply types of finishing materials to surfaces.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be

expected to demonstrate the following required skills: - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; - follow instructions; - use and interpret non-verbal communication; - use language and concepts appropriate to cultural differences; - recognise procedures, respond to change and contribute to workplace responsibilities, such as current work site environmental or sustainability frameworks or management systems; - select appropriate tools and equipment, respond to workplace challenges and put ideas into action; - literacy skills to read and interpret drawings, specifications and relevant Australian standards; - numeracy skills to calculate material requirements; - planning and organising skills to identify requirements, apply relevant resources and sequence tasks; - problem-solving skills to recognise and take action to rectify minor faults and problems, and; - teamwork skills to be able to work with others to action tasks and relate to people from a range of cultural, social, ethnic backgrounds and with varying physical and mental abilities. Students will also be expected to demonstrate the following knowledge: - interpretation of construction specifications; - job safety analysis (JSA) and safe work method statements; - organisation's quality assurance requirements; - surface preparation relevant to material surfaces and applied finishes; - types and performance of finished surfaces; - types and uses of finishing materials; - types of applicators and equipment relevant to applying finishing materials; - types of hazardous materials and safe handling requirements; - types of material substrates and surfaces, and; - workplace and equipment safety requirements.

CPCCWC3003A Install dry wall passive fire-rated systems

Locations: Industry, Werribee, Sunshine, Learning Links Geelong.

Prerequisites: CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to select and install dry wall fire-rated systems to walls and ceilings. It includes planning and preparation for installation; installation of approved systems for timber stud walls, steel stud partitions, shaft walls, timber joist and suspended ceilings; and completion of post-installation activities.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: follow instructions; - read and interpret: documentation from a variety of sources; drawings and specifications; - recognise procedures; - report faults; - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - written skills to record results of checks and tests and relevant work completion procedures; - evaluate own actions and make judgments about performance and necessary improvements; - identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials; - organisational skills, including the ability to plan and set out work; - respond to change and contribute to workplace responsibilities, such as current work site environmental and sustainability frameworks and management systems; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - use a range of

mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - basic combustion theory; - dry wall passive fire-rated T-systems installation techniques and processes; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS); - materials storage and environmentally friendly waste management; - plans, drawings and specifications; - processes for the calculation of material requirements; - quality requirements; - range of materials commonly used in the installation of dry wall passive fire-rated systems; - regulations and building codes related to dry wall passive fire-rated systems; - tools and equipment used in the installation of dry wall passive fire-rated systems; - types and specifications for dry wall passive fire-rated systems related to steel stud and timber stud walls, shaft walls, timber joists and suspended ceilings; - wall and ceiling terminology, and; - workplace and equipment safety requirements.

CPCCWHS1001 Prepare to work safely in the construction industry

Locations: Industry, Werribee, Sunshine, Learning Links Geelong..

Prerequisites: Nil.

Description: This unit of competency specifies the mandatory work health and safety training required prior to undertaking construction work. The unit requires the person to demonstrate personal awareness and knowledge of health and safety legislative requirements in order to work safely and prevent injury or harm to self and others. It covers identifying and orally reporting common construction hazards, understanding basic risk control measures, and identifying procedures for responding to potential incidents and emergencies. It also covers correctly selecting and fitting common personal protective equipment (PPE) used for construction work.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - identify and orally report two construction hazards; - orally explain how risk could be reduced or removed in relation to those two hazards; - select appropriate personal protective equipment (PPE) to control the risk; - orally explain basic procedures for responding to incidents and emergencies, including types and purpose of the following fire safety equipment: fire blankets; fire extinguishers, including water, carbon dioxide, powder and foam, and; hose reels and mains; - identify and orally explain the meaning of required safety signs and symbols; - orally explain the purpose of job safety analyses (JSAs), safe work method statements (SWMS) and safety data sheets (SDS), and; - orally explain the roles of the following designated health and safety personnel: first aid officers; work health and safety representatives; work health and safety committee members; supervisors. The person must also demonstrate correctly fitting to themselves the PPE listed below: - eye protection; - hearing protection; - hard hat, and; - high visibility retro reflective vest. Students will also be expected to demonstrate the following knowledge: - basic duty of care, and the roles, rights and responsibilities of business owners and workers in relation to working safely while undertaking construction work; - basic meaning of the terms 'hazard' and 'risk'; - basic principles of risk management; - basic procedures for accessing first aid; - construction hazards; - construction work that requires a high risk work licence; - types, purpose and use of PPE used in construction, as specified in the performance evidence, and including safety footwear, harnesses and respiratory protection, and

ultraviolet (UV) protective clothing and sunscreen; - construction emergencies; - construction incidents; - safe work practices that should be followed in construction work, and; - meanings and symbols associated with construction safety signs, symbols and tags.

CPCWHS3001 Identify construction work hazards and select risk control strategies

Locations:Sunshine.

Prerequisites:Nil.

Description:This unit of competency specifies the outcomes required to participate in preparing a job safety analysis (JSA) for general hazards, or a safe work method statement (SWMS) for high risk work hazards, on construction sites according to the level of responsibility of the work role as specified in work health and safety (WHS) legislation. The unit supports construction workers undertaking work on a construction site alone or as part of a team to identify hazards and select risk control strategies. It applies to construction work on residential and commercial work sites in new construction, renovation or refurbishment, and maintenance projects.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. The person must also: - develop a new job safety analysis (JSA) for general hazards in consultation with relevant company personnel for two different job tasks on two different work sites; - revise one of the JSA prior to starting work, identifying changed conditions and where appropriate, amending the JSA to reflect changed hazards and risk control strategies; - develop a new safe work method statement (SWMS) for high-risk work in consultation with relevant company personnel for two different job tasks on two different work sites, and; - revise one of the SWMS prior to starting work, identifying changed conditions and where appropriate, amending the SWMS to reflect changed hazards and risk control strategies. In doing the above work, the person must: - inspect the work sites to identify potential hazards associated with work site and tasks; - identify and review compliance with requirements relating to each work site and potential task-related hazards; - consult with relevant personnel to select risk control strategies for both general hazards and high-risk work, and; - document and store the above JSA and SWMS according to workplace requirements. Students will also be expected to demonstrate the following knowledge: - common hazards and causes of incidents and near misses on construction sites; - compliance requirements in relation to identified job tasks and work sites; - construction hand and power tools, and equipment and plant relevant to the identified job tasks, and requirements for their safe handling and operation; - format and content requirements for JSA and SWMS; - principles of the hierarchy of controls; - purpose and application of safety data sheets (SDS) when working with different materials; - risk management strategies relevant to identified job tasks specified in the performance evidence; - types of construction methods and materials used in both general hazards and high-risk construction work and risk factors inherent in their use and application; - use and application of the Safe Work Australia Model Code of Practice - Construction Work when identifying construction site hazards and selecting risk control strategies, and; - use and meaning

of construction terminology used on construction work sites relevant to identifying site hazards and selecting suitable risk control strategies.

CPCWP2001A Handle waterproofing materials

Locations:Werribee, Sunshine.

Prerequisites:CPCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description:This unit of competency specifies the outcomes required to safely handle waterproofing materials manually and mechanically, including their storage requirements. It includes the preparation, handling, sorting, stacking and disposal of waterproofing products, materials and components in the application of waterproofing systems, including the disposal of waste.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment:Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: follow instructions; - read and interpret: documentation from a variety of sources; drawings and specifications; - recognise procedures; - report faults; - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - written skills to record results of checks and tests and relevant work completion procedures; - evaluate own actions and make judgments about performance and necessary improvements; - identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials; - organisational skills, including the ability to plan and set out work; - respond to change and contribute to workplace responsibilities, such as current work site environmental and sustainability frameworks and management systems; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - technological skills to: use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - communication processes - verbal and signalling; - general construction terminology; - job safety analysis (JSA) and safe work method statements; - MSDS and hazards associated with waterproofing materials; - materials storage and environmentally friendly waste management; - measurement and calculation; - plans, drawings and specifications; - processes for the calculation of material requirements; - quality requirements; - techniques of handling waterproofing materials; - waterproofing materials associated with application systems, and; - workplace and equipment safety requirements.

CPCWP2002A Use waterproofing tools and equipment

Locations:Werribee, Sunshine.

Prerequisites:CPCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description:This unit of competency specifies the outcomes required to safely and effectively use tools and equipment used in waterproofing. It includes identification, selection and use of hand and power tools, plant and equipment used in masonry work.

Required Reading:The qualified trainer and assessor will provide teaching and

learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills to: follow instructions; - read and interpret documentation from a variety of sources; drawings and specifications; - recognise procedures; - report faults; - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand; - use language and concepts appropriate to cultural differences; - use and interpret non-verbal communication, such as hand signals; - written skills to record results of checks and tests and relevant work completion procedures; - evaluate own actions and make judgments about performance and necessary improvements; - identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials; - organisational skills, including the ability to plan and set out work; - respond to change and contribute to workplace responsibilities, such as current work site environmental and sustainability frameworks and management systems; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities, and; - technological skills to: use a range of mobile technology, such as two-way radio and mobile phones; voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - applications, limitations and method of operation and maintenance of hand and power tools, plant and equipment applicable to waterproofing tasks; - communication processes - verbal and signalling; - general construction terminology; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS) and hazards associated with the use of waterproofing tools, plant and equipment; - materials storage and environmentally friendly waste management; - measurement and calculation; - plans, drawings and specifications; - quality requirements, and; - workplace and equipment safety requirements.

CPCWP2003A Prepare for construction waterproofing process

Locations: Werribee, Sunshine.

Prerequisites: CPCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to apply waterproofing to differing types of wet areas in varying building situations. It includes identification of the processes required and planning and preparation of materials for application.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills; - evaluate own actions and make judgments about performance and necessary improvements; - identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials; - organisational skills, including the ability to

plan and set out work; - respond to change and contribute to workplace responsibilities, such as current work site environmental and sustainability frameworks and management systems; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities; - use a range of mobile technology, such as two-way radio and mobile phones, and; - voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - building structures and work scheduling; - characteristics and applications of waterproofing materials and adhesives; - construction systems and waterproofing considerations and requirements; - general construction terminology; - job safety analysis (JSA) and safe work method statements; - material safety data sheets (MSDS) and the handling of hazardous materials; - materials storage and environmentally friendly waste management; - plans, drawings and specifications; - plant, tools and equipment types, characteristics, uses and limitations; - preparation for waterproofing processes and waterproofing techniques; - principles and considerations of water exclusion; - processes for the calculation of material requirements; - quality requirements; - waterproofing process materials, including durability, compatibility, applications and protection requirements, and; - workplace and equipment safety requirements.

CPCWP2004A Prepare surfaces for waterproofing application

Locations: Werribee, Sunshine.

Prerequisites: CPCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description: This unit of competency specifies the outcomes required to repair and prepare different material surfaces that form part of the application of waterproofing within the construction process. It includes the inspection, preparation for, and repair and finishing of surfaces prior to the application of the waterproofing process.

Required Reading: The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.

Assessment: Assessment tasks will be designed to reinforce and extend knowledge and skill competence within set and controlled parameters in accordance with each unit's learning outcomes and performance criteria requirements, including the setting of work based practical application tasks designed to provide evidence of competence outcomes, within periodic and scheduled timelines. Students will be expected to demonstrate the following required skills: - communication skills; - evaluate own actions and make judgments about performance and necessary improvements; - identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials; - organisational skills, including the ability to plan and set out work; - respond to change and contribute to workplace responsibilities, such as current work site environmental and sustainability frameworks and management systems; - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities; - use a range of mobile technology, such as two-way radio and mobile phones, and; - voice and hand signals to access and understand site-specific instructions. Students will also be expected to demonstrate the following knowledge: - building structures and work scheduling; - characteristics, compatibility and applications of waterproofing materials and adhesives; - construction systems and waterproofing considerations and requirements; - contaminants in waterproofing processes; - flashing and termination detailing; - general construction terminology; - job safety analysis (JSA) and safe work method statements; - levels and falls; - material safety data sheets (MSDS) and the handling of hazardous materials; - materials handling, storage and

environmentally friendly waste management; - plans, drawings and specifications; - plant, tools and equipment types, characteristics, uses and limitations; - preparation surfaces for waterproofing application techniques; - principles and considerations of water exclusion; - processes for the calculation of material requirements; - quality requirements; - waterproofing process materials, including durability, compatibility, applications and protection requirements, and; - workplace and equipment safety requirements. .

CPCCWP3001A Apply waterproofing process to below ground level wet areas

Locations:Werribee, Sunshine.

Prerequisites:CPCCOHS2001A - Apply OHS requirements, policies and procedures in the construction industry

Description:This unit of competency specifies the outcomes required to apply waterproofing practices and principles to wet areas below ground level. It includes identification of the waterproofing system to be used, its preparation and its application.

Required Reading:The qualified trainer and assessor will provide teaching and learning materials as required in the form of workbooks produced by the Polytechnic and/or via the Polytechnic e-learning system.
